HP Officejet 6200 series all-in-one

User Guide
Safety information

Warning  To prevent fire or shock hazard, do not expose this product to rain or any type of moisture.

Always follow basic safety precautions when using this product to reduce risk of injury from fire or electric shock.

Warning  Potential shock hazard

1. Read and understand all instructions in the setup poster.
2. Use only a grounded electrical outlet when connecting the device to a power source. If you do not know whether the outlet is grounded, check with a qualified electrician.
3. Observe all warnings and instructions marked on the product.
4. Unplug this product from wall outlets before cleaning.
5. Do not install or use this product near water or when you are wet.
6. Install the product securely on a stable surface.
7. Install the product in a protected location where no one can step on or trip over the line cord, and where the line cord will not be damaged.
8. If the product does not operate normally, see the online Troubleshooting help.
9. No operator-serviceable parts inside. Refer servicing to qualified service personnel.
10. Use in a well-ventilated area.

Caution  To reduce the risk of fire, use only No. 26 AWG or larger UL Listed or CSA Certified Telecommunication Line Cord.

It is not lawful in many places to make copies of the following items. When in doubt, check with a legal representative first.

- Governmental paper or documents:
  - Passports
  - Immigration papers
  - Selective service papers
  - Identification badges, cards, or insignias
- Governmental stamps:
  - Postage stamps
  - Food stamps
- Checks or drafts drawn on Governmental agencies
- Paper currency, traveler's checks, or money orders
- Certificates of deposit
- Copyrighted works

View the Readme file
HP all-in-one overview

Many HP all-in-one functions can be accessed directly, without turning on your computer. Tasks such as making a copy and sending a fax can be accomplished quickly and easily from your HP all-in-one.

This chapter describes the HP all-in-one hardware features, control panel functions, and how to access the HP Image Zone software. Your HP all-in-one might not have all of the features described in this guide.

Tip You can do more with your HP all-in-one by using the HP Image Zone software installed on your computer during the initial setup. The software provides enhanced copy and scan functionality, as well as troubleshooting tips and product-specific help. For more information, see the onscreen HP Image Zone Help and Use the HP Image Zone to do more with your HP all-in-one.

</table>
13 **Start Copy Black**: Start a black and white copy job.

14 **Start Copy Color**: Start a color copy job.

15 **Start Scan**: Start a scan job and send it to the destination you selected using the Scan To button.

16 **On**: Turn the HP all-in-one on or off. When the HP all-in-one is off, a minimal amount of power is still supplied to the device. To completely disconnect the power supply to the HP all-in-one, turn the device off, and then unplug the power cord.

17 **On light**: When lit, the On light indicates that the HP all-in-one is on. The light blinks while performing a job.

18 **Scan To**: Select a scan destination.

19 **Menu**: Select copy options, including Tray Select, Paper Type, Paper Size, and several other options, using the Menu button in the Copy area.

20 **Reduce/Enlarge**: Change the size of the photo or copy for printing.

21 **Copy quality lights**: Indicates selected copy quality.

22 **Quality**: Control the speed and quality of copies.

23 **Control panel display**: View menus and messages.

24 **Redial/Pause**: Redial the most recently dialed number, or insert a 3-second pause in a fax number.

25 **Auto Answer**: Set the fax function to answer the phone automatically when a fax is sent to the device.

26 **Auto Answer light**: When lit, the HP all-in-one is set to receive faxes automatically.

**Menu Overview**

The following tables provide a quick reference to top-level menus that appear on the HP all-in-one color graphics display.

**Copy Menu**

<table>

Use the HP Image Zone to do more with your HP all-in-one

The HP Image Zone software is installed on your computer when you set up your HP all-in-one. For further information, see the Setup Guide that came with your device.

Access to the HP Image Zone software differs by operating system (OS). For example, if you have a PC and are running Windows, the HP Image Zone software entry point is the HP Director. If you have a Macintosh and are running OS X V10.1.5 or later, the HP Image Zone software entry point is the HP Image Zone window. Regardless, the entry point serves as the launching pad for the HP Image Zone software and services.

You can quickly and easily expand the functionality of your HP all-in-one by using the HP Image Zone software. Look for boxes like this throughout the guide that provide topic-specific tips and helpful information for your projects.

Access the HP Image Zone software (Windows)

Open the HP Director from the desktop icon, system tray icon, or the Start menu. The HP Image Zone software features appear in the HP Director.

Note HP Image Zone software features are not available if you are using an HP JetDirect 175x. For more information, see Connection information.

To open the HP Director

1. Do one of the following:
   - On the Windows desktop, double-click the HP Director icon.
   - In the system tray at the far right of the Windows taskbar, double-click the Hewlett-Packard Digital Imaging Monitor icon.
   - On the taskbar, click Start, point to Programs or All Programs, select HP, and then click HP Director.

2. In the Select Device box, click to see a list of installed devices.

3. Select the HP all-in-one.

Note The icons in the HP Director graphic below might appear differently on your computer. The HP Director is customized to display icons associated with the device that is selected. If the selected device is not equipped with a particular feature or function, then the icon for that feature or function does not display in the HP Director.

Tip If the HP Director on your computer does not contain any icons, an error might have occurred during the software installation. To correct this, use the Control Panel in Windows to completely uninstall the HP Image Zone software; then reinstall the software. For more information, see the Setup Guide that came with your HP all-in-one.
<table>
<thead>
<tr>

<td><strong>Scan Document</strong>: Scans a document that contains text or both text and graphics, and displays it in your selected program.</td>
</tr>
<tr>
<td><img src="image" alt="Make Copies" /></td>
<td><strong>Make Copies</strong>: Displays the Copy dialog box for the selected device, from which you can make a printed copy of your image or document. You can select the copy quality, number of copies, color, and size.</td>
</tr>
</tbody>
</table>
| ![HP Image Zone](image) | **HP Image Zone**: Displays the **HP Image Zone**, where you can:  
  - View and edit images  
  - Print photos in multiple sizes  
  - Make and print a photo album, postcard, or flyer  
  - Make a multimedia CD (only available if the HP Memories Disc software is installed)  
  - Share images through e-mail or a website |

**Note**  
For information on additional features and menu items such as Software Update, Creative Ideas, and HP Shopping, see the onscreen **HP Image Zone Help**.

Menu and list items are also available to help you select the device you want to use, check its status, adjust a variety of software settings, and access the onscreen help. The following table explains these items.

<table>
<thead>
<tr>
<th>Feature</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>Status</td>
<td>Use this feature to display the current status of your HP all-in-one.</td>
</tr>
</tbody>
</table>

**Open the HP Image Zone software (Macintosh OS X v10.1.5 or later)**

**Note**  
Macintosh OS X v10.2.1 and v10.2.2 are not supported.

When you install the **HP Image Zone** software, the **HP Image Zone** icon is placed in the Dock.
Note If you install more than one HP all-in-one, an **HP Image Zone** icon for each device is displayed in the Dock. For example, if you have an HP scanner and an HP all-in-one installed, two **HP Image Zone** icons are present in the Dock, one for each device. However, if you installed two of the same kind of device (for example, two HP all-in-ones) only one **HP Image Zone** icon is displayed in the Dock to represent all devices of that kind.

You can access the **HP Image Zone** software in one of two ways:

- Through the **HP Image Zone** window
- Through the **HP Image Zone** Dock menu

**Open the HP Image Zone window**

Select the **HP Image Zone** icon to open the **HP Image Zone** window. The **HP Image Zone** window has two main elements:

- The display area for the **Products/Services** tabs
  - The **Products** tab gives you access to many of the features of your HP imaging products, such as an installed products pop-up menu and a list of tasks available for the current product. The list may include tasks such as copy, scan, or fax. Clicking on a task opens an application to assist you with that task.
  - The **Services** tab gives you access to digital imaging applications that can help you view, edit, manage, and share your images.
- The **Search HP Image Zone Help** text entry field
  The **Search HP Image Zone Help** text entry field lets you search **HP Image Zone Help** for keywords or phrases.

**To open the HP Image Zone window**

➔ Click the **HP Image Zone** icon in the Dock.
  The **HP Image Zone** window appears.
  The **HP Image Zone** window displays only the **HP Image Zone** features that are appropriate for the selected device.

**Note** The icons in the table below might appear differently on your computer. The **HP Image Zone** window is customized to display feature icons associated with the device that is selected. If the selected device is not equipped with a particular feature or function, then that feature or function does not display in the **HP Image Zone** window.

<table>

<td>Use this feature to search the <strong>HP Image Zone Help</strong>, which provides software help and troubleshooting information for your HP all-in-one.</td>
</tr>
</tbody>
</table>

### Display the HP Image Zone Dock menu

The **HP Image Zone** Dock menu provides a shortcut to **HP Image Zone** services. The Dock menu automatically contains all of the applications available in the **HP Image Zone** window **Services** tab list. You can also set **HP Image Zone** preferences to add other items to the menu, such as tasks from the **Products** tab list or **HP Image Zone Help**.
To display the HP Image Zone Dock menu

→ Do one of the following:
  – Set either HP Gallery or iPhoto as your preferred photo manager.
  – Set additional options associated with your preferred photo manager.
  – Customize the list of items displayed in the HP Image Zone Dock menu.

Access the HP Image Zone software (Macintosh OS earlier than X v10.1.5)

Note Macintosh OS 9 v9.1.5 and later and v9.2.6 and later are supported. Macintosh OS X v10.0 and v10.0.4 are not supported.

The HP Director is the entry point to the HP Image Zone software. Depending on the capabilities of your HP all-in-one, the HP Director lets you initiate device functions such as scanning, copying, or faxing. You can also use the HP Director to open the HP Gallery to view, modify, and manage images on your computer.

Use one of the following methods to open the HP Director. The methods are Macintosh OS specific.

- Macintosh OS X: The HP Director opens automatically during HP Image Zone software installation, and an HP Director icon is created in the Dock for your device. To display the HP Director menu:
  In the Dock, click the HP Director icon for your device.
  The HP Director menu appears.

  Note If you install several HP devices of different kinds (for example, an HP all-in-one, a camera, and an HP scanner), an HP Director icon for each kind of device is displayed in the Dock. However, if you install two of the same kind of device (for example, you may have a laptop that you connect to two different HP all-in-one devices -- one at work and one at home) only one HP Director icon is displayed in the Dock.

- Macintosh OS 9: The HP Director is a standalone application that must be opened before its features can be accessed. Use one of the following methods to open the HP Director:
  – Double-click the HP Director alias on the desktop.
  – Double-click the HP Director alias in the Applications:Hewlett-Packard:HP Photo and Imaging Software folder.
  The HP Director displays only the task buttons that pertain to the selected device.

Note The icons in the table below might appear differently on your computer. The HP Director menu is customized to display feature icons associated with the device that is selected. If the selected device is not equipped with a particular feature or function, then the icon for that feature or function does not display.

### Device Tasks

<table>

## Find more information

A variety of resources, both printed and onscreen, provide information about setting up and using your HP all-in-one.

### Setup Guide

The Setup Guide provides instructions for setting up your HP all-in-one and installing software. Make sure you follow the steps in order.

If you have problems during setup, see Troubleshooting in the last section of the Setup Guide, or the Troubleshooting chapter in this guide.

### User Guide

This User Guide contains information on how to use your HP all-in-one, including troubleshooting tips and step-by-step instructions.

### HP Image Zone Tour

The HP Image Zone Tour is a fun, interactive way to get a brief overview of the software included with your HP all-in-one. You'll learn how HP Image Zone can help you edit, organize, and print your photos.

### HP Director

The HP Director provides easy access to the software applications, default settings, status, and onscreen Help for your HP device. To start the HP Director, double-click the HP Director icon from your desktop.

### HP Image Zone Help

The HP Image Zone Help provides detailed information on using the software for your HP all-in-one.

- The **Get step-by-step instructions** topic provides information on using the HP Image Zone software with HP devices.
- The **Explore what you can do** topic provides more information about the practical and creative things you can do with the HP Image Zone software and your HP devices.
- If you need further assistance or want to check for HP software updates, see the **Troubleshooting and support** topic.
### Onscreen help from your device

Onscreen help is available from your device and contains additional information on select topics. Access the onscreen help from the control panel.

From the control panel, press the **Setup** button next to the ? and then press 1. Use the ▶ to scroll through the list of available topics. Highlight the appropriate topic and press **OK**.

### Readme

The Readme file contains the most recent information which might not be found in other publications.

Install the software to access the Readme file.

### www.hp.com/support

If you have internet access, you can get help and support from the HP website. This website offers technical support, drivers, supplies, and ordering information.
3 Connection information

Your HP all-in-one comes equipped with a USB port so you can connect directly to a computer using a USB cable. It also has networking capability which can be accessed by using an external print server (HP JetDirect 175x). The HP JetDirect can be purchased as an accessory for your HP all-in-one and lets you easily share your device through an existing Ethernet network.

### Connect using a USB cable

Detailed instructions for connecting a computer to your HP all-in-one using a USB cable are included in the Setup Guide that came with your device.

### Use Windows printer sharing

If your computer is on a network, and another computer on the network has an HP all-in-one connected to it by means of a USB cable, you can use that device as your printer using Windows printer sharing. The computer directly connected to the HP all-in-one acts as the host for the printer and has full feature functionality. Your computer, which is referred to as a client, has access only to the print features. All other functions must be performed on the host computer.

**To enable Windows printer sharing**

➔ Refer to the user guide that came with your computer or Windows onscreen Help.

### Use printer sharing (Macintosh OS X)

If your computer is on a network, and another computer on the network has an HP all-in-one connected to it by means of a USB cable, you can use that device as your printer using printer sharing. The computer directly connected to the HP all-in-one acts as the host for the printer and has full feature functionality. Your computer, which is referred to as a client, has access only to the print features. All other functions must be performed on the host computer.

**To enable printer sharing**

1. On the host computer, select **System Preferences** in the Dock. The **System Preferences** window appears.
2. Select **Sharing**.
3. From the **Services** tab, click **Printer Sharing**.

### Set up the HP JetDirect 175x

Your HP all-in-one can be shared by up to five computers on a local area network (LAN) by using the HP JetDirect 175x as a print server for all computers on the network. Simply connect your HP JetDirect to your HP all-in-one and router or hub, and then run the HP JetDirect installation CD. The required printer drivers (INF file) are located on the installation CD for your HP all-in-one.
Note Using the HP JetDirect 175x, you can print and send a scan using Webscan from your computer; you can make copies, send a fax, and print from the control panel of your HP all-in-one.

To network connect your HP all-in-one using the HP JetDirect 175x (Windows)

1 Before you follow the steps below:
   - Uninstall the HP Image Zone software from your computer if your HP all-in-one has been connected to a computer with a USB cable and you now want to connect it to a network using an HP JetDirect. For more information, see Uninstall and reinstall the software.
   - Use the Setup Guide for your HP all-in-one and follow the hardware setup instructions if you are performing an initial installation of both your HP all-in-one and HP JetDirect 175x.

2 Follow the HP JetDirect 175x setup instructions to connect the print server to a LAN.

3 Connect the HP JetDirect to the USB port on the rear of your HP all-in-one.

4 Insert the installation CD that was supplied with the HP JetDirect into your computer's CD-ROM drive.
   You will use this CD to locate the HP JetDirect on the network.

5 Select Install to run the HP JetDirect installer.

6 When prompted, insert the HP all-in-one installation CD.

   Note If you are performing an initial installation of your HP all-in-one and HP JetDirect 175x, do not run the HP all-in-one setup wizard. Just install the drivers following the instructions below.

   If you decide at some later date to connect your HP all-in-one using a USB cable, then insert the HP all-in-one installation CD and run the setup wizard.

7 Follow the steps appropriate for your operating system:

   If you are using Windows XP or 2000:
   a Browse to the root directory of the CD and select the correct driver .inf for your HP all-in-one.
      The printer driver file, located in the root directory, is hpoprn08.inf.

   If you are using Windows 98 or ME:
   a Browse the CD for the "Drivers" folder and find the correct language subfolder.
      For example, for English speaking customers, navigate to the \enu\drivers \win9x_me directory, where enu is the English language directory and win9x_me is for Windows ME. The printer driver file is hpoupdrx.inf.
   b Repeat for each of the drivers required.

8 Complete the installation.

   Note If, at some later time, you want to connect to your PC using a USB cable, disconnect the HP JetDirect from your HP all-in-one, uninstall the HP printer driver from your computer, and follow the instructions provided in the Setup Guide that came with your HP all-in-one.

To network connect your HP all-in-one using the HP JetDirect 175x (Macintosh)

1 Follow the HP JetDirect 175x setup instructions to connect the print server to a LAN.
2 Connect the HP JetDirect to the USB port on the rear of your HP all-in-one.

3 Do one of the following:
   – If you are performing an initial installation of your HP all-in-one, make sure you insert the HP all-in-one installation CD into the CD-ROM drive on your computer and run the HP all-in-one setup wizard. The network support software for your computer is installed at this time. When the installation is finished, the **HP All-in-One Setup Assistant** appears on your computer.
   – From the Disk Drive, open the **HP All-in-One Setup Assistant** from the following location: Applications:Hewlett-Packard:HP Photo & Imaging Software:HP AiO Software
     The **HP All-in-One Setup Assistant** appears on your computer.

4 Follow the onscreen prompts and provide the information requested.
   **Note** Make sure you click **TCP/IP Network** on the connection screen.

### Use Webscan

Webscan lets you perform a basic scan through the HP JetDirect 175x using just a Web browser. It also lets you perform the scan from your HP all-in-one without the device software installed on your computer. Just enter the IP address of the HP JetDirect in a Web browser and access the HP JetDirect embedded Web server and Webscan.

The user interface for Webscan is unique to using the HP JetDirect and does not support scan-to destinations like the **HP Image Zone** scanning software. The e-mail functionality of Webscan is limited, so it is recommended you use the **HP Image Zone** scanning software if you are not connected using the HP JetDirect.

### To use Webscan

1 Briefly press and release the test button on the rear of the HP JetDirect 175x. The HP JetDirect network configuration page prints on the HP all-in-one.

2 Enter the IP address of the HP JetDirect (obtained from the network configuration page) in a Web browser on your computer. The HP JetDirect Web server opens in the browser window.

3 Select Scan.

4 Follow the onscreen instructions.
4 Work with photos

Your HP all-in-one allows you to transfer, edit, share, and print photos in several different ways. This chapter contains a brief overview of the wide range of options for performing each of these tasks, depending on your preferences and computer setup. More detailed information for each task is available in other chapters within this guide, or in the onscreen HP Image Zone Help.

Transfer photos

You have several different options for transferring photos. You can transfer photos to your HP all-in-one or computer. For more information, see the section below specific to your operating system.

Transfer photos using a Windows PC

The graphic below shows several methods for transferring photos to your Windows PC. For more information, see the list below the graphic.

A Transfer a photo by scanning a photo on your HP all-in-one directly to your Windows PC using HP Instant Share.

B Transfer a photo from your HP digital camera to your Windows PC.

Note You can only print photos using the PictBridge camera port on the front of your HP all-in-one. You cannot transfer photos from the camera to your computer using the HP all-in-one PictBridge camera port.

Transfer photos using a Macintosh

The graphic below shows several methods for transferring photos to your Macintosh. For more information, see the list below the graphic.
Transfer a photo by scanning a photo on your HP all-in-one directly to your Macintosh using HP Instant Share.

Transfer a photo from your HP digital camera to your Macintosh.

Note: You can only print photos using the PictBridge camera port on the front of your HP all-in-one. You cannot transfer photos from the camera to your computer using the HP all-in-one PictBridge camera port.

Edit photos

You have several different options for editing photos. For more information, see the section below specific to your operating system.

Edit photos using a Windows PC

The graphic below shows one method for editing photos using a Windows PC. For more information, see the description below the graphic.

Edit a photo on your Windows PC using the HP Image Zone software.

Edit photos using a Macintosh

The graphic below shows several methods for editing photos using a Macintosh. For more information, see the list below the graphic.
A Edit a photo on your Macintosh using the **HP Image Zone** software.

B Edit a photo on your Macintosh using the iPhoto software.

---

**Share photos**

You have several different options for sharing photos with friends and family. For more information, see the section below specific to your operating system.

**Share photos using a Windows PC**

The graphic below shows one method for sharing photos using a Windows PC. For more information, see the information below the graphic.

Share photos from your USB-connected HP all-in-one using the HP Instant Share service. Scan the photos to the HP Instant Share destination. This sends the scanned image to the HP Instant Share tab within the **HP Image Zone** software. From there, you can select a service (such as e-mail) to send the photos through the HP Instant Share service to your friends or family.

**Share photos using a Macintosh**

The graphic below shows one method for sharing photos using a Macintosh. For more information, see the information below the graphic.

Share photos from your USB-connected HP all-in-one using the HP Instant Share service. Scan the photos to the HP Instant Share destination. This sends the scanned...
image to the HP Instant Share client application software. From there, you can select a service (such as e-mail) to send the photos through the HP Instant Share service to your friends or family.

Print photos
You have several different options for printing photos. For more information, see the section below specific to your operating system.

Print photos using a Windows PC
The graphic below shows several methods for printing photos using a Windows PC. For more information, see the list below the graphic.

5 Load originals and load paper

This chapter provides instructions for loading originals in the automatic document feeder or on the glass to copy, scan, or fax; choosing the best paper type for your job; loading paper in the input tray; and avoiding paper jams.

Load originals

You can load an original for a copy, fax, or scan job in the automatic document feeder or on the glass. Originals that are loaded in the automatic document feeder will automatically be fed into the HP all-in-one.

Load an original in the automatic document feeder

You can copy, scan, or fax a multiple-page letter-, A4-, or legal-size document (up to 20 pages) by placing it in the document feeder tray.

