Glossary
Index
Congratulations on your purchase of an HP LaserJet 5100 series printer. If you have not done so, see the start guide provided with the printer for setup instructions.

Now that the printer is set up and ready to use, take a few moments to get to know the printer. This chapter introduces the following:

• Features and benefits of the printer.

• Important printer parts and locations.

• Accessories and supplies available for the printer.

• The layout and basic operation of the printer’s control panel.

• Helpful printer software for increased printing flexibility.
Printer Features and Benefits

Many of the printer’s features and benefits are outlined below. Specific chapters contain more information on each feature. See this guide’s index or contents to locate this information.

Wide Format Printing

*Increased capability from your laser printer:*

- Prints on paper sizes up to 312 x 470 mm (12.28 x 18.5 inches).
- Prints full bleed images (up to A3 size and 279 x 432 mm [11 x 17 inches]) by printing images on larger paper that can be trimmed to the edges.

High Print Quality

*Professional results that meet the demands of complex documents:*

- ProRes 1200 (true 1200 dpi) for highest quality graphics printing.
- FastRes 1200 for fast, high-quality image printing.
- HP UltraPrecise toner for high quality print.

High Performance

*Faster printing for improved productivity:*

- Prints 22 pages per minute (A4) or 21 pages per minute (Letter).
- 300 MHz RISC microprocessor.
- Prints the first page in less than 13 seconds.

Connectivity/Ease of Use

*Easy to use and administer in a shared environment:*

- Available HP JetDirect print server EIO cards with support for all leading network operating systems.
- Helpful printer software provided on a compact disc.
Expandability

*Ability to grow with the printing needs of workgroups:*

- 3 built-in DIMM slots for memory expansion.
- Available flash and memory DIMM cards.
- 2 EIO interface slots.
- Available hard drive EIO card for storage of additional fonts and forms.

Paper Handling

*Versatile to meet a combination of user needs:*

- 100 sheet multi-purpose tray.
- 250 sheet paper tray.
- 500 sheet universal paper feeder (standard on the HP LaserJet 5100tn and 5100dtn models).
- Up to 4 paper trays possible.
- Optional duplex printing accessory for two-sided printing (standard on the HP LaserJet 5100dtn model).

Best Value

*Providing industry-leading value to customers:*

- PostScript™ 3 emulation standard.
- 10,000 page print cartridge.

Euro Character

*Equipping customers for a changing world market:*

- This printer is currently enabled to print the all-new euro character. HP is committed to maximizing document portability through supporting and promoting euro symbol standards.
- To learn more about printing the euro character, visit HP’s LaserJet euro website at http://www.hp.com/go/laserjeteuro.
Environmental Features

- EconoMode uses approximately 50% less toner, which extends the life of the print cartridge (HP does not recommend full-time use of EconoMode)
- PowerSave setting saves energy (meets ENERGY STAR guidelines)
Congratulations on your purchase of the HP LaserJet 5100 series printer! This printer is available in three configurations, as described below.

**HP LaserJet 5100 printer**

The HP LaserJet 5100 printer (product number: Q1860A) is a 22 pages per minute (ppm) laser printer that comes standard with a 100-sheet multi-purpose Tray 1, a 250-sheet Tray 2, and 16 MB of memory. It is designed for workgroups and can print on paper sizes up to A3 and 11 x 17 (279 x 432 mm).

**HP LaserJet 5100tn printer**

The HP LaserJet 5100tn printer (product number: Q1861A) is a 22 ppm laser printer that comes standard with a 100-sheet multi-purpose Tray 1, a 250-sheet Tray 2, a 500-sheet Tray 3, 32 MB of memory, and an HP Jetdirect print server for connecting to a fast Ethernet (10/100Base-TX) network. It is designed for network users and can print on paper sizes up to A3 and 11 x 17 (279 x 432 mm).

**HP LaserJet 5100dtn printer**

The HP LaserJet 5100dtn printer (product number: Q1862A) is a 22 ppm laser printer that comes standard with a 100-sheet multi-purpose Tray 1, a 250-sheet Tray 2, a 500-sheet Tray 3, 32 MB of memory, an HP Jetdirect print server for connecting to a fast Ethernet (10/100Base-TX) network, an embedded Web server DIMM for remote printer management, and a duplex (two-sided) printing accessory. The printer is designed for network users and can print on paper sizes up to A3 and 11 x 17 (279 x 432 mm).

The illustrations in this guide will be based on the HP LaserJet 5100 printer unless otherwise stated.
A variety of configurations are possible with the optional trays:

Figure 1  Optional Tray Configurations

Note  A duplexer can be added to any of these configurations and is placed under Tray 2.
Printer Parts and Locations

- Control panel and display
- Top output bin
- Paper stop
- Top cover
- Product and serial numbers (located on the underside of the top cover)
- Tray 1 (100-sheet)
- Paper level indicator
- Tray 2 (250-sheet)
- Paper size indicator (set with dial inside tray)
- Power switch
- Power connector
- Latches (to open rear door)
- Rear door (paper jam access)
- Rear output bin (straight-through paper path)
- Network, I/O, or optional hard disk (EIO slots)
- Parallel interface connector

Figure 2 Printer Parts (front and rear views)
Accessories and Supplies

You can increase the capabilities of the printer with optional accessories and supplies.

**Note**

Use accessories and supplies specifically designed for the printer to ensure optimum performance.

The printer supports two enhanced input/output (EIO) cards. Other accessories and options are available. For ordering information, see the following page.

**Suggested Accessories**

- HP JetDirect print server EIO card
- Optional hard disk EIO card
- Memory or Flash DIMM
- Duplex Printing Accessory (or duplexer, for 2-sided printing)
- 250-sheet feeder and tray
- 500-sheet feeder and tray

*Figure 3  Optional Accessories*
Ordering Information

Use only accessories specifically designed for this printer. To order an accessory, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)

12 Chapter 1: Printer Basics
**Control Panel Keys**

<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
</table>
| [Go]     | • Places the printer either online or offline.  
                      • Prints any data residing in the printer's buffer.  
                      • Allows the printer to resume printing after being offline. Clears most printer messages and places the printer online.  
                      • Allows the printer to continue printing with an error message such as **TRAY x LOAD [TYPE] [SIZE]** or **UNEXPECTED PAPER SIZE**.  
                      • Confirms a manual feed request if Tray 1 is loaded and **TRAY 1 MODE=CASSETTE** has been set from the Paper Handling Menu in the printer's control panel.  
                      • Overrides a manual feed request from Tray 1 by selecting paper from the next available tray.  
                      • Exits the control panel menus. (To save a selected control panel setting, first press [Select].)                                                                                       |
| [Cancel Job] | Cancels the print job that the printer is processing. The time it takes to cancel depends on the size of the print job. (Press it only once.)                                                                 |
| [Menu]   | Cycles through the control panel menus. Press the right end of the button to move forward or the left end of the button to move backward.                                                                 |
| [Item]   | Cycles through the selected menu's items. Press the right end of the button to move forward or the left end of the button to move backward.                                                                 |
| [- Value +] | Cycles through the selected menu item's values. Press [+ ] to move forward or [-] to move backward.                                                                                                      |
| [Select] | • Saves the selected value for that item. An asterisk (*) appears next to the selection, indicating that it is the new default. Default settings remain when the printer is switched off or reset (unless you reset all factory defaults from the Resets Menu).  
                      • Prints one of the printer information pages from the control panel.                                                                                                                                 |

**ENWW**

Chapter 1: Printer Basics 13
Control Panel Menus

For a complete list of control panel items and possible values, see page B-1.

Press [Menu] for access to all control panel menus. When additional trays or other accessories are installed in the printer, new menu items automatically appear.

To change a control panel setting:

1 Press [Menu] until the desired menu appears.
2 Press [Item] until the desired item appears.
3 Press [- Value +] until the desired setting appears.
4 Press [Select] to save the selection. An asterisk (*) appears next to the selection in the display, indicating that it is now the default.
5 Press [Go] to exit the menu.

Note

Settings in the printer driver and software application override control panel settings. (Software application settings override printer driver settings.)

If you cannot access a menu or item, it is either not an option for the printer, or your network administrator has locked the function. (The control panel reads ACCESS DENIED MENUS LOCKED.) See your network administrator.

To print a control panel menu map:

To see the current settings for all of the menus and items available in the control panel, print a control panel menu map.

1 Press [Menu] until INFORMATION MENU appears.
2 Press [Item] until PRINT MENU MAP appears.
3 Press [Select] to print the menu map.

You might want to store the menu map near the printer for reference. The content of the menu map varies, depending on the options currently installed in the printer.
Configure the control panel display language (Optional)

By default, the control panel on the printer displays messages in English. If necessary, set the printer to display messages and print configuration pages in another supported language.

1. Turn the printer off.
2. Hold down [Select] while turning on the printer.
3. When SELECT LANGUAGE appears in the LED display, release [Select].
4. After the printer has finished initializing, LANGUAGE = ENGLISH will appear in the LED display.
5. When LANGUAGE = ENGLISH appears in the display, press [- VALUE +] to scroll through the available languages.
6. Press [Select] to save the desired language as the new default.
7. Press [Go] to return to READY.
8. To activate your new language choice, turn the printer off and then turn the printer on.
9. The LED display text should now appear in the selected language.

Note

For Japanese, Turkish, Czech, Russian, Hungarian, and Polish, language selection will change the default symbol set for the specific language. For all other languages, the default symbol set is PC-8.
Printer Software

The printer comes with helpful software on a compact disc. See the start guide for installation instructions.

**Note** Check the ReadMe file provided on the compact disc for additional software included and supported languages.

Figure 5  Printer Software

The printer drivers provided on the compact disc must be installed to take full advantage of the printer’s features. The other software programs are recommended, but are not required for operation. See the ReadMe file for more information.

The most recent drivers, additional drivers, and other software are available from the Internet. Depending on the configuration of Windows-driven computers, the installation program for the printer software automatically checks the computer for Internet access to obtain the latest software. If you do not have access to the Internet, see the telephone support flyer included with the printer to obtain the most recent software.
Printer Drivers

Printer drivers access the printer features and allow the computer to communicate with the printer (via a printer language).

Note

Check the ReadMe file provided on the compact disc for additional software included and supported languages.

Certain printer features are available only from the PCL 6 driver. See the printer software help for availability of features.

Drivers Included with the Printer

The following printer drivers are included with the printer. The most recent drivers are available on the Internet. Depending on the configuration of Windows computers, the installation program for the printer software automatically checks the computer for Internet access to obtain the latest drivers.

¹ PostScript (PS) printer driver
² Microsoft® Windows® Millennium Edition

Within the computer installation program, select **Typical Install** to install the PCL 5e, PCL 6, and PS drivers. Select **Custom Install** to install only the software you prefer, or if you are a network administrator. Select **Minimum Install** to install only the PCL 6 driver for basic printing.
Additional Drivers

You can obtain the following printer drivers by downloading them from the Internet, or by requesting them from an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)

- OS/2 PCL/PCL 6 printer driver*
- OS/2 PS printer driver*
- AutoCAD™ (Rev. 15 compatible Windows printer driver available on the compact disc. Rev. 14 printer driver available with HP LaserJet 5100 printer drivers [http://www.hp.com/lj5100]).

*The OS/2 drivers are also available from IBM, and are packaged with OS/2.

Note

If the desired printer driver is not on the compact disc or is not listed here, check the software application’s installation disks or ReadMe files to see if they include support for the printer. If not, contact the software manufacturer or distributor and request a driver for the printer.
Software for Windows

Use the **Typical Install** or **Custom Install** option to install the HP software. (This includes several printer drivers. For more information, see page 20.)

---

**Note**

Network Administrators: If the printer is attached to a network, before you can print, the printer must be configured for that network using HP Web JetAdmin or similar network software. (See the start guide.)

---

**Access the Windows Printer Driver**

To configure the driver, access it in one of the following ways:

<table>
<thead>
<tr>
<th>Operating System</th>
<th>Temporarily Change Settings (from a software application)</th>
<th>Change Default Settings (across all applications)</th>
</tr>
</thead>
<tbody>
<tr>

---

**Note**

Settings in the printer driver and software application override control panel settings. (Software application settings override printer driver settings.)
Choose the Right Driver for Your Needs

Choose a printer driver based on the way you use the printer.

- Use the PCL 6 driver to take full advantage of the printer’s features. Unless backward compatibility with previous PCL drivers or older printers is necessary, the PCL 6 driver is recommended.

- Use the PCL 5e driver if you want print results to look comparable to those from older printers. Certain features are not available in this driver. (Do not use the PCL 5e driver provided with this printer with older printers.)

- Use the PS driver for compatibility with PostScript 3 needs. Certain features are not available in this driver.

The printer automatically switches between PS and PCL printer languages.

Printer Driver Help

Each printer driver has help screens that can be activated either from the Help button, the F1 key, or a question mark symbol in the upper right corner in the printer driver (depending on the Windows operating system used). These help screens give detailed information about the specific driver. Printer driver help is separate from the software application help.
Software for Macintosh Computers

PostScript Printer Description Files (PPDs)
Mac OS 8.6 to 9.x, Mac OS X classic, and Mac OS X use PPDs. PPDs, in combination with the LaserWriter driver, access the printer features and allow the computer to communicate with the printer. An installation program for the PPDs and other software is provided on the compact disc. Use the LaserWriter printer driver that comes with the computer. (The LaserWriter driver is also available from Apple.)

Print Dialog Extensions (PDEs) (Mac OS X only)
PDEs are code plug-ins that provide access to printer features, such as number of copies, duplexing, and quality settings. An installation program for the PDEs is provided on the compact disc.

HP LaserJet Utility
HP LaserJet Utility allows control of features that are not available in the driver. The illustrated screens make selecting printer features from the Macintosh computer easier than ever. Use the HP LaserJet Utility to do the following:

- Customize the printer’s control panel messages.
- Name the printer, assign it to a zone on the network, download files and fonts, and change most of the printer settings.
- Set a password for the printer.
- From the computer, lock out functions on the printer’s control panel to prevent unauthorized access. (See the printer software help.)
HP Web Jetadmin

Download HP Web Jetadmin from the HP Web site (http://www.hp.com/cposupport/software.html). This web-based driver-administration software should be installed on a server. The following systems are supported:

- Windows 95
- Windows 98
- Windows Me
- Windows NT
- Windows 2000
- Windows XP
- HP-UX*
- OS/2*

*The software for these systems is not included on the compact disc with the printer, but is available from the Internet. If you do not have access to the Internet, see the telephone support flyer included with the printer to obtain this software.

Software for Linux

For information about Linux support for the printer, see the HP Linux support homepage: http://hp.sourceforge.net/.
Printing Tasks

Overview

This chapter presents **basic printing tasks**, such as:

- Selecting the output bin.
- Loading the trays.
- Printing on both sides of paper with the optional duplexer.
- Printing on special paper, such as letterhead and envelopes.

This chapter also introduces some **advanced printing tasks**, to help you take full advantage of the printer’s features. These tasks are “advanced” because they require you to change settings from a software application, the printer driver, or the printer’s control panel.

- The printer driver allows you to:
  - Create Quick Sets to save the printer’s setup information for different kinds of print jobs.
  - Print pages with a watermark in the background.
  - Print the first page of a document on a different kind of paper than the rest of the pages.
  - Print multiple pages on one sheet of paper.
  - Store, Quick Copy, and proof and hold print jobs. (See “Using Features in the Printer Driver” on page 53.)

- Tray 1 can be used in several different ways. See “Customizing Tray 1 Operation” on page 55.
- If you frequently use several kinds of paper or share the printer with others, print by type and size to ensure that print jobs always print on the desired paper. See “Printing by Type and Size of Paper” on page 57.
Selecting the Output Bin

The printer has two output locations: the rear output bin and the top output bin. To use the top output bin, be sure the rear output bin is closed. To use the rear output bin, open it.

The following table shows the minimum and maximum sizes of paper supported in the output bins.

