## HP Color LaserJet CP1510 series vs Samsung CLP-315 printers (After printing 1,000 pages ...)

**HP CLJ CP1510 output**

**Samsung CLP-315 output**

The HP Color LaserJet CP1510 Series printers include **multiple technologies** to deliver consistent, high quality output over time including integrated toner cartridges, contact development, closed-loop color calibration, advanced halftoning and trapping, sRGB color tables, instant-on fusing technology, environmental sensors and accurate toner level sensing with reliable physical sensors. Based on testing results, the Samsung CLP-315 printer produces unusable output in many scenarios due to **the lack of** color calibration and environmental sensors as well as unreliable toner low sensing, and Samsung print quality is degraded due to the use of jump-gap development.