⚠️ Warning  Do not load photos in the automatic document feeder; this might cause damage to your photos.

Note Some features, such as the Fit to Page and Fill Entire Page copy features, do not work when you load your originals in the automatic document feeder. For more information, see Load an original on the glass.

To load an original in the automatic document feeder

1 Load your originals face up in the document feeder tray with the top of the page on the left. Keep sliding the paper leftward into the automatic document feeder until you hear a beep. This indicates that the HP all-in-one detected the pages you loaded. The automatic document feeder holds a maximum of 20 sheets of plain paper.

Tip For more help on loading originals in the automatic document feeder, refer to the diagram engraved in the document feeder tray.

2 Slide the paper guides inward until they stop at the left and right edges of the paper.

Load an original on the glass

You can copy, scan, or fax up to letter- or A4-size single-page originals by loading them on the glass, as described here. If your original contains multiple full-size pages,
load it in the automatic document feeder. For more information, see Load an original in the automatic document feeder.

Note  Many of the special features will not work correctly if the glass and lid backing are not clean. For more information, see Clean the HP all-in-one.

To load an original on the glass
1  Remove all originals from the document feeder tray, and then lift the lid on the HP all-in-one.
2  Place your original face down on the right front corner of the glass.
   Tip  For more help on loading an original, refer to the guides along the front and right edges of the glass.
3  Close the lid.

Choose papers for printing and copying
You can use many types and sizes of paper in your HP all-in-one. Review the following recommendations to get the best printing and copying quality. Whenever you change paper types or sizes, remember to change those settings.

Recommended papers
If you want the best print quality, HP recommends using HP papers that are specifically designed for the type of project you are printing. If you are printing photos, for example, load glossy or matte photo paper in the input tray. If you are printing a brochure or presentation, use a type of paper specifically designed for that purpose.
For more information about HP papers, see the onscreen HP Image Zone Help, or go to www.hp.com/support.

Papers to avoid
Using paper that is too thin, paper that has a slick texture, or paper that stretches easily can cause paper jams. Using paper that has a heavy texture or does not accept ink can cause printed images to smear, bleed, or not fill in completely.
We do not recommend printing to the following papers:
- Paper with cutouts or perforations (unless specifically designed for use with HP inkjet devices).
- Highly textured stock, such as linen. It may not print evenly, and the ink can bleed into these papers.
- Extremely smooth, shiny, or coated papers not specifically designed for your HP all-in-one. They can jam the HP all-in-one or repel the ink.
- Multi-part forms (such as duplicate and triplicate forms). They can wrinkle or get stuck. The ink is also more likely to smear.
- Envelopes with clasps or windows.
- Banner paper.

We do not recommend copying to the following papers:
- Any size paper other than letter, A4, 10 by 15 cm (4 by 6 inch), 5 by 7 inch, Hagaki, L, or legal. Depending on your country/region, some of these papers might not be available to you.
- Paper with cutouts or perforations (unless specifically designed for use with HP inkjet devices).
- Envelopes.
- Banner paper.
- Transparency film other than HP Premium Inkjet Transparency Film or HP Premium Plus Inkjet Transparency Film.
- Multiple-part forms or label stock.

Load paper

This section describes the procedure for loading different types and sizes of paper into your HP all-in-one for your copies, printouts, or faxes.

Tip To help prevent rips, wrinkles, and curled or bent edges, store all paper flat in a resealable bag. If the paper is not stored properly, extreme changes in temperature and humidity might result in curled paper that does not work well in the HP all-in-one.

Load full-size paper

You can load many types of letter, A4, or legal paper into the input tray of your HP all-in-one.

To load full-size paper in the input tray
1 Remove the output tray, and slide the paper-width guide to its outermost position.
2 Tap a stack of paper on a flat surface to align the edges, and then check the paper for the following:
   – Make sure it is free of rips, dust, wrinkles, and curled or bent edges.
   – Make sure all the paper in the stack is the same size and type.
3 Insert the stack of paper into the input tray with the short edge forward and the print side down. Slide the stack of paper forward until it stops.

Note Make sure that the HP all-in-one is idle and silent when you load paper into the input tray. If the HP all-in-one is servicing the print cartridges or otherwise engaged in a task, the paper stop inside the device might not be in place. You could push the paper too far forward, causing the HP all-in-one to eject blank pages.

Tip If you are using letterhead, insert the top of the page first with the print side down. For more help on loading full-size paper and letterhead, refer to the diagram engraved in the base of the input tray.

4 Slide the paper-width guide inward until it stops at the edges of the paper. Do not overload the input tray; make sure the stack of paper fits within the input tray and is no higher than the top of the paper-width guide.

5 Replace the output tray.
6 Pull the output tray extender toward you, as far as it will go. Flip the paper catch at the end of the output tray extender to open the extender the rest of the way.

Load 10 by 15 cm (4 by 6 inch) photo paper

You can load 10 by 15 cm (4 by 6 inch) photo paper into the paper tray of your HP all-in-one. For the best results, use a recommended type of 10 by 15 cm (4 by 6 inch) photo paper. For more information, see Recommended papers.

In addition, for best results, set the paper type and paper size before copying or printing. For information on changing paper settings, see the onscreen HP Image Zone Help.

Tip To help prevent rips, wrinkles, and curled or bent edges, store all paper flat in a resealable bag. If the paper is not stored properly, extreme changes in temperature and humidity might result in curled paper that does not work well in the HP all-in-one.

To load 10 by 15 cm (4 by 6 inch) photo paper in the input tray

1 Remove the output tray.
2 Remove all paper from the input tray.
3 Insert the stack of photo paper into the far right side of the input tray with the short edge forward and the glossy side down. Slide the stack of photo paper forward until it stops.
   If the photo paper you are using has perforated tabs, load the photo paper so that the tabs are closest to you.
4 Slide the paper-width guide inward against the stack of photo paper until it stops. Do not overload the input tray; make sure the stack of photo paper fits within the input tray and is no higher than the top of the paper-width guide.
Load postcards or Hagaki cards

You can load postcards or Hagaki cards into the input tray of your HP all-in-one. For the best results, set the paper type and size before printing or copying. For more information, see the onscreen **HP Image Zone Help**.

To load postcards or Hagaki cards in the input tray

1. Remove the output tray.
2. Remove all paper from the input tray.
3. Insert the stack of cards into the far right side of the input tray with the short edge forward and the print side down. Slide the stack of cards forward until it stops.
4. Slide the paper-width guide inward against the stack of cards until it stops. Do not overload the input tray; make sure the stack of cards fits within the input tray and is no higher than the top of the paper-width guide.

Load envelopes

You can load one or more envelopes into the input tray of your HP all-in-one. Do not use shiny or embossed envelopes or envelopes that have clasps or windows.

Note: For specific details on how to format text for printing on envelopes, consult the help files in your word processing software. For best results, consider using a label for the return address on envelopes.

To load envelopes

1. Remove the output tray.
2. Remove all paper from the input tray.
3. Insert one or more envelopes into the far right side of the input tray with the envelope flaps up and to the left. Slide the stack of envelopes forward until it stops.
Tip For more help on loading envelopes, refer to the diagram engraved in the base of the input tray.

4 Slide the paper-width guide inward against the stack of envelopes until it stops. Do not overload the input tray; make sure the stack of envelopes fits within the input tray and is no higher than the top of the paper-width guide.

5 Replace the output tray.

Load other types of paper

The following table provides guidelines for loading certain types of paper. For best results, adjust the paper settings each time you change paper sizes or paper types. For information on changing paper settings, see the onscreen **HP Image Zone Help**.

Note Not all paper sizes and paper types are available with all the functions on the HP all-in-one. Some paper sizes and paper types can only be used if you are starting a print job from the **Print** dialog box in a software application. They are not available for copying or faxing. Papers that are only available for printing from a software application are indicated as such, below.

| HP papers                  | - HP Premium Paper: Locate the gray arrow on the nonprinting side of the paper, and then slide the paper into the input tray with the arrow side facing up.  
                             - HP Premium Inkjet Transparency Film: Insert the film so that the white transparency strip (with arrows and the HP logo) is on top and is going into the input tray first.  
                             Note The HP all-in-one cannot automatically detect transparency film. For best results, set the paper type to transparency film before printing or copying onto transparency film.  
                             - HP Iron-On Transfers: Flatten the transfer sheet completely before using it; do not load curled sheets. (To prevent curling, keep transfer sheets sealed in the original package until you are ready to use them.) Locate the blue stripe on the nonprinting side of the transfer paper and then manually feed one sheet at a time into the input tray with the blue stripe facing up.  
                             - HP Matte Greeting Cards, HP Photo Greeting Cards, or HP Textured Greeting Cards: Insert a small stack of HP greeting... |

| Labels (for printing from a software application only) | Always use letter or A4 label sheets designed for use with HP inkjet devices (such as Avery inkjet labels), and make sure that the labels are not more than two years old. Labels on older sheets might peel off when the paper is pulled through the HP all-in-one, causing subsequent paper jams.  
1. Fan the stack of labels to make sure none of the pages are sticking together.  
2. Place a stack of label sheets on top of full-size plain paper in the input tray, label side down. Do not insert labels one sheet at a time. |

**Avoid paper jams**

To help avoid paper jams, follow these guidelines:

- Prevent curled or wrinkled paper by storing all unused paper flat in a resealable bag.
- Remove printed papers from the output tray frequently.
- Ensure that paper loaded in the input tray lays flat and the edges are not bent or torn.
- Do not combine different paper types and paper sizes in the input tray; the entire stack of paper in the input tray must be the same size and type.
- Adjust the paper-width guide in the input tray to fit snugly against all paper. Make sure the paper-width guide does not bend the paper in the input tray.
- Do not force paper too far forward in the input tray.
- Use paper types that are recommended for your HP all-in-one. For more information, see Choose papers for printing and copying.

For more information about clearing paper jams, see Paper troubleshooting.
Use a PictBridge camera

The HP all-in-one supports the PictBridge standard, which lets you connect any PictBridge-compatible digital camera to the camera port and print JPEG photos contained on the memory card in the camera. The photos are printed directly from the digital camera. For more information about printing from your camera, see the documentation that came with your digital camera.

To print photos from a PictBridge-compatible camera

1. Make sure the HP all-in-one is turned on and that the initialization process is finished.
2. Connect your PictBridge-compatible digital camera to the camera port on the front of your HP all-in-one using the USB cable supplied with your camera.
3. Turn on your camera and make sure it is in PictBridge mode.

Note When the camera is connected correctly, the status light next to the camera port blinks while the camera is being accessed. The light also stops blinking and stays lit when printing from the camera.

If the camera is not PictBridge-compliant or is not in PictBridge mode, the status light blinks amber and an error message displays on your computer monitor (if you have the HP all-in-one software installed). Disconnect the camera, correct the problem on the camera and reconnect. For more information about PictBridge camera port troubleshooting, see the 6200 series Troubleshooting section in the HP Image Zone Help.

After you successfully connect your PictBridge-compliant camera to the HP all-in-one, you can print your photos. Make sure the size of the paper loaded in the HP all-in-one matches the setting on your camera. If the paper size setting on your camera is set to the default, the HP all-in-one uses the paper that is currently loaded in the input tray. Refer to the user guide that came with your camera for detailed information on printing from the camera.

Tip If your digital camera is an HP model that does not support PictBridge, you can still print directly to the HP all-in-one. Connect the camera to the USB port on the back of the HP all-in-one instead of to the camera port. Direct-printing from the back port works with HP digital cameras only.
7 Use the copy features

The HP all-in-one allows you to produce high-quality color and black-and-white copies on a variety of paper types, including transparencies. You can enlarge or reduce the size of an original to fit a specific paper size, adjust the darkness and color intensity of the copy, and use special features to make high-quality copies of photos, including 10 by 15 cm (4 by 6 inch) borderless copies.

This chapter provides instructions for increasing copy speed, enhancing copy quality, setting the number of copies to print, guidelines for choosing the best paper type and size for your job, and making iron-on transfers.

Tip For the best copy performance on standard copy projects, set the paper size to Letter or A4, the paper type to Plain Paper, and the copy quality to Fast.

For information on setting the paper size, see Set the copy paper size.

For information on setting the paper type, see Set the copy paper type.

For information on setting the copy quality, see Increase copy speed or quality.

You can learn how to perform photo copy projects, such as making borderless copies of photos, enlarging and reducing the copies of photos to suit your preference, making multiple copies of photos on a page, and making quality enhancements to copies of faded photos.

- Make a 10 by 15 cm (4 by 6 inch) borderless copy of a photo.
- Copy a 10 by 15 cm (4 by 6 inch) photo onto a full-size page.
- Enhance light areas of your copy.

Set the copy paper size

You can set the paper size on your HP all-in-one. The paper size you select should match what is loaded in your input tray. The default paper size setting for copying is Automatic, which causes the HP all-in-one to detect the size of paper in the input tray.

Set the copy paper type
You can set the paper type on your HP all-in-one. The default paper type setting for copying is Automatic, which causes the HP all-in-one to detect the type of paper in the input tray.

If you copy onto special papers, or if you experience poor print quality by using the Automatic setting, you can set the paper type manually.

Refer to the following table to determine which paper type setting to choose based on the paper loaded in the input tray.
Increase copy speed or quality

The HP all-in-one provides three options that affect copy speed and quality:

- **Best** produces the highest quality for all paper and eliminates the banding (striping) effect that sometimes occurs in solid areas. **Best** copies more slowly than the other quality settings.
- **Normal** delivers high-quality output and is the recommended setting for most of your copying. **Normal** copies faster than **Best**.
- **Fast** copies faster than the **Normal** setting. The text is comparable to the quality of the **Normal** setting, but the graphics might be lower quality. The **Fast** setting uses less ink and extends the life of your print cartridges.

To change the copy quality from the control panel

1. Make sure you have paper loaded in the input tray.
2. Load your original face down on the right front corner of the glass or face up in the document feeder tray.
   - If you use the document feeder tray, place the pages so that the top of the document goes in first.
3. In the Copy area, press **Quality** until you illuminate the light next to a quality setting.
4. Press **Start Copy Black** or **Start Copy Color**.

Change default copy settings

When you change copy settings from the control panel, the settings apply only to the current copy job. To apply copy settings to all future copy jobs, you can save the settings as defaults.

When you change copy settings from the control panel or the HP Director, the settings apply only to the current copy job. To apply copy settings to all future copy jobs, you can save the settings as defaults.

To set default copy settings from the control panel

1. Make any needed changes to the Copy settings.
2. In the Copy area, press Menu until Set New Defaults appears.
3. Press $\rightarrow$ until Yes appears.
4. Press OK to accept the settings as the new default settings.

The settings you specify here are only saved on the HP all-in-one. They do not adjust the settings in the software. You can save your most frequently used settings by using the HP Image Zone software that came with your HP all-in-one. For more information, see the onscreen HP Image Zone Help.

Make multiple copies of the same original

You can set the number of copies that you want to print by using the Number of Copies option.

1. Make sure you have paper loaded in the input tray.
2. Load your original face down on the right front corner of the glass or face up in the document feeder tray.
   If you use the document feeder tray, place the pages so that the top of the document goes in first.
3. In the Copy area, press Menu until Number of Copies appears.
4. Press $\rightarrow$ or use the keypad to enter the number of copies, up to the maximum.
   (The maximum number of copies varies by model.)

   Tip: If you hold down either of the arrow buttons, the number of copies changes by increments of 5 to make it easier to set a large number of copies.

5. Press Start Copy Black or Start Copy Color.
   In this example, the HP all-in-one makes three copies of the original 10 by 15 cm (4 by 6 inch) photo.

Copy a two-page black-and-white document

You can use the HP all-in-one to copy a single- or multiple-page document in color or black and white. In this example, the HP all-in-one is used to copy a two-page black-and-white original.

To copy a two-page document from the control panel

1. Make sure you have paper loaded in the input tray.
2 Load your letter- or A4-sized originals in the document feeder tray. Place the pages so that the top of the document goes in first.
3 Press **Start Copy Black**.

**Make a 10 by 15 cm (4 by 6 inch) borderless copy of a photo**

For the best quality when copying a photo, load photo paper in the input tray and change your copy settings for the correct paper type and photo enhancement. You might also want to use the photo print cartridge for superior print quality. With the tri-color and photo print cartridges installed, you have a six-ink system. See **Use a photo print cartridge** for more information.

**To copy a photo from the control panel**

1 Load 10 by 15 cm (4 by 6 inch) photo paper in the input tray.
   
   **Tip** When making borderless copies, you must have photo paper (or other specialty paper) loaded.
2 Load your original photo face down on the right front corner of the glass. Position the photo on the glass so the long edge of the photo is along the front edge of the glass.
3 Press **Start Copy Color**.
   
   The HP all-in-one makes a 10 by 15 cm (4 by 6 inch) borderless copy of your original photo, as shown below.

   ![Photo copy example](image)

   **Tip** If the output is not borderless, then set the paper size to **10x15 cm Borderless** or **4x6 Borderless**, set the paper type to **Photo Paper**, set the **Photo** enhancement, and then try again.

   For more information on setting the paper size, see **Set the copy paper size**.
   
   For information on setting the paper type, see **Set the copy paper type**.
   
   For information on setting the **Photo** enhancement, see **Enhance light areas of your copy**.

**Copy a 10 by 15 cm (4 by 6 inch) photo onto a full-size page**

You can use the **Fill Entire Page** setting to enlarge or reduce your original to fill the printable area of the paper size loaded in the input tray. In this example, **Fill Entire Page** is used to enlarge a 10 by 15 cm (4 by 6 inch) photo to create a full-size borderless copy. When copying a photo, you might want to use the photo print cartridge for superior print quality. With the tri-color and photo print cartridges installed, you have a six-ink system. See **Use a photo print cartridge** for more information.
Note  In order to achieve a borderless print without changing the proportions of the original, the HP all-in-one might crop some of the image around the margins. In most cases, this cropping will not be noticeable.

To copy a photo onto a full-size page from the control panel

Note  This feature will not work correctly if the glass and lid backing are not clean. For more information, see Clean the HP all-in-one.

1  Load letter or A4 photo paper in the input tray.
   Tip  When making borderless copies, you must have photo paper (or other specialty paper) loaded.

2  Load your original photo face down on the right front corner of the glass. Position the photo on the glass so the long edge of the photo is along the front edge of the glass.

3  In the Copy area, press Reduce/Enlarge until Fill Entire Page appears.

4  Press Start Copy Color.
   Tip  If the output is not borderless, then set the paper size to Letter Borderless or A4 Borderless, set the paper type to Photo Paper, set the Photo enhancement, and then try again.
   For more information on setting the paper size, see Set the copy paper size.
   For information on setting the paper type, see Set the copy paper type.
   For information on setting the Photo enhancement, see Enhance light areas of your copy.

Resize an original to fit onto letter or A4 paper

If the image or text on your original fills the entire sheet with no margins, use Fit to Page or Full Page 91% to reduce your original and prevent unwanted cropping of the text or images at the edges of the sheet.
You can also enlarge a small photo to fit within the printable area of a full-size page. In order to do this without changing the proportions of the original or cropping the edges, the HP all-in-one might leave an uneven amount of white space around the edges of the paper.

**To resize a document from the control panel**
1. Make sure you have paper loaded in the input tray.
2. Load your original face down on the right front corner of the glass or face up in the document feeder tray.
   Place the page in the document feeder tray so that the top of the document goes in first.
3. In the Copy area, do one of the following:
   - If you loaded your original in the document feeder tray, press Reduce/Enlarge until Full Page 91% appears.
   - If you want to use Fit to Page, press Reduce/Enlarge until Fit to Page appears.
4. Press Start Copy Black or Start Copy Color.

**Resize an original using custom settings**

You can use your own custom settings to reduce or enlarge a copy of a document.

**To set a custom size from the control panel**
1. Make sure you have paper loaded in the input tray.
2. Load your original face down on the right front corner of the glass or face up in the document feeder tray.
3. In the Copy area, press Reduce/Enlarge until Custom 100% appears.
4. Press \( \text{ or use the keypad to enter a percentage to reduce or enlarge the copy, and then press } \text{OK. } \)
   (The minimum and maximum percentage to resize a copy varies by model.)
5. Press Start Copy Black or Start Copy Color.

**Copy a legal-size document onto letter paper**

You can use the Legal > Ltr 72% setting to reduce a copy of a legal-size document to a size that fits onto letter paper.

**Note** The percentage in the example, Legal > Ltr 72%, might not match the percentage that appears in the control panel display.

1. Make sure you have paper loaded in the input tray.
2. Load your legal-size document face up in the document feeder tray with the top of the page on the left.
3. In the Copy area, press Reduce/Enlarge until Legal > Ltr 72% appears.
4. Press Start Copy Black or Start Copy Color.
   The HP all-in-one reduces the size of your original to fit within the printable area of the letter paper, as shown below.
Copy a faded original

You can use the Lighter/Darker option to adjust the lightness and darkness of the copies you make. You can also adjust the color intensity to make colors on your copy more vivid or more subtle.

1. Make sure you have paper loaded in the input tray.
2. Load your original face down on the right front corner of the glass or face up in the document feeder tray.
   If you use the document feeder tray, place the pages so that the top of the document goes in first.
3. In the Copy area, press Menu until Lighter/Darker appears.
4. Press ▶ to darken the copy, and then press OK.
   Note: You can also press ◀ to lighten the copy.
5. In the Copy area, press Menu until Color Intensity appears.
   The range of color intensity values appears as a scale on the control panel display.
6. Press ▶ to make the image more vivid, and then press OK.
   Note: You can also press ◀ to make the image more pale.
7. Press Start Copy Black or Start Copy Color.