<table>
<thead>
<tr>
<th>Top Output Bin</th>
<th>Rear Output Bin</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Width</strong></td>
<td><strong>Width</strong></td>
</tr>
<tr>
<td>From 3.9 to 11.7 inches wide</td>
<td>From 3 to 12.28 inches wide</td>
</tr>
<tr>
<td>(100 to 297 mm wide)</td>
<td>(76 to 312 mm wide)</td>
</tr>
<tr>
<td><strong>Length</strong></td>
<td><strong>Length</strong></td>
</tr>
<tr>
<td>From 5 to 18.5 inches long</td>
<td>From 5 to 18.5 inches long</td>
</tr>
<tr>
<td>(127 to 470 mm long)</td>
<td>(127 to 470 mm long)</td>
</tr>
</tbody>
</table>

**Guidelines**

- If paper coming out of the top output bin has problems, such as excessive curl, try printing to the rear output bin.
- To avoid paper jams, do not open or close the rear output bin while the printer is printing.
- Do not print envelopes, labels, paper wider than 11.7 inches (297 mm) wide, small custom-size paper, postcards, or light or heavy paper to the top output bin.
- For printing stacks of large paper only, the paper stop on the top output bin prevents long paper from being pushed over the edge of the printer.
Printing to the Top Output Bin

The top output bin collects paper face-down, in correct order. The top output bin should be used for most print jobs and is recommended for printing the following:

- over 50 sheets of paper, continuously
- transparencies

Figure 6   Top Output Bin
Printing to the Rear Output Bin

The printer always prints to the rear output bin if it is open. Paper comes out of the printer face-up, with the last page on top.

To open the rear output bin, grasp the handle at the top of the bin and pull the bin down. Slide out the first extension, then flip open the second extension if necessary.

Printing from Tray 1 to the rear output bin provides the straightest paper path. Opening the rear output bin might improve output quality with the following:

- envelopes
- labels
- paper wider than 11.7 inches (297 mm) or less than 3.9 inches (100 mm) wide
- small custom-size paper
- postcards
- paper lighter than 16 lb (60 g/m²) or heavier than 28 lb (105 g/m²)

Note
Opening the rear output bin disables the optional duplexer (if installed) and the top output bin.
Adjust the Paper Stop

For printing stacks of large paper only, the paper stop on the top output bin prevents long paper from being pushed over the edge of the printer.

1. Push in the center of the paper stop to release it.
2. Pull the paper stop out until it stops.
3. Flip up the end section.
4. Adjust the paper stop to the desired size.
Note
To avoid paper jams, do not load trays while the printer is printing.

Tray 1 is a multi-purpose tray that holds a variety of paper, including up to 100 sheets of paper, 10 envelopes, or 20 index cards. The printer might pull paper from Tray 1 first. To change this, see page 55. For supported sizes of paper, see page A-4.

1 Open Tray 1 and pull out the tray extension.

2 If the paper being loaded is longer than 9 in (229 mm), flip open the second tray extension.

3 Set the side guides to the desired size.

4 Load Tray 1. Paper should fit under the arrows and tabs on the guides. For correct orientation, see page 39.

- For example, load letter, A4, A5, Executive, and B5 size paper with the long edge toward the printer.

- Load other sizes of paper with the short edge toward the printer.

5 Make sure the guides touch the edges of the paper without bending it.
The following instructions are for loading Tray 2 or an optional 250-sheet paper tray. For supported sizes of paper, see page A-5.

**Note**
To avoid paper jams, do not load trays while the printer is printing.

1 Pull the tray completely out of the printer. Lift the tray cover.

2 Rotate the dial in the tray so the printer will read the correct size of paper. The toggle switch accesses more sizes. An error might occur if the dial is not set properly.

**Note**
Setting the dial adjusts the printer’s sensors. It does not adjust the guides inside the tray.

3 Make sure the paper size setting matches the size of paper loaded, or the printer might jam or other errors might occur.

4 Tilt the blue rear guide toward the front of the tray to detach it.

**Continued on the next page.**
5 Align the rear guide with the desired paper size. With the guide angled slightly toward the front of the tray, insert the two front tabs (A) into the appropriate holes. Push the guide upright, snapping the center tab (B) into place.

The guide must always be placed correctly in the tray (even for 11 x 17 or A3 paper).

6 Adjust the side guides to the proper size.

7 Load the tray. For correct orientation, see page 39.

8 Make sure the paper is flat in the tray at all four corners and below the tabs on the guides.

9 Close the tray cover. Slide the tray back into the printer.

**Note**
If you want to print by type and size of paper from the printer driver, configure the tray settings in the printer's control panel to match the type of paper loaded in each tray (page 57).
Loading the 500-Sheet Tray (Optional)

The following instructions are for loading standard sizes in a 500-sheet tray (optional). For supported sizes of paper, see page A-6. To load custom-sizes, see page 47.

Note
To avoid paper jams, do not load trays while the printer is printing.

1 Pull the tray completely out of the printer and place it on a flat surface.

2 Squeeze the release on the back of the rear paper guide. Slide the guide to the desired paper size.

3 Squeeze the release on the outside of the left guide and adjust the left and right guides to match the width of the paper. The guides should touch the paper without bending it.

4 Load the tray. For correct orientation, see page 39.

5 Make sure the paper is flat in the tray at all four corners and below the tabs on the guides.

Continued on the next page.
6a When loading a full stack of media, continue to step 6B. Otherwise, proceed to step 7.

6b Align the tension lever up or down to match the symbol displayed in the tension indicator window.

7 To prevent jams, rotate the dial in the tray so the printer will read the correct size of paper. The toggle switch accesses more sizes. An error might occur if the dial is not set properly.

8 Slide the tray into the printer.

**Note**
If you want to print by type and size of paper from the printer driver, configure the tray settings in the printer’s control panel to match the type of paper loaded in each tray (page 57).
Printing Both Sides of Paper (Optional Duplexer)

The printer can automatically print on both sides of paper with an optional duplex printing accessory (duplexer). This is called duplexing. To order optional accessories, see page 9.

**Note**

See the documentation included with the duplexer for complete installation and setup instructions. Duplexing might require additional memory (page C-1).

The duplexer supports sizes from 5.8 by 8.3 inches (148 by 210 mm) to 11.7 by 17 inches (297 by 432 mm).

Prepunched paper should be printed in a rotated direction for 2-sided printing (page 44).

![Figure 8 Printer with the Optional Duplexer](image)

ENWW

Chapter 2: Printing Tasks 33
Guidelines for Printing Both Sides of Paper

**Caution**

Do not print on both sides of labels, transparencies, envelopes, vellum, or paper heavier than 28 lb (105 g/m²). Damage to the printer and paper jamming might result.

**WARNING!**

To avoid personal injury and damage to the printer, do not lift the printer with the duplexer installed. Before relocating the printer, separate the duplexer and optional trays from the printer.

- You might need to configure the printer driver to recognize the duplexer. (See the printer software help for details.)
- To print on both sides of paper, make the selection from the software or printer driver. (See the printer software help.)
- If the printer driver does not have this option, change the Duplex setting from the Paper Handling Menu in the printer’s control panel to **DUPLEX=ON**. Also in the Paper Handling Menu, set Binding to long edge or short edge. (For more information, see page 37.)
- Be sure that Tray 2 is in place with its cover down. (The paper passes over this cover when duplexing.)
- Close the rear output bin to use the duplexer (page 24). Opening the rear output bin disables the duplexer.
Separating the Printer from the Duplexer

Before you lift the printer, always separate the printer from the duplexer.

1. Slide the rear section of the duplexer away from the printer.
2. Lift the printer off the duplexer.
Paper Orientation for Printing Both Sides of Paper

The duplexer prints the second side of paper first, so paper such as letterhead, prepunched, and preprinted paper need to be oriented as shown in Figure 9.

Figure 9   Paper Orientation for Printing Both Sides of Paper

For Tray 1, load the first side facing down.

- Load letter, A4, A5, Executive, and B5 paper with the top, short edge toward the right.
- Load other sizes with the top, short edge toward the printer.

For all other trays, load the first side facing up.

- Load letter, A4, A5, Executive, and B5 paper with the top, short edge toward the right.
- Load other sizes with the top, short edge toward the front of the tray.
Layout Options for Printing Both Sides of Paper

The four print orientation options are shown below. These options can be selected from the printer driver or from the printer's control panel (set **BINDING** from the Paper Handling Menu and **ORIENTATION** from the Printing Menu).

1. **Long-edge portrait**
   - This is the default printer setting, and the most common layout used, with every printed image oriented right side up. Facing pages are read from top to bottom on the left page, then from top to bottom on the right page.

2. **Long-edge landscape**
   - This layout is often used in accounting, data processing, and spreadsheet applications. Every other printed image is oriented upside-down. Facing pages are read continuously from top to bottom.

3. **Short-edge portrait**
   - This layout is often used with clipboards. Every other printed image is oriented upside-down. Facing pages are read continuously from top to bottom.

4. **Short-edge landscape**
   - Each printed image is oriented right side up. Facing pages are read from top to bottom on the left page, then from top to bottom on the right page.

---

**Figure 10  Layout Options for Printing Both Sides of Paper**
Printing Special Paper

Special paper includes letterhead, prepunched (including 3-hole punched), envelopes, labels, transparencies, full-bleed images, rotated paper, index cards, postcards, custom-size, and heavy paper.

Printing Letterhead, Prepunched, or Preprinted Paper

When printing letterhead, prepunched, or preprinted paper, it is important to load the trays with the correct orientation.

Note

Paper orientation is different when you print with an optional duplexer (page 36).

It may be necessary to print prepunched paper in a rotated orientation (page 44).

Printing in portrait or landscape mode is usually selected from the software application or printer driver. If the option is not available, change the Orientation setting from the Printing Menu in the printer’s control panel (page B-9).
Paper Orientation

Figure 11  Paper Orientation for Tray 1

- Load letter, A4, A5, Executive, and B5 paper with the side-to-be-printed facing up, and the top, short edge toward the right.
- Load other sizes of paper with the side-to-be-printed facing up, and the top, short edge toward the printer.

Figure 12  Paper Orientation for All Other Trays

- Load letter, A4, A5, Executive, and B5 paper with the side-to-be-printed facing down, and the top, short edge toward the right.
- Load other sizes with the side-to-be-printed facing down, and the top, short edge toward the front of the tray.
Printing Envelopes

Many types of envelopes can be printed from Tray 1. (Up to 10 can be stacked in the tray.) Printing performance depends on the construction of the envelope. Always test a few sample envelopes before purchasing a large quantity.

- Set margins at least 0.6 inch (15 mm) from the edge of the envelope.
- To minimize curl and wrinkling, always print envelopes to the rear output bin.

When you print large numbers of envelopes and standard paper, for best printing performance print paper first, then envelopes. To alternate paper and envelopes, from the Configuration Menu in the printer’s control panel select SMALL PAPER SPEED=SLOW.

**WARNING!** Never use envelopes with coated linings, exposed self-stick adhesives, or other synthetic materials. These items can emit noxious fumes.

**Caution** Envelopes with clasps, snaps, windows, coated linings, exposed self-stick adhesives, or other synthetic materials can severely damage the printer.

To avoid jamming and possible printer damage, never try to print on both sides of an envelope.

Before you load envelopes, make sure they are flat and not damaged or stuck together. Do not use envelopes with pressure-sensitive adhesive. (For envelope specifications, see page A-11.)
Loading Envelopes in Tray 1

1. Open Tray 1 and pull out the tray extension. If the envelopes are longer than 9 inches (229 mm), flip open the second tray extension.

2. Open the rear output bin and pull out the tray extension. (This reduces envelope curl and wrinkling.)

3. Load up to 10 envelopes in the center of Tray 1 with the side-to-be-printed facing up, and the postage-end toward the front of the tray. Slide the envelopes into the printer as far as they will go without forcing them.

4. Adjust the guides to touch the envelope stack without bending the envelopes. Make sure the envelopes fit under the tabs on the guides.
Printing Labels

Use only labels recommended for use in laser printers. Multi-thickness labels and labels that do not stack flat might print better rotated. To print rotated paper, see page 44. Make sure that labels meet the specifications for the input tray you use (page A-10).

Do:

- Print a stack of 50 labels from Tray 1 or a stack of 50 to 100 labels from other trays.
- For proper page orientation when printing labels, see page 39.
- Try opening the rear output bin (page 26) to prevent curl and other problems.

Caution

Failure to follow these instructions can damage the printer.

- Do not load the trays to capacity because labels are heavier than paper.
- Do not use labels that are separating from the backing sheet, wrinkled, or damaged in any way.
- Do not use labels that have the backing sheet exposed. (Labels must cover the entire backing sheet with no exposed spaces.)
- Do not feed a sheet of labels through the printer more than once. The adhesive backing is designed for only one pass through the printer.
- Do not print on both sides of labels.
Printing Transparencies

Use only transparencies recommended for use in laser printers. For transparency specifications, see page A-10.

- Load transparencies in Tray 1 with the side-to-be printed facing up and the top edge toward the right.
- To prevent transparencies from becoming too hot or sticking together, use the top output bin by closing the rear output bin (page 25). Remove each transparency from the output bin before printing another.
- Place transparencies on a flat surface to cool after removing them from the printer.

![Image of a printer with transparencies loaded in Tray 1]

Figure 14  Printing Transparencies
Printing Rotated Paper

The printer can print letter, A4, A5, Executive, and B5 (JIS) in a rotated orientation (short-edge first) from Tray 1. The printer can print letter and A4 in a rotated orientation from a 500-sheet tray. Rotated paper prints slower. Some types of paper feed better rotated, such as prepunched paper (especially printed on both sides with the optional duplexer) or labels that do not stack flat.

Tray 1:

1 From the Paper Handling Menu in the printer’s control panel, select TRAY 1 MODE=CASSETTE.
2 Also from the Paper Handling Menu, select LTR-R, A4-R, A5-R, EXEC-R, or JB5-R as the Tray 1 size.
3 Load paper with the side-to-be printed facing up, and the top, short-edge toward the printer.
4 In the printer driver or software application select the paper size as you normally would and select Tray 1.

Figure 15   Printing Rotated Paper from Tray 1
500-Sheet Tray:

1. Rotate the dial inside the front of the tray to the correct paper size.
2. Load paper with the side-to-be printed facing down, and the top, short-edge toward the front of the tray.
3. In the printer driver or software application select the size and location of the rotated paper.

Figure 16  Printing Rotated Paper from the 500-Sheet Tray
Printing Full-Bleed Images

Full-bleed images extend from edge to edge of the page. To achieve this effect, use larger paper, then trim its edges to the desired size.

**Caution**

Never print directly to the edge of paper. This causes toner to accumulate inside the printer, which may affect print quality and damage the printer. Print on paper up to 12.28 by 18.5 in (312 by 470 mm), leaving margins on all four sides of at least .08 inch (2 mm).

**Note**

When printing paper wider than 11.7 inches (297 mm), always use the rear output bin. Do not use the optional duplexer when printing this size of paper.
## Printing Cards, Custom-Size and Heavy Paper

Custom-size paper can be printed from Tray 1 or the optional 500-sheet tray. For paper specifications, see page A-2.

<table>
<thead>
<tr>
<th>Tray</th>
<th>Minimum Size</th>
<th>Maximum Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tray 1</td>
<td>3 by 5 inches (76 by 127 mm)</td>
<td>12.28 by 18.5 inches (312 by 470 mm)</td>
</tr>
<tr>
<td>Optional 500-Sheet Tray</td>
<td>5.8 by 8.2 inches (148 by 210 mm)</td>
<td>11.7 by 16.5 inches (297 by 419 mm) OR 11 x 17 inches (280 by 432 mm)</td>
</tr>
</tbody>
</table>

The maximum paper weight is 53 lb (199 g/m²) from Tray 1 and 28 lb (105 g/m²) from the 500-sheet tray.

**Note**

Heavy paper and very small or very large custom-size paper should be printed from Tray 1 to the rear output bin. Open the rear output bin to use it (page 26).

The printer's control panel can be set for one custom size at a time. Do not load more than one size of custom paper into the printer.

When you print large numbers of small or narrow media and standard paper, for best printing performance print paper first, then the small or narrow media. To alternate paper and small or narrow media, from the Configuration Menu in the printer's control panel select **small paper speed=slow**.

