

HP LaserJet P1005 vs. Konica-Minolta PagePro 1400W

Print sooner from powersave mode

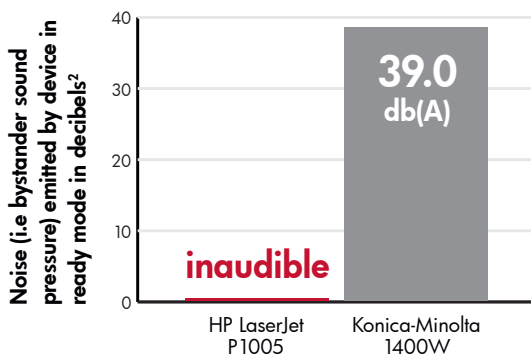

Faster on-demand printing — Instant-on Technology enables your HP LaserJet P1005 to print up to 4 pages from powersave mode before the Konica-Minolta PagePro 1400W can even finish warming up. This advantage is especially noteworthy when you consider that most printers are usually in sleep mode when a user submits a job for printing, according to research conducted by InfoTrends.

Virtually maintenance free — Your HP LaserJet P1005 employs an innovative print cartridge that incorporates the toner supply, imaging drum, primary charge roller, and developer into one single, integrated unit you can easily replace with no mess. The Konica-Minolta PagePro 1400W uses a complex 2-piece system that forces users to stock and replace an extra consumable.

Fast sustained performance — Your HP LaserJet P1005 has a faster processor (266 MHz vs. the Konica-Minolta PagePro 1400W's 48-MHz chip).

Less noise in Ready mode

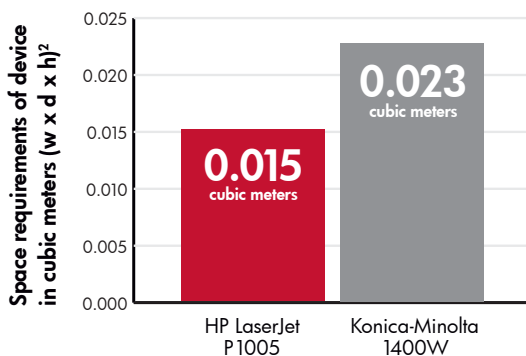

Energy efficient — The advanced, fast-heating ceramic element within your HP LaserJet P1005's Instant-on Fuser consumes 65% less energy while printing than the conventional fuser Konica-Minolta builds into the PagePro 1400W (315 watts maximum while printing vs. 900 watts maximum, respectively). Your HP LaserJet also meets the new, more strict ENERGY STAR[®] rules that went into effect April 1, 2007.

Mac support — Your HP LaserJet P1005 supports Mac OS X (v.10.28, v.10.3, and v.10.4 or higher) and UNIX. The Konica-Minolta PagePro 1400W does not.

Less conspicuous — Your HP LaserJet P1005 is 34% smaller than the Konica-Minolta PagePro 1400W. Plus the HP device is inaudible in Ready mode, whereas the Konica Minolta unit emits up to 39 decibels.

Use 34% less space

1. Based on internal HP testing.

2. Based on the manufacturers' published product specifications.