Copy a document that has been faxed several times

You can use the Enhancements feature to adjust the quality of text documents by sharpening edges of black text or adjust photographs by enhancing light colors that might otherwise appear white.

The Mixed enhancement is the default option. Use the Mixed enhancement to sharpen edges of most originals.

To copy a blurred document

1. Make sure you have paper loaded in the input tray.
2. Load your original face down on the right front corner of the glass or face up in the document feeder tray.
   If you use the document feeder tray, place the pages so that the top of the document goes in first.
3. In the Copy area, press Menu until Enhancements appears.
4. Press ▶ until the Text setting appears, and then press OK.
5. Press Start Copy Black or Start Copy Color.

If any of the following occur, turn off Text enhancement by selecting Photo or None:

- Stray dots of color surround some text on your copies
- Large, black typefaces look splotchy (not smooth)
• Thin, colored objects or lines contain black sections
• Horizontal grainy or white bands appear in light- to medium-gray areas

Enhance light areas of your copy
You can use Photo enhancements to enhance light colors that might otherwise appear white. You can also use Photo enhancements to eliminate or reduce any of the following that might occur when copying with Text enhancements:
• Stray dots of color surround some text on your copies
• Large, black typefaces look splotchy (not smooth)
• Thin, colored objects or lines contain black sections
• Horizontal grainy or white bands appear in light- to medium-gray areas

To copy an overexposed photo
1. Make sure you have paper loaded in the input tray.
2. Load your original photo face down on the right front corner of the glass.
   Position the photo on the glass so the long edge of the photo is along the front edge of the glass.
3. In the Copy area, press Menu until Enhancements appears.
4. Press ▶until the Photo enhancement setting appears, and then press OK.
5. Press Start Copy Color.

It is easy to set Enhancement settings for photos and other documents you copy by using the HP Image Zone software that came with your HP all-in-one. With one click of your mouse button, you can set a photo to copy with Photo enhancements, a text document to copy with Text enhancements, or a document that contains both images and text to copy with both Photo and Text enhancements turned on. For more information, see the onscreen HP Image Zone Help.

Prepare a color iron-on transfer
You can copy an image or text onto an iron-on transfer, then iron it onto a T-shirt, pillow cover, place mat, or other piece of fabric.

Tip Practice applying an iron-on transfer on an old garment first.

1. Load the iron-on transfer paper in the input tray.
2. Load your original face down on the right front corner of the glass.
   If you are copying a photo, position the photo on the glass so the long edge of the photo is along the front edge of the glass.
3. In the Copy area, press Menu until Copy Paper Type appears.
4. Press ▶until Iron-On or Iron-On Mirrored appears, and then press OK.
   

5. Press Start Copy Black or Start Copy Color.
   
   Note When you select Iron-On Mirrored as the paper type, the HP all-in-one copies a mirror image of your original automatically so that it will appear properly when you iron it onto fabric.
Stop copying

→ To stop copying, press Cancel on the control panel.
8 Use the scan features

Scanning is the process of converting text and pictures into an electronic format for your computer. You can scan just about anything: photos, magazine articles, and text documents, as long as you are careful not to scratch the glass on your HP all-in-one.

You can use the scanning features of your HP all-in-one to do the following:

- Scan text from an article into your word processor and quote it in a report.
- Print business cards and brochures by scanning a logo and using it in your publishing software.
- Send photos to friends and relatives by scanning your favorite prints and including them in e-mail messages.
- Create a photographic inventory of your house or office.
- Archive treasured photos in an electronic scrapbook.

Note Scanning text (also known as optical character recognition or OCR) lets you bring the content of magazine articles, books, and other printed matter into your favorite word processor (and many other programs) as fully editable text. Learning to do OCR right is important if you want to obtain the best results. Do not expect scanned text documents to be letter-perfect the first time you use your OCR software. Using OCR software is an art that takes time and practice to master.

For more information about scanning documents, especially documents containing both text and graphics, see the documentation that came with your OCR software.

To use the scan features, your HP all-in-one and computer must be connected and turned on. The HP all-in-one software must also be installed and running on your computer prior to scanning. To verify that the HP all-in-one software is running on a Windows PC, look for the HP all-in-one icon in the system tray at the lower right side of the screen, near the time. On a Macintosh, the HP all-in-one software is always running.

Note Closing the HP Windows system tray icon can cause your HP all-in-one to lose some of its scan functionality and result in the No Connection error message. If this happens, you can restore full functionality by restarting your computer or by starting the HP Image Zone software.

For information about how to scan from the computer, and how to adjust, resize, rotate, crop, and sharpen your scans, see the onscreen HP Image Zone Help that came with your software.

This chapter contains information on: sending a scan to and from different destinations, and adjusting the preview image.

Scan to an application

Follow these steps if your HP all-in-one is directly connected to a computer through a USB cable.

You can scan originals placed on the glass directly from the control panel.
Note The menus shown in this section may vary in content depending on your computer's operating system and which applications you set up as scan destinations in the HP Image Zone.

To send a scan to an application
1 Load your original face down in the right front corner of the glass.
2 In the Scan area, press the Scan To button. The Scan To menu appears, listing destinations, including applications, for anything you scan. The default destination is whichever one you selected the last time you used this menu. You designate which applications and other destinations appear on the Scan To menu by using the HP Image Zone on your computer.
3 To select an application to receive the scan, use ◀ or ▶ to select it, and then press OK or Start Scan. A preview image of the scan appears in the HP Scan window on the computer, where you can edit it. For more information about editing a preview image, see the onscreen HP Image Zone Help that came with your software.
4 Make any edits to the preview image in the HP Scan window. When you have finished, click Accept. The HP all-in-one sends the scan to the selected application. For example, if you chose the HP Image Zone software (Windows) or JPEG to HP Gallery (Macintosh), it automatically opens and displays the image. The HP Image Zone has many tools that you can use to edit your scanned image. You can improve the overall image quality by adjusting the brightness, sharpness, color tone, or saturation. You can also crop, straighten, rotate, or resize the image. When the scanned image looks just the way you want it, you can open it in another application, send it through e-mail, save it to a file, or print it. For more information about using the HP Image Zone, see the onscreen HP Image Zone Help.

Stop scanning
➔ To stop scanning, press Cancel on the control panel.
9 Print from your computer

The HP all-in-one can be used with any software application that allows printing. The instructions vary slightly depending on whether you are printing from a Windows PC or a Macintosh. Make sure you follow the instructions for your operating system in this chapter.

In addition to the printing capabilities described in this chapter, you can print special print jobs such as borderless prints and newsletters; print images directly from a digital camera that supports PictBridge; and use scanned images in printing projects in the HP Image Zone.

- For more information on printing from a digital camera, see Use a PictBridge camera.
- For more information on performing special print jobs or printing images in the HP Image Zone, see the onscreen HP Image Zone Help.

Print from a software application

Most print settings are automatically handled by the software application you are printing from or by HP ColorSmart technology. You need to change the settings manually only when you change print quality, print on specific types of paper or transparency film, or use special features.

To print from the software application you used to create your document (Windows users)

1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Select the HP all-in-one as the printer.
4. If you need to change settings, click the button that opens the Properties dialog box.
   Depending on your software application, this button might be called Properties, Options, Printer Setup, or Printer.
5. Select the appropriate options for your print job by using the features available in the Paper/Quality, Finishing, Effects, Basics, and Color tabs.

   Tip  You can easily select the appropriate options for your print job by choosing one of the predefined print tasks on the Printing Shortcuts tab. Click a type of print task in the What do you want to do? list. The default settings for that type of print task are set, and summarized on the Printing Shortcuts tab. If necessary, you can adjust the settings here, or you can make your changes on the other tabs in the Properties dialog box.

6. Click OK to close the Properties dialog box.
7. Click Print or OK to begin printing.

To print from the software application you used to create your document (Macintosh users)

1. Make sure you have paper loaded in the input tray.
Select the HP all-in-one in the Chooser (OS 9), Print Center (OS 10.2 or earlier), or Printer Setup Utility (OS 10.3 or later) before you begin printing.

From the File menu in your software application, choose Page Setup. The Page Setup dialog box appears, allowing you to specify the paper size, orientation, and scaling.

Specify the page attributes:
- Choose the paper size.
- Select the orientation.
- Enter the scaling percentage.

Note For OS 9, the Page Setup dialog box also includes options to print a mirrored (or reversed) version of the image, and to adjust the page margins for two-sided printing.

Click OK.

From the File menu in your software application, choose Print. The Print dialog box appears. If you are using OS 9, the General panel opens. If you are using OS X, the Copies & Pages panel opens.

Change the print settings for each option in the pop-up menu, as appropriate for your project.

Click Print to begin printing.

Change the print settings

You can customize the print settings of the HP all-in-one to handle nearly any print task.

Windows users

Before you change print settings, you should decide if you want to change the settings for the current print job only, or if you want to make the settings the defaults for all future print jobs. How you display print settings depends on whether or not you want to apply the change to all future print jobs or just to the current print job.

To change the print settings for all future jobs
1 In the HP Director, click Settings, point to Print Settings, and then click Printer Settings.
2 Make changes to the print settings, and click OK.

To change the print settings for the current job
1 On the File menu in your software application, click Print.
2 Make sure the HP all-in-one is the selected printer.
3 Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, or Printer.
4 Make changes to the print settings, and click OK.
5 Click Print or OK in the Print dialog box to print the job.
Macintosh users

Use the Page Setup and Print dialog boxes to change the settings for your print job. Which dialog box you use depends on which setting you want to change.

To change the paper size, orientation, or scaling percentage
1. Select the HP all-in-one in the Chooser (OS 9), Print Center (OS 10.2 or earlier), or Printer Setup Utility (OS 10.3 or later) before you begin printing.
2. From the File menu in your software application, choose Page Setup.
3. Make changes to the paper size, orientation, and scaling percentage settings, and click OK.

To change all other print settings
1. Select the HP all-in-one in the Chooser (OS 9), Print Center (OS 10.2 or earlier), or Printer Setup Utility (OS 10.3 or later) before you begin printing.
2. From the File menu in your software application, choose Print.
3. Make changes to the print settings, and click Print to print the job.

Stop a print job

Although you can stop a print job from either the HP all-in-one or the computer, we recommend you stop it from the HP all-in-one for best results.

To stop a print job from the HP all-in-one

➔ Press Cancel on the control panel. Look for the Print Cancelled message on the control panel display. If the message does not appear, press Cancel again.
Fax setup

After completing all steps in the Setup Guide, use the instructions in this chapter to complete your fax setup. Please keep your Setup Guide for later use.

In this chapter, you will learn how to set up your HP all-in-one so that faxing works successfully with equipment and services you might already have on the same phone line as your HP all-in-one.

Before you begin setting up your HP all-in-one for faxing, determine which kind of phone system your country/region uses. The instructions for setting up your HP all-in-one for faxing differ depending whether you have a serial or parallel phone system.

- If the connector type on your shared telephone equipment (modems, phones, and answering machines) does not allow a physical connection to the "2-EXT" port on your HP all-in-one and instead must be connected at the telephone wall jack, you probably have a serial-type telephone system. Check the table below to make sure that your country/region does not appear in this list. If you are unsure which kind of telephone system you have (serial or parallel), check with your telephone company. This type of phone system uses a 4-wire phone cord to connect the HP all-in-one to the telephone wall jack.

- If your country/region is listed in the table, you probably have a parallel-type telephone system. This type of phone system uses a 2-wire phone cord to connect the HP all-in-one to the telephone wall jack.

<table>

</tbody>
</table>

Tip   You can also check the end of the phone cord that came in the box with your HP all-in-one. If the phone cord appears to have two wires, you have a 2-wire phone cord. If the phone cord has four wires, you have a 4-wire phone cord. The graphic below shows the differences between the phone cords.
Choose the right fax setup for your home or office

To fax successfully, you need to know what types of equipment and services (if any) share the same phone line with your HP all-in-one. This is important because you might need to connect some of your existing office equipment directly to your HP all-in-one, and you might also need to change some fax settings before you can fax successfully.

To determine the best way to set up the HP all-in-one in your home or office, first read through the questions in this section and record your answers. Next, refer to the table in the following section and choose the recommended setup case based on your answers.

Make sure to read and answer the following questions in the order they are presented.

1. Do you have a digital subscriber line (DSL) service through your telephone company?
   - Yes, I have DSL.
   - No.

   If you answered Yes, proceed directly to Case B: Set up your HP all-in-one with DSL. You do not need to continue answering questions.
   If you answered No, please continue answering questions.

2. Do you have a private branch exchange (PBX) phone system or an integrated services digital network (ISDN) system?

   If you answered Yes, proceed directly to Case C: Set up your HP all-in-one with a PBX phone system or an ISDN line. You do not need to continue answering questions.
   If you answered No, please continue answering questions.

3. Do you subscribe to a distinctive ring service through your telephone company that provides multiple phone numbers with different ring patterns?
   - Yes, I have distinctive ring.
   - No.

   If you answered Yes, proceed directly to Case D: Fax with a distinctive ring service on the same line. You do not need to continue answering questions.
   If you answered No, please continue answering questions.

Are you unsure if you have distinctive ring? Many phone companies offer a distinctive ring feature that allows you to have several phone numbers on one phone line.

When you subscribe to this service, each phone number will have a different ring pattern. For example, you can have single, double, and triple rings for the different numbers. You might assign one phone number with a single ring to your voice calls, and another phone number with double rings to your fax calls. This allows you to tell the difference between voice and fax calls when the phone rings.
4 Do you receive voice calls at the same phone number you will use for fax calls on your HP all-in-one?
   ❑ Yes, I receive voice calls.
   ❑ No.
   Please continue answering questions.

5 Do you have a PC modem on the same phone line as your HP all-in-one?
   ❑ Yes, I have a PC modem.
   ❑ No.
   If you answer Yes to any of the following questions, you are using a PC modem:
      – Do you send and receive faxes directly to and from your computer software programs through a dial-up connection?
      – Do you send and receive e-mail messages on your computer through a dial-up connection?
      – Do you access the Internet from your computer through a dial-up connection?
   Please continue answering questions.

6 Do you have an answering machine that answers voice calls at the same phone number you will use for fax calls on your HP all-in-one?
   ❑ Yes, I have an answering machine.
   ❑ No.
   Please continue answering questions.

7 Do you subscribe to a voice mail service through your telephone company at the same phone number you will use for fax calls on your HP all-in-one?
   ❑ Yes, I have a voice mail service.
   ❑ No.
   After you have completed answering the questions, proceed to the next section to select your fax setup case.

Select your fax setup case

Now that you have answered all of the questions about the equipment and services that share the phone line with your HP all-in-one, you are ready to choose the best setup case for your home or office.

From the first column in the following table, choose the combination of equipment and services applicable to your home or office setting. Then look up the appropriate setup case in the second or third column based on your phone system. Step-by-step instructions are included for each case later in this chapter.

If you have answered all of the questions in the previous section and have none of the described equipment or services, choose "None" from the first column in the table.

Note If your home or office setup is not described in this chapter, set up the HP all-in-one as you would a regular analog phone. Make sure you use the phone cord supplied in the box to connect one end to your telephone wall jack and the other end to the port labeled "1-LINE" on the back of your HP all-in-one. If you use another phone cord, you might experience problems sending and receiving faxes.

<td>Voice calls and answering machine (You answered Yes to questions 4 and 6 only.)</td>
<td>Case I: Shared voice/fax line with answering machine</td>
<td>Not applicable.</td>
</tr>
<tr>
<td>Voice calls, PC modem, and answering machine (You answered Yes to questions 4, 5, and 6 only.)</td>
<td>Case J: Shared voice/fax line with PC modem and answering machine</td>
<td>Not applicable.</td>
</tr>
<tr>
<td>Voice calls, PC modem, and voice mail service</td>
<td>Case K: Shared voice/fax line with PC modem and voice mail</td>
<td>Not applicable.</td>
</tr>
</tbody>
</table>
Case A: Separate fax line (no voice calls received)
If you have a separate phone line on which you receive no voice calls, and you have no other equipment connected on this phone line, set up your HP all-in-one as described in this section.

1. Telephone wall jack
2. Phone cord supplied in the box with your HP all-in-one connected to the "1-LINE" port

To set up your HP all-in-one with a separate fax line
1. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

2. Set up the HP all-in-one to answer incoming calls automatically. Press the Auto Answer button until the light is on.
3. (Optional) Change the Rings to Answer setting to one ring or two rings. For information on changing this setting, see Set the number of rings before answering.
4. Run a fax test. For information, see Test your fax setup.

When the phone rings, your HP all-in-one will answer automatically after the number of rings you set in the Rings to Answer setting. Then it will begin emitting fax reception tones to the sending fax machine and receive the fax.
Case B: Set up your HP all-in-one with DSL

If you have a DSL service through your telephone company, use the instructions in this section to connect a DSL filter between the telephone wall jack and your HP all-in-one. The DSL filter removes the digital signal that can interfere with your HP all-in-one from communicating properly with the phone line. (DSL might be called ADSL in your country/region.)

Caution If you have a DSL line and you do not connect the DSL filter, you will not be able to send and receive faxes with your HP all-in-one.

Back view of the HP all-in-one

1 Telephone wall jack
2 DSL filter and cord supplied by your DSL provider
3 Phone cord supplied in the box with your HP all-in-one connected to the "1-LINE" port

To set up your HP all-in-one with DSL

1 Obtain a DSL filter from your DSL provider.
2 Using the phone cord supplied in the box with your HP all-in-one, connect one end to the open port on the DSL filter, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office.

3 Connect the DSL filter cord to the telephone wall jack.
4 Run a fax test. For information, see Test your fax setup.

Case C: Set up your HP all-in-one with a PBX phone system or an ISDN line

If you are using either a PBX phone system or an ISDN converter/terminal adapter, make sure you do the following:

- If you are using either a PBX or an ISDN converter/terminal adaptor, connect the HP all-in-one to the port that is designated for fax and phone use. Also, make sure that the terminal adapter is set to the correct switch type for your country/region, if possible.
Note  Some ISDN systems allow you to configure the ports for specific phone equipment. For example, you might have assigned one port for telephone and Group 3 fax and another port for multiple purposes. If you have problems when connected to the fax/phone port of your ISDN converter, try using the port designated for multiple purposes; it might be labeled "multi-combi" or something similar.

- If you are using a PBX phone system, set the call waiting tone to "off."

  Caution  Many digital PBX systems include a call-waiting tone that is factory-set to "on." The call waiting tone will interfere with any fax transmission, and you will not be able to send or receive faxes with your HP all-in-one. Refer to the documentation that came with your PBX phone system for instructions on how to turn off the call-waiting tone.

- If you are using a PBX phone system, dial the number for an outside line before dialing the fax number.

- Make sure you use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

Case D: Fax with a distinctive ring service on the same line

If you subscribe to a distinctive ring service (through your telephone company) that allows you to have multiple phone numbers on one phone line, each with a different ring pattern, set up your HP all-in-one as described in this section.

![Back view of the HP all-in-one](image)

1 Telephone wall jack  
2 Phone cord supplied in the box with your HP all-in-one connected to the "1-LINE" port

To set up your HP all-in-one with a distinctive ring service

1 Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.
Caution If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

2 Set the HP all-in-one to answer incoming calls automatically. Press the Auto Answer button until the light is on.

3 Change the Answer Ring Pattern setting to the pattern that has been assigned to your fax number by the telephone company, for example, double rings or triple rings.
   For information on changing this setting, see Change the answer ring pattern (distinctive ringing).

   Note Your HP all-in-one is factory-set to answer all ring patterns. If you do not set the correct ring pattern assigned to your fax number by the telephone company, your HP all-in-one might answer both voice calls and fax calls or it might not answer at all.

4 (Optional) Change the Rings to Answer setting to one ring or two rings.
   For information on changing this setting, see Set the number of rings before answering.

5 Run a fax test. For information, see Test your fax setup.

Your HP all-in-one will automatically answer incoming calls that have the ring pattern you selected (Answer Ring Pattern setting) after the number of rings you selected (Rings to Answer setting). Then it will begin emitting fax reception tones to the sending fax machine and receive the fax.

Case E: Shared voice/fax line

If you receive both voice calls and fax calls at the same phone number, and you have no other office equipment (or voice mail) on this phone line, set up your HP all-in-one as described in this section.
To set up your HP all-in-one with a shared voice/fax line

1 Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

2 Do one of the following, depending on your phone system:
   - If you have a parallel-type phone system, remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one, and then connect a phone to this port.
   - If you have a serial-type phone system, you might plug your phone directly to the telephone wall jack.

3 Now you need to decide how you want the HP all-in-one to answer calls, automatically or manually:
   - If you set up the HP all-in-one to answer calls automatically, it answers all incoming calls and receives faxes. Your HP all-in-one will not be able to distinguish between fax and voice calls in this case; if you suspect the call is a voice call, you will need to answer it before the HP all-in-one answers the call.
     To answer fax calls automatically, press the Auto Answer button until the light is on.
   - If you set up the HP all-in-one to answer faxes manually, you must be available to respond in person to incoming fax calls or your HP all-in-one cannot receive faxes.
To answer fax calls manually, press the Auto Answer button until the light is off.

4 Run a fax test. For information, see Test your fax setup.

If you pick up the phone before the HP all-in-one and hear fax tones from a sending fax machine, you will need to answer the fax call manually. For information, see Receive a fax manually.

Case F: Shared voice/fax line with voice mail

If you receive both voice calls and fax calls at the same phone number, and you also subscribe to a voice mail service through your telephone company, set up your HP all-in-one as described in this section.