For information on setting custom paper sizes, see page 50.
The following instructions are for loading custom-sizes in a 500-sheet tray (optional). For supported sizes of paper, see page A-6. To load standard sizes, see page 31.

**Note**
To avoid paper jams, do not load trays while the printer is printing.

1. Pull the tray completely out of the printer and place it on a flat surface.

2. Load the tray.

3. Squeeze the release on the back of the rear paper guide. Slide the rear guide against the edge of the paper. The front corners of the paper should be lined up with the marks on the front side guide’s tabs.

4. Squeeze the release on the outside of the left guide and adjust the left and right guides to match the width of the paper. The front corners of the paper should be below the tabs on the guides, and the edges should be lined up with the markings on the tabs. The guides should touch the paper without bending it.

5. Make sure the paper is flat in the tray at all four corners and below the tabs on the guides.

**Continued on the next page.**
6a When loading a full stack of media, continue to step 6B. Otherwise, proceed to step 7.

6b Align the tension lever up or down to match the symbol displayed in the tension indicator window.

7 To prevent jams, rotate the dial in the tray to **Custom**. The toggle switch accesses more sizes. An error might occur if the dial is not set properly.

8 Slide the tray into the printer.

---

**Note**

If you want to print by type and size of paper from the printer driver, configure the tray settings in the printer’s control panel to match the type of paper loaded in each tray (page 57).
Guidelines for Printing Custom-Size Paper

- Do not attempt to print on paper smaller than 3 inches (76 mm) wide or 5 inches (127 mm) long.
- Set page margins at least .17 inch (4.23 mm) away from the edges.

Setting Custom Paper Sizes

When custom paper is loaded, size settings need to be selected from the software application (the preferred method), the printer driver, and from the printer’s control panel.

Note

All settings in the printer driver and software application (except configuring custom paper sizes) override control panel settings. (Software application settings override printer driver settings.) The control panel must be set if the PCL 5e driver is used, or custom paper is loaded long-edge first (X is longer than Y).

Figure 17  Printing Custom-Size Paper
If the settings are not available from the software, set the custom paper size from the control panel:

1. From the Printing Menu set CONFIGURE CUSTOM PAPER=YES.
2. From the Printing Menu, select inches or millimeters as the unit of measurement.
3. From the Printing Menu, set the X dimension (the front edge of the paper) as shown in Figure 17. The X dimension can be 3 to 12.28 inches (76 to 312 mm) for Tray 1 or 8.2 to 11.7 inches (148 to 297 mm) for the 500-sheet tray (optional). Set the Y dimension (the side edge of the paper) as shown in Figure 17. The Y dimension can be 5 to 18.5 inches (127 to 470 mm) for Tray 1 or 5.8 to 17 inches (210 to 432 mm) for the 500-sheet tray (optional).
4. If custom paper is loaded into Tray 1 and TRAY 1 MODE=CASSETTE, then set TRAY 1 SIZE=CUSTOM from the Paper Handling Menu in the printer’s control panel. See “Customizing Tray 1 Operation” on page 55.

   If custom paper is loaded in the optional 500-sheet tray, be sure the paper size dial is set to Custom.

5. In the software, select Custom as the paper size.
   For example, if the custom paper is 8 by 10 inches (203 by 254 mm), set X=8 inches and Y=10 inches (X=203 millimeters and Y=254 millimeters).
Printing Vellum

Vellum is special lightweight paper similar to parchment. Print vellum from Tray 1 only, and open the rear output bin. Do not print on both sides of vellum.

1 Load vellum with the side-to-be-printed facing up and the top, short edge toward the right.
2 Open the rear output bin.
3 From the Paper Handling Menu in the printer’s control panel, set TRAY 1 MODE=CASSETTE.
4 From the printer driver, set the type of paper for Tray 1 to vellum, and select paper by type. For details on selecting by type of paper, see page 57.
Advanced Printing Tasks

This section will help you take full advantage of the printer’s features. These tasks are “advanced” because they require you to change settings from the printer’s control panel or the printer driver.

Using Features in the Printer Driver

When you print from a software application, many of the printer’s features are available from the printer driver. To access Windows printer drivers, see page 19.

Note

HP PCL 5e, PCL 6, PS, and Macintosh drivers are slightly different. Check the drivers for available options. The PCL 6 driver takes full advantage of the printer’s features.

Settings in the printer driver and software application override control panel settings. (Software application settings override printer driver settings.)

Saving Printer Setup Information

Printer drivers allow you to save the printer settings you use most often as the default settings. For example, the driver might be set to print on letter size paper, portrait orientation, with automatic tray selection (from the first available tray).

Some PCL 6 printer drivers will allow you to save printer settings for multiple kinds of print jobs. For example, you might want to create a Quick Set for envelopes, or for printing the first page of a document on letterhead.

Look for the Quick Sets option in the Windows PCL 6 printer driver, or see the printer driver help for more information.

Printing with a Watermark

A watermark is a notice, such as “Top Secret,” printed in the background of each page in a document. Check the driver for available options.
Printing the First Page on Different Paper

From the PCL 6 printer driver, you can choose to print the first page of a document on different paper than the rest of the pages. Look for “Use different paper for first page” in the printer driver.

Printing Multiple Pages on One Sheet of Paper

You can print more than one page on a single sheet of paper. This feature is available in some printer drivers, and provides a cost-effective way to print draft pages.

To print more than one page on a sheet of paper, look for a Layout or Pages Per Sheet option in the printer driver. (This is sometimes called 2-up, 4-up, or n-up printing.)

Figure 19 Sample Layout Options (1-up, 2-up, and 4-up)
Customizing Tray 1 Operation

Customize Tray 1 to fit your printing needs.

The printer can be set to print from Tray 1 as long as it is loaded, or to print only from Tray 1 if the type of paper loaded is specifically requested. Set TRAY 1 MODE=FIRST or TRAY 1 MODE=CASSETTE from the Paper Handling Menu in the printer’s control panel. (Print speed might be slightly slower when printing from Tray 1 when TRAY 1 MODE=FIRST.)

**Tray 1 Mode=First**

If you do not keep paper in Tray 1 all the time, or you use Tray 1 only for manually feeding paper, keep the default setting, TRAY 1 MODE=FIRST in the Paper Handling Menu.

- TRAY 1 MODE=FIRST means that the printer usually pulls paper from Tray 1 first unless it is empty.
- You can still choose paper from other trays by specifically choosing another tray in the printer driver.

**Tray 1 Mode=Cassette**

TRAY 1 MODE=CASSETTE means the printer treats Tray 1 like the other trays. Instead of looking for paper in Tray 1 first, the printer pulls paper either starting from the bottom tray upward (from the tray with the highest capacity to the tray with the least capacity), or the tray that matches type or size settings selected from the software.

- When TRAY 1 MODE=CASSETTE is set, an option appears in the Paper Handling Menu to configure size as well as type settings for Tray 1.
- Through the printer driver, you can select paper from any tray (including Tray 1) by type, size, or source. To print by type and size of paper, see page 57.
Manually Feeding Paper from Tray 1

The Manual Feed feature allows you to print on special paper from Tray 1, such as envelopes or letterhead. If Manual Feed is selected, the printer will print only from Tray 1.

Select Manual Feed through the software or printer driver. Manual Feed can also be enabled from the Paper Handling Menu in the printer’s control panel.

---

**Note**

When Manual Feed is selected, if TRAY 1 MODE=FIRST the printer automatically prints (if paper is in the tray). If TRAY 1 MODE=CASSETTE the printer prompts to load Tray 1 whether or not Tray 1 is loaded. This enables you to load different paper if necessary. Press [Go] to print from Tray 1.
Printing by Type and Size of Paper

You can configure the printer to select paper by type (such as plain or letterhead) and size (such as letter or A4), as opposed to source (a paper tray).

Benefits of Printing by Type and Size of Paper

If you frequently use several different kinds of paper, once trays are set up correctly, you do not have to check which paper is loaded in each tray before you print. This is especially helpful when the printer is shared, and more than one person loads or removes paper.

Printing by type and size of paper is a way to be sure that print jobs always print on the desired paper. (Some printers have a feature which “locks out” trays, to prevent printing on the wrong paper. Printing by type and size of paper eliminates the need to lock out trays.)

To print by type and size of paper, do the following:

1 Be sure to adjust and load the trays correctly. (See the sections on loading paper, starting on page 28.)

2 From the Paper Handling Menu in the printer’s control panel, select the paper type for each tray. If you are unsure what type you are loading (such as bond or recycled), check the label on the package of paper. For supported types, see page A-2.

3 Select the paper size settings from the control panel.

   • Tray 1: If the printer has been set to TRAY 1 MODE=CASSETTE from the Paper Handling Menu, also set the Tray 1 size from the Paper Handling Menu. If custom paper is loaded, set the size of custom paper from the Printing Menu to match the paper loaded in Tray 1. To print custom-size paper, see page 50.

   • Tray 2: Paper size settings are adjusted when paper is properly loaded into the printer and the paper size dials are set to match the paper size (See the sections on loading paper, starting on page 29.)

   • Optional 500-sheet tray: Paper size settings are adjusted when paper is properly loaded into the printer and the paper size dial is set to match the paper size. If custom paper is loaded, set the size of custom paper from the Printing Menu to match the paper loaded in the tray. Set the paper size dial in the tray to Custom. To print custom-size paper, see page 50.

   • Optional 250-sheet tray: Paper size settings are adjusted when paper is properly loaded into the printer and the paper size dials are set to match the paper size (See the sections on loading paper, starting on page 29.)
4 From the software or printer driver, select the desired type and size of paper.

**Note**

The type and size settings can also be configured from HP Web JetAdmin for networked printers. See the printer software help.

To print by type and size, it might be necessary to unload or close Tray 1, or set TRAY 1 MODE=CASSETTE from the Paper Handling Menu in the printer's control panel. For more information, see page 55.

Settings in the printer driver and software application override control panel settings. (Software application settings override printer driver settings.)
Job Retention

There are four job retention features: Quick Copy, Proof and Hold, Private Job, and Stored Job (all are available with an optional hard disk installed). Proof and Hold and Private Job are available without a hard disk installed. See the following pages for more information on each of these features.

Note

The private job and the proof and hold features also work if the printer does not have an optional hard disk by using the printer’s available RAM memory. A minimum of 32 MB of RAM is required. For moderate to heavy use of this feature, HP recommends adding a hard disk.

To access each of the features, first follow the steps below, then continue to the section that describes the feature you wish to use.

For Windows only:

1. Select Print from the application’s menu.
2. Click Properties to display the properties dialog box.
3. Click the Destination tab to display the destination options.
4. Click Options under Destination Features to display Job Retention Options.

For Macintosh only:

Select Job Retention from the pull-down menu in the print dialog box for newer drivers. For older drivers, select Printer Specific Options.

Quick Copying a Job

The quick copy feature prints the requested number of copies of a job and stores a copy of the job on the printer’s optional hard disk. Additional copies of the job can be printed later. For more information about specifying the number of quick copy jobs that can be stored, see the QUICK COPY JOBS control panel item described on page 2.
Printing Additional Copies of a Quick Copy Job

To print additional copies of a job stored on the printer’s optional hard disk from the control panel:

1 Press [Menu] repeatedly until PRIVATE/STORED JOBS MENU appears.
2 Press [Item] until your user name appears.
3 Press [-Value+] until the desired job name appears.
4 Press [Select] to select the job. COPIES=x appears.
5 Press [-Value+] until the desired number of copies appears.
6 Press [Select] to print the job.

Deleting a Stored Quick Copy Job

When a user sends a quick copy job, the printer overwrites any previous jobs with the same name. If there is not a quick copy job already stored under the job name and the printer needs additional space, the printer may delete other stored quick copy jobs starting with the oldest job. The default number of quick copy jobs that can be stored is 32. The number of quick copy jobs that can be stored is set from the control panel.

---

Note

If you turn the printer off and then back on, all quick copy, proof and hold, and private jobs are deleted.

A stored quick copy job can also be deleted from the control panel or from HP Web JetAdmin.

1 Press [Menu] repeatedly until PRIVATE/STORED JOBS MENU appears.
2 Press [Item] until your user name appears.
3 Press [-Value+] until the desired job name appears.
4 Press [Select] to select the job. COPIES=x appears.
5 Press [-Value+] until DELETE appears.
6 Press [Select] to delete the job.
Proofing and Holding a Job

The proof and hold feature provides a quick and easy way to print and proof one copy of a job and then print the additional copies. The job is held on the printer’s optional hard disk or memory until the user prints the additional copies. After the additional copies are printed, the proof and hold job is deleted from the printer.

Note

The proof and hold feature also works if the printer does not have an optional hard disk by using the printer’s available RAM memory. A minimum of 32 MB of RAM is required. For moderate to heavy use of this feature, HP recommends adding a hard disk.

To permanently store the job and prevent the printer from deleting it when space is needed for something else, select the Stored Job option in the driver.

Printing the Remaining Copies of a Held Job

The user can print the remaining copies of a job held on the printer’s optional hard disk from the control panel.

1 Press [Menu] repeatedly until PRIVATE/STORED JOBS MENU appears.
2 Press [Item] until your user name appears.
3 Press [-Value+] until the desired job name appears.
4 Press [Select] to select the job. COPIES=x appears.
5 Press [-Value+] until the desired number of copies appears.
6 Press [Select] to print the job.

Deleting a Held Job

When a user sends a proof and hold job, the printer overwrites any previous jobs with the same name.

Note

If you turn the printer off and then back on, all quick copy, proof and hold, and private jobs are deleted.

A stored proof and hold job can also be deleted from the control panel.

1 Press [Menu] repeatedly until PRIVATE/STORED JOBS MENU appears.
2 Press [Item] until your user name appears.
3 Press [-Value+] until the desired job name appears.
4 Press [Select] to select the job. COPIES=x appears.
5 Press [-Value+] until DELETE appears.
6 Press [Select] to delete the job.
Printing a Private Job

The private printing feature lets a user specify that a job is not printed until that user releases it using a 4-digit Personal Identification Number (PIN) through the printer’s control panel. The user specifies the PIN in the driver and it is sent to the printer as part of the print job.

**Note**
The private job feature also works if the printer does not have an optional hard disk by using the printer’s available RAM memory. A minimum of 32 MB of RAM is required. For moderate to heavy use of this feature, HP recommends adding a hard disk.

Specifying a Private Job

To specify that a job is private from the driver, select the Private Job option and type a 4-digit PIN.

Releasing a Private Job

The user can print a private job from the control panel.

2. Press [Item] until your user name appears.
3. Press [-Value+] until the desired job name appears.
4. Press [Select]. **PIN:0000** appears.
5. Press [-Value+] to change the first number of the PIN, and then press [Select]. An * appears in place of the number. Repeat these steps to change the remaining three numbers of the PIN. **COPIES=x** appears.
6. Press [-Value+] until the desired number of copies appears.
7. Press [Select] to print the job.
Deleting a Private Job

When a user sends a private job, the printer overwrites any previous jobs with the same name. A private job is automatically deleted from the printer’s optional hard disk or memory after the user releases it for printing.

Note

If you turn the printer off and then back on, all quick copy, proof and hold, and private jobs are deleted.

A private job can also be deleted from the printer’s control panel before it is ever printed.

1 Press [Menu] repeatedly until PRIVATE/STORED JOBS MENU appears.
2 Press [Item] until your user name appears.
3 Press [-Value+] until the desired job name appears.
4 Press [Select] to select the job. PIN: 0000 appears.
5 Press [-Value+] to change the first number of the PIN, and then press [Select]. An * appears in place of the number. Repeat these steps to change the remaining three numbers of the PIN.
6 Press [-Value+] until DELETE appears.
7 Press [Select] to delete the job.
Storing a Print Job

The user can download a print job to the printer’s optional hard disk without printing it. The user can then print the job at any time through the printer’s control panel. For example, a user may want to download a personnel form, calendar, time sheet, or accounting form that other users can access and print.

To store a print job permanently on the optional hard disk, select the Stored Job option in the driver when printing the job.

Specifying a Stored Job as Private

To specify that a stored job in the driver is private, select the Require PIN to Print option below the Stored Job option and type a 4-digit PIN.

