

Protection for your laptop.
Peace of mind for you.

In this day and age, data security, theft protection and regulatory compliance are critical.

HP is a preferred provider of Absolute® Software's Computrace® solutions that help organizations address issues of data protection, computer theft and regulatory compliance by allowing them to efficiently monitor use, recover stolen or missing machines, and remotely delete data, if necessary.

Embedded in the BIOS firmware of all new HP Business Series notebooks and tablet PCs*, Computrace gives you the added value of proactively enforcing computer data security policies across the entire organization, increasing both end-user and administrator productivity. Because Computrace is already present, there's no need to purchase additional software or perform installations - it can even survive operating system re-installations, hard drive reformatting and hard drive replacements.

Absolute Software's Computrace products are designed to reduce regulatory compliance risks and improve security policies to ensure all your organization's remote and mobile computers are easily locatable through one system.

*New notebook and tablet PC models are added on a regular basis; please visit www.absolute.com/HP for a complete list of BIOS enabled models.

Computrace products provide:

- **Computer Theft Recovery:** The Absolute Recovery Team has the ability to track and recover stolen computers even when the hard drive has been replaced or tampered with, providing the highest level of security against computer theft. This feature can help deter theft, minimize computer drift and recover stolen computers.
- **Data Protection:** Computrace provides the ability to remotely delete data on stolen computers to prevent private and confidential information from ending up in the wrong hands. This feature can help customers meet strict regulatory requirements to protect sensitive data.
- **Secure Asset Tracking™:** Computrace can provide IT staff with 100% visibility of their client computer assets. This feature helps simplify the management of software licenses, computer leases, machine configuration, computer retirement, upgrades and device ownership to help prevent uncontrolled loss.

Ensure your HP computer and the information it contains is compliant, secure and trackable with Absolute Software's Computrace solutions.

Choose the level of protection that's right for you.

Product	Theft Recovery	Data Protection	Secure Asset Tracking	Recovery Guarantee