Note You cannot receive faxes automatically if you have a voice mail service at the same phone number you use for fax calls. You must receive faxes manually; this means you must be available to respond in person to incoming fax calls. If you want to receive faxes automatically instead, contact your telephone company to subscribe to a distinctive ring service, or to obtain a separate phone line for faxing.

Back view of the HP all-in-one

<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Telephone wall jack</td>
</tr>
<tr>
<td>2</td>
<td>Phone cord supplied in the box with your HP all-in-one connected to the &quot;1-LINE&quot; port</td>
</tr>
</tbody>
</table>

To set up your HP all-in-one with voice mail

1 Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

2 Set up the HP all-in-one to answer incoming calls manually. Press the Auto Answer button until the light is off.

3 Run a fax test. For information, see Test your fax setup.
You must be available to respond in person to incoming fax calls, or your HP all-in-one cannot receive faxes. For information on receiving faxes manually, see Receive a fax manually.

Case G: Fax line shared with PC modem (no voice calls received)

If you have a fax line on which you receive no voice calls, and you also have a PC modem connected on this line, set up your HP all-in-one as described in this section.

Since your PC modem shares the phone line with your HP all-in-one, you will not be able to use both your PC modem and your HP all-in-one simultaneously. For example, you cannot use your HP all-in-one for faxing if you are using your PC modem to send an e-mail or access the Internet.

Back view of the HP all-in-one

1 Telephone wall jack
2 Phone cord supplied in the box with your HP all-in-one connected to the "1-LINE" port
3 Computer with modem

To set up your HP all-in-one with a PC modem

1 Remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one.
2 Find the phone cord that connects from the back of your computer (your PC modem) to a telephone wall jack. Disconnect the cord from the telephone wall jack and plug it into the port labeled "2-EXT" on the back of your HP all-in-one.
3 Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord...
is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

4 If your PC modem software is set to receive faxes to your computer automatically, turn off that setting.

⚠️ Caution If you do not turn off the auto fax receive setting in your PC modem software, your HP all-in-one will not be able to receive faxes.

5 Set up the HP all-in-one to answer incoming calls automatically. Press the Auto Answer button until the light is on.

6 (Optional) Change the Rings to Answer setting to one ring or two rings. For information on changing this setting, see Set the number of rings before answering.

7 Run a fax test. For information, see Test your fax setup.

When the phone rings, your HP all-in-one will answer automatically after the number of rings you set in the Rings to Answer setting. Then it will begin emitting fax reception tones to the sending fax machine and receive the fax.

Case H: Shared voice/fax line with PC modem

If you receive both voice calls and fax calls at the same phone number, and you also have a PC modem connected on this phone line, set up your HP all-in-one as described in this section.

Since your PC modem shares the phone line with your HP all-in-one, you will not be able to use both your PC modem and your HP all-in-one simultaneously. For example, you cannot use your HP all-in-one for faxing if you are using your PC modem to send an e-mail or access the Internet.

There are two different ways to set up your HP all-in-one with your computer based on the number of phone ports on your computer. Before you begin, check your computer to see if it has one or two phone ports:

- If your computer has only one phone port, see the next section, Set up your HP all-in-one to a computer with one phone port. You will need to purchase a parallel splitter (also called a coupler) in order to send and receive faxes successfully and use your PC modem. (A parallel splitter has one RJ-11 port on the front and two RJ-11 ports on the back. Do not use a 2-line phone splitter, a serial splitter, or a parallel splitter which has two RJ-11 ports on the front and a plug on the back.) You will also need three additional phone cords. You can purchase a parallel splitter and additional phone cords from an electronics store that carries phone accessories.
- If your computer has two phone ports, see Set up your HP all-in-one to a computer with two phone ports.

Set up your HP all-in-one to a computer with one phone port

This section describes how to set up your HP all-in-one with a PC modem if your computer has only one phone port.
To set up your HP all-in-one to a computer with one phone port

1. Find the phone cord that connects from the back of your computer (your PC modem) to a telephone wall jack. Disconnect the cord from the telephone wall jack and plug it into the parallel splitter on the side with two phone ports.

2. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

   **Caution** If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

3. Remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one.

4. Using another phone cord, connect one end to the port labeled "2-EXT" on the back of your HP all-in-one. Connect the other end of the phone cord to the parallel splitter on the side with the single phone port.

5. If your PC modem software is set to receive faxes to your computer automatically, turn off that setting.

   **Caution** If you do not turn off the auto fax receive setting in your PC modem software, your HP all-in-one will not be able to receive faxes.

6. (Optional) Connect a phone to the other open phone port on the parallel splitter.
7 Now you need to decide how you want the HP all-in-one to answer calls, automatically or manually:

- If you set up the HP all-in-one to answer calls automatically, it answers all incoming calls and receives faxes. Your HP all-in-one will not be able to distinguish between fax and voice calls in this case; if you suspect the call is a voice call, you will need to answer it before the HP all-in-one answers the call.
  
  To answer fax calls automatically, press the **Auto Answer** button until the light is on.

- If you set up the HP all-in-one to answer faxes manually, you must be available to respond in person to incoming fax calls or your HP all-in-one cannot receive faxes.
  
  To answer fax calls manually, press the **Auto Answer** button until the light is off.

8 Run a fax test. For information, see [Test your fax setup](#).

If you pick up the phone before the HP all-in-one and hear fax tones from a sending fax machine, you will need to answer the fax call manually. For information, see [Receive a fax manually](#).

### Set up your HP all-in-one to a computer with two phone ports

This section describes how to set up your HP all-in-one with a PC modem if your computer has two phone ports.

</table>
To set up your HP all-in-one to a computer with two phone ports

1. Remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one.
2. Find the phone cord that connects from the back of your computer (your PC modem) to a telephone wall jack. Disconnect the cord from the telephone wall jack and plug it into the port labeled "2-EXT" on the back of your HP all-in-one.
3. Connect a phone to the "OUT" port on the back of your PC modem.
4. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

5. If your PC modem software is set to receive faxes to your computer automatically, turn off that setting.

Caution If you do not turn off the auto fax receive setting in your PC modem software, your HP all-in-one will not be able to receive faxes.

6. Now you need to decide how you want the HP all-in-one to answer calls, automatically or manually:
   - If you set up the HP all-in-one to answer calls automatically, it answers all incoming calls and receives faxes. Your HP all-in-one will not be able to distinguish between fax and voice calls in this case; if you suspect the call is a voice call, you will need to answer it before the HP all-in-one answers the call.
     To answer fax calls automatically, press the Auto Answer button until the light is on.
   - If you set up the HP all-in-one to answer faxes manually, you must be available to respond in person to incoming fax calls or your HP all-in-one cannot receive faxes.
     To answer fax calls manually, press the Auto Answer button until the light is off.

7. Run a fax test. For information, see Test your fax setup.

If you pick up the phone before the HP all-in-one and hear fax tones from a sending fax machine, you will need to answer the fax call manually. For information, see Receive a fax manually.

Case I: Shared voice/fax line with answering machine

If you receive both voice calls and fax calls at the same phone number, and you also have an answering machine that answers voice calls at this phone number, set up your HP all-in-one as described in this section.
To set up your HP all-in-one with a shared voice/fax line with answering machine

1. Remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one.
2. Unplug your answering machine from the telephone wall jack, and connect it to the port labeled "2-EXT" on the back of your HP all-in-one.

Note: If you do not connect your answering machine directly to your HP all-in-one, fax tones from a sending fax machine might be recorded on your answering machine, and you probably will not be able to receive faxes with your HP all-in-one.

3. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution: If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

4. (Optional) If your answering machine does not have a built-in phone, for convenience you might want to connect a phone to the back of your answering machine at the "OUT" port.
5 Set up the HP all-in-one to answer incoming calls automatically. Press the Auto Answer button until the light is on.
6 Set your answering machine to answer after four or fewer rings.
7 Change the Rings to Answer setting on your HP all-in-one to six rings. For information on changing this setting, see Set the number of rings before answering.
8 Run a fax test. For information, see Test your fax setup.

When the phone rings, your answering machine will answer after the number of rings you have set, and then play your recorded greeting. The HP all-in-one monitors the call during this time, "listening" for fax tones. If incoming fax tones are detected, the HP all-in-one will emit fax reception tones and receive the fax; if there are no fax tones, the HP all-in-one stops monitoring the line and your answering machine can record a voice message.

Case J: Shared voice/fax line with PC modem and answering machine

If you receive both voice calls and fax calls at the same phone number, and you also have a PC modem and answering machine connected on this phone line, set up your HP all-in-one as described in this section.

Since your PC modem shares the phone line with your HP all-in-one, you will not be able to use both your PC modem and your HP all-in-one simultaneously. For example, you cannot use your HP all-in-one for faxing if you are using your PC modem to send an e-mail or access the Internet.

There are two different ways to set up your HP all-in-one with your computer based on the number of phone ports on your computer. Before you begin, check your computer to see if it has one or two phone ports:

- If your computer has only one phone port, see the next section, Set up your HP all-in-one to a computer with one phone port. You will need to purchase a parallel splitter (also called a coupler) in order to send and receive faxes successfully and use your PC modem. (A parallel splitter has one RJ-11 port on the front and two RJ-11 ports on the back. Do not use a 2-line phone splitter, a serial splitter, or a parallel splitter which has two RJ-11 ports on the front and a plug on the back.) You will also need three additional phone cords. You can purchase a parallel splitter and additional phone cords from an electronics store.
- If your computer has two phone ports, see Set up your HP all-in-one to a computer with two phone ports.

Set up your HP all-in-one to a computer with one phone port

This section describes how to set up your HP all-in-one with a PC modem if your computer has only one phone port.
### To set up your HP all-in-one to a computer with one phone port

1. Find the phone cord that connects from the back of your computer (your PC modem) to a telephone wall jack. Disconnect the cord from the telephone wall jack and plug it into the parallel splitter on the side with two phone ports.

2. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

   **Caution** If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

3. Remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one.

4. Using another phone cord, connect one end to the port labeled "2-EXT" on the back of your HP all-in-one. Connect the other end of the phone cord to the parallel splitter on the side with the single phone port.

5. Unplug your answering machine from the telephone wall jack, and connect it to the parallel splitter on the side with two phone ports.

Note If you do not connect your answering machine in this way, fax tones from a sending fax machine might be recorded on your answering machine, and you might not be able to receive faxes with your HP all-in-one.

6 (Optional) If your answering machine does not have a built-in phone, for convenience you might want to connect a phone to the back of your answering machine at the "OUT" port.

7 If your PC modem software is set to receive faxes to your computer automatically, turn off that setting.

⚠️ Caution If you do not turn off the auto fax receive setting in your PC modem software, your HP all-in-one will not be able to receive faxes.

8 Set up the HP all-in-one to answer incoming calls automatically. Press the Auto Answer button until the light is on.

9 Set your answering machine to answer after four or fewer rings.

10 Change the Rings to Answer setting on your HP all-in-one to six rings. For information on changing this setting, see Set the number of rings before answering.

11 Run a fax test. For information, see Test your fax setup.

When the phone rings, your answering machine will answer after the number of rings you have set, and then play your recorded greeting. The HP all-in-one monitors the call during this time, "listening" for fax tones. If incoming fax tones are detected, the HP all-in-one will emit fax reception tones and receive the fax; if there are no fax tones, the HP all-in-one stops monitoring the line and your answering machine can record a voice message.

**Set up your HP all-in-one to a computer with two phone ports**

This section describes how to set up your HP all-in-one with a PC modem if your computer has two phone ports.
Back view of the HP all-in-one

1 Telephone wall jack
2 "IN" phone port on your computer
3 "OUT" phone port on your computer
4 Telephone
5 Answering machine
6 Computer with modem
7 Phone cord supplied in the box with your HP all-in-one connected to the "1-LINE" port

To set up your HP all-in-one to a computer with two phone ports

1 Remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one.
2 Find the phone cord that connects from the back of your computer (your PC modem) to a telephone wall jack. Disconnect the cord from the telephone wall jack and plug it into the port labeled "2-EXT" on the back of your HP all-in-one.
3 Unplug your answering machine from the telephone wall jack, and connect it to the "OUT" port on the back of your PC modem. This allows a direct connection between the HP all-in-one and your answering machine, even though the PC modem is connected first in line.

Note   If you do not connect your answering machine in this way, fax tones from a sending fax machine might be recorded on your answering machine, and you might not be able to receive faxes with your HP all-in-one.

4 Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution   If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord...
is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

5 (Optional) If your answering machine does not have a built-in phone, for convenience you might want to connect a phone to the back of your answering machine at the "OUT" port.

6 If your PC modem software is set to receive faxes to your computer automatically, turn off that setting.

Caution If you do not turn off the auto fax receive setting in your PC modem software, your HP all-in-one will not be able to receive faxes.

7 Set up the HP all-in-one to answer incoming calls automatically. Press the Auto Answer button until the light is on.

8 Set your answering machine to answer after four or fewer rings.

9 Change the Rings to Answer setting on your HP all-in-one to six rings. For information on changing this setting, see Set the number of rings before answering.

10 Run a fax test. For information, see Test your fax setup.

When the phone rings, your answering machine will answer after the number of rings you have set, and then play your recorded greeting. The HP all-in-one monitors the call during this time, "listening" for fax tones. If incoming fax tones are detected, the HP all-in-one will emit fax reception tones and receive the fax; if there are no fax tones, the HP all-in-one stops monitoring the line and your answering machine can record a voice message.

Case K: Shared voice/fax line with PC modem and voice mail

If you receive both voice calls and fax calls at the same phone number, use a PC modem on the same phone line, and subscribe to a voice mail service through your telephone company, set up your HP all-in-one as described in this section.

Note You cannot receive faxes automatically if you have a voice mail service at the same phone number you use for fax calls. You must receive faxes manually; this means you must be available to respond in person to incoming fax calls. If you want to receive faxes automatically instead, contact your telephone company to subscribe to a distinctive ring service, or to obtain a separate phone line for faxing.

Since your PC modem shares the phone line with your HP all-in-one, you will not be able to use both your PC modem and your HP all-in-one simultaneously. For example, you cannot use your HP all-in-one for faxing if you are using your PC modem to send an e-mail or access the Internet.

There are two different ways to set up your HP all-in-one with your computer based on the number of phone ports on your computer. Before you begin, check your computer to see if it has one or two phone ports:

- If your computer has only one phone port, see the next section, Set up your HP all-in-one to a computer with one phone port. You will need to purchase a parallel splitter (also called a coupler) in order to send and receive faxes successfully and use your PC modem. (A parallel splitter has one RJ-11 port on the front and two RJ-11 ports on the back. Do not use a 2-line phone splitter, a
serial splitter, or a parallel splitter which has two RJ-11 ports on the front and a plug on the back.) You will also need three additional phone cords. You can purchase a parallel splitter and additional phone cords from an electronics store.

- If your computer has two phone ports, see Set up your HP all-in-one to a computer with two phone ports.

Set up your HP all-in-one to a computer with one phone port

This section describes how to set up your HP all-in-one with a PC modem if your computer has only one phone port.

To set up your HP all-in-one to a computer with one phone port

1. Find the phone cord that connects from the back of your computer (your PC modem) to a telephone wall jack. Disconnect the cord from the telephone wall jack and plug it into the parallel splitter on the side with two phone ports.

2. Using another phone cord, connect one end to the port labeled "2-EXT" on the back of your HP all-in-one. Connect the other end of the phone cord to the parallel splitter on the side with the single phone port.

3. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution  If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord
is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

4 Remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one.

5 If your PC modem software is set to receive faxes to your computer automatically, turn off that setting.

Caution If you do not turn off the auto fax receive setting in your PC modem software, your HP all-in-one will not be able to receive faxes.

6 (Optional) Connect a phone to the other open phone port on the parallel splitter.

7 Set up the HP all-in-one to answer incoming calls manually. Press the Auto Answer button until the light is off.

8 Run a fax test. For information, see Test your fax setup.

You must be available to respond in person to incoming fax calls, or your HP all-in-one cannot receive faxes. For information on receiving faxes manually, see Receive a fax manually.

Set up your HP all-in-one to a computer with two phone ports

Back view of the HP all-in-one

1 Telephone wall jack
2 "IN" phone port on your computer
3 "OUT" phone port on your computer
4 Telephone
5 Computer with modem
6 Phone cord supplied in the box with your HP all-in-one connected to the "1-LINE" port

To set up your HP all-in-one to a computer with two phone ports

1 Remove the white plug from the port labeled "2-EXT" on the back of your HP all-in-one.
2. Find the phone cord that connects from the back of your computer (your PC modem) to a telephone wall jack. Disconnect the cord from the telephone wall jack and plug it into the port labeled "2-EXT" on the back of your HP all-in-one.

3. Connect a phone to the "OUT" port on the back of your PC modem.

4. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

Caution If you do not use the supplied cord to connect from the telephone wall jack to your HP all-in-one, you might not be able to fax successfully. This special phone cord is different from the phone cords you might already have in your home or office. If the supplied phone cord is too short, see The phone cord that came with my HP all-in-one is not long enough for information on extending it.

5. If your PC modem software is set to receive faxes to your computer automatically, turn off that setting.

Caution If you do not turn off the auto fax receive setting in your modem software, your HP all-in-one will not be able to receive faxes.

6. Set up the HP all-in-one to answer incoming calls manually. Press the Auto Answer button until the light is off.

7. Run a fax test. For information, see the next section, Test your fax setup. You must be available to respond in person to incoming fax calls, or your HP all-in-one cannot receive faxes. For information on receiving faxes manually, see Receive a fax manually.

Test your fax setup

You can test your fax setup to check the status of your HP all-in-one and to make sure it is set up properly for faxing. Perform this test after you have completed setting up your HP all-in-one for faxing. The test does the following:

- Checks the fax hardware
- Verifies that the phone cord is plugged into the correct port
- Checks for a dial tone
- Checks for an active phone line
- Checks the status of your phone line connection

The HP all-in-one prints a report with the results of the test. If the test fails, review the report for information on how to fix the problem and rerun the test.

To test your fax setup from the control panel

1. Set up your HP all-in-one for faxing according to the setup instructions in this chapter.

2. Make sure you have inserted the print cartridges and loaded paper before starting the test.

   For more information, see Replace the print cartridges and Load full-size paper.

3. Press Setup.

4. Press 6, then press 5.

   This selects the Tools menu and then selects Run Fax Test.
The HP all-in-one displays the status of the test on the control panel display and prints a report.

5 Review the report.
   – If the test passes and you are still having problems faxing, check the fax settings listed in the report to verify the settings are correct. A blank or incorrect fax setting can cause problems faxing.
   – If the test fails, review the report for more information on how to fix any problems found.

6 After you pick up the fax report from your HP all-in-one, press **OK**. If necessary, resolve any problems found and rerun the test.
   For more information on resolving any problems found during the test, see The fax test failed.
11 Use the fax features

You can use your HP all-in-one to send and receive faxes, including color faxes. You can set up speed dials to send faxes quickly and easily to frequently used numbers. From the control panel, you can also set a number of fax options, such as resolution.

You should explore the HP Director that came with your HP Image Zone software to take full advantage of all of its features. Using the HP Director, you can send a fax from your computer, include a computer-generated cover page, and quickly set up speed dials. For more information, see the onscreen HP Image Zone Help.

For information on accessing the HP Director, see Use the HP Image Zone to do more with your HP all-in-one.

Set up the HP all-in-one to receive faxes

Your HP all-in-one can be set up to receive faxes automatically or manually, depending on your home or office setup. If you set up the HP all-in-one to answer faxes automatically, it answers all incoming calls and receives faxes. If you set up the HP all-in-one to answer faxes manually, you must be available to respond in person to the incoming fax call, or your HP all-in-one cannot receive faxes. For more information on receiving faxes manually, see Receive a fax manually.

In certain situations you might want to receive faxes manually. For example, if you share a phone line between your HP all-in-one and phone and you do not have distinctive ringing or an answering machine, you will need to set up the HP all-in-one to answer fax calls manually. If you subscribe to a voice mail service, you will also need to answer fax calls manually. This is because the HP all-in-one will not be able to distinguish between fax calls and phone calls.

For more information on setting up your office equipment with the HP all-in-one, see Fax setup.

Choose the recommended answer mode for your setup

Refer to the table below to determine the recommended answer mode for your HP all-in-one based on your home or office setup. From the first column in the table, choose the type of equipment and services applicable to your office setup. Then, look up the recommended answer mode in the second column. The third column describes how the HP all-in-one will answer incoming calls.

After you have determined the recommended answer mode setting for your home or office setup, see Set the answer mode for more information.

</table>
| An answering machine and a shared voice and fax phone line. | Automatic (The Auto Answer light is on.) | The answering machine will answer the call and the HP all-in-one will monitor the line. If the HP all-in-one detects fax tones, the HP all-in-one will receive the fax.  

**Note** This is the recommended setting if you have an answering machine. Make sure the answering machine is set up properly with the HP all-in-one. For information, see Fax setup.  

Also, set the number of rings to answer for the HP all-in-one to a number greater than the number of rings to answer for the answering machine. The answering machine must answer the call before your HP all-in-one. For more information on setting the number of rings to answer, see Set the number of rings before answering. |
| Distinctive ringing service. | Automatic (The Auto Answer light is on.) | The HP all-in-one automatically answers all incoming calls.  
Make sure the ring pattern the phone company set for your fax phone line matches the Answer Ring Pattern set for the HP all-in-one. For more information, see Change the answer ring pattern (distinctive ringing). |
Set the answer mode

The answer mode determines whether your HP all-in-one answers incoming calls or not. If you set up the HP all-in-one to answer faxes automatically (the Auto Answer light is on), it answers all incoming calls and receives faxes. If you set up the HP all-in-one to answer faxes manually (the Auto Answer light is off), you must be available to respond in person to the incoming fax call, or your HP all-in-one will not receive faxes. For more information on receiving faxes manually, see Receive a fax manually.