Printing a Stored Job

1 Press [Menu] repeatedly until PRIVATE/STORED JOBS MENU appears.
2 Press [Item] until your user name appears.
3 Press [-Value+] until the desired job name appears.
4 (Follow this step only if printing a private job.) Press [Select] to select the job. PIN:0000 appears.
5 (Follow this step only if printing a private job.) Press [-Value+] to change the first number of the PIN, and then press [Select]. An * appears in place of the number. Repeat these steps to change the remaining three numbers of the PIN. COPIES=1 appears.
6 Press [-Value+] until the desired number of copies appears.
7 Press [Select] to print the job.
Deleting a Stored Job

When a user sends a stored job, the printer overwrites any previous jobs with the same name. Jobs stored on the printer’s optional hard disk can be deleted from the control panel.

2. Press [Item] until your user name appears.
3. Press [-Value+] until the desired job name appears.
4. (Follow this step only if printing a private job.) Press [Select] to select the job. PIN: 0000 appears.
5. (Follow this step only if printing a private job.) Press [-Value+] to change the first number of the PIN, and then press [Select]. An * appears in place of the number. Repeat these steps to change the remaining three numbers of the PIN. COPIES=1 appears.

Note: Press [Select] to delete the job.
Printer Maintenance

Overview

This chapter explains basic printer maintenance.

• Performing routine maintenance.

• Managing the print cartridge.

• Cleaning the printer.
Performing Routine Maintenance

To ensure optimum print quality, the printer will prompt you to perform printer maintenance every 150,000 pages. When the PERFORM PRINTER MAINTENANCE message appears on the control panel, you will need to purchase a printer maintenance kit and install the new parts. To check the number of pages the printer has printed, print a configuration page (page 105).

To order the printer maintenance kit, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)

The kit includes:

- fuser assembly
- transfer roller
- feed rollers
- necessary instructions

For more information on installing the printer maintenance kit, see the instructions that accompany it.

---

**Note**

The printer maintenance kit is a consumable and is not covered under warranty or standard service agreements.
Managing the Print Cartridge

HP Policy on Non-HP Print Cartridges

Hewlett-Packard Company cannot recommend use of non-HP print cartridges, either new or remanufactured. Because they are not HP products, HP cannot influence their design or control their quality.

Caution

Any damage caused by a non-HP print cartridge is not covered under the HP warranty and service agreements.

To install a new HP print cartridge, follow the instructions included in the start guide. To replace a HP print cartridge and recycle the used cartridge, follow the instructions included with the new cartridge.

Print Cartridge Storage

Do not remove the print cartridge from its package until you are ready to use it. (The shelf life of a cartridge in an unopened package is approximately 2.5 years.)

Caution

To prevent damage to the print cartridge, do not expose it to light for more than a few minutes.

Print Cartridge Life Expectancy

The life of the print cartridge depends on the amount of toner that print jobs require. When printing text at 5% coverage, an HP print cartridge lasts an average of 10,000 pages. (A typical business letter is about 5% coverage.) This assumes that print density is set to 3 and EconoMode is off. (These are the default settings.)

Caution

HP does not recommend full-time use of EconoMode. (If EconoMode is used consistently to print media with less than 5% toner coverage, it is possible that the toner supply will outlast the mechanical parts in the print cartridge.)
Continue Printing When Toner is Low

When toner is low, the printer’s control panel displays the **TONER LOW** message.

- If the **TONER LOW** message displays, but the printer continues printing, **TONER LOW** is set to **CONTINUE** (the default setting).
- If the printer stops printing when low toner is detected, **TONER LOW** is set to **STOP**. To resume printing, press **[Go]**.

The printer will continue to display **TONER LOW** until you replace the print cartridge.

Select **TONER LOW=CONTINUE** or **TONER LOW=STOP** from the Configuration Menu in the control panel (page B-13).
Redistributing the Toner

When toner is low, faded or light areas might appear on a printed page. You might be able to temporarily improve print quality by redistributing the toner. The following procedure might allow you to finish the current print job before replacing the print cartridge.

1 Open the top cover.

2 Remove the print cartridge from the printer.

**WARNING!**
Avoid reaching too far into the printer. The adjacent fusing area might be hot!

**Caution**
To prevent damage to the print cartridge, do not expose it to light for more than a few minutes.

3 Rotate the print cartridge and gently shake it from side to side to redistribute the toner.

**Note**
If toner gets on your clothing, wipe it off with a dry cloth and wash clothing in cold water. (Hot water sets toner into fabric.)

4 Reinsert the print cartridge into the printer and close the top cover.

If the print remains light, install a new print cartridge. (Follow the instructions provided with the new print cartridge.)
Cleaning the Printer

To maintain print quality, follow the cleaning procedure (on the following page) every time the print cartridge is changed, or whenever print quality problems occur. As much as possible, keep the printer free from dust and debris.

- Clean the outside of the printer with a slightly water-dampened cloth.
- Clean the inside with a dry, lint-free cloth.

Caution  Do not use ammonia-based cleaners on or around the printer.

While cleaning the printer, be careful not to touch the transfer roller (the black, rubber roller, located underneath the print cartridge). Skin oils on the roller can cause print quality problems.

Figure 20  Location of the Transfer Roller—Do Not Touch!
Cleaning the Printer

Before beginning these steps, turn the printer off and unplug the power cord.

1. Open the top cover and remove the print cartridge.

**WARNING!**
Avoid reaching too far into the printer. The adjacent fusing area might be hot!

**Caution**
To prevent damage to the print cartridge, do not expose it to light for more than a few minutes.

2. Wipe any dust or dirt off the paper feed guides (shaded areas) with a dry, lint-free cloth.

**Note**
If toner gets on your clothing, wipe it off with a dry cloth and wash clothing in cold water. (Hot water sets toner into fabric.)

3. Using the green handles, lift the paper access plates and wipe off any residue with a dry, lint-free cloth.

4. Close the paper access plates, replace the print cartridge, close the top cover, plug in the power cord, and turn the printer on.
Using the Printer Cleaning Page

If toner specks appear on the front or back side of your print jobs, follow the procedure below.

From the printer’s control panel, do the following:

2. Press [Item] until CREATE CLEANING PAGE appears.
3. Press [Select] to create the cleaning page.
4. Follow the instructions on the cleaning page to complete the cleaning process.

Note

In order for the cleaning page to work properly, print the page on copier grade paper (not bond or rough paper).

You might need to create a cleaning page more than once. When toner has been cleaned from inside the printer, shiny black spots will appear on the page’s black strip. If white spots appear on the black strip, create a cleaning page again.

To ensure good print quality with certain types of paper, use the cleaning page every time the print cartridge is replaced. If the cleaning page is frequently needed, try a different type of paper.
Problem Solving

Overview

This chapter will help you to troubleshoot and solve printer problems.

Clear paper jams: Occasionally, paper can jam during printing. This section will help you to locate paper jams, properly clear them from the printer, and solve repeated paper jams.

Understand printer messages: Many different messages can appear on the printer’s control panel display. Some messages tell the printer’s current status, such as INITIALIZING. Other messages require an action, such as CLOSE TOP COVER. Many of these messages are self-explanatory. However, some messages indicate a problem with the printer, or require further action or description. This section lists these types of messages, and tells what to do if a message persists.

Correct output quality problems: The printer should produce print jobs of the highest quality. If print jobs do not look sharp and clear, defects such as lines, specks, or smears appear on the page, or paper is wrinkled or curled, use this section to troubleshoot and solve the output quality problem.

Determine printer problems: Before you can fix a printer problem, you must understand where the problem lies. Use the flowchart in this section to determine the printer problem, and then follow the corresponding troubleshooting suggestions.

Check printer configuration: From the printer, you can print information pages, which give details about the printer and its configuration.
Clearing Paper Jams

If the printer’s control panel displays a paper jam message, look for paper in the locations indicated in Figure 21, then see the procedure for clearing the paper jam. You might need to look for paper in other locations than indicated in the paper jam message. If the location of the paper jam is not obvious, look first in the top cover area.

When clearing paper jams, be very careful not to tear the paper. If a small piece of paper is left in the printer, it could cause additional jams. If paper jams are a recurring problem, see page 82.

---

**Note**

A paper jam message might also display if the rear door is open.

The top cover of the printer must be opened and then closed to clear a paper jam message.

Paper jams can occur at the following locations:

1. **Output areas (top and rear)**
   - Go to page 79.
2. **Top cover area**
   - Go to page 78.
3. **Input tray areas**
   - Go to page 77.
4. **Optional duplexer**
   - Go to page 80.

---

**Figure 21 Paper Jam Locations**

---

**Note**

Loose toner might remain in the printer after a paper jam, but the toner should clear after a few sheets are printed.
Clearing Jams from the Input Tray Areas

1 Slide the tray out of the printer, and remove any damaged paper from the tray.

2 If the edge of the paper is visible in the feed area, slowly pull the paper down and out of the printer. If the paper is not visible, look in the top cover area (page 78).

3 Before replacing the tray, make sure the paper is flat in the tray at all four corners and below the tabs on the guides.

4 Open and close the top cover to clear the paper jam message.

If a paper jam message persists, there is still paper in the printer. Look for paper in another location (page 76).
Clearing Jams from the Top Cover Area

1 Open the top cover and remove the print cartridge.

**Caution**

To prevent damage to the print cartridge, do not expose it to light for more than a few minutes.

2 Use the green handles to lift the paper access plates.

3 Slowly pull the paper out of the printer. Do not tear the paper!

**Note**

Avoid spilling loose toner. Using a dry, lint-free cloth, clean any loose toner that might have fallen into the printer (page 72).

If loose toner falls into the printer, it might cause temporary problems with print quality. Loose toner should clear from the paper path after a few pages are printed.

If toner gets on your clothing, wipe it off with a dry cloth and wash clothing in cold water. (Hot water sets toner into fabric.)

4 Close the paper access plates, replace the print cartridge, and close the top cover.

If a paper jam message persists, there is still paper in the printer. Look for paper in another location (page 76).
Clearing Jams from the Output Areas

1. Push in the two gray latches to release the rear door.

2. Push down the green paper release levers.

3. Grasp both sides of the paper, and slowly pull the paper out of the printer. (There might be loose toner on the paper. Be careful not to spill it on yourself or into the printer.)

**Note**
If paper is difficult to remove, try opening the top cover and removing the print cartridge to release pressure on the paper.

4. Close the rear door. (The levers automatically return to their original positions when the rear door is closed.) Open and close the top cover to clear the paper jam message.

If a paper jam message persists, there is still paper in the printer. Look for paper in another location (page 76).
Clearing Jams from the Optional Duplexer

Look for jams in the following locations:

The Tray 2 area:

1 Slide Tray 2 out of the printer.
2 Slowly pull any paper out of the printer.

The front cover of the duplexer:

3 From the front of the printer, grasp the front cover of the duplexer (use the grip in the center), pull it straight toward you, and then lift it up to remove.
4 Slowly pull any paper out of the printer.
5 Replace the duplexer's front cover, and replace Tray 2.

Continued on the next page.
The rear section of the duplexer:

6 From the rear of the printer, use the handles on both sides of the duplexer to slide out the rear section until it stops.

7 Slowly pull any paper out of the duplexer.

The duplexer's rear door:

8 Open the duplexer's rear door.

9 Slowly pull any paper out of the duplexer.

When all paper has been removed from the duplexer, continue with step 10 below:

10 Close the duplexer’s rear door, and push the rear section of the duplexer back into the printer. Open and close the top cover to clear the paper jam message.

**Note**
To prevent further jams, make sure all tray covers are in place.
Solving Repeated Paper Jams

If paper jams occur frequently, try the following:

- Check all the paper jam locations. A piece of paper might be stuck somewhere in the printer. (See page 76.)
- Check that paper is correctly loaded in the trays, that the trays are correctly adjusted for the loaded paper size, and that the trays are not overfilled. (See the sections on loading paper, starting on page 28.)
- Check that all trays and paper handling accessories are completely inserted into the printer. (If a tray is opened during a print job, this might cause a paper jam.)
- Check that all covers and doors are closed. (If a cover or door is opened during a print job, this might cause a paper jam.)
- Try printing to a different output bin (page 24).
- The sheets might be sticking together. Try bending the stack to separate each sheet. Do not fan the stack.
- If you are printing from Tray 1, try feeding fewer sheets of paper or fewer envelopes at a time.
- If you are printing with the optional duplexer, make sure that the cable tray is seated properly, and that the Tray 2 cover is installed.
- If you are printing small sizes (such as index cards), make sure the paper is oriented correctly in the tray (page 50).
- Turn over the stack of paper in the tray. Also try rotating the paper 180°.
- Try rotating paper (such as perforated or multi-sheet forms and labels) to feed through the printer from a different orientation (page 44).
- Check the quality of the paper being printed. Damaged or irregular paper should not be used.
- Use only paper that meets HP specifications (pages A-2 through A-14).
- Do not use paper that has already been used in a printer or copier. (Do not print on both sides of envelopes, transparencies, vellum, or labels.)
- Check that the power supplied to the printer is steady, and meets printer specifications (page A-18).
- Clean the printer (page 72).
- Contact an HP-authorized service or support provider to perform routine printer maintenance. (See the telephone support flyer included with the printer.)
Understanding Printer Messages

The following table explains messages that might display on the printer’s control panel. Printer messages and their meanings are listed in alphabetical order, with numbered messages following.

If a message persists:

- If a message persists requesting that you load a tray, or if a message indicates that a previous print job is still in the printer’s memory, press [Go] to print or press [Cancel Job] to clear the job from the printer’s memory.

- If a message persists after performing all of the recommended actions, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)

Note
Not all messages are described in this user’s guide (many are self-explanatory).

Some printer messages are affected by the Auto Continue and Clearable Warning settings from the Configuration Menu in the printer’s control panel (page B-13).