If you do not know which answer mode to use, see Choose the recommended answer mode for your setup.

➔ Press the Auto Answer button to set the answer mode.
  When the Auto Answer light is on, your HP all-in-one automatically answers calls. When the light is off, your HP all-in-one does not answer calls.

Send a fax

You can send a fax in a variety of ways. Using the control panel, you can send a black-and-white or color fax from your HP all-in-one. You can also send a fax manually from an attached phone. This allows you to speak with the recipient before sending the fax.

If you frequently send faxes to the same numbers, you can set up speed dials to send faxes by using the Speed Dial button or a one-touch speed dial button. Review this section for more information on all the ways you can send faxes.

Send a basic fax

You can send a basic single- or multiple-page fax by using the control panel.

Note If you need printed confirmation that your faxes were successfully sent, enable fax confirmation before sending any faxes. For information, see Enable fax confirmation.

Tip You can also send a fax using monitor dialing. This allows you to control the pace of your dialing. This feature is useful when you want to use a calling card to charge the call and you need to respond to tone prompts while dialing. For more information, see Send a fax using monitor dialing.

1 Load your originals face up in the document feeder tray with the top of the page on the left. If you are sending a single-page fax, you can also load it on the glass.
  Note If you are sending a multiple-page fax, you must load the originals in the automatic document feeder.

2 Enter the fax number by using the keypad.
  Tip To enter a pause in the fax number, press Redial/Pause.

3 Press Start Fax Black.

4 If your original is loaded on the glass, press 1.
  Tip You can also send a fax in color, such as a photo, from your HP all-in-one. Just press Start Fax Color instead of Start Fax Black.
Did you know that you can send a fax from your computer by using the **HP Director** that came with your **HP Image Zone** software? You can also create and attach a computer-generated cover page to send with your fax. It's easy. For more information, see the onscreen **HP Image Zone Help** that came with your **HP Image Zone** software.

**Enable fax confirmation**

If you need printed confirmation that your faxes were successfully sent, follow these instructions to enable fax confirmation before sending any faxes.

The default fax confirmation setting is **Every Error**. This means that your HP all-in-one prints a report only if there is a problem with sending or receiving a fax. A confirmation message indicating whether a fax was successfully sent appears briefly on the control panel display after each transaction. For more information on printing reports, see **Print reports**.

1. Press **Setup**.
2. Press **2**, and then press **1**.
   This selects **Print Report** and then selects **Fax Report Setup**.
3. Press ▶ until **Send Only** appears, and then press **OK**.
   Every time you send a fax, the HP all-in-one will print a confirmation report informing you whether the fax was sent successfully or not.

   **Note** If you select **Send Only**, you will not receive printed reports if there are errors while the HP all-in-one is receiving faxes. Print the **Fax Log** to view any receive errors. For more information on printing the **Fax Log**, see **Generate reports manually**.

**Send a fax manually from a phone**

You can make a phone call and talk with the recipient before you send your fax. This method of sending a fax is called manually sending a fax. Sending a fax manually is useful if you want to make sure the recipient is available to receive the fax before you send it.

The phone must be connected to the "2-EXT" port on the back of the HP all-in-one. For information on setting up your HP all-in-one with your phone, see **Fax setup**.

1. Load your originals face up in the document feeder tray with the top of the page on the left.
2. Dial the number by using the keypad on the phone that is connected to your HP all-in-one.

   **Note** You must use the keypad on the phone to dial the number. Do not use the keypad on the control panel of the HP all-in-one.

3. Do one of the following:
   - If after dialing the number you hear fax tones, press **Start Fax Black** or **Start Fax Color** within three seconds to send the fax.
   - If the recipient answers the telephone, you can engage in a conversation before sending your fax. Once you are ready to send your fax, press the **Start Fax Black** or **Start Fax Color** button on the control panel.
The phone line will go silent while the fax is transmitting. At this point, you can hang up the telephone. If you want to continue speaking with the recipient, remain on the line until the fax transmission is complete.

**Send a fax using redial**

You can use redial to send a fax to the last fax number dialed from the control panel.

1. Load your originals face up in the document feeder tray with the top of the page on the left.
2. Press Redial/Pause.
   - The last number dialed appears in the control panel display.
3. Press Start Fax Black or Start Fax Color.

**Send a fax using speed dials**

You can quickly send a fax by pressing Speed Dial or a one-touch speed dial button on the control panel. The one-touch speed dial buttons correspond to the first five speed-dial entries.

Speed-dial entries will not appear until you have set them up. For more information, see Set up speed dialing.

1. Load your originals face up in the document feeder tray with the top of the page on the left.
2. Do one of the following:
   - Press Speed Dial until the appropriate speed-dial entry appears. You can also scroll through the speed-dial entries by pressing ◀ or ▶.
   - Press Speed Dial and then enter the speed-dial code by using the keypad on the control panel.
   - Press a one-touch speed dial button.
3. Press Start Fax Black or Start Fax Color.

**Schedule a fax**

You can schedule a black-and-white fax to be sent later the same day (when phone lines are not as busy or phone rates are lower, for example). When scheduling a fax, the originals must be loaded in the document feeder tray and not on the glass. The HP all-in-one automatically sends your fax when the specified time is reached.

You can only schedule one fax to be sent at a time. You can continue to send faxes normally, however, while a fax is scheduled.

1. Load your originals face up in the document feeder tray with the top of the page on the left.

   **Note** Load your originals in the document feeder tray, and not on the glass. This feature is not supported if you load your originals on the glass.

2. In the Fax area, press Menu until How to Fax appears.
3. Press ▶ until Send Fax Later appears, and then press OK.
4. Enter the send time by using the numeric keypad, and then press OK.
5. Enter the fax number by using the keypad, press a one-touch speed dial button, or press Speed Dial until the appropriate speed-dial entry appears.
6. Press Start Fax Black.
The HP all-in-one sends the fax at the scheduled time and the scheduled time appears on the control panel display.

**Cancel a scheduled fax**

You can cancel a scheduled fax or one that is currently in progress. After you schedule a fax, the scheduled time appears on the control panel display.

- After the scheduled time appears on the control panel display, press **Cancel**, and then press 1.
  The scheduled fax is cancelled.

**Send a fax from memory**

You can scan a black-and-white fax into memory and then send the fax from memory. This feature is useful if the fax number you are trying to reach is busy or temporarily unavailable. The HP all-in-one scans the originals into memory and sends them once it is able to connect to the receiving fax machine. After the HP all-in-one scans the pages into memory, you can immediately remove the originals from the document feeder tray.

1. Load your originals face up in the document feeder tray with the top of the page on the left.

   **Note** Load your originals in the document feeder tray, and not on the glass. This feature is not supported if you load your originals on the glass.

2. In the Fax area, press **Menu** until **How to Fax** appears.
3. Press ➤ until **Scan & Fax** appears, and then press **OK**.
4. Enter the fax number by using the keypad, press a one-touch speed dial button, or press **Speed Dial** until the appropriate speed-dial entry appears.
5. Press **Start Fax Black**.

   **Note** If you press **Start Fax Color**, the fax will be sent in black and white and a message appears on the control panel display.

The HP all-in-one scans the originals into memory and sends the fax when the receiving fax machine is available. If you want to send all faxes with this setting, change it to the default. For more information, see [Set new default settings](#).

**Send a fax using monitor dialing**

Monitor dialing allows you to dial a number from the control panel as you would dial a regular telephone. This feature is useful when you want to use a calling card to charge the call and you need to respond to tone prompts while dialing. It also allows you to dial the number at your own pace, if necessary.

**Note** Make sure the volume is turned on, or you will not hear a dial tone. For information, see [Adjust the volume](#).

1. Load your originals face up in the document feeder tray with the top of the page on the left. If you are sending a single-page fax, you can also load it on the glass.
2. Press **Start Fax Black** or **Start Fax Color**.
3. If your original is loaded on the glass, press 1.
4 After you hear the dial tone, enter the number by using the keypad on the control panel.
5 Follow any prompts that might occur.
Your fax is sent when the receiving fax machine answers.

Receive a fax

Your HP all-in-one can receive faxes automatically or manually, depending on the answer mode that you set. If the light next to the Auto Answer button is on, your HP all-in-one automatically answers incoming calls and receive faxes. If the light is off, you need to receive faxes manually. For more information on the answer mode, see Set up the HP all-in-one to receive faxes.

Note If you installed a photo print cartridge for printing photos, you might want to replace it with the black print cartridge when receiving faxes. See Work with print cartridges.

Set the number of rings before answering

You can specify how many rings should occur before your HP all-in-one automatically answers the incoming call.

Note This setting only applies if your HP all-in-one is set to receive faxes automatically.

The Rings to Answer setting is important if you have an answering machine on the same phone line as your HP all-in-one. The answering machine must answer the call before your HP all-in-one. The number of rings to answer for the HP all-in-one should be greater than the number of rings to answer for the answering machine.

For example, set your answering machine to answer in 4 rings and your HP all-in-one to answer in the maximum number of rings supported by your device. (The maximum number of rings varies by country/region.) In this setup, the answering machine will answer the call and the HP all-in-one will monitor the line. If the HP all-in-one detects fax tones, the HP all-in-one will receive the fax. If the call is a voice call, the answering machine will record the incoming message.

To set the number of rings before answering from the control panel
1 Press Setup.
2 Press 4, and then press 3.
   This selects Basic Fax Setup and then selects Rings to Answer.
3 Enter the appropriate number of rings by using the keypad.
4 Press OK to accept the setting.

Receive a fax manually

If you set up your HP all-in-one to receive faxes manually (the Auto Answer light is off) or you answer the phone and hear fax tones, use the instructions in this section to receive faxes.
You can receive faxes manually from a phone that is:

- Directly connected to the HP all-in-one (on the "2-EXT" port)
- On the same phone line, but is not connected to the HP all-in-one

1. Make sure the HP all-in-one is turned on and you have paper loaded in the input tray.
2. Remove any originals from the document feeder tray.
3. Set the Rings to Answer setting to a high number to allow you to answer the incoming call before the HP all-in-one answers. Or, set your HP all-in-one to answer faxes manually.

For information on setting the number of rings to answer, see Set the number of rings before answering. For information on setting the HP all-in-one to answer faxes manually, see Set the answer mode.

4. Do one of the following:
   - If your phone is on the same phone line (but not plugged into the back of the HP all-in-one) and you hear fax tones from a sending fax machine, wait 5 - 10 seconds before pressing 1 2 3 on your phone. If the HP all-in-one does not begin receiving the fax, wait several more seconds and press 1 2 3 again.

   **Note** When the HP all-in-one receives an incoming call, it displays Ringing on the control panel display. If you pick up the phone, Phone Off Hook appears after a few seconds. You must wait until Phone Off Hook appears before pressing 1 2 3 on your phone or you will not be able to receive the fax.

   - If your phone is plugged directly into the back of the HP all-in-one and you hear fax tones from a sending fax machine, press the Start Fax Black or Start Fax Color button on the control panel. Then, press 2 to receive the fax.

   - If you are currently on the phone with the sender using a phone connected to the HP all-in-one, instruct them to press Start on their fax machine first. After you hear fax tones from the sending fax machine, press the Start Fax Black or Start Fax Color button on the control panel. Then, press 2 to receive the fax.

   **Note** If you press Start Fax Color but the sender sent the fax in black and white, the HP all-in-one prints the fax in black and white.

**Poll to receive a fax**

Polling allows your HP all-in-one to ask another fax machine to send a fax that it has in its queue. When you use the Poll to Receive feature, the HP all-in-one calls the designated fax machine and requests the fax from it. The designated fax machine must be set for polling and have a fax ready to send.

**Note** The HP all-in-one does not support polling pass codes. This is a security feature that requires the receiving fax machine (your HP all-in-one) to provide a pass code to the device it is polling in order to receive the fax. Make sure the device you are polling does not have a pass code set up (or changed the default pass code) or the HP all-in-one will not be able to receive the fax.

1. In the Fax area, press Menu until How to Fax appears.
2. Press ➪ until Poll to Receive appears, and then press OK.
3. Enter the fax number of the other fax machine.
4. Press Start Fax Black or Start Fax Color.
Note If you press Start Fax Color but the sender sent the fax in black and white, the HP all-in-one prints the fax in black and white.

Set the date and time
You can set the date and time from the control panel. When a fax is transmitted, the current date and time are printed along with the fax header. The date and time format is based on the language and country/region setting.

Note If your HP all-in-one loses power, you will need to reset the date and time.

1  Press Setup.
2  Press 4, and then press 1.
   This selects Basic Fax Setup and then selects Date and Time.
3  Enter the month, day, and year by pressing the appropriate numbers on the keypad. Depending on your country/region setting, you might enter the date in a different order.
   The underline cursor is presented initially beneath the first digit; it automatically advances to the next digit when you press a button. The time prompt automatically appears after you enter the last digit of the date.
4  Enter the hours and minutes.
5  If your time is displayed in the 12-hour format, press 1 for AM, or 2 for PM.
   The new date and time settings appear on the control panel display.

Set the fax header
The fax header prints your name and fax number on the top of every fax you send. We recommend that you set up the fax header by using the Fax Setup Wizard (Windows users) or the Setup Assistant (Macintosh users) during the HP Image Zone software installation.

You can also set up or change the fax header from the control panel. The fax header information is required by law in many countries/regions.

1  Press Setup.
2  Press 4, and then press 2.
   This selects Basic Fax Setup and then selects Fax Header.
3  Enter your personal or company name. You can enter up to 25 characters.
   For information on entering text from the control panel, see Enter text and symbols.
4  Press OK.
5  Enter your fax number by using the numeric keypad. You can enter up to 19 digits.
6  Press OK.
   You might find it easier to enter fax header information by using the HP Director that came with your HP Image Zone software. In addition to entering fax header information, you can also enter cover page information that will be used when you send a fax from your computer and attach a cover page. For more information, see the onscreen HP Image Zone Help that came with your HP Image Zone software.

Enter text and symbols
You can enter text and symbols from the control panel by using the keypad on the control panel when you set up speed-dial entries and the fax header information.
You can also enter symbols from the keypad when you dial a fax or phone number. When the HP all-in-one dials the number, it will interpret the symbol and respond accordingly. For example, if you enter a dash in the fax number, the HP all-in-one will pause before dialing the remainder of the number. A pause is useful if you need to access an outside line before dialing the fax number.

Enter text using the keypad on the control panel

You can enter text or symbols by using the keypad on the control panel.

- Press the keypad numbers that correspond to the letters of a name. For example, the letters a, b, and c correspond to the number 2, as shown on the button below.

- Press a button multiple times to see the available characters.

  Note Depending on your language and country/region setting, additional characters might be available.

- After the correct letter appears, wait for the cursor to advance automatically to the right, or press \( \Rightarrow \). Press the number that corresponds to the next letter in the name. Press the button multiple times until the correct letter appears. The first letter of a word is automatically set to uppercase.

- To insert a space, press \( \text{Space (\#)} \).

- To enter a pause, press \( \text{Redial/Pause} \). A dash appears in the number sequence.

- To enter a symbol, such as \( @ \), press the \( \text{Symbols (*)} \) button repeatedly to scroll through the list of available symbols: asterisk (\(*\)), dash (\(-\)), ampersand (\(&\)), period (\(\cdot\)), slash (\(/\)), parentheses (\(\()\)), apostrophe (\('\)), equals (\(=\)), number sign (\(#\)), at (\(@\)), underscore (\(_\)), plus (\(+\)), exclamation (\(!\)), semi colon (\(;\)), question (\(?\)), comma (\(,\)), colon (\(:\)), percent (\(%\)), and approximation (\(\sim\)).

- If you make a mistake, press \( \leftarrow \) to clear it, and then make the correct entry.

- After you are done entering text, press \( \text{OK} \) to store your entry.

Print reports

You can set up your HP all-in-one to print error reports and confirmation reports automatically for each fax you send and receive. You can also manually print system reports as you need them; these reports provide useful system information about your HP all-in-one.

By default, your HP all-in-one is set to print a report only if there is a problem with sending or receiving a fax. A confirmation message that indicates whether a fax was successfully sent appears briefly on the control panel display after each transaction.

Generate reports automatically

You can configure your HP all-in-one so that it automatically prints error and confirmation reports.
Note  If you need printed confirmation each time a fax is sent, follow these instructions before sending any faxes and select Send Only.

1  Press Setup.
2  Press 2, and then press 1.
   This selects Print Report and then selects Fax Report Setup.
3  Press to scroll through the following report types:
   – Every Error: prints whenever there is any kind of fax error (default).
   – Send Error: prints whenever there is a transmission error.
   – Receive Error: prints whenever there is a receiving error.
   – Every Fax: confirms every time a fax is sent or received.
   – Send Only: prints every time a fax is sent indicating whether the fax was successfully sent or not.
   – Off: does not print any error or confirmation reports.
4  Press OK to select the report.

Generate reports manually

You can manually generate reports about your HP all-in-one, such as the status of the last fax you sent, a list of programmed speed-dial entries, or a self-test report for diagnostic purposes.

1  Press Setup, and then press 2.
   This selects Print Report.
2  Press to scroll through the following report types:
   – 1: Fax Report Setup: prints the automatic fax reports as described in Generate reports automatically.
   – 2: Last Transaction: prints details of the last fax transaction.
   – 3: Fax Log: prints a log of approximately the last 30 fax transactions.
   – 4: Speed Dial List: prints a list of programmed speed-dial entries.
   – 5: Self-Test Report: prints a report to assist you in diagnosing print and alignment problems. For more information, see Print a self-test report.
3  Press OK to print the report.

Set up speed dialing

You can assign speed-dial entries to fax numbers you use often. Use the one-touch speed dial buttons on the control panel to send faxes quickly. You can also press Speed Dial to scroll through and select from the list of speed-dial entries.

The first five speed-dial entries are automatically saved to the one-touch speed dial buttons on the control panel.

For information on sending a fax using speed dials, see Send a fax using speed dials.

You can quickly and easily set up speed-dial entries from your computer by using the HP Director that came with your HP Image Zone software. For more information, see the onscreen HP Image Zone Help that came with your HP Image Zone software.

Create speed-dial entries

You can create speed-dial entries for fax numbers that you use frequently.

1  Press Setup.
2 Press 3, and then press 1.
This selects Speed Dial Setup and then selects Individual Speed Dial.
The first unassigned speed-dial entry appears on the control panel display.
3 Press OK to select the displayed speed-dial entry. You can also press ◄ or ► to select another empty entry, and then press OK.
4 Enter the fax number to assign to that entry, and then press OK. You can enter up to 49 digits.
Tip To enter a pause in the fax number, press Redial/Pause.
5 Enter the name, and then press OK. You can enter up to 13 characters.
For more information on entering text, see Enter text and symbols.
6 Press 1 if you want to set up another number, or press 2 if you are finished creating speed-dial entries.

Create group speed-dial entries
You can create a group speed-dial entry that contains up to 48 individual speed-dial entries. This allows you to send black-and-white faxes to specific groups of people by using one speed-dial entry.

Note You can only send black-and-white faxes when sending a fax to groups. Very Fine resolution is also not supported when using this feature.

You can only assign previously entered individual speed-dial numbers to a group. Additionally, only individual speed-dial entries can be added; you can't assign one group to another group.
1 Press Setup.
2 Press 3, and then press 2.
This selects Speed Dial Setup and then selects Group Speed Dial.
The first unassigned speed-dial entry appears on the control panel display.
3 Press OK to select the displayed speed-dial entry. You can also press ◄ or ► to select another empty entry, and then press OK.
4 Press ◄ or ► to select an individual speed-dial entry to add to the group speed dial.
5 Press OK.
6 Press 1 to add another individual speed-dial entry, or press 2 if you are finished.
7 Enter the group speed-dial name, and then press OK.
For more information on entering text, see Enter text and symbols.
8 Press 1 to add another group, or press 2 if you are finished.

Update speed-dial entries
You can change the phone number or name of an individual speed-dial entry.

Note If the individual speed-dial entry is also a part of a speed-dial group, the speed-dial group will reflect any updates made to the individual speed-dial entry.
1 Press Setup.
2 Press 3, and then press 1.
This selects Speed Dial Setup and then selects Individual Speed Dial.
3 Press ◄ or ► to scroll through the speed-dial entries, and then press OK to select the appropriate entry.
4 When the current fax number appears, press ▷ to erase it.
5 Enter the new fax number.
6 Press OK to save the new number.
7 Enter the new name.
   For more information on using entering text, see Enter text and symbols.
8 Press OK.
9 Press 1 to update another speed-dial entry, or press 2 when you are finished.

Delete speed-dial entries
You can delete an individual or group speed-dial entry. If you delete an individual
speed-dial entry that is included in a group speed dial, it will be deleted from the group
as well.
1 Press Setup.
2 Press 3, and then press 3 again.
   This selects Speed Dial Setup and then selects Delete Speed Dial.
3 Press ◄ or ► until the speed-dial entry that you want to delete appears, and then
   press OK to delete it. You can also enter the speed-dial code by using the
   keypad on the control panel.

Change the fax resolution and lighter/darker settings
You can change the Fax Resolution and Lighter/Darker settings for documents that
you are faxing.