<tr>
<td><strong>LOADING PROGRAM &lt;number&gt; alternates with</strong></td>
<td>Programs and fonts can be stored on the printer's file system. At bootup time these entities are loaded into RAM. (These entities can take a long time to load into RAM depending on the size and number of entities being loaded.) The &lt;number&gt; specifies a sequence number indicating the current program being loaded.</td>
</tr>
<tr>
<td><strong>DO NOT POWER OFF</strong></td>
<td></td>
</tr>
<tr>
<td><strong>MANUALLY FEED [TYPE] [SIZE]</strong></td>
<td>Load the requested paper into Tray 1.</td>
</tr>
<tr>
<td></td>
<td>Press [Go] if the desired paper is already loaded in Tray 1.</td>
</tr>
<tr>
<td></td>
<td>Press [-Value+] to scroll through the available types and sizes. Press [Select] to accept the alternate type or size.</td>
</tr>
<tr>
<td><strong>MEMORY FULL STORED DATA LOST</strong></td>
<td>There is no available memory in the printer. The current job might not print correctly and some resources (such as downloaded fonts or macros) might have been deleted. You might want to add more memory to the printer (page C-1).</td>
</tr>
</tbody>
</table>
### Printer Messages (Continued)

<table>
<thead>
<tr>
<th>Message</th>
<th>Explanation or Recommended Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>MEMORY SETTINGS CHANGED</td>
<td>The printer changed its memory settings because it did not have enough memory to use the previous settings for I/O Buffering and Resource Saving. This usually occurs after removing memory from the printer, adding a duplexer, or adding a printer language. You might want to change memory settings for I/O Buffering and Resource Saving (although default settings are usually best) or add more memory to the printer (page C-1).</td>
</tr>
<tr>
<td>MEMORY SHORTAGE JOB CLEARED</td>
<td>The printer did not have enough free memory to print the entire job. The remainder of the job will not print and will be cleared from memory. Press [Go] to continue. Change the Resource Saving setting from the printer’s control panel (page C-6) or add more memory to the printer (page C-1).</td>
</tr>
<tr>
<td>MEMORY SHORTAGE PAGE SIMPLIFIED</td>
<td>The printer had to compress the job in order to fit it in available memory. Some data loss might have occurred. Press [Go] to continue. You might want to add more memory to the printer (page C-1).</td>
</tr>
<tr>
<td>MOPY PAGE TOO COMPLEX alternates with PRESS GO TO CONTINUE</td>
<td>The data (dense text, rules, raster or vector graphics) sent to the printer was too complex. Press [Go] to print the transferred data. (Some data might be lost.) If this message appears often, simplify the print job.</td>
</tr>
<tr>
<td>OFFLINE</td>
<td>Press [Go] to place the printer online.</td>
</tr>
<tr>
<td>OUTPUT BIN FULL CLEAR (BIN nnn) n (bin name)</td>
<td>The output bin is full and needs to be emptied.</td>
</tr>
<tr>
<td>PERFORM PRINTER MAINTENANCE</td>
<td>Hewlett-Packard recommends that only HP-authorized service technicians service the printer. However, you can perform most routine maintenance. When the PERFORM PRINTER MAINTENANCE message appears on the control panel, you will need to purchase a printer maintenance kit and install the new parts.</td>
</tr>
<tr>
<td>RAM DISK DEVICE FAILURE</td>
<td>The RAM disk had a critical failure and can no longer be used. Turn the printer off, and then turn the printer on to clear the message.</td>
</tr>
<tr>
<td>RAM DISK FILE OPERATION FAILED</td>
<td>The requested operation could not be performed. You might have attempted an illegal operation, such as trying to download a file to a non-existent directory.</td>
</tr>
<tr>
<td>Message</td>
<td>Explanation or Recommended Action</td>
</tr>
<tr>
<td>---------</td>
<td>----------------------------------</td>
</tr>
</tbody>
</table>
| RAM DISK FILE SYSTEM IS FULL | Delete files and then try again, or turn the printer off, and then turn the printer on to delete all files on the device. (Delete files using HP Web JetAdmin, or another software utility. See the software help for more information.)
If the message persists, increase the size of the RAM disk. Change the RAM disk size from the Configuration Menu in the printer's control panel (page B-14). |
<p>| RESEND UPGRADE | There is an error in the printer's flash firmware. Resend a valid firmware image. |
| TRAY x EMPTY | Load the empty tray (x) to clear the message. If you do not load the specified tray, the printer will continue printing from the next available tray, and the message will continue to display. |
| TRAY x LOAD [TYPE] [SIZE] | Load the requested paper into the specified tray (x). (See the sections on loading paper, starting on page 28.) Ensure that the trays are correctly adjusted for size. The size displayed on the front of the paper tray must match the size of paper loaded in the tray. The tray type settings (and size for Tray 1) must be set from the printer's control panel (page 57). If you are trying to print A4 or letter size paper, and this message appears, make sure the default paper size is set correctly from the Printing Menu in the printer's control panel. Press [Go] to print from the next available tray. Press [-Value+] to scroll through the available types and sizes. Press [Select] to accept the alternate type or size. |
| TRAY 2 LOAD LEGAL (or similar messages requesting that you load paper) | Load the requested paper into the indicated tray, or press [Select] to override the message and to print on a loaded paper size. If printing does not continue, press [Go]. |
| UNABLE TO STORE JOB | A job cannot be stored on the printer because of memory or file system configuration. |
| UNSUPPORTED SIZE IN TRAY [YY] | An external paper handling device detected an unsupported paper size. The printer will go offline until the condition is corrected. |
| USE [TYPE] [SIZE] INSTEAD? | If the requested paper size or type is not available, the printer asks if it should use another paper size or type instead. Press [-Value+] to scroll through the available types and sizes. Press [Select] to accept the alternate type or size. |
| WAIT FOR PRINTER TO REINITIALIZE | The RAM disk setting has been changed from the printer's control panel. This change will not take effect until the printer reinitializes. |</p>

<tr>
<td>13.x PAPER JAM [LOCATION]</td>
<td>Remove jammed paper from the specified location (page 76). Open and close the top cover to clear the message. If the message persists after all jams have been cleared, a sensor might be stuck or broken. Contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>
<td>20 INSUFFICIENT MEMORY</td>
<td>The printer received more data than can fit in its available memory. You might have tried to transfer too many macros, soft fonts, or complex graphics. Press [Go] to print the transferred data (some data might be lost), then simplify the print job or install additional memory (page C-1).</td>
</tr>
<tr>
<td>21 PAGE TOO COMPLEX</td>
<td>The data (dense text, rules, raster or vector graphics) sent to the printer was too complex. Press [Go] to print the transferred data. (Some data might be lost.) To print the job without losing data, from the Configuration Menu in the printer control panel, set PAGE PROTECT=ON, print the job, and then return PAGE PROTECT=AUTO. (For more information, see page B-13.) Do not leave PAGE PROTECT=ON; it might degrade performance. If this message appears often, simplify the print job.</td>
</tr>
<tr>
<td>22 EIO x BUFFER OVERFLOW</td>
<td>Too much data was sent to the EIO card in the specified slot (x). An improper communications protocol may be in use. Press [Go] to clear the message. (Data will be lost.) Check the host configuration. If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>
<td>22 PARALLEL I/O BUFFER OVERFLOW</td>
<td>Too much data was sent to the parallel port. Check for a loose cable connection and be sure to use a high-quality cable (page 8). (Some non-HP parallel cables might be missing pin connections, or might otherwise not conform to the IEEE-1284 specification.) This error can occur if the driver you are using is not IEEE-1284 compliant. For best results, use an HP driver that came with the printer (page 20). Press [Go] to clear the error message. (Data will be lost.) If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>

<tr>
<td>41.3 UNEXPECTED PAPER SIZE</td>
<td>The paper size you are trying to print is not the same as the settings for the tray. Make sure that all trays are correctly adjusted for size. The size displayed on the front of the paper tray must match the size of paper loaded in the tray. (The printer will continue trying to print the job until size settings are correct.) If you are trying to print from Tray 1, make sure the printer's control panel setting for paper size is correctly configured (page B-4). After performing the actions above, press [Go]. The page containing the error will automatically be reprinted. (Or, you might want to press [Cancel Job] to clear the job from the printer's memory.)</td>
</tr>
<tr>
<td>41.x PRINTER ERROR alternates with PRESS GO TO CONTINUE</td>
<td>A temporary printing error occurred. Press [Go]. The page containing the error will automatically be reprinted. If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>
<td>50.x FUSER ERROR</td>
<td>An internal error has occurred. Turn the printer off, and then turn the printer on. If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>
<td>51.x or 52.x PRINTER ERROR</td>
<td>A temporary printing error occurred. Press [Go]. The page containing the error will automatically be reprinted. If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
</tbody>
</table>
### Printer Messages (Continued)

<table>
<thead>
<tr>
<th>Message</th>
<th>Explanation or Recommended Action</th>
</tr>
</thead>
</table>
| 53.xy.zz PRINTER ERROR | There is a problem with the printer's memory. The DIMM that caused the error will not be used. Values of \(x\), \(y\), and \(zz\) are as follows:  
\(x =\) DIMM type  
\(0 = ROM\)  
\(1 = RAM\)  
\(y =\) Device location  
\(0 =\) Internal memory (ROM or RAM)  
\(1\) to \(3 = \) DIMM slots 1, 2, or 3  
\(zz = \) Error number  

Turn the printer off, and then reseat the DIMM that caused the error.  
Turn the printer on.  
If the problem persists, move the DIMM to a different slot or replace the specified DIMM (page C-2).  
If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.) |
| 55 PRINTER ERROR | A temporary printing error occurred.  
Press [Go]. The page containing the error will automatically be reprinted.  
If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.) |
| 56.x, 57.x, 58.x, or 59.x PRINTER ERROR | A temporary printing error occurred.  
Turn the printer off, and then turn the printer on.  
If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.) |
| 62.x PRINTER ERROR | There is a problem with the printer’s memory. The \(x\) value refers to the location of the problem:  
\(0 =\) Internal memory  
\(1\) to \(3 = \) DIMM slots 1, 2, or 3  
You might need to replace the specified DIMM.  
If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.) |
| 64.x PRINTER ERROR | A temporary printing error occurred.  
Turn the printer off, and then turn the printer on.  
If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.) |
## Printer Messages (Continued)

<table>
<thead>
<tr>
<th>Message</th>
<th>Explanation or Recommended Action</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>66.xy.zz INPUT DEVICE FAILURE</strong>&lt;br&gt;alternates with CHECK CABLES AND CYCLE POWER</td>
<td>An error occurred in an external paper handling device. Press [Go] to clear the message. If the message will not clear, turn the printer off, and then turn the printer on. If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>
<td><strong>68 NVRAM ERROR CHECK SETTINGS</strong></td>
<td>An error occurred in the printer’s nonvolatile memory (NVRAM) and one or more printer settings has been reset to its factory default. Print a configuration page and check the printer settings to determine which values have changed (page 105). Hold down [Cancel Job] while turning the printer on. This will clean up the NVRAM by removing old areas that are not being used. If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>
<td><strong>68 NVRAM FULL CHECK SETTINGS</strong></td>
<td>The printer’s nonvolatile memory (NVRAM) is full. Some settings might have been reset to the factory defaults. Print a configuration page and check the printer settings to determine which values have changed (page 105). If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>
<td><strong>69.x PRINTER ERROR</strong></td>
<td>A temporary printing error occurred. Turn the printer off, and then turn the printer on. If this message persists, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
<tr>
<td><strong>79.xxxxx PRINTER ERROR</strong></td>
<td>The printer detected an error. The numbers (xxxxx) indicate the specific type of error. Turn the printer off, and then turn the printer on. Try printing a job from a different software application. If the job prints, go back to the first application and try printing a different file. (If the message only appears with a certain software application or print job, contact the software vendor for assistance.) If the message persists with different software applications and print jobs, record the numbers that appear (xxxxx) and contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)</td>
</tr>
</tbody>
</table>
Correcting Output Quality Problems

Use the examples below to determine which output quality problem you are experiencing, then see the following table to troubleshoot the problem.

Note The examples below depict letter-size paper that has passed through the printer long-edge first. (If the paper has passed through the printer short-edge first, lines and repeating defects will run vertically rather than horizontally.)

![Figure 22 Examples of Output Quality Problems](image-url)
### Troubleshooting Steps

(Follow the steps in the order they are listed.)

Determining Printer Problems

Troubleshooting Flowchart

If the printer is not responding properly, use the flowchart to determine the problem. If the printer does not pass a step, follow the corresponding troubleshooting suggestions.

If you cannot resolve the problem after following the suggestions in this user’s guide, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)

Note
Macintosh users: For more troubleshooting information, see page 100.

1. Does the control panel display READY?  
   - NO
   - The display is blank and the printer’s fan is off.
     - Check the power cord connections and the power switch.
     - Plug the printer into a different outlet.
     - Check that the power supplied to the printer is steady, and meets printer specifications (page A-18).
   - The display is blank but the printer’s fan is on.
     - Press any control panel key to see if the printer responds. Turn the printer off, and then turn the printer on. If this does not work, contact an HP-authorized service or support provider. (See the telephone support flyer included with the printer.)
   - The display is in the wrong language.
     - Turn the printer off. Hold down [Select] while turning the printer on. Press [-Value+] to scroll through the available languages. Press [Select] to save the desired language as the new default. Press [Go] to return to READY. Turn the printer off and on.
   - The display shows garbled or unfamiliar characters.
     - Make sure the desired language is selected from the control panel.
   - A message other than READY is displayed.
     - Turn the printer off, and then turn the printer on.
     - Reseat installed accessories.
   - YES
     - Go to step 2.
     - Go to page 83.
2 Can you print a configuration page?

**NO**

A configuration page does not print.
- Check that all trays are properly loaded, adjusted, and installed in the printer. (See the sections on loading paper, starting on page 28.)
- From the computer, check the print queue or print spooler to see if the printer has been paused. If there are problems with the current print job, or if the printer is paused, a configuration page will not print. (Press [Cancel Job] and try Step 2 again.)

A blank page prints.
- Check that the sealing tape is not still in the print cartridge. (See the start guide or the instructions that came with the print cartridge.)

A message other than READY or PRINTING is displayed.
- Go to page 83.

**YES**

Go to step 3.

Print a configuration page to verify that the printer is feeding paper correctly (page 105).

- The print cartridge might be empty. Install a new print cartridge.
3 Can you print from a software application?

NO

- The job will not print.

   - If the job will not print, and a message is displayed, see page 83.
   - From the computer, check to see if the printer has been paused.
   - If the printer is on a network, check that you are printing to the correct printer. To verify that it is not a network problem, connect the computer directly to the printer with a parallel cable, change the port to LPT1, and try to print.
   - Check the interface cable connections. Disconnect and reconnect the cable at the computer and the printer.
   - Test the cable by trying it on another computer (if possible).
   - If you are using a parallel connection, make sure the cable is IEEE-1284 compliant.
   - If the printer is on a network, print a configuration page (page 105) and verify in the Protocol Information that the server name and the node name match the names in the printer driver.
   - To verify that it is not a computer problem, print from another computer (if possible).
   - Make sure the print job is being sent to the correct port (LPT1, or network printer port, for example).
   - Check that you are using the proper printer driver (page 19).
   - Reinstall the printer driver. (See the start guide.)
   - Check that the port is configured and working properly. (One way to check this is to connect another printer to that port and print.)
   - If printing with the PS driver, from the Printing Menu in the printer’s control panel, set PRINT PS ERRORS=ON, then print the job again. If an error page prints, see the instructions in the next column.
   - From the Configuration Menu in the printer’s control panel, make sure that PERSONALITY=AUTO (page B-11).
   - You might be missing a printer message that could help you solve the problem. From the Configuration Menu in the printer’s control panel, temporarily turn the Clearable Warnings and Auto Continue settings off (page B-13) and then print the job again.

YES

Go to step 4.

- A message other than READY is displayed.

   - The printer might have received a nonstandard PS code. From the Configuration Menu in the printer’s control panel, set PERSONALITY to PS for this print job only. After the job has printed, return the setting to AUTO (page B-11).
   - Make sure the print job is a PS job, and that you are using the PS driver.
   - The printer might have received PS code when it is set to PCL. From the Configuration Menu, set PERSONALITY to AUTO (page B-11).

- Print a short document from a software application.
4 Does the job print as expected?

---

**NO**

- **Print is garbled or only a portion of the page prints.**
  - Check that you are using the proper printer driver (page 20).
  - The data file sent to the printer might be corrupt. To test, try printing it on another printer (if possible), or try a different file.
  - Check the interface cable connections. Test the cable by trying it on another computer (if possible).
  - Replace the printer cable with a high-quality cable (page 9).
  - Reduce the job's complexity, print at a lower resolution (page B-6), or install more printer memory (page C-1).
  - You might be missing a printer message that could help you solve the problem. From the Configuration Menu in the printer's control panel, temporarily turn the Clearable Warnings and Auto Continue settings off (page B-13) and then print the job again.

- **Printing stops in the middle of the job.**
  - [Cancel Job] might have been pressed.
  - Check that the power supplied to the printer is steady, and meets printer specifications (page A-18).

- **Print speed is slower than expected.**
  - Simplify the print job.
  - Add more memory to the printer (page C-1).
  - Turn banner pages off. (See your network administrator.)

- **A control panel setting is not taking effect.**
  - Check settings in the printer driver or software application. (Printer driver and software commands override control panel settings.)

**YES**

continued
Does the job print as expected?  (continued)

**NO**

- The print job is not formatted correctly.
  - Check that you are using the proper printer driver (page 20).
  - Check the software settings. (See the software help.)
  - Try a different font.
  - Make sure the setting of the dial in the tray matches the size of the paper loaded in the tray.
  - If TRAY 1=FIRST is set in Paper Handling Menu, the printer pulls paper from Tray 1, regardless of size.
  - Downloaded resources might have been lost. You might need to download them again.

- Pages are not fed correctly or are damaged.
  - Make sure paper is loaded correctly and that the guides are not too tight or too loose against the paper stack. (See the sections on loading paper, starting on page 28.)
  - If you are trying to print A4 paper, the side guides in the tray might have slipped out of place. (Make sure the side guides are locked into position.)
  - If you are having problems printing custom-size paper, see page 50.
  - If pages are wrinkled or curled, or if the image is skewed on the page, see page 93.