Change the fax resolution
The Fax Resolution setting affects the transmission speed and quality of faxed black-
and-white documents. The HP all-in-one sends faxes at the highest resolution
supported by the receiving fax machine. You can only change the resolution for faxes
that you are sending in black and white. All color faxes will be sent using Fine
resolution. The following resolution settings are available:

- **Fine**: provides high-quality text suitable for faxing most documents. This is the
default setting.
- **Very Fine**: provides the best quality fax when you are faxing documents with very
fine detail. If you choose Very Fine, be aware that the faxing process takes
longer to complete and you can only send black-and-white faxes using this
resolution. If you send a color fax, it will be sent using Fine resolution instead.
- **Photo**: provides the best quality fax when sending photographs. If you choose
Photo, be aware that the faxing process takes longer to complete. When faxing
photographs, we recommend that you choose Photo.
- **Standard**: provides the fastest possible fax transmission with the lowest quality.

This setting returns to the default setting after the job has been completed, unless you
set your changes as the default. For information, see Set new default settings.

To change the resolution from the control panel
1 Load your originals face up in the document feeder tray with the top of the page
on the left.
2 Enter the fax number by using the keypad, press a one-touch speed dial button,
or press Speed Dial until the appropriate speed-dial entry appears.
3 In the Fax area, press Menu until Fax Resolution appears.
4 Press ▶ to select a resolution setting.
5 Press Start Fax Black.

Note If you press Start Fax Color, the fax will be sent using the Fine setting.

Your fax is sent with the Fax Resolution setting you selected. If you want to send all faxes with this setting, change it to the default. For more information, see Set new default settings.

Change the lighter/darker setting

You can change the contrast of a fax to be darker or lighter than the original. This feature is useful if you are faxing a document that is faded, washed out, or handwritten. You can darken the original by adjusting the contrast.

This setting returns to the default setting after the job has been completed, unless you set your changes as the default. For information, see Set new default settings.

1 Load your originals face up in the document feeder tray with the top of the page on the left.
2 Enter the fax number by using the keypad, press a one-touch speed dial button, or press Speed Dial until the appropriate speed-dial entry appears.
3 In the Fax area, press Menu until Lighter/Darker appears.
4 Press ▲ to lighten the fax or press ▼ to darken it.
The indicator moves to the left or right as you press an arrow.
5 Press Start Fax Black or Start Fax Color.

Your fax is sent with the Lighter/Darker setting you selected. If you want to send all faxes with this setting, change it to the default. For more information, see Set new default settings.

Set new default settings

You can change the default value for the Fax Resolution, Lighter/Darker, and How to Fax settings through the control panel.

1 Make your changes to the Fax Resolution, Lighter/Darker, or How to Fax settings.
2 Press Menu until Set New Defaults appears.
3 Press ▶ until Yes appears.

Set fax options

There are numerous fax options that you can set, such as controlling whether the HP all-in-one redials a busy number automatically. When you make changes to the following options, the new setting becomes the default. Review this section for information on changing fax options.

Set the paper size for received faxes

You can select the paper size for received faxes. The paper size you select should match what is loaded in your input tray. Faxes can be printed on letter, A4, or legal paper only.
Note If an incorrect paper size is loaded in the input tray when a fax is received, the fax does not print and an error message appears on the control panel display. Load letter, A4, or legal paper, and then press OK to print the fax.

1 Press Setup.
2 Press 4, and then press 4 again.
   This selects Basic Fax Setup and then selects Fax Paper Size.
3 Press ▶ to select an option, and then press OK.

Set tone or pulse dialing

You can set the dial mode for your HP all-in-one to either tone dialing or pulse dialing. Most telephone systems work with either type of dialing. If your telephone system does not require pulse dialing, we recommend using tone dialing. If you have a public telephone system or a private branch exchange (PBX) system, you may need to select Pulse Dialing. Contact your local telephone company if you are unsure which setting to use.

Note If you select Pulse Dialing, some phone system features might not be available. It can also take longer to dial a fax or phone number.

1 Press Setup.
2 Press 4, and then press 5.
   This selects Basic Fax Setup and then selects Tone or Pulse Dialing.
3 Press ▶ to select an option, and then press OK.

Adjust the volume

Your HP all-in-one provides three levels for adjusting the ring and speaker volume. The ring volume is the volume of the phone rings. The speaker volume is the level of everything else, such as the dial tones, fax tones, and button press beeps. The default setting is Soft.

1 Press Setup.
2 Press 4, and then press 6.
   This selects Basic Fax Setup and then selects Ring and Beep Volume.
3 Press ▶ to select one of the options: Soft, Loud, or Off.
   Note If you select Off, you will not hear a dial tone, fax tones, or incoming ring tones.
4 Press OK.

Forward faxes to another number

You can set up your HP all-in-one to forward your faxes to another fax number. If a color fax is received, the fax is forwarded in black and white.

Note When the HP all-in-one is forwarding your faxes, it will not print the faxes it receives unless there was a problem. If the HP all-in-one is not able to forward the fax to the designated fax machine (if it is not turned on, for example), the HP all-in-one will print the fax and an error report.

We recommend that you verify the number you are forwarding to works. Send a test fax to make sure the fax machine is able to receive your forwarded faxes.
To forward faxes from the control panel

1. Press Setup.
2. Press 4, and then press 7.
   This selects Basic Fax Setup and then selects Fax Forwarding Black Only.
3. Press ▶ until On appears, and then press OK.
4. At the prompt, enter the number of the fax machine that will receive the forwarded faxes.
5. Press OK.
   Fax Forwarding appears on the control panel display.

Cancel fax forwarding

You can cancel your fax forwarding setup from the control panel.

You can cancel your fax forwarding setup from the control panel or the HP Director. If you want to change the number of the fax machine you are forwarding your faxed to, use the HP Director.

To cancel forward faxes from the control panel
➔ Press Cancel, and then press 1.
   Fax forwarding is cancelled.

Change the answer ring pattern (distinctive ringing)

Many phone companies offer a distinctive ringing feature that allows you to have several phone numbers on one phone line. When you subscribe to this service, each number will have a different ring pattern. For example, you can have single, double, and triple rings for the different numbers. You can set up your HP all-in-one to answer incoming calls that have a specific ring pattern.

If you connect your HP all-in-one to a line with distinctive ringing, have your telephone company assign one ring pattern to voice calls and another ring pattern to fax calls. We recommend that you request double or triple rings for a fax number. When the HP all-in-one detects the specified ring pattern, it will answer the call and receive the fax.

For example, you might have your telephone company assign double rings to your fax number and a single ring to your voice number. In this setup, set the Answer Ring Pattern for your HP all-in-one to Double Rings. You can also set the Rings to Answer setting to 3. When a call comes in with a double ring, the HP all-in-one answers it after three rings and receives the fax.

If you do not have this service, use the default ring pattern, which is All Rings.

To change the answer ring pattern from the control panel

1. Verify that your HP all-in-one is set to answer fax calls automatically. For information, see Set the answer mode.
2. Press Setup.
3. Press 5, and then press 1.
   This selects Advanced Fax Setup and then selects Answer Ring Pattern.
4. Press ▶ to select an option, and then press OK.
   When the phone rings with the ring pattern assigned to your fax phone line, the HP all-in-one answers the call and receives the fax.
Redial a busy or unanswered number automatically

You can set your HP all-in-one to redial a busy or an unanswered number automatically. The default setting for Busy Redial is Redial. The default setting for No Answer Redial is No Redial.

1. Press Setup.
2. Do one of the following:
   - To change the Busy Redial setting, press 5, and then press 2. This selects Advanced Fax Setup and then selects Busy Redial.
   - To change the No Answer Redial setting press 5, and then press 3. This selects Advanced Fax Setup and then selects No Answer Redial.
3. Press ▶ to select Redial or No Redial.
4. Press OK.

Set automatic reduction for incoming faxes

This setting determines what your HP all-in-one does if it receives a fax that is too large for the default paper size. With this setting turned on (the default), the image of the incoming fax is reduced so that it fits on one page, if possible. With this feature turned off, information that does not fit on the first page is printed on a second page. Automatic Reduction is useful when you receive a legal-size fax and letter-size paper is loaded in the input tray.

1. Press Setup.
2. Press 5, and then press 4. This selects Advanced Fax Setup and then selects Automatic Reduction.
3. Press ▶ to select Off or On.
4. Press OK.

Set backup fax reception

The HP all-in-one stores all received faxes in memory. If there is an error condition that prevents the HP all-in-one from printing the faxes, Backup Fax Reception allows you to continue receiving faxes. During the error condition, with Backup Fax Reception enabled, the faxes are stored in memory.

For example, if the HP all-in-one is out of paper and Backup Fax Reception is enabled, all received faxes are stored in memory. After you load more paper, you can print the faxes. If you disable this feature, the HP all-in-one will not answer incoming fax calls until the error condition is resolved.

Error conditions, such as the following, may prevent the HP all-in-one from printing faxes:

- There is no paper loaded in the input tray
- There is a paper jam
- The print-carriage access door is open
- The print carriage is stalled

During normal operation (whether Backup Fax Reception is On or Off), the HP all-in-one stores all faxes in memory. After the memory becomes full, the HP all-in-one overwrites the oldest, printed faxes as it receives new faxes. If you want to delete all the faxes in memory, turn off the HP all-in-one by pressing the On button.
Note  If Backup Fax Reception is On and there is an error condition, the HP all-in-one stores the faxes it receives in memory as "unprinted." All unprinted faxes remain in memory until they are printed or deleted. When the memory becomes full of unprinted faxes, the HP all-in-one will not receive any more fax calls until the unprinted faxes are printed or deleted from memory. For information on printing or deleting faxes from memory, see Reprint or delete the faxes in memory.

The default Backup Fax Reception setting is On.

To set backup fax reception from the control panel
1  Press Setup.
2  Press 5, and then press 5 again.
   This selects Advanced Fax Setup and then selects Backup Fax Reception.
3  Press ▶ to select On or Off.
4  Press OK.

Use error correction mode

Error Correction Mode (ECM) eliminates data that is lost due to poor phone lines by detecting errors that occur during transmission and automatically requesting retransmission of the erroneous portion. Phone charges are unaffected, or might even be reduced, on good phone lines. On poor phone lines, ECM increases sending time and phone charges, but sends the data much more reliably. The default setting is on. Turn ECM off only if it increases phone charges substantially, and you can accept poorer quality in exchange for reduced charges.

The following rules apply to ECM:
● If you turn ECM off, this applies only to faxes that you send. This does not apply to faxes that you receive.
● If you turn ECM off, set the Fax Speed to Medium. If the Fax Speed is set to Fast, the fax will automatically be sent with ECM on. For information on changing the Fax Speed, see Set the fax speed.
● If you send a fax in color, the fax will be sent with ECM on, regardless of the option currently set.

To change the ECM setting from the control panel
1  Press Setup.
2  Press 5, and then press 6.
   This selects Advanced Fax Setup and then selects Error Correction Mode.
3  Press ▶ to select Off or On.
4  Press OK.

Set the fax speed

You can set the fax speed used to communicate between your HP all-in-one and other fax machines when sending and receiving faxes. The default fax speed is Fast.

If you use one of the following, setting the fax speed to a slower speed might be required:
● An Internet phone service
● A PBX system
Fax over Internet Protocol (FoIP)

An integrated services digital network (ISDN) service

If you experience problems sending and receiving faxes, you might want to try setting the Fax Speed setting to Medium or Slow. The following table provides the available fax speed settings.

<table>
<thead>
<tr>
<th>Fax speed setting</th>
<th>Fax speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fast</td>
<td>v.34 (33600 baud)</td>
</tr>
<tr>
<td>Medium</td>
<td>v.17 (14400 baud)</td>
</tr>
<tr>
<td>Slow</td>
<td>v.29 (9600 baud)</td>
</tr>
</tbody>
</table>

To set the fax speed from the control panel

1. Press Setup.
2. Press 5, and then press 7.
   This selects Advanced Fax Setup and then selects Fax Speed.
3. Press ▶ to select an option, and then press OK.

Reprint or delete the faxes in memory

You can reprint or delete the faxes stored in memory. You might need to reprint a fax in memory if your HP all-in-one runs out of paper while receiving a fax. Or, if the memory of the HP all-in-one becomes full, you might need to clear it in order to continue receiving faxes.

Note The HP all-in-one stores all faxes it receives in memory, even when the faxes are printed. This allows you to reprint the faxes later, if needed. After the memory becomes full, the HP all-in-one overwrites the oldest, printed faxes as it receives new faxes.

To reprint faxes in memory from the control panel

1. Make sure you have paper loaded in the input tray.
2. Press Setup.
3. Press 6, and then press 4.
   This selects Tools and then selects Reprint Faxes in Memory.
   The faxes are printed in the reverse order they were received with the most recently received fax printed first, and so on.
4. If you do not need a fax that is printing, press Cancel.
   The HP all-in-one begins printing the next fax in memory.

Note You will need to press Cancel for each stored fax in order to stop it from printing.

To delete all the faxes in memory from the control panel

To delete all the faxes from memory, turn off the HP all-in-one by pressing the On button.

All faxes stored in memory will be deleted from memory after you turn off the power to your HP all-in-one.
Fax over the Internet

You may subscribe to a low cost phone service that allows you to send and receive faxes with your HP all-in-one by using the Internet. This method is called Fax over Internet Protocol (FoIP). You probably use a FoIP service (provided by your telephone company) if you:

- Dial a special access code along with the fax number, or
- Have an IP converter box that connects to the Internet and provides analog phone ports for the fax connection.

**Note**  You can only send and receive faxes by connecting a phone cord to the port labeled "1-LINE" on the HP all-in-one and not from the Ethernet port. This means that your connection to the Internet must be done either through a converter box (which supplies regular analog phone jacks for fax connections) or your telephone company.

The FoIP service might not work properly when the HP all-in-one is sending and receiving faxes at high speed (33600bps). If you experience problems sending and receiving faxes, use a slower fax speed. You can do this by changing the Fax Speed setting from High (the default) to Medium. For information on changing this setting, see Set the fax speed.

You should also check with your telephone company to make sure their Internet phone service supports faxing. If they do not support faxing, you will not be able to send and receive faxes through the Internet.

Stop faxing

You can cancel a fax you are sending or receiving at any time.

**To stop faxing from the control panel**

- Press Cancel on the control panel to stop a fax you are sending or receiving. Look for the Fax Cancelled message on the control panel display. If it does not appear, press Cancel again.
  The HP all-in-one prints any pages it has already started printing and then cancels the remainder of the fax. This can take a few moments.

**To cancel a number you are dialing**

- Press Cancel to cancel a number you are currently dialing.
12 Use HP Instant Share

HP Instant Share makes it easy to share photos with family and friends. Just scan a photo, select a destination for your photo, and then send the photo on its way. You can even upload your photos to an online photo album or an online photo finishing service. Availability of services varies by country/region.

With **HP Instant Share E-mail**, family and friends always get photos they can view: no more large downloads or images that are too big to open. An e-mail message with thumbnail images of your photos is sent with a link to a secure Web page where family and friends can easily view, share, print, and save the photos.

Overview

If your HP all-in-one is USB-connected, you can share photos with friends and relatives using your device and the HP software installed on your computer. If you have a Windows-based computer, use the **HP Image Zone** software; if you have a Macintosh, use the **HP Instant Share** client application software.

Note  A USB-connected device is an HP All-in-One that is connected to a computer by means of a USB cable and relies on the computer for access to the Internet.

Use HP Instant Share to send images from your HP all-in-one to a destination of your choice. The destination, for example, can be an e-mail address, an online photo album, or an online photo finishing service. Availability of services varies by country/region.

Note  You can also send images to a friend or relative's network-connected HP All-in-One or photo printer. To send to a device, you must have an HP Passport user ID and password. The receiving device must be set up and registered with HP Instant Share. You will also need to obtain the name the recipient assigned to the receiving device. Further instructions are provided in step 6 in **Send images using your HP all-in-one**.

Get started

You must have the following to use HP Instant Share with your HP all-in-one:

- An HP all-in-one connected to a computer with a USB cable
- Internet access through the computer to which the HP all-in-one is connected
- **HP Image Zone** software installed on your computer. Macintosh users will find that the **HP Instant Share** client application software is also installed.

Once you have set up your HP all-in-one and installed the **HP Image Zone** software, you are ready to start sharing photos using HP Instant Share. For more information on setting up your HP all-in-one, see the Setup Guide that came with your device.
Send images using your HP all-in-one

Images can be photos or scanned documents. Either can be shared with friends and relatives using your HP all-in-one and HP Instant Share.

Share a scanned image by pressing Scan To on the control panel. To use Scan To, place an image face down on the glass, select a destination to which you want to send the image, and start the scan.

Note For more information on scanning an image, see Use the scan features.

To send a scanned image from your HP all-in-one
1 Load your original face down on the right front corner of the glass or (if you are using the automatic document feeder) in the document tray.
2 Press Scan To on the control panel of your HP all-in-one.
The Scan To menu appears on the color graphics display.
3 Use the ← and → arrows to highlight HP Instant Share.
4 Press OK or Start Scan to select the destination.
The image is scanned and uploaded to your computer.

Note If an original is detected in the automatic document feeder, one or more pages are scanned. If no original is detected in the automatic document feeder, a single page is scanned from the scanner bed.

For Windows users, the HP Image Zone software opens on your computer. The HP Instant Share tab appears. A thumbnail of the scanned image appears in the Selection Tray. For more information on the HP Image Zone, see Use the HP Image Zone in the onscreen help.

For Macintosh users, the HP Instant Share client application software opens on your computer. A thumbnail of the scanned image appears in the HP Instant Share window.

Note If you are using a Macintosh OS earlier than X v10.1.5 (including OS 9 v9.1.5), your photos are uploaded to the HP Gallery on your Macintosh. Click E-mail. Send the scanned image as an e-mail attachment by following the prompts on your computer screen.

5 Follow the steps appropriate for your operating system:

If you are using a Windows-based computer:
a From either the Control or Work areas of the HP Instant Share tab, click the link or icon of the service you want to use to send your scanned image.

Note If you click See All Services, you can choose from among all of the services available in your country/region, for example: HP Instant Share E-mail and Create Online Albums. Follow the onscreen instructions.

The Go Online screen appears in the Work area.
b Click Next and follow the onscreen instructions.

If you are using a Macintosh:

a Make sure the scanned image you want to share displays in the HP Instant Share window.
Use the - button to remove photos, or the + button to add photos to the window.

b Click **Continue** and follow the onscreen instructions.
c From the HP Instant Share services list, select the service you want to use to send your scanned image.
d Follow the onscreen instructions.

6 From the **HP Instant Share E-mail** service, you can:
   – Send an e-mail message with thumbnail images of your photos which can be viewed, printed, and saved over the Web.
   – Open and maintain an e-mail address book. Click **Address Book**, register with HP Instant Share, and create an HP Passport account.
   – Send your e-mail message to multiple addresses. Click the related link.
   – Send a collection of images to a friend or relative's network-connected device. Enter the name assigned to the device by the recipient in the **E-mail address** field followed by @send.hp.com. You will be prompted to sign in to HP Instant Share with your HP Passport **userid** and **password**.

   **Note** If you have not previously set up HP Instant Share, click **I need an HP Passport account** on the **Sign in with HP Passport** screen. Obtain an HP Passport user ID and password.

**Send images using your computer**

In addition to using your HP all-in-one to send images through HP Instant Share, you can use the **HP Image Zone** software installed on your computer to send images. The **HP Image Zone** software lets you select and edit one or more images, and then access HP Instant Share to select a service (for example, **HP Instant Share E-mail**) and send your images. At a minimum, you can share images through the following:

   ● HP Instant Share E-mail (send to an e-mail address)
   ● HP Instant Share E-mail (send to a device)
   ● Online Albums
   ● Online photo finishing (availability varies by country/region)

**Send images using the HP Image Zone software (Windows)**

Use the **HP Image Zone** software to share images with friends and relatives. Simply open the **HP Image Zone**, select the images you want to share, and forward the images using the **HP Instant Share E-mail** service.

   **Note** For more information on using the **HP Image Zone** software, see the onscreen **HP Image Zone Help**.

**To use the HP Image Zone software**

1 Double-click the **HP Image Zone** icon on your desktop.
   The **HP Image Zone** window opens on your computer. The **My Images** tab appears in the window.

2 Select one or more images from the folder(s) in which they are stored.
   For more information, see the onscreen **HP Image Zone Help**.
Note Use the HP Image Zone image editing tools to edit your images and achieve the results you want. For more information, see the onscreen HP Image Zone Help.

3 Click the HP Instant Share tab.
The HP Instant Share tab appears in the HP Image Zone window.
4 From either the Control or Work areas of the HP Instant Share tab, click the link or icon of the service you want to use to send your scanned image.

Note If you click See All Services, you can choose from among all of the services available in your country/region, for example: HP Instant Share E-mail and Create Online Albums. Follow the onscreen instructions.

The Go Online screen appears in the Work area of the HP Instant Share tab.
5 Click Next and follow the onscreen instructions.
6 From the HP Instant Share E-mail service, you can:
   – Send an e-mail message with thumbnail images of your photos which can be viewed, printed, and saved over the Web.
   – Open and maintain an e-mail address book. Click Address Book, register with HP Instant Share, and create an HP Passport account.
   – Send your e-mail message to multiple addresses. Click the related link.
   – Send a collection of images to a friend or relative's network-connected device. Enter the name assigned to the device by the recipient in the E-mail address field followed by @send.hp.com. You will be prompted to sign in to HP Instant Share with your HP Passport userid and password.

Note If you have not previously set up HP Instant Share, click I need an HP Passport account on the Sign in with HP Passport screen. Obtain an HP Passport user ID and password.

Send images using the HP Instant Share client application software (Macintosh OS X v10.1.5 and later)

Note Macintosh OS X v10.2.1 and v10.2.2 are not supported.

Use the HP Instant Share client application to share images with friends and relatives. Simply open the HP Instant Share window, select the images you want to share, and forward the images using the HP Instant Share E-mail service.