- There are print quality problems.
  - Adjust the print resolution (page B-6).
  - Check that RET is on (page B-6).
  - Go to page 93.
5 Does the printer select the proper trays, output locations, and paper handling accessories?

**NO**

- The printer pulls from the wrong tray.
  - Make sure paper trays are correctly configured for paper size and type (page 57). Print a configuration page to see current tray settings (page 105).
  - Make sure the tray selection (or paper type) in the printer driver or software application is set correctly. (The printer driver and software application settings override the printer's control panel settings.)
  - If you do not want to print from Tray 1, remove any paper loaded in the tray or change the TRAY 1 MODE setting to CASSETTE (page 55). By default, paper loaded in Tray 1 will be printed first.
  - If you want to print from Tray 1, but cannot select the tray from a software application, see page 55.

- An optional accessory is not working properly.
  - Print a configuration page to verify that the accessory is installed properly and is functional (page 105).
  - Configure the printer driver for the installed accessories (see the software help).
  - Turn the printer off, and then turn the printer on.
  - Verify that you are using the correct optional accessory for the printer.
  - If the optional duplexer will not duplex, check that the rear output bin is closed.
  - If the optional duplexer will not duplex, you might need to install more memory (page C-1)

- A message other than READY is displayed.
  - Go to page 83.

**YES**

For other problems, check the Contents, the Index, or the printer software help.
Troubleshooting Flowchart for Macintosh Users

Note

This section lists problems that can happen when using Mac OS 8.6 to Mac OS 9.2.

1. Can you print from a software application?
   - **YES** Go to step 2.
   - **NO** Print a short document from a software application.

   **The Macintosh computer is not communicating with the printer.**
   - Make sure the printer's control panel displays **READY** (page 94).
   - Make sure the correct printer driver is selected in the Chooser. (There will be a printer icon beside the name.)
   - If the printer resides on a network with multiple zones, make sure the correct zone is selected in the AppleTalk Zones box in the Chooser.
   - Make sure the correct printer has been chosen in the Chooser by printing a configuration page (page 105). Make sure the name of the printer displayed on the configuration page matches the printer in the Chooser.
   - Make sure AppleTalk is active. (Select this in the Chooser.)
   - Make sure the computer and printer are on the same network. From Control Panels in the Apple menu, select the Network (or the AppleTalk) control panel and then choose the correct network (for example, LocalTalk or EtherTalk).

   **Auto Setup did not automatically set up the printer.**
   - Set up the printer manually by selecting Configure.
   - Reinstall the printer software. (See the start guide.)
   - Select an alternate PPD (page 102).
   - The PPD might have been renamed. If so, select the renamed PPD (page 103).

   **The printer driver icon does not appear in the Chooser.**
   - Make sure the LaserWriter Chooser extension resides in the Extensions folder. If it is not present anywhere on your system, then obtain the Macintosh LaserWriter driver from Apple.
2 Does the job print as expected?

YES

For other problems, check the Contents, the Index, the printer software help, or page 94.

NO

The print job is not sent to the desired printer.

Another printer with the same or similar name might have received the print job. Verify that the printer name matches the name selected in the Chooser (page 103).

The print job has incorrect fonts.

If you are printing an .EPS file, try downloading the fonts contained in the .EPS file to the printer before printing. Use the HP LaserJet Utility (page 21).

If the document is not printing with New York, Geneva, or Monaco fonts, go into the Page Setup dialog box, and select Options to deselect substituted fonts.

The computer cannot be used while the printer is printing.

Turn Background Printing on in the Chooser. Status messages will be redirected to the Print Monitor, allowing the computer to continue working while the printer is printing.
Selecting an Alternate PPD
Mac OS 8.6 to Mac OS 9.2

1 Open the Chooser from the Apple menu.
2 Click the LaserWriter icon.
3 If you are on a network with multiple zones, select the zone in the AppleTalk Zones box where the printer is located.
4 Click the printer name you want to use in the Select a PostScript Printer box. (Double-clicking will immediately generate the next few steps.)
5 Click Setup... (This button might read Create for first-time setup.)
6 Click Select PPD....
7 Find the desired PPD in the list and click Select. If the desired PPD is not listed, choose one of the following options:
   • Select a PPD for a printer with similar features.
   • Select a PPD from another folder.
   • Select the generic PPD by clicking Use Generic. The generic PPD allows you to print, but limits your access to printer features.
8 In the Setup dialog box, click Select, and then click OK to return to the Chooser.
   
   **Note**
   If you manually select a PPD, an icon might not appear next to the selected printer in the Select a PostScript Printer box. In the Chooser, click Setup, click Printer Info, and then click Update Info to bring up the icon.

9 Close the Chooser.

Mac OS X

1 Open the Print Center, and then click Add Printer.... (The Print Center is located in the Utilities folder, which is in the Applications folder of the hard disk.)
2 In the Printer Model pop-up menu, select a printer name. If the printer name that you want to use is not listed, choose one of the following options:
   • Select a PPD for a printer with similar features.
   • Click Other and select a PPD from another folder.
   • Select the generic PPD by clicking Generic. The generic PPD allows you to print, but limits your access to printer features.
3 Click Add.
4 Close the Print Center.
Renaming the Printer

Note

Use this information to rename a printer when using Mac OS 8.6 to Mac OS 9.2.

If you are going to rename the printer, do this before selecting the printer in the Chooser. If you rename the printer after selecting it in the Chooser, you will have to go back into the Chooser and reselect it.

Use the Set Printer Name feature in the HP LaserJet Utility to rename the printer.

Linux Problem Solving

For information about Linux problem solving, see the HP Linux support homepage: http://hp.sourceforge.net/.
Checking the Printer’s Configuration

From the printer’s control panel, you can print pages that give details about the printer and its current configuration. The following information pages are described here:

- Menu Map
- Configuration Page
- PCL or PS Font List

For a complete list of the printer’s information pages, see the Information Menu in the printer’s control panel (page B-3).

Menu Map

To see the current settings for the menus and items available in the control panel, print a control panel menu map:

1 Press [Menu] until INFORMATION MENU appears.
2 Press [Item] until PRINT MENU MAP appears.
3 Press [Select] to print the menu map.

You might want to store the menu map near the printer for reference. The content of the menu map varies, depending on the options currently installed in the printer. (Many of these values can be overridden from the printer driver or software application.)

For a complete list of control panel items and possible values, see page B-1. To change a control panel setting, see page 14.
Configuration Page

Use the configuration page to view current printer settings, to help troubleshoot printer problems, or to verify installation of optional accessories, such as memory (DIMMs), paper trays, and printer languages.

Note
If an HP JetDirect print server card is installed, a JetDirect configuration page will print out as well.

To print a configuration page:

2. Press [Item] until PRINT CONFIGURATION appears.
3. Press [Select] to print the configuration page.

Figure 23 is a sample configuration page. Numbers in the sample printout match the numbers in the table. The content of the configuration page varies, depending on the options currently installed in the printer.
<table>
<thead>
<tr>
<th></th>
<th><strong>1 Printer Information</strong></th>
<th>Lists the serial number, IP addresses, page counts, and other information for the printer.</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td><strong>Event Log</strong></td>
<td>Lists the number of entries in the log, the maximum number of entries viewable, and the last three entries. The second page of the event log is the manufacturing page. This page contains information that may assist HP Customer Care representatives in solving possible printer problems.</td>
</tr>
<tr>
<td>3</td>
<td><strong>Installed Personalities and Options</strong></td>
<td>Lists all printer languages that are installed (such as PCL and PS) and lists options that are installed in each DIMM slot and EIO slot.</td>
</tr>
<tr>
<td>4</td>
<td><strong>Memory</strong></td>
<td>Lists printer memory, PCL Driver Work Space (DWS), I/O buffering information, and resource saving information.</td>
</tr>
<tr>
<td>5</td>
<td><strong>Security</strong></td>

</tr>
<tr>
<td>6</td>
<td><strong>Paper Trays and Options</strong></td>
<td>Lists the size settings for all trays and lists optional paper handling accessories that are installed.</td>
</tr>
<tr>
<td>7</td>
<td><strong>Toner Level</strong></td>
<td>Provides a graphic representation of how much toner is left in the cartridge.</td>
</tr>
</tbody>
</table>
PCL or PS Font List

Use the font lists to see which fonts are currently installed in the printer. (The font lists also show which fonts are resident on an optional hard disk or flash DIMM.)

To print a PCL or PS font list:

1 Press [Menu] until INFORMATION MENU appears.
2 Press [Item] until PRINT PCL FONT LIST or PRINT PS FONT LIST appears.
3 Press [Select] to print the font list.

The PS font list shows the PS fonts installed, and gives a sample of those fonts. The following describes the information that can be found on the PCL font list:

• **Font** gives the font names and samples.
• **Pitch/Point** indicates the pitch or point size of the font.
• **Escape Sequence** (a PCL programming command) is used to select the designated font. (See the legend at the bottom of the font list page.)

---

**Note**

For step-by-step instructions on using printer commands to select a font with DOS applications, see page D-7.

---

• **Font #** is the number used to select fonts from the printer’s control panel (not the software application). Do not confuse the font # with the font ID, described below. The number indicates the DIMM slot where the font is stored.
• **SOFT:** Downloaded fonts, which stay resident in the printer until other fonts are downloaded to replace them, or until the printer is turned off.
• **INTERNAL:** Fonts that permanently reside in the printer.
• **Font ID** is the number you assign to soft fonts when you download them through software.
Specifications

Overview

This appendix includes:

• Paper specifications

• Printer specifications

• Cable specifications
Paper Specifications

HP LaserJet printers produce excellent print quality. This printer accepts a variety of media, such as cut-sheet paper (including recycled paper), envelopes, labels, transparencies, vellum, and custom-size paper. Properties such as weight, grain, and moisture content are important factors affecting printer performance and output quality.

The printer can use a variety of paper and other print media in accordance with the guidelines in this manual. Paper that does not meet these guidelines may cause the following problems:

- poor print quality
- increased paper jams
- premature wear on the printer, requiring repair

Note

For best results, use only HP brand paper and print media. Hewlett-Packard Company cannot recommend the use of other brands. Because they are not HP products, HP cannot influence or control their quality.

It is possible for paper to meet all of the guidelines in this manual and still not produce satisfactory results. This might be the result of improper handling, unacceptable temperature and humidity levels, or other variables over which Hewlett-Packard has no control.

Before purchasing a large quantity of paper, make sure it meets the requirements specified in this user’s guide and in the HP LaserJet Printer Family Print Media Guide. (To order the guide, see page 8.) Always test paper before purchasing a large quantity.

Caution

Using paper outside HP specifications may cause problems for the printer, requiring repair. This repair is not covered by the Hewlett-Packard warranty or service agreements.
Polyester media

The use of polyester media through the printer for offset printing applications will not effect or impact any existing printer warranties.

However, image print quality defects and jams are possible when using polyester media. Only 1 sheet at a time should be fed through Tray 1.

The media vendor should be contacted to resolve any performance issues related to the use of polyester media. For more information, see the polyester media drawer statement at http://www.hp.com/cposupport/printers/support_doc/bpl07088.html.
## Supported Sizes and Weights of Paper

</tbody>
</table>

¹. The printer supports a wide range of media sizes. Check the printer software for supported sizes.
². Capacity may vary depending on media weight and thickness, and environmental conditions.
³. To print rotated paper, see page 44.
⁴. To print custom-size paper, see page 47.
Supported Types of Paper

The printer supports the following types of paper:

- plain
- letterhead
- prepunched
- bond
- color
- rough
- user-defined (if using HP Web Jetadmin or HP LaserJet Utility)
- preprinted
- transparency
- labels
- recycled
- card stock
- vellum
Guidelines for Using Paper

For best results, use conventional 20 lb (75 g/m²) paper. Make sure the paper is of good quality, and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, and curled or bent edges.

If you are unsure what type of paper you are loading (such as bond or recycled), check the label on the package of paper.

Some paper causes print quality problems, jamming, or damage to the printer.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Problem with Paper</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor print quality or toner adhesion.</td>
<td>Too moist, too rough, too smooth, or embossed; faulty paper lot.</td>
<td>Try another kind of paper, between 100-250 Sheffield, 4-6% moisture content.</td>
</tr>
<tr>
<td>Problems with feeding.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Dropouts, jamming, curl.</td>
<td>Stored improperly.</td>
<td>Store paper flat in its moisture-proof wrapping.</td>
</tr>
<tr>
<td>Increased gray background shading.</td>
<td>Too heavy.</td>
<td>Use lighter paper. Open the rear output bin.</td>
</tr>
<tr>
<td>Excessive curl.</td>
<td>Too moist, wrong grain direction or short-grain construction.</td>
<td>Open the rear output bin. Use long-grain paper. Set FUSER MODE=LOW (page B-5).</td>
</tr>
<tr>
<td>Problems with feeding.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Jamming, damage to printer.</td>
<td>Cutouts or perforations.</td>
<td>Use higher-quality paper with cutouts or perforations.</td>
</tr>
<tr>
<td>Problems with feeding.</td>
<td>Ragged edges.</td>
<td>Use good quality paper.</td>
</tr>
</tbody>
</table>

Note

Do not use letterhead paper that is printed with low-temperature inks, such as those used in some types of thermography.

Do not use raised letterhead.

Lower-quality cutout, perforated, or pre-punched media increases the risk of jams.

The printer uses heat and pressure to fuse toner to the paper. Make sure that any colored paper or preprinted forms use inks that are compatible with the printer’s temperature (400° F or 205° C for 0.1 second).
Use this table to determine approximate equivalent points in weight specifications other than U.S. bond weight. For example, to determine the equivalent of 20 lb U.S. bond weight paper in U.S. cover weight, locate the bond weight (in row 3, second column) and scan across the row to the cover weight (in the fourth column). The equivalent is 28 lb.

Shaded areas indicate a standard weight for that grade.

</tbody>
</table>

1. U.S. Post Card measurements are approximate. Use for reference only.
Labels

Caution
To avoid damaging the printer, use only labels recommended for use in laser printers.

If you have problems printing labels, use Tray 1 and open the rear output bin.

Never print on the same sheet of labels more than once.

Label Construction

When selecting labels, consider the quality of each component:

• Adhesives: The adhesive material should be stable at 400°F (205°C), the printer’s maximum temperature.

• Arrangement: Only use labels with no exposed backing between them. Labels can peel off sheets with spaces between the labels, causing serious jams.

• Curl: Prior to printing, labels must lie flat with no more than 0.5 inch (13 millimeters) of curl in any direction.

• Condition: Do not use labels with wrinkles, bubbles, or other indications of separation.

To print sheets of labels, see page 42.

Transparencies

Transparencies used in the printer must be able to withstand 400°F (205°C), the printer’s maximum temperature, for 0.1 second. Close the rear output bin to print transparencies to the top output bin.

Caution
To avoid damaging the printer, use only transparencies recommended for use in laser printers.

If you have problems printing transparencies, use Tray 1.

To print transparencies, see page 43.
Vellum

Vellum is special lightweight paper similar to parchment. Print vellum from Tray 1 only, and open the rear output bin. Do not print on both sides of vellum.

Vellum used in the printer must be able to withstand 400° F (205° C), the printer’s maximum temperature, for 0.1 second. To print vellum, see page 52.

Envelopes

Envelope Construction

Envelope construction is critical. Envelope fold lines can vary considerably, not only between manufacturers, but also within a box from the same manufacturer. Successful printing on envelopes depends upon the quality of the envelopes. When selecting envelopes, consider the following components:

- **Weight**: The weight of the envelope paper should not exceed 28 lb (105 g/m²), or jamming may result.
- **Construction**: Prior to printing, envelopes should lie flat with less than 0.25 inch (6 mm) curl, and should not contain air. (Envelopes that trap air may cause problems.)
- **Condition**: Make sure envelopes are not wrinkled, nicked, or otherwise damaged.
- **Sizes in Tray 1**: From 3 by 5 inches (76 by 127 mm) to 8.5 by 14 inches (216 by 356 mm) 12.28 by 18.5 inches (312 by 470 mm).
- **Sizes in the optional envelope feeder**: From 3.5 by 6.3 inches (90 by 160 millimeters) to 7 by 10 inches (178 by 254 millimeters).