Note For more information on using the HP Instant Share client application software, see the onscreen HP Image Zone Help.

To use the HP Instant Share client application
1 Select the HP Image Zone icon from the Dock.
The HP Image Zone opens on your desktop.
2 In the HP Image Zone, click the Services button at the top of the window.
A list of applications appears in the lower part of the HP Image Zone.
3 Choose HP Instant Share from the list of applications.
The HP Instant Share client application software opens on your computer.
4 Use the + button to add an image to the window, or the - button to remove an image.
For more information on using the HP Instant Share client application software, see the onscreen HP Image Zone Help.

5 Make sure the images you want to share display in the HP Instant Share window.
6 Click Continue and follow the onscreen instructions.
7 From the HP Instant Share services list, select the service you want to use to send your scanned image.
8 Follow the onscreen instructions.
9 From the HP Instant Share E-mail service, you can:
   – Send an e-mail message with thumbnail images of your photos which can be viewed, printed, and saved over the Web.
   – Open and maintain an e-mail address book. Click Address Book, register with HP Instant Share, and create an HP Passport account.
   – Send your e-mail message to multiple addresses. Click the related link.
   – Send a collection of images to a friend or relative's network-connected device. Enter the name assigned to the device by the recipient in the E-mail address field followed by @send.hp.com. You will be prompted to sign in to HP Instant Share with your HP Passport user ID and password.

Note If you have not previously set up HP Instant Share, click I need an HP Passport account on the Sign in with HP Passport screen. Obtain an HP Passport user ID and password.

Share images using the HP Director (Macintosh OS earlier than X v10.1.5)

Note Macintosh OS 9 v9.1.5 and later and v9.2.6 and later are supported. Macintosh OS X v10.0 and v10.0.4 are not supported.

Share images with anyone who has an e-mail account. Simply start the HP Director and open the HP Gallery. Then create a new e-mail message using an e-mail application installed on your computer.

Note For more information, see the HP Imaging Gallery section in the onscreen HP Photo and Imaging Help.

To use the e-mail option within the HP Director

1 Display the HP Director menu:
   – In OS X, select the HP Director icon from the Dock.
   – In OS 9, double-click the HP Director shortcut on your desktop.
2 Open the HP Photo and Imaging Gallery:
   – In OS X, select HP Gallery from the Manage and Share section of the HP Director menu.
   – In OS 9, click HP Gallery.
3 Select one or more images to share.
   For more information, see the onscreen HP Photo and Imaging Help.
4 Click E-mail.
   The e-mail program on your Macintosh opens.
   Send the images as an e-mail attachment by following the prompts on your computer screen.
13 Order supplies

You can order recommended types of HP paper and print cartridges online from the HP website.

Order paper, transparency film, or other media

To order media such as HP Premium Paper, HP Premium Plus Photo Paper, HP Premium Inkjet Transparency Film, or HP Iron-On Transfer, go to www.hp.com. If prompted, choose your country/region, follow the prompts to select your product, and then click one of the shopping links on the page.

Order print cartridges

To order print cartridges for your HP all-in-one, go to www.hp.com. If prompted, choose your country/region, follow the prompts to select your product, and then click one of the shopping links on the page.

Your HP all-in-one supports the following print cartridges:

<table>
<thead>
<tr>
<th>Print cartridges</th>
<th>HP reorder number</th>
</tr>
</thead>
<tbody>
<tr>
<td>HP black inkjet print cartridge</td>
<td>#94, 11 ml black print cartridge</td>
</tr>
<tr>
<td>HP tri-color inkjet print cartridge</td>
<td>#97, 14 ml color print cartridge #95, 7 ml color print cartridge</td>
</tr>
<tr>
<td>HP photo inkjet print cartridge</td>
<td>#99, 13 ml color photo print cartridge</td>
</tr>
</tbody>
</table>

Note  Print cartridge reorder numbers vary by country/region. If the reorder numbers listed in this guide do not match the numbers on the print cartridges currently installed in your HP all-in-one, order new print cartridges with the same numbers as those you currently have installed.

You can find out the reorder numbers for all the print cartridges your device supports through the Printer Toolbox. In the HP Director, click Settings, point to Print Settings, and then click Printer Toolbox. Click the Estimated Ink Levels tab, and then click Print Cartridge Ordering Information.

You can also contact a local HP reseller or go to www.hp.com/support to confirm the correct print cartridge reorder numbers for your country/region.

Order other supplies

To order other supplies, such as HP all-in-one software, a copy of the printed User Guide, a Setup Guide, or other customer-replaceable parts, call the appropriate number below:

- In the U.S. or Canada, dial 1-800-474-6836 (1-800-HP invent).
- In Europe, dial +49 180 5 290220 (Germany) or +44 870 606 9081 (U.K.).

To order HP all-in-one software in other countries/regions, call the phone number for your country/region. The numbers listed below are current as of the publication date of
this guide. For a list of current ordering numbers, go to [www.hp.com/support](http://www.hp.com/support). If prompted, choose your country/region, and then click **Contact HP** for information on calling for technical support.

<table>

Maintain your HP all-in-one

The HP all-in-one requires little maintenance. Sometimes you might want to clean the glass and lid backing to remove surface dust and ensure that your copies and scans remain clear. You will also need to replace, align, or clean your print cartridges occasionally. This chapter provides instructions for keeping your HP all-in-one in top working condition. Perform these simple maintenance procedures as necessary.

Clean the HP all-in-one

Fingerprints, smudges, hair, and other debris on the glass or lid backing slow down performance and affect the accuracy of special features such as Fit to Page. To ensure that your copies and scans remain clear, you might need to clean the glass and lid backing. You might also want to dust the exterior of the HP all-in-one.

Clean the glass

Fingerprints, smudges, hair, and dust on the main glass surface slow down performance and affect the accuracy of features such as Fit to Page.

In addition to the main glass surface, you might also need to clean the small glass strip inside the automatic document feeder. Streaks can occur if the glass strip inside the automatic document feeder is dirty.

To clean the glass

1. Turn off the HP all-in-one, unplug the power cord, and raise the lid.

   **Note** When you unplug the power cord, the date and time are erased. You will need to reset the date and time later, when you plug the power cord back in. Any faxes stored in memory are also erased.

2. Clean the glass with a soft cloth or sponge slightly moistened with a nonabrasive glass cleaner.

   **Warning** Do not use abrasives, acetone, benzene, or carbon tetrachloride on the glass; they can damage it. Do not place or spray liquid directly on the glass; the liquid might seep under the glass and damage the device.

3. Dry the glass with a chamois or cellulose sponge to prevent spotting.

To clean the glass strip inside the automatic document feeder

1. Lift the cover of the automatic document feeder.
2 Raise the lid, as if you were loading an original on the glass.

3 Lift the automatic document feeder mechanism.

There is a glass strip under the automatic document feeder.
4 Clean the glass strip with a soft cloth or sponge slightly moistened with a nonabrasive glass cleaner.

⚠️ **Warning**  Do not use abrasives, acetone, benzene, or carbon tetrachloride on the glass; they can damage it. Do not place or spray liquid directly on the glass; the liquid might seep under the glass and damage the device.

5 Lower the automatic document feeder mechanism, and then close the cover of the automatic document feeder.

6 Close the lid.

### Clean the lid backing

Minor debris can accumulate on the white document backing located underneath the lid of the HP all-in-one.

1 Turn off the HP all-in-one, unplug the power cord, and raise the lid.

2 Clean the white document backing with a soft cloth or sponge slightly moistened with a mild soap and warm water.

3 Wash the backing gently to loosen debris. Do not scrub the backing.

4 Dry the backing with a chamois or soft cloth.

⚠️ **Warning**  Do not use paper-based wipes, as these might scratch the backing.

5 If further cleaning is needed, repeat the previous steps using isopropyl (rubbing) alcohol, and wipe the backing thoroughly with a damp cloth to remove any residual alcohol.

⚠️ **Warning**  Be careful not to spill alcohol on the glass or painted parts of the HP all-in-one, as this might damage the device.

### Clean the exterior

Use a soft cloth or slightly moistened sponge to wipe dust, smudges, and stains off the case. The interior of the HP all-in-one does not require cleaning. Keep fluids away from the control panel and the interior of the HP all-in-one.

⚠️ **Warning**  To avoid damage to painted parts of the HP all-in-one, do not use alcohol or alcohol-based cleaning products on the control panel, document feeder tray, lid, or other painted parts of the device.
Print a self-test report

If you are experiencing problems with printing, print a self-test report before you replace the print cartridges. This report provides useful information on several aspects of your device, including your print cartridges.

1. Load letter, A4, or legal unused plain white paper into the input tray.
2. Press Setup.
3. Press 2, then press 5. This selects Print Report and then selects Self-Test Report.
   The HP all-in-one prints a self-test report, which might indicate the source of the printing problem. A sample of the ink test area of the report is shown below.

4. Make sure the test patterns are even and show a complete grid.
   If more than a few lines in a pattern are broken, this might indicate a problem with the nozzles. You might need to clean the print cartridges. For more information, see Clean the print cartridges.
5. Make sure the lines of color extend across the page.
   If the black line is missing, faded, streaked, or shows lines, this might indicate a problem with the black or photo print cartridge in the right slot.
   If any of the remaining three lines are missing, faded, streaked, or show lines, this might indicate a problem with the tri-color print cartridge in the left slot.
6. Make sure the color blocks have even consistency and are representative of the colors listed below.
   You should see cyan, magenta, yellow, violet, green, and red color blocks.
   If color blocks are missing, or if a block of color is muddy or does not match the label indicated below the block, this might indicate that the tri-color print cartridge is out of ink. You might need to replace the print cartridge. For more information on replacing print cartridges, see Replace the print cartridges.

Note: For examples of test patterns, lines of color, and color blocks from normal and malfunctioning print cartridges, see the onscreen HP Image Zone Help that came with your software.
Work with print cartridges

To ensure the best print quality from your HP all-in-one, you will need to perform some simple maintenance procedures. This section provides guidelines for handling the print cartridges and instructions for replacing, aligning, and cleaning the print cartridges.

Handle the print cartridges

Before you replace or clean a print cartridge, you should know the part names and how to handle the print cartridges.

1 Copper-colored contacts
2 Plastic tape with pink pull tab (must be removed before installing)
3 Ink nozzles under tape

Hold the print cartridges by their black plastic sides, with the label on top. Do not touch the copper-colored contacts or the ink nozzles.

⚠️ Warning  Be careful not to drop the print cartridges. This can damage them, making them unusable.

Replace the print cartridges

When the ink level for the print cartridge is low, a message appears on the control panel display.

Note  You can also check the estimated amount of ink remaining in your cartridges by using the HP Image Zone software that came with your HP all-in-one. For information on checking the ink levels from the HP Director, see the onscreen HP Image Zone Help that came with your software.

When you receive a low-ink warning message on the control panel display, make sure you have a replacement print cartridge available. You should also replace the print
cartridges when you see faded text or if you experience print quality issues related to the print cartridges.

Tip  You can also use these instructions to replace the black print cartridge with a photo print cartridge for printing high-quality color photos.

To find out the reorder number for all the print cartridges that your HP all-in-one supports, see Order print cartridges. To order print cartridges for your HP all-in-one, go to www.hp.com. If prompted, choose your country/region, follow the prompts to select your product, and then click one of the shopping links on the page.

To replace the print cartridges

1  Make sure the HP all-in-one is on.

   **Warning**  If the HP all-in-one is off when you lift the print-carriage access door to access the print cartridges, the HP all-in-one will not release the cartridges for changing. You might damage the HP all-in-one if the print cartridges are not docked safely on the right side when you try to remove them.

2  Open the print-carriage access door by lifting from the front center of the device, until the door locks into place.
   The print carriage moves to the far right side of the HP all-in-one.

3  Wait until the print carriage is idle and silent, and then lightly press down on a print cartridge to release it.
   If you are replacing the tri-color print cartridge, remove the print cartridge from the slot on the left.
   If you are replacing the black or photo print cartridge, remove the print cartridge from the slot on the right.
4 Pull the print cartridge toward you out of its slot.
5 If you are removing the black print cartridge in order to install the photo print cartridge, store the black print cartridge in the print cartridge protector. For more information, see Use the print cartridge protector. If you are removing the print cartridge because it is low or out of ink, recycle the print cartridge. The HP Inkjet Supplies Recycling Program is available in many countries/regions, and lets you recycle used print cartridges free of charge. For more information, go to the following website: www.hp.com/hpinfo/globalcitizenship/environment/recycle/inkjet.html
6 Remove the new print cartridge from its packaging and, being careful to touch only the black plastic, gently remove the plastic tape by using the pink pull tab.

Caution Do not touch the copper-colored contacts or ink nozzles. Touching these parts can result in clogs, ink failure, and bad electrical connections.
7 Slide the new print cartridge forward into the empty slot. Push the print cartridge forward until it clicks into place. If the print cartridge you are installing has a white triangle on its label, slide the print cartridge into the slot on the left. The label for the slot is green with a solid white triangle. If the print cartridge you are installing has a white square or a white pentagon on its label, slide the print cartridge into the slot on the right. The label for the slot is black with a solid white square and a solid white pentagon.

8 Close the print-carriage access door.

Use a photo print cartridge

You can optimize the quality of the color photos you print and copy with your HP all-in-one by purchasing a photo print cartridge. Remove the black print cartridge and insert the photo print cartridge in its place. With the tri-color print cartridge and photo print cartridge installed, you have a six-ink system, which provides enhanced quality color photos.
When you want to print regular text documents, swap the black print cartridge back in. Use a print cartridge protector to keep your print cartridge secure when it is not being used.

- For more information on purchasing a photo print cartridge, see Order print cartridges.
- For more information on replacing print cartridges, see Replace the print cartridges.
- For more information on using the print cartridge protector, see Use the print cartridge protector.

**Use the print cartridge protector**

In some countries/regions, when you purchase a photo print cartridge, you might also receive a print cartridge protector. In other countries/regions, a print cartridge protector comes in the box with your HP all-in-one. If neither your print cartridge nor your HP all-in-one came with a print cartridge protector, you can order one from HP Support. Go to www.hp.com/support.

The print cartridge protector is designed to keep a print cartridge secure and prevent it from drying out when it is not being used. Whenever you remove a print cartridge from the HP all-in-one with the intention of using it again later, store it in the print cartridge protector. For example, store the black print cartridge in a print cartridge protector if you are removing it so you can print high-quality photos with the photo and tri-color print cartridges.

**To insert a print cartridge into the print cartridge protector**

→ Slide the print cartridge into the print cartridge protector at a slight angle and snap it securely into place.

**To remove the print cartridge from the print cartridge protector**

→ Press down and back on the top of the print cartridge protector to release the print cartridge, then slide the print cartridge out of the print cartridge protector.
Align the print cartridges

The HP all-in-one prompts you to align cartridges every time you install or replace a print cartridge. You can also align the print cartridges at any time from the control panel or by using the HP Image Zone software on your computer. Aligning the print cartridges ensures high-quality output.

Note If you remove and reinstall the same print cartridge, the HP all-in-one will not prompt you to align the print cartridges. The HP all-in-one remembers the alignment values for that print cartridge, so you do not need to realign the print cartridges.

To align the print cartridges from the control panel when prompted

➔ Make sure you have letter or A4 unused plain white paper loaded in the input tray, and then press OK.
The HP all-in-one prints a print cartridge alignment sheet and aligns the print cartridges. Recycle or discard the page.

Note If you have colored paper loaded in the input tray when you align the print cartridges, the alignment will fail. Load unused plain white paper into the input tray, and then try the alignment again.

If the alignment fails again, you might have a defective sensor or print cartridge. Contact HP Support. Go to www.hp.com/support. If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

To align the cartridges from the control panel at any other time

1 Load letter or A4 unused plain white paper into the input tray.
2 Press Setup.
3 Press 6, then press 2.
   This selects Tools and then selects Align Print Cartridge.
   The HP all-in-one prints a print cartridge alignment sheet and aligns the print cartridges. Recycle or discard the page.

For information on aligning the print cartridges by using the HP Image Zone software that came with your HP all-in-one, see the onscreen HP Image Zone Help that came with your software.
Clean the print cartridges

Use this feature when the self-test report shows streaking or white lines through any of the lines of color. Do not clean print cartridges unnecessarily, as this wastes ink and shortens the life of the ink nozzles.

To clean the print cartridges from the control panel

1. Load letter or A4 unused plain white paper into the input tray.
2. Press Setup.
3. Press 6, then press 1.

   This selects Tools and then selects Clean Print Cartridge.

   The HP all-in-one prints a page that you can recycle or discard.

   If copy or print quality still seem poor after you clean the print cartridges, try cleaning the print cartridge contacts before replacing the affected print cartridge.

   For information on cleaning the print cartridge contacts, see Clean the print cartridge contacts. For information on replacing the print cartridges, see Replace the print cartridges.

For information on cleaning the print cartridges by using the HP Image Zone software that came with your HP all-in-one, see the onscreen HP Image Zone Help that came with your software.

Clean the print cartridge contacts

Clean the print cartridge contacts only if you get repeated messages on the control panel display prompting you to check a print cartridge after you already have cleaned or aligned the print cartridges.

Before cleaning the print cartridge contacts, remove the print cartridge and verify that nothing is covering the print cartridge contacts, then reinstall the print cartridge. If you continue to get messages to check the print cartridges, clean the print cartridge contacts.

Make sure you have the following materials available:

- Dry foam rubber swabs, lint-free cloth, or any soft material that will not come apart or leave fibers.
- Distilled, filtered, or bottled water (tap water might contain contaminants that can damage the print cartridges).

Warning Do not use platen cleaners or alcohol to clean the print cartridge contacts. These can damage the print cartridge or the HP all-in-one.

To clean the print cartridge contacts

1. Turn on the HP all-in-one and open the print-carriage access door.
   The print carriage moves to the far right side of the HP all-in-one.
2. Wait until the print carriage is idle and silent, and then unplug the power cord from the back of the HP all-in-one.

Note When you unplug the power cord, the date and time are erased. You will need to reset the date and time later, when you plug the power cord back in. For more information, see Set the date and time. Any faxes stored in memory are also erased.
3 Lightly press down on the print cartridge to release it, and then pull it toward you out of the slot.

Note  Do not remove both print cartridges at the same time. Remove and clean each print cartridge one at a time. Do not leave a print cartridge outside the HP all-in-one for more than 30 minutes.

4 Inspect the print cartridge contacts for ink and debris buildup.
5 Dip a clean foam rubber swab or lint-free cloth into distilled water, and squeeze any excess water from it.
6 Hold the print cartridge by its sides.
7 Clean only the copper-colored contacts. For information on cleaning the ink nozzle area, see Clean the area around the ink nozzles.

8 Slide the print cartridge back into the slot. Push the print cartridge forward until it clicks into place.
9 Repeat if necessary for the other print cartridge.
10 Gently close the print-carriage access door and plug the power cord into the back of the HP all-in-one.

Clean the area around the ink nozzles

If the HP all-in-one is used in a dusty environment, a small amount of debris might accumulate inside the device. This debris can include dust, hair, carpet, or clothing fibers. When debris gets on the print cartridges, it can cause ink streaks and smudges on printed pages. Ink streaking can be corrected by cleaning around the ink nozzles as described here.

Note  Clean the area around the ink nozzles only if you continue to see streaks and smudges on your printed pages after you have already cleaned the print cartridges by using the control panel or the HP Image Zone. For more information, see Clean the print cartridges.
Make sure you have the following materials available:

- Dry foam rubber swabs, lint-free cloth, or any soft material that will not come apart or leave fibers.
- Distilled, filtered, or bottled water (tap water might contain contaminants that can damage the print cartridges).

**Warning** Do not touch the copper-colored contacts or ink nozzles. Touching these parts can result in clogs, ink failure, and bad electrical connections.

**To clean the area around the ink nozzles**

1. Turn on the HP all-in-one and open the print-carriage access door. The print carriage moves to the far right side of the HP all-in-one.
2. Wait until the print carriage is idle and silent, and then unplug the power cord from the back of the HP all-in-one.

**Note** When you unplug the power cord, the date and time are erased. You will need to reset the date and time later, when you plug the power cord back in. For more information, see Set the date and time. Any faxes stored in memory are also erased.

3. Lightly press down on the print cartridge to release it, and then pull it toward you out of the slot.

**Note** Do not remove both print cartridges at the same time. Remove and clean each print cartridge one at a time. Do not leave a print cartridge outside the HP all-in-one for more than 30 minutes.

4. Place the print cartridge on a piece of paper with the ink nozzles facing up.
5. Lightly moisten a clean foam rubber swab with distilled water.
6. Clean the face and edges around the ink nozzle area with the swab, as shown below.

   ![Diagram showing the ink nozzle area]

   1. Nozzle plate (do not clean)
   2. Face and edges around the ink nozzle area

**Warning** Do not clean the nozzle plate.

7. Slide the print cartridge back into the slot. Push the print cartridge forward until it clicks into place.
8. Repeat if necessary for the other print cartridge.
9. Gently close the print-carriage access door and plug the power cord into the back of the HP all-in-one.
Change the device settings

You can change the scroll speed and prompt delay time settings on your HP all-in-one so that it behaves according to your preference. You can also restore the device settings to what they were when you purchased your device. This will erase any new defaults you have set.

Set the scroll speed

The Scroll Speed option lets you control the rate that text messages scroll from right to left in the control panel display. For example, if the message is "Pass. Refer to printed report for Fax Test details. Press OK to continue.", it will not completely fit in the control panel display and will need to scroll. This is so that you can read the entire message. You can choose the rate at which it will scroll: Normal, Fast, or Slow. The default is Normal.