Always print envelopes from Tray 1 (page 40). To prevent envelopes from wrinkling or jamming, open the rear output bin.
**Envelopes with Double-Side-Seams**

Double-side-seam construction has vertical seams at both ends of the envelope rather than diagonal seams. This style may be more likely to wrinkle. Be sure the seam extends all the way to the corner of the envelope as illustrated below.

![Figure A-1  Envelopes with Double-Side-Seams](image)

**Envelopes with Adhesive Strips or Flaps**

Envelopes with a peel-off adhesive strip or with more than one flap that folds over to seal must use adhesives compatible with the heat and pressure in the printer. The extra flaps and strips might cause wrinkling, creasing, or jams.
### Envelope Margins

The following table gives typical address margins for a Commercial #10 or DL envelope.

<table>
<thead>
<tr>
<th>Type of Address</th>
<th>Top Margin</th>
<th>Left Margin</th>
</tr>
</thead>
<tbody>
<tr>
<td>Return Address</td>
<td>0.6 in (15 mm)</td>
<td>0.6 in (15 mm)</td>
</tr>
<tr>
<td>Delivery Address</td>
<td>2 in (51 mm)</td>
<td>3.5 in (89 mm)</td>
</tr>
</tbody>
</table>

**Note**  
For the best print quality, position margins no closer than 0.6 inch (15 millimeters) from the edges of the envelope.

### Envelope Storage

Proper storage of envelopes helps contribute to good print quality. Envelopes should be stored flat. If air is trapped in an envelope, creating an air bubble, then the envelope may wrinkle during printing.

### Card Stock and Heavy Paper

Many types of card stock can be printed from Tray 1, including index cards and postcards. Some card stock performs better than others because its construction is better suited for feeding through a laser printer.

For optimum printer performance, do not use paper heavier than 53 lb (199 g/m²) in Tray 1 or 28 lb (105 g/m²) in other trays. Paper that is too heavy might cause misfeeds, stacking problems, paper jams, poor toner fusing, poor print quality, or excessive mechanical wear.

**Note**  
Printing on heavier paper may be possible if the tray is not filled to capacity, and paper with a smoothness rating of 100-180 Sheffield is used.
Card Stock Construction

- **Smoothness:** 36-53 lb (135-199 g/m²) card stock should have a smoothness rating of 100-180 Sheffield. 16-36 lb (60-135 g/m²) card stock should have a smoothness rating of 100-250 Sheffield.
- **Construction:** Card stock should lie flat with less than 0.2 inch (5 millimeters) of curl.
- **Condition:** Make sure card stock is not wrinkled, nicked, or otherwise damaged.
- **Sizes:** Use only card stock within the following size ranges:
  - minimum: 3 by 5 inches (76 by 127 mm)
  - maximum: 12.28 by 18.5 inches (312 by 470 mm)

**Note**

Before loading card stock in Tray 1, make sure it is regular in shape and not damaged. Also, make sure the cards are not stuck together.

Card Stock Guidelines

- If cards curl or jam, try printing from Tray 1 and opening the rear output bin.
- Set margins at least 0.08 inch (2 mm) away from the edges of the paper.
Printer Specifications

Physical Dimensions

Figure A-2  HP LaserJet 5100 Printer Dimensions (top and side views)
Figure A-3  HP LaserJet 5100tn/5100dtn Printer Dimensions (top and side views)
**Printer Weight (without print cartridge)**

- HP LaserJet 5100 printer: 50 lb (23 kg)
- HP LaserJet 5100tn printer with optional 500-sheet feeder: 75 lb (34 kg)
- HP LaserJet 5100dtn printer with duplexer and optional 500-sheet feeder: 114 lb (52 kg)
# Environmental Specifications

## Electrical Specifications

<tr>
<td>Printing, 11 ppm</td>
<td>( L_{\text{wad}} = 6.3-6.2 ) bels (A)</td>
</tr>
<tr>
<td>PowerSave</td>
<td>( L_{\text{wad}} = 4.4-0 ) bels (A)</td>
</tr>
</tbody>
</table>

1. You might want to install printers with sound power \( L_{\text{wad}} \geq 6.3 \) bels (A) or more in a separate room or cubicle.

### General Specifications

- **Operating temperature**: 50-91°F (10-32°C)
- **Relative Humidity**: 20-80%
- **Speed, in pages per minute (ppm)**
  - Up to 21 ppm, letter size paper.
  - Up to 22 ppm, A4 size paper.
- **Expandable Memory**: Up to 192 MB total, combining standard and accessory memory DIMMs.
Control Panel Menus

Overview

You can perform most routine printing tasks from the computer through the printer driver or software application. This is the most convenient way to control the printer, and will override the printer's control panel settings. See the help files associated with the software, or for more information on accessing the printer driver, see page 19.

You can also control the printer by changing settings in the printer's control panel. Use the control panel to access printer features not supported by the printer driver or software application.

Note

Printer driver and software commands override the printer's control panel settings.

You can print a menu map from the control panel that shows the current printer configuration (page 14). This appendix lists all the items and possible values for the printer. (Default values are listed in the “Item” column.)

Additional menu items can appear in the control panel, depending on the options currently installed in the printer.
Private/Stored Jobs Menu

This menu provides a list of the private, stored, quick copy, and proof and hold jobs on the printer’s hard disk or RAM memory. The user can print or delete these jobs from the control panel. For more information, see page 59.

**Note**

If there are no private, stored, quick copy, or proof and hold jobs on the printer’s optional hard disk or RAM memory, this menu is not displayed on the control panel.

<table>
<thead>
<tr>
<th>Item</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>[JOBNAME]</td>
<td>The name of the job stored on the printer’s hard disk or in RAM.</td>
</tr>
<tr>
<td>PIN:0000</td>
<td>To print a private job, the user must enter the Personal Identification Number (PIN) assigned to the job in the driver.</td>
</tr>
<tr>
<td>COPIES=X</td>
<td>The number of copies the user wants to print.</td>
</tr>
<tr>
<td></td>
<td>1-999: Prints the requested number of copies of the job.</td>
</tr>
<tr>
<td></td>
<td>DELETE: Deletes the job from the printer’s hard disk or RAM memory.</td>
</tr>
</tbody>
</table>
Information Menu

This menu contains printer information pages that give details about the printer and its configuration. To print an information page, scroll to the desired page and press [Select].

<table>
<thead>
<tr>
<th>Item</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRINT MENU MAP</td>
<td>The menu map shows the layout and current settings of the control panel menu items. For more information, see page 104.</td>
</tr>
<tr>
<td>PRINT CONFIGURATION</td>
<td>The configuration page shows the printer’s current configuration. If an HP JetDirect print server card is installed (HP LaserJet 5100tn and 5100dtn printers), a JetDirect configuration page will print out as well. For more information, see page 105.</td>
</tr>
<tr>
<td>PRINT PCL FONT LIST</td>
<td>The PCL font list shows all the PCL fonts currently available to the printer. For more information, see page 107.</td>
</tr>
<tr>
<td>PRINT PS FONT LIST</td>
<td>The PS font list shows all the PS fonts currently available to the printer. For more information, see page 107.</td>
</tr>
<tr>
<td>PRINT FILE DIRECTORY</td>
<td>This item appears only when a mass storage device (such as an optional flash DIMM or hard disk) containing a recognized file system is installed in the printer. The file directory shows information for all installed mass storage devices. For more information, see page C-1.</td>
</tr>
<tr>
<td>PRINT EVENT LOG</td>
<td>The event log lists printer events or errors.</td>
</tr>
<tr>
<td>SHOW EVENT LOG</td>
<td>This item allows you to view the most recent printer events on the control panel display. Press [-Value+] to scroll through the event log entries.</td>
</tr>
<tr>
<td>PRINT PAPER PATH TEST</td>
<td>The paper path test can be used to verify that the paper path is working properly, or to troubleshoot problems with a type of paper. Choose the input tray, output bin, duplexer (if available), and number of copies.</td>
</tr>
</tbody>
</table>
When paper handling settings are correctly configured through the control panel, you can print by choosing the type and size of paper from the printer driver or software application. For more information, see page 57.

Some items in this menu can be accessed from a software application, or from the printer driver (if the appropriate driver is installed). Printer driver and software application settings override control panel settings. For more information, see page 53.

### Paper Handling Menu

<table>

</table>
### Paper Handling Menu (Continued)

<table>
<thead>
<tr>
<th>Item</th>
<th>Values</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>MANUAL FEED</td>
<td>OFF, ON</td>
<td>Feed the paper manually from Tray 1, rather than automatically from a tray. When MANUAL FEED=ON and Tray 1 is empty, the printer goes offline when it receives a print job and displays MANUALLY FEED [PAPER SIZE]. For more information, see page 56.</td>
</tr>
<tr>
<td>DUPLEX</td>
<td>OFF, ON</td>
<td>This item appears only when an optional duplexer is installed. Set the value to ON to print on both sides (duplex) or OFF to print on one side (simplex) of a sheet of paper. For more information, see page 33.</td>
</tr>
<tr>
<td>BINDING</td>
<td>LONG EDGE, SHORT EDGE</td>
<td>This item appears only when an optional duplexer is installed and the duplex option is on. Choose the binding edge when duplexing (printing on both sides of paper). For more information, see page 33.</td>
</tr>
<tr>
<td>OVERRIDE A4/LETTER</td>
<td>NO, YES</td>
<td>Choose YES to print on letter size paper when an A4 job is sent, but no A4 size paper is loaded in the printer (or to print on A4 size paper when a letter job is sent, but no letter paper is loaded in the printer).</td>
</tr>
<tr>
<td>CONFIGURE FUSER MODE</td>
<td>NO, YES</td>
<td>Configure the fuser mode associated with each paper type. (This is only necessary if you are experiencing problems printing on certain paper types.) The fuser mode menu items are not accessible. Additional items appear (see below). <strong>Note</strong> To see the default fuser mode for each paper type, select YES, scroll back to the Information Menu, and print a menu map (page B-3).</td>
</tr>
<tr>
<td>[TYPE]</td>
<td>NORMAL, LOW, HIGH, VELLUM</td>
<td>This item appears only when CONFIGURE FUSER MODE MENU=YES. Most paper types are set to NORMAL by default. The exceptions are as follows: ROUGH=HIGH VELLUM=VELLUM For a complete list of supported paper types, see page A-7.</td>
</tr>
</tbody>
</table>
Print Quality Menu

Some items in this menu can be accessed from a software application, or from the printer driver (if the appropriate driver is installed). Printer driver and software application settings override control panel settings. For more information, see page 53.

### Print Quality Menu

<table>
<thead>
<tr>
<th>Item</th>
<th>Values</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>RESOLUTION=</td>
<td>300</td>
<td>Select the resolution from the following values: 300: Produces draft print quality at the printer’s maximum speed (22 ppm). The 300 dpi (dots per inch) setting is recommended for some bitmapped fonts and graphics, and for compatibility with the HP LaserJet III family of printers.</td>
</tr>
<tr>
<td>FASTRES 1200</td>
<td>600</td>
<td>600: Produces high print quality at the printer’s maximum speed (22 ppm).</td>
</tr>
<tr>
<td></td>
<td>FASTRES 1200</td>
<td>FASTRES 1200: Produces optimum print quality (comparable to 1200 dpi) at the printer’s maximum speed (22 ppm).</td>
</tr>
<tr>
<td></td>
<td>PRORES 1200</td>
<td>PRORES 1200: Produces optimum print quality (true 1200 dpi) at half the printer’s maximum speed (11 ppm).</td>
</tr>
<tr>
<td>RET=MEDIUM</td>
<td>OFF</td>
<td>Use the printer’s Resolution Enhancement technology (RET) setting to produce print with smooth angles, curves, and edges.</td>
</tr>
<tr>
<td></td>
<td>LIGHT</td>
<td>All print resolutions, including FastRes 1200, benefit from RET.</td>
</tr>
<tr>
<td></td>
<td>MEDIUM</td>
<td>Note It is best to change the resolution from the printer driver or software application. (Driver and software settings override control panel settings.)</td>
</tr>
<tr>
<td></td>
<td>DARK</td>
<td>Note It is best to change the RET setting from the printer driver or software application. (Driver and software settings override control panel settings.)</td>
</tr>
</tbody>
</table>
### Print Quality Menu (Continued)

<table>
<thead>
<tr>
<th>Item</th>
<th>Values</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| ECONOMODE=OFF | OFF, ON      | Turn EconoMode on (to save toner) or off (for high quality). EconoMode creates draft-quality printing by reducing the amount of toner on the printed page by up to 50%.

**Caution**
HP does not recommend full-time use of EconoMode. (If EconoMode is used full-time, it is possible that the toner supply will outlast the mechanical parts in the print cartridge.)

**Note**
It is best to turn EconoMode on or off from the printer driver or software application. (Driver and software settings override control panel settings.)

<table>
<thead>
<tr>
<th>Item</th>
<th>Values</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| TONER DENSITY | 1, 2, 3, 4, 5 | Lighten or darken the print on the page by changing the toner density setting. The settings range from 1 (light) to 5 (dark), but the default setting of 3 usually produces the best results.

**Note**
It is best to change the toner density from the printer driver or software application. (Driver and software settings override control panel settings.)

<table>
<thead>
<tr>
<th>Item</th>
<th>Values</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>CREATE CLEANING PAGE</td>
<td>No value to</td>
<td>Press [Select] to print a cleaning page (for cleaning excess toner from the paper path). In order for the cleaning page to work properly, print the page on copier grade paper (not bond or rough paper). Follow the instructions on the cleaning page. For more information, see page 74.</td>
</tr>
<tr>
<td></td>
<td>select.</td>
<td></td>
</tr>
<tr>
<td>PROCESS CLEANING PAGE</td>
<td>No value to</td>
<td>This item appears only after a cleaning page has been generated (as described above). Press [Select] to process the cleaning page.</td>
</tr>
<tr>
<td></td>
<td>select.</td>
<td></td>
</tr>
</tbody>
</table>
Some items in this menu can be accessed from a software application, or from the printer driver (if the appropriate driver is installed). Printer driver and software application settings override control panel settings. For more information, see page 53.

</tbody>
</table>
| RESOURCE SAVE=   | OFF, ON, AUTO | Dedicate printer memory to save each language's permanent resources. (You might need to add memory to the printer in order for this item to appear.) The amount of memory set aside can be different for each installed language. Some languages might have memory set aside for resource saving without requiring all languages to do so. Any time the amount of memory dedicated to a specific language is changed, all languages will lose all saved resources, including any unprocessed print jobs.  
**OFF**: No language resource saving is performed, and language-dependent resources, such as fonts and macros, are lost when language or resolution changes.  
**ON**: An item will appear for each installed language that allows the user to allocate a particular amount of memory to that language's resource saving area. (See the items below.)  
**AUTO**: The printer automatically determines the amount of memory to use for each installed language's resource saving area. For more information, see page C-6. |
| PCL MEMORY=      | 0K and up   | This item appears only when RESOURCE SAVE=ON. Select the amount of memory used for saving PCL resources. Printer default is the minimum amount of memory needed to perform resource saving for PCL. Press [-Value+] to change settings by increments of 10 (up to 100 KB) or by increments of 100 (above 100 KB). For more information, see page C-6. |
| PS MEMORY=       | 0K and up   | This item appears only when RESOURCE SAVE=ON. Select the amount of memory used for saving PS resources. Printer default is the minimum amount of memory needed to perform resource saving for PS. Press [-Value+] to change settings by increments of 10 (up to 100 KB) or by increments of 100 (above 100 KB). For more information, see page C-6. |

### RAM DISK=AUTO

**Item:** RAM DISK=AUTO  
**Values:** OFF, ON, AUTO  
**Explanation:**

Determine how the RAM disk is configured. This item appears only if there is no optional hard disk installed and the printer has at least 8 MB of memory.

- **OFF:** The RAM disk is disabled.
- **ON:** The RAM disk is enabled. Configure the amount of memory to be used through the following item: RAM DISK SIZE.

**Note**

If the setting is changed from OFF to ON or from OFF to AUTO, the printer will automatically reinitialize when it becomes idle.

### RAM DISK SIZE=xK

**Item:** RAM DISK SIZE=xK  
**Values:** OK and up (This value depends on the amount of installed memory.)  
**Explanation:**

Determine the size of the RAM disk. This item appears if RAM DISK=ON or AUTO.

Press [-Value+] to change settings by increments of 100.

**Note**

This setting cannot be changed if RAM DISK=AUTO. Changing this value will cause the printer to reinitialize when it becomes idle.

### JAM RECOVERY=

**Item:** JAM RECOVERY=AUTO  
**Values:** AUTO, ON, OFF  
**Explanation:**

Determine how the printer behaves when a paper jam occurs.

- **AUTO:** The printer automatically selects the best mode for printer jam recovery (usually ON). This is the default setting.
- **ON:** The printer automatically reprints pages after a paper jam is cleared.
- **OFF:** The printer does not reprint pages following a paper jam. Printing performance might be increased with this setting.

### MAINTENANCE MESSAGE=OFF

**Item:** MAINTENANCE MESSAGE=OFF  
**Values:** OFF  
**Explanation:**

This item appears only after the PERFORM PRINTER MAINTENANCE message displays.

- **OFF:** The PERFORM PRINTER MAINTENANCE message will be cleared and will not be displayed again until the next maintenance is due.

The message should not be turned off unless the printer maintenance has been performed. If the required maintenance is not performed, the printer’s performance will degrade.

<td>• <strong>100TX HALF</strong>: Sets 100 Mbps, Half-duplex operation on the print server.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• <strong>100TX FULL</strong>: Sets 100 Mbps, Full-duplex operation on the print server.</td>
</tr>
</tbody>
</table>
Resets Menu

Use this menu with caution. You can lose buffered page data or printer configuration settings when you select these items. Only reset the printer under the following circumstances:

- You want to restore the printer’s default settings.
- Communication between the printer and computer has been interrupted.

The items in the Resets Menu will clear all memory in the printer, while [Cancel Job] clears only the current job.

<table>
<thead>
<tr>
<th>Item</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>RESET MEMORY</td>
<td>This item clears the printer buffer and the active I/O input buffer, and makes the control panel defaults current. The DATA RECEIVED message might display on the control panel. Resetting memory during a print job can result in data loss.</td>
</tr>
<tr>
<td>RESTORE FACTORY SETTINGS</td>
<td>This item performs a simple reset and restores most of the factory (default) settings. This item also clears the input buffer for the active I/O. The DATA RECEIVED message might display on the printer's control panel.</td>
</tr>
<tr>
<td>RESET ACTIVE I/O CHANNEL</td>
<td>This item performs a simple reset and clears the input and output buffers (for the active I/Os only). The DATA RECEIVED message might display on the printer's control panel.</td>
</tr>
<tr>
<td>RESET ALL I/O CHANNELS</td>
<td>This item performs a simple reset and clears the input and output buffers for all I/Os.</td>
</tr>
<tr>
<td>POWERSAVE</td>
<td>Allows PowerSave feature to be turned on or off.</td>
</tr>
</tbody>
</table>
Overview

The printer has three dual in-line memory module (DIMM) slots for upgrading with:

- More printer memory. DIMMs are available in 16, 32, and 64 MB, for a maximum of 192 MB.
- Flash memory DIMMs, available in 2 and 4 MB. Unlike standard printer memory, flash DIMMs can be used to permanently store downloaded items in the printer, even when the printer is off.
- DIMM-based accessory fonts, macros, EWS, and patterns.
- Other DIMM-based printer languages and printer options.

Note

Single in-line memory modules (SIMMs) used on previous HP LaserJet printers are not compatible with the printer.

You might want to add more memory to the printer if you often print complex graphics or PS documents, print with the optional duplexer, use many downloaded fonts, print at ProRes 1200, or print large paper sizes (such as A3, B4, or 11 x 17).

The printer has two enhanced input/output (EIO) slots for expanding the printer’s capabilities with:

- A network card.
- A mass storage device, such as an optional hard disk.

For ordering information, see page 10.

To find out how much memory is installed in the printer, or to find out what is installed in the EIO slots, print a configuration page (page 105).
Installing a DIMM

1 Turn the printer off. Unplug the power cord and disconnect any cables. (If an optional duplexer is installed, you will need to remove the rear section and the cable tray first. Go to page C-4.)

2 Remove the two captive screws on the back of the printer.

3 Grasp the tabs and pull the formatter board out of the printer. Place it on a flat, non-conductive surface.

4 Remove the DIMM from the antistatic package. Hold the DIMM with fingers against the side edges and thumbs against the back edge. Align the notches on the DIMM with the DIMM slot. (Check that the locks on each side of the DIMM slot are open, or outward.)

5 Press the DIMM straight into the slot (press firmly). Make sure the locks on each side of the DIMM snap inward into place. (To remove a DIMM, the locks must be released.) A firmware DIMM must be placed in slot 1 as shown. A memory DIMM

Caution
Static electricity can damage dual in-line memory modules (DIMMs). When handling DIMMs, either wear an antistatic wrist strap or frequently touch the surface of the DIMM’s antistatic package, then touch bare metal on the printer.

If you have not already done so, print a configuration page to find out how much memory is installed in the printer before adding more memory (page 105).
may be placed in any slot other than slot 1.

6 Slide the formatter board back into the printer and tighten the two screws.

7 If an optional duplexer is installed, reattach the cable tray and the rear section of the duplexer. Reattach any interface cables, and the power cord. Turn the printer on and test the DIMM. (Go to page C-5.)
If an optional duplexer is installed:

1. Slide the rear section of the duplexer away from the printer.

2. Remove the rear section of the duplexer by lifting and rotating the rear section to clear all of the tabs in the grooves, as illustrated.

3. Unplug the power cord and disconnect any cables.

4. Remove the cable tray by lifting it out of position, as illustrated.

Go back to Step 2, on page C-2.

**Note**
Reverse these steps to install the cable tray and the rear section of the duplexer. Make sure the cable tray is properly installed and the cables are routed through the left side.
Checking Memory Installation

Follow this procedure to verify that DIMMs are installed correctly:

1. Check that the printer’s control panel displays **READY** when the printer is turned on. If an error message appears, a DIMM might have been incorrectly installed. Check the printer messages (page 83).

2. Print a new configuration page (page 105).

3. Check the memory section on the configuration page and compare it to the configuration page printed before the DIMM installation. If the amount of memory has not increased, the DIMM might not be installed correctly (repeat the installation procedure) or the DIMM might be defective (try a new DIMM).

---

**Note**

If you installed a printer language (personality), check the Installed Personalities and Options section on the configuration page. This area should list the new printer language.
Adjusting Memory Settings

Resource Saving

Resource Saving allows the printer to keep downloaded resources (permanent downloaded fonts, macros, or patterns) in memory when the printer language or resolution is changed.

If you do not have an optional hard disk or flash DIMM for storing downloaded resources, you might want to change the amount of memory allocated to each language when downloading an unusually large number of fonts, or if the printer is in a shared environment.

The minimum amount of memory that can be allocated to Resource Saving is 400 KB each for PCL and PS.

To determine how much memory to allocate to a language:

1. From the Configuration Menu, set RESOURCE SAVE=ON (page B-12). You might need to add memory to the printer in order for this option to appear in the printer's control panel.

2. Also from the Configuration Menu, choose either PCL MEMORY or PS MEMORY and change the setting to the highest value displayed. This amount will vary depending upon how much memory is installed in the printer.

3. Using a software application, download all the fonts you want to use in the selected language.

4. Print a configuration page (page 105). The amount of memory used by the fonts is listed next to the language. Round this figure up to the nearest 100 KB. (For example, if 475 KB are shown, 500 KB should be reserved.)

5. From the Configuration Menu, set PCL MEMORY or PS MEMORY to the value determined in step 4.

6. Repeat step 3. (You must download all fonts again. See the note below.)

Note

When you change the Resource Saving setting, all downloaded resources (such as fonts or macros) will need to be downloaded again, unless they are stored on an optional hard disk or flash DIMM.
I/O Buffering

To allow the computer to continue working without waiting for the print job to finish queuing, the printer uses a portion of its memory (an I/O buffer) to hold jobs in progress. (If I/O buffering is off, no memory is reserved for this function.)

In most cases, it is best to let the printer automatically reserve memory for I/O buffering. (For each megabyte of memory added to the printer, 100 kilobytes are reserved.)

To speed network printing, you might want to increase the amount of memory reserved for I/O buffering.

To change the I/O Buffer setting:

1. From the I/O Menu, set I/O BUFFER=ON (page B-16).
2. Also from the I/O Menu, set I/O SIZE to the desired value.

Note

When you change the I/O Buffer setting, all downloaded resources (such as fonts or macros) will need to be downloaded again, unless they are stored on an optional hard disk or flash DIMM.
Installing EIO Cards/Mass Storage

Turn off the printer before installing the EIO card or mass storage device.

See Figure 24 for orientation and location of the EIO card or optional mass storage device, such as an optional hard disk.

Use HP Web JetAdmin to delete files from a mass storage device. For more information, see the printer software help.

Figure 24  Installing EIO Cards or Mass Storage Devices
Printer Commands

Overview

Most software applications do not require you to enter printer commands. See your computer and software documentation to find the method for entering printer commands, if needed.

PCL

PCL printer commands tell the printer which tasks to perform or which fonts to use. This appendix provides a quick reference for users who are already familiar with PCL command structure.

Note

Unless PCL 5e backward compatibility is required, HP recommends that PCL 6 printer drivers be used to take full advantage of all printer features. The PCL 5e printer driver in this printer is not backward compatible with older printers that use PCL 5e printer drivers.

HP-GL/2

The printer has the ability to print vector graphics using the HP-GL/2 graphics language. Printing in the HP-GL/2 language requires that the printer leave PCL language and enter HP-GL/2 mode, which can be done by sending the printer PCL code. Some software applications switch languages through their drivers.

PJL

HP's Printer Job Language (PJL) provides control above PCL and other printer languages. The four major functions provided by PJL are: printer language switching, job separation, printer configuration, and status readback from the printer. PJL commands may be used to change printer default settings.

Note

The table at the end of this appendix contains commonly used PCL 5e commands (page D-5). For a complete listing and explanation of how to use PCL, HP-GL/2, and PJL commands, order the *PCL 5/PJL Technical Reference Documentation CD* (page 8).
Understanding PCL Printer Command Syntax

Before using printer commands, compare these characters:

- Lowercase l: \( l \)
- Uppercase O: \( O \)
- Number one: 1
- Number 0: Ø

Many printer commands use the lowercase letter l (\( l \)) and the number one (1), or the uppercase letter O (\( O \)) and the number zero (Ø). These characters may not appear on your screen as shown here. You must use the exact character and case specified for PCL printer commands.

Figure D-1 displays the elements of a typical printer command (in this instance, a command for page orientation).
Combining Escape Sequences

Escape sequences may be combined into one escape sequence string. There are three important rules to follow when combining code:

1. The first two characters after the $\text{EC}$ character (the parameterized and group characters, see Figure D-1) must be the same in all of the commands to be combined.

2. When combining escape sequences, change the uppercase (termination) character in each individual escape sequence to lower case.

3. The final character of the combined escape sequence must be uppercase.

The following is an example of an escape sequence string that would be sent to the printer to select legal paper, landscape orientation, and 8 lines per inch:

$$\text{EC} \& l3A\text{EC} \& l1O\text{EC} \& l8D$$

The following escape sequence sends the same printer commands by combining them into a shorter sequence:

$$\text{EC} \& l3a1o8D$$
Selecting PCL Fonts

PCL printer commands for selecting fonts can be found on the PCL Font List (page 107). A sample section is shown below. Notice the two variable boxes for symbol set and point size.

Univers Medium Scale \textbackslash<esc>|<esc>\{s1p v0s0b4148T I 01

These variables must be filled in or the printer will use defaults. For example, if you want a symbol set that contains line-draw characters, select the 10U (PC-8) or 12U (PC-850) symbol set. Other common symbol set codes are listed in the table on page D-7.

Note

Fonts are either “fixed” or “proportional” in spacing. The printer contains both fixed fonts (Courier, Letter Gothic, and Lineprinter) and proportional fonts (CG Times, Arial®, Times New Roman, and others).

Fixed-spaced fonts are generally used in applications such as spreadsheets and databases, where it is important for columns to line up vertically. Proportional-spaced fonts are generally used in text and word processing applications.

</tbody>
</table>

1. For custom paper, replace "Custompapertype" with the name of the paper, and replace the "#" with the number of characters in the name, plus 1.
2. Order the PCL 5/PJL Technical Reference Documentation CD for symbol set charts or for more information (page 8).
3. The preferred method is to use the primary pitch command.
Embedded Web Server

The embedded Web server (EWS) is a standard feature in the HP LaserJet 5100dtn, and is an available accessory for the HP LaserJet 5100 and HP LaserJet 5100tn. For ordering information, see page 9.

You can use the embedded Web server to view printer and network status and manage printing functions from your computer instead of from the printer control panel or printer management software. The following are examples of how you can use the embedded Web server:

- view printer control panel messages
- determine the remaining life for all printer supplies
- access a link that facilitates ordering printer supplies for your printer
- view and change the input tray configurations
- view and change the printer control panel menu configuration
- print internal pages or view that information from your Web browser
- view and change the network configuration

You must have an IP-based network and a Web browser. The embedded Web server does not support IPX-based printer connections. You can use the embedded Web server with Microsoft Internet Explorer 5.0 and above or with Netscape Navigator 4.7 and above.

To access the embedded Web server

1. Open your Web browser.
2. Type the IP address assigned to the printer (http://ip_address) in the Address or Location field in your Web browser.

If you do not know the printer’s IP address, it is listed on the printer configuration page. For more information about printing a configuration page, see page 105.
Home Pages

The home pages of the embedded Web server are the informational pages for the printer. These include:

- **Printer status page**
  This page shows the printer control panel and any current message. The control panel status lights and buttons are also displayed, so you can change the printer control panel menu settings from this page. Consumable life levels and the input tray media configuration are also displayed.

- **Configuration page**
  The printer configuration page is displayed from this site in the embedded Web server.

- **Event log page**
  This page shows the printer event log.

- **Supplies page**
  This page shows the levels of the consumables for the printer.

- **Usage page**
  This page shows how much of each media type has been used by the printer.

- **Device identification page**
  This page lets you name the device for network management needs, and shows the IP address and server for the printer.
Device Pages

The device pages of the embedded Web server allow you to configure the printer from your computer. These pages can be password protected. Always consult with your network administrator before changing the printer configuration.

- **Configure printer page**
  This page lets you configure all printer settings.

- **Alerts page**
  This page lets you configure notification recipients for various printer events.

- **E-mail page**
  The e-mail addresses of notification recipients of printer events are entered in this page.

- **Order supplies page**
  The remaining life of various consumables is shown on this page, and links to the HP website for ordering supplies is also displayed.

- **Contact information page**
  The name and e-mail address of the primary point of contact for information about the printer is entered into this page. The primary point of contact is usually the network administrator.

- **Security page**
  This page configures the password information for the embedded Web server. Password information should be configured only by the network administrator.

- **Other links page**
  This page is used to enter other websites into the embedded Web server. These sites are displayed on the navigational bar throughout the embedded Web server pages.

- **Refresh rate page**
  This page configures how often the embedded Web server obtains information from the printer regarding printer status.

- **Language page**
  The language that the embedded Web server is displayed in is configured from this page.

- **Device identification page**
  This page lets you name the device for network management needs, and shows the IP address and server for the printer.
Networking Pages

The network pages of the embedded Web server provide access to the HP Jetdirect print server network. These pages include:

- **Network settings page**
  This page provides access to network protocol configuration parameters and other settings.

- **Support settings page**
  This page lets you configure links for support assistance.

- **Admin password page**
  This page lets you limit user access to network configuration parameters for this printer.

- **Access control page**
  This page allows an administrator to limit client system access to this printer.

- **Diagnostic pages**
  These pages provide access to network statistics and configuration page settings useful for troubleshooting.