1. Press Setup.
2. Press 7, then press 2.
   This selects Preferences and then selects Set Scroll Speed.
3. Press ▶ to select a scroll speed, then press OK.

Set the prompt delay time

The Prompt Delay Time option allows you to control the amount of time that passes before a message prompts you to take further action. For example, if you press Menu in the Copy area and the prompt delay time passes without you pressing another button, the message "Press Menu for more options." appears in the control panel display. You can choose Normal, Fast, Slow, or Off. If you select Off, hints will not appear on the control panel display but other messages, such as low ink warnings and error messages, will still appear.

1. Press Setup.
2. Press 7, then press 3.
   This selects Preferences and then selects Set Prompt Delay Time.
3. Press ▶ to select a delay time, then press OK.

Restore the factory defaults

You can restore the original factory settings to what they were when you purchased your HP all-in-one.

Note Restoring the factory defaults will not affect any changes you made to scan settings and the language and country/region settings.

You can perform this process from the control panel only.

1. Press Setup.
2. Press 6, then press 3.
   This selects Tools and then selects Restore Factory Defaults.
15 Troubleshooting information

This chapter contains troubleshooting information for the HP all-in-one. Specific information is provided for installation and configuration issues, and some operational topics. For more troubleshooting information, see the onscreen HP Image Zone Help.

Many issues are caused when the HP all-in-one is connected to the computer using a USB cable before the HP all-in-one software is installed on the computer. If you connected the HP all-in-one to your computer before the software installation screen prompts you to do so, you must follow these steps:

1. Disconnect the USB cable from the computer.
2. Uninstall the software (if you have already installed it).
3. Restart your computer.
4. Turn off the HP all-in-one, wait one minute, then restart it.
5. Reinstall the HP all-in-one software. Do not connect the USB cable to the computer until prompted by the software installation screen.

For information about uninstalling and reinstalling the software, see Uninstall and reinstall the software.

This chapter contains the following topics:

- **Setup troubleshooting**: Contains information on hardware setup, software installation, and fax setup troubleshooting information.
- **Operational troubleshooting**: Contains information on issues that may occur during normal tasks when using the HP all-in-one features.
- **Device update**: Based on advice from HP customer support or a message on the control panel display, you might access the HP support website to retrieve an upgrade for your device. This section contains information about updating your device.

### Before you call HP Support

If you have a problem, follow these steps:

1. Check the documentation that came with the HP all-in-one.
   - **Setup Guide**: The Setup Guide explains how to set up the HP all-in-one.
   - **User Guide**: The User Guide is the book you are reading. This book describes the basic features of the HP all-in-one, explains how to use the HP all-in-one without connecting it to a computer, contains setup and operational troubleshooting information, and contains device update information.
– **HP Image Zone Help**: The onscreen **HP Image Zone Help** describes how to use the HP all-in-one with a computer and contains additional troubleshooting information not covered in the User Guide.

– **Readme file**: The Readme file contains information on possible installation problems and system requirements. For more information, see **View the Readme file**.

2 If you are unable to solve the problem using the information in the documentation, visit [www.hp.com/support](http://www.hp.com/support) to do the following:

  – Access online support pages
  – Send HP an e-mail message for answers to your questions
  – Connect with an HP technician by using online chat
  – Check for software updates

Support options and availability vary by product, country/region, and language.

3 Contact your local point of purchase. If the HP all-in-one has a hardware failure, you will be asked to bring the HP all-in-one to where you purchased it. Service is free during the HP all-in-one limited warranty period. After the warranty period, you will be quoted a service charge.

4 If you are unable to solve the problem using the onscreen Help or HP websites, call HP Support using the number for your country/region. For more information, see **Get HP support**.

### View the Readme file

You might want to refer to the Readme file for more information on possible installation problems and system requirements.

- In Windows, you can access the Readme file from Windows taskbar by clicking **Start**, pointing to **Programs** or **All Programs**, pointing to **Hewlett-Packard**, pointing to **HP Officejet 6200 series all-in-one**, and then clicking **View the Readme File**. If you have not yet installed the software and want to view the Readme file, follow the Macintosh instructions below.

- In Macintosh OS 9 or OS X, you can access the Readme file by double-clicking the icon located in the top-level folder of the HP all-in-one software CD-ROM.

### Setup troubleshooting

This section includes installation and configuration troubleshooting tips for some of the most common issues associated with hardware, software, and fax features of the HP all-in-one.

#### Hardware setup troubleshooting

Use this section to solve any problems you might encounter while setting up the HP all-in-one hardware.

**My HP all-in-one does not turn on**

**Solution** Make sure each of the power cords is firmly connected, and wait a few seconds for the HP all-in-one to turn on. If this is the first time you have turned on the HP all-in-one, it can take up to a minute to turn on. Make sure the green light on the power adaptor is illuminated. Also, if the HP all-in-one is plugged in to a power strip, make sure the power strip is turned on.
I connected the USB cable, but I am having problems using the HP all-in-one with my computer

**Solution**  You must first install the software that came with your HP all-in-one before connecting the USB cable. During installation, do not plug in the USB cable until prompted by the onscreen instructions. Connecting the USB cable before prompted can cause errors.

Once you have installed the software, connecting your computer to your HP all-in-one with a USB cable is straightforward. Simply plug one end of the USB cable into the back of your computer and the other into the back of the HP all-in-one. You can connect to any USB port on the back of your computer.

I received a message on the control panel display to attach the control panel overlay
Solution This might mean the control panel overlay is not attached, or it is attached incorrectly. Make sure to align the overlay over the buttons on the top of the HP all-in-one and snap it firmly into place.

The control panel display shows the wrong language

Solution Usually, you set the language and country/region when you first set up the HP all-in-one. However, you can change these settings at any time by using the following procedure:
1. Press Setup.
2. Press 7, and then press 1.
   This selects Preferences, and then selects Set Language & Country/Region. A list of languages appears. You can scroll through the list of languages by pressing the ▼ and ► arrows.
3. When your language is highlighted, press OK.
4. When prompted, press 1 for Yes or 2 for No.
   The countries/regions for the selected language appear. Press ▼ or ► to scroll through the list.
5. Use the keypad to enter the two-digit number for the appropriate country/region.
6. When prompted, press 1 for Yes or 2 for No.

The wrong measurements are showing in menus on the control panel display

Solution You may have selected the incorrect country/region when setting up your HP all-in-one. The country/region you select determines the paper sizes shown on the control panel display.

To change the country/region, you must first set the default language again. Usually, you set the language and country/region when you first set up the HP all-in-one. However, you can change these settings at any time by using the following procedure:
1. Press Setup.
2. Press 7, and then press 1.
   This selects Preferences, and then selects Set Language & Country/Region.
A list of languages appears. You can scroll through the list of languages by pressing the ◄ and ► arrows.

3 When your language is highlighted, press OK.

4 When prompted, press 1 for Yes or 2 for No.

The countries/regions for the selected language appear. Press ◄ or ► to scroll through the list.

5 Use the keypad to enter the two-digit number for the appropriate country/region.

6 When prompted, press 1 for Yes or 2 for No.

---

I received a message on the control panel display to align the print cartridges

Solution The HP all-in-one prompts you to align cartridges every time you install a new print cartridge. For more information, see Align the print cartridges.

Note If you remove and reinstall the same print cartridge, the HP all-in-one will not prompt you to align the print cartridges. The HP all-in-one remembers the alignment values for that print cartridge, so you do not need to realign the print cartridges.

---

I received a message on the control panel display that the print cartridge alignment failed

Cause The incorrect type of paper is loaded in the input tray.

Solution If you have colored paper loaded in the input tray when you align the print cartridges, the alignment fails. Load unused plain white letter or A4 paper into the input tray, and then try the alignment again. If the alignment fails again, you might have a defective sensor or print cartridge.

Contact HP Support. Go to www.hp.com/support. If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

---

Cause Protective tape is covering the print cartridges.

Solution Check each print cartridge. If the plastic tape is still covering the ink nozzles, gently remove the plastic tape by using the pink pull tab. Do not touch the ink nozzles or the copper-colored contacts.
Reinsert the print cartridges and verify that they are fully inserted and locked in place.

**Cause**  The contacts on the print cartridge are not touching the contacts in the print carriage.

**Solution**  Remove and then reinsert the print cartridges. Verify that they are fully inserted and locked in place.

**Cause**  The print cartridge or sensor is defective.

**Solution**  Contact HP Support. Go to www.hp.com/support. If prompted, choose your country/region, and then click **Contact HP** for information on calling for technical support.

---

**The HP all-in-one does not print**

**Solution**  If your HP all-in-one and computer are not communicating with each other, try the following:

- Check that the HP all-in-one print queue is not paused (Windows) or stopped (Macintosh). If it is, choose the appropriate setting to resume printing. For more information about accessing the print queue, see the documentation that came with the operating system installed on your computer.
- Check the USB cable. If you are using an older cable, it might not be working properly. Try connecting it to another product to see if the USB cable works. If you experience problems, the USB cable might need to be replaced. Also verify that the cable does not exceed 3 meters (9.8 feet) in length.
• Make sure your computer is USB ready. Some operating systems, such as Windows 95 and Windows NT, do not support USB connections. Check the documentation that came with your operating system for more information.

• Check the connection from your HP all-in-one to your computer. Verify that the USB cable is securely plugged into the USB port on the back of your HP all-in-one. Make sure the other end of the USB cable is plugged into a USB port on your computer. After the cable is connected properly, turn your HP all-in-one off and then on again.

• Check other printers or scanners. You might need to disconnect older products from your computer.

• After you check the connections, try restarting your computer. Turn your HP all-in-one off and then on again.

• If necessary, remove and then install the HP Image Zone software again. For more information, see Uninstall and reinstall the software.

For more information on setting up your HP all-in-one and connecting it to your computer, see the Setup Guide that came with your HP all-in-one.

---

I received a message on the control panel display about a paper jam or a blocked carriage

Solution If either a paper jam or blocked carriage error message appears on the control panel display, there might be some packing material inside the HP all-in-one. Lift open the print-carriage access door. The orange shipping lock might still be in place on the left side of the HP all-in-one. Pull out the orange shipping lock and throw it away.

---

Software installation troubleshooting

If you encounter a problem during software installation, see the topics below for a possible solution. If you encounter a hardware problem during setup, see Hardware setup troubleshooting.
During a normal installation of the HP all-in-one software, the following events occur:

1. The HP all-in-one software CD-ROM runs automatically.
2. The software installs.
3. Files are copied to your hard drive.
4. You are requested to connect the HP all-in-one to your computer.
5. A green OK and check mark appear on an installation wizard screen.
6. You are requested to restart your computer.
7. The Fax Setup wizard runs.
8. The registration process runs.

If any of these things did not occur, there might be a problem with the installation. To check the installation on a PC, verify the following:

- Start the **HP Director** and check to make sure the following icons appear: **Scan Picture**, **Scan Document**, **Send Fax** and **HP Gallery**. For information on starting **HP Director**, see the onscreen **HP Image Zone Help** that came with your software. If the icons do not appear immediately, you might need to wait a few minutes for the HP all-in-one to connect to your computer. Otherwise, see **Some of the icons are missing in the HP Director**.

  **Note)** If you performed a minimum installation of the software (as opposed to a typical installation), the **HP Image Zone** and **Copy** are not installed and will not be available from the **HP Director**.

- Open the Printers dialog box and check to see that the HP all-in-one is listed.
- Look in the system tray at the far right of the Windows taskbar for an HP all-in-one icon. This indicates that the HP all-in-one is ready.

**When I insert the CD-ROM into my computer’s CD-ROM drive, nothing happens (Windows only)**

  **Solution**  
  Do the following:
  1. From the Windows **Start** menu, click **Run**.
  2. In the **Run** dialog box, enter `d:\setup.exe` (if your CD-ROM drive is not assigned to drive letter D, enter the appropriate drive letter), and then click **OK**.

**The minimum system checks screen appears**

  **Solution**  
  Your system does not meet the minimum requirements to install the software. Click **Details** to see what the specific problem is, and then correct the problem before attempting to install the software.

**A red X appears on the USB connect prompt**

  **Solution**  
  Normally, a green check appears indicating that the plug and play is successful. A red X indicates that the plug and play failed.

  Do the following:
  1. Verify that the control panel overlay is firmly attached, unplug the HP all-in-one power cable, and then plug it in again.
  2. Verify that the USB and power cables are plugged in.
3 Click **Retry** to retry the plug and play setup. If this does not work, continue to the next step.

4 Verify that the USB cable is set up properly as follows:
   – Unplug the USB cable and plug it in again.
   – Do not attach the USB cable to a keyboard or non-powered hub.
   – Verify that the USB cable is 3 meters or less in length.
   – If you have several USB devices attached to your computer, you might want to unplug the other devices during the installation.

5 Continue with the installation and restart the computer when prompted. Then open **HP Director** and check for the essential icons (**Scan Picture**, **Scan Document**, **Send Fax**, and **HP Gallery**).

6 If the essential icons do not appear, remove the software and then reinstall it. For more information, see Uninstall and reinstall the software.

---

**I received a message that an unknown error has occurred**

**Solution** Try to continue with the installation. If that doesn’t work, stop and then restart the installation, and follow the directions on the screen. If an error occurs, you might need to uninstall and then reinstall the software. Do not simply delete the HP all-in-one program files from your hard drive. Make sure to remove them properly using the uninstall utility provided in the HP all-in-one program group.

For more information, see Uninstall and reinstall the software.

---

**Some of the icons are missing in the HP Director**

If the essential icons (**Scan Picture**, **Scan Document**, **Send Fax**, and **HP Gallery**) do not appear, your installation might not be complete.

**Solution** If your installation is incomplete, you might need to uninstall and then reinstall the software. Do not simply delete the HP all-in-one program files from your hard drive. Make sure to remove them properly using the uninstall utility
provided in the HP all-in-one program group. For more information, see **Uninstall and reinstall the software**.

---

**The fax wizard does not start**

**Solution**

1. Start the **HP Director**. For more information, see the onscreen **HP Image Zone Help** that came with your software.
2. Click the **Settings** menu, select **Fax Settings and Setup**, then select **Fax Setup Wizard**.

---

**The registration screen does not appear (Windows only)**

**Solution**

➔ In Windows, you can access the registration screen from the Windows taskbar by clicking Start, pointing to **Programs** or **All Programs** (XP), **Hewlett-Packard**, **HP Officejet 6200 series all-in-one**, and then clicking **Sign up now**.

---

**The Digital Imaging Monitor does not appear in the system tray (Windows only)**

**Solution**

If the Digital Imaging Monitor does not appear in the system tray, start the **HP Director** to check whether or not essential icons are there. For more information about starting the **HP Director**, see the onscreen **HP Image Zone Help** that came with your software.

For more information about missing essential icons in the **HP Director**, see **Some of the icons are missing in the HP Director**.

The system tray normally appears in the lower-right corner of the desktop.

---

**Uninstall and reinstall the software**

If your installation is incomplete, or if you connected the USB cable to the computer before prompted by the software installation screen, you might need to uninstall and then reinstall the software. Do not simply delete the HP all-in-one program files from your hard drive. Make sure to remove them properly using the uninstall utility provided in the HP all-in-one program group.

A reinstall can take from 20 to 40 minutes for both Windows and Macintosh computers. There are three methods to uninstall the software on a Windows computer.
To uninstall from a Windows computer, method 1

1. Disconnect your HP all-in-one from your computer. Do not connect the HP all-in-one to your computer until after you have reinstalled the software.
2. On the Windows taskbar, click Start, Start Programs or All Programs (XP), Hewlett-Packard, HP Officejet 6200 series all-in-one, uninstall software.
3. Follow the onscreen instructions.
4. If you are asked whether you would like to remove shared files, click No. Other programs that use these files might not work properly if the files are deleted.
5. Restart your computer.

   Note: It is important that you disconnect your HP all-in-one before restarting your computer. Do not connect the HP all-in-one to your computer until after you have reinstalled the software.

6. To reinstall the software, insert the HP all-in-one CD-ROM into your computer’s CD-ROM drive, and follow the onscreen instructions and the instructions provided in the Setup Guide that came with your HP all-in-one.
7. After the software is installed, connect the HP all-in-one to your computer.
8. Press the On button to turn the HP all-in-one on. After connecting and turning on your HP all-in-one, you might have to wait several minutes for all of the Plug and Play events to complete.
9. Follow the onscreen instructions.

When the software installation is complete, the Status Monitor icon appears in the Windows system tray.

To verify that the software is properly installed, double-click the HP Director icon on the desktop. If the HP Director shows the key icons (Scan Picture, Scan Document, Send Fax, and HP Gallery), the software has been properly installed.

To uninstall from a Windows computer, method 2

Note: Use this method if Uninstall Software is not available in the Windows Start menu.

1. On the Windows taskbar, click Start, Settings, Control Panel.
2. Double-click Add/Remove Programs.
3. Select HP all-in-one & Officejet 4.0, and then click Change/Remove.
   Follow the onscreen instructions.
4. Disconnect your HP all-in-one from your computer.
5. Restart your computer.

   Note: It is important that you disconnect your HP all-in-one before restarting your computer. Do not connect the HP all-in-one to your computer until after you have reinstalled the software.

7. Follow the onscreen instructions and the instructions provided in the Setup Guide that came with your HP all-in-one.
To uninstall from a Windows computer, method 3

Note  This is an alternate method if Uninstall Software is not available in the Windows Start menu.

1 Run the HP Officejet 6200 series all-in-one software Setup program.
2 Select Uninstall and follow the onscreen directions.
3 Disconnect your HP all-in-one from your computer.
4 Restart your computer.

Note  It is important that you disconnect your HP all-in-one before restarting your computer. Do not connect the HP all-in-one to your computer until after you have reinstalled the software.

5 Run the HP Officejet 6200 series all-in-one software Setup program again.
6 Launch Reinstall.
7 Follow the onscreen instructions and the instructions provided in the Setup Guide that came with your HP all-in-one.

To uninstall from a Macintosh computer

1 Disconnect the HP all-in-one from your Macintosh.
2 Double-click the Applications: HP All-in-One Software folder.
3 Double-click HP Uninstaller.
   Follow the onscreen instructions.
4 After the software is uninstalled, disconnect your HP all-in-one, and then restart your computer.

Note  It is important that you disconnect your HP all-in-one before restarting your computer. Do not connect the HP all-in-one to your computer until after you have reinstalled the software.

5 To reinstall the software, insert the HP all-in-one CD-ROM into your computer’s CD-ROM drive.
6 On the desktop, open the CD-ROM and then double-click HP all-in-one installer.
7 Follow the onscreen instructions and the instructions provided in the Setup Guide that came with your HP all-in-one.

Fax setup troubleshooting

This section contains fax setup troubleshooting information for the HP all-in-one. If your HP all-in-one is not set up properly for faxing, you might experience problems when sending faxes, receiving faxes, or both.

Tip  This section contains only setup-related troubleshooting. For additional fax troubleshooting topics, such as problems with your printouts or slow fax reception, see the onscreen Troubleshooting Help that came with your HP Image Zone software.

If you are having faxing problems, you can print a fax test report to check the status of your HP all-in-one. The test will fail if your HP all-in-one is not set up properly for faxing. Perform this test after you have completed setting up your HP all-in-one for faxing.
To test your fax setup
1 Press Setup.
2 Press 6, and then press 5.
   This displays the Tools menu and then selects Run Fax Test.
   The HP all-in-one displays the status of the test on the control panel display and
   prints a report.
3 Review the report.
   – If the test passes and you are still having problems faxing, check the fax
     settings listed in the report to verify the settings are correct. A blank or
     incorrect fax setting can cause faxing problems.
   – If the test fails, review the report for information on how to fix any problems
     found. For more information, you can also see the next section, The fax test
     failed.
4 Press OK to return to the Setup Menu.
If you are still experiencing faxing problems, continue with the following sections for
more troubleshooting help.

The fax test failed
If you ran a fax test and the test failed, review the report for basic information about
the error. For more detailed information, check the report to see which part of the test
failed, and then navigate to the appropriate topic in this section for information:

● The fax hardware test failed
● The fax connected to active telephone wall jack test failed
● The phone cord connected to correct port on fax test failed
● The fax line condition test failed
● The dial tone detection test failed

The fax hardware test failed

Solution
● Turn off the HP all-in-one by using the On button located on the control panel
   and then unplug the power cord from the back of the HP all-in-one. After a
   few seconds, plug the power cord back in and turn the power on. Run the
   test again. If the test fails again, continue reviewing the troubleshooting
   information in this section.
● Try to send or receive a test fax. If you can send or receive a fax
   successfully, there might not be a problem.
● If you have a Windows computer and are running the test from the Fax
   Setup Wizard, make sure the HP all-in-one is not busy completing another
   task, such as receiving a fax or making a copy. Check the control panel
   display for a message indicating that the HP all-in-one is busy. If it is busy,
   wait until it is finished and in the idle state, before running the test.

After you resolve any problems found, run the fax test again to make sure it
passes and your HP all-in-one is ready for faxing. If the Fax Hardware Test
continues to fail and you experience problems faxing, contact HP for support. For
information on contacting HP for support, see Get HP support.
The fax connected to active telephone wall jack test failed

Solution

- Check the connection between the telephone wall jack and the HP all-in-one to make sure the phone cord is secure.
- Make sure you use the phone cord that came with your HP all-in-one. If you do not use the supplied phone cord to connect from the telephone wall jack to your HP all-in-one, you may not be able to send or receive faxes. After you plug in the phone cord that came with your HP all-in-one, run the fax test again.
- Make sure you have correctly connected the HP all-in-one to the telephone wall jack. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one. For more information on setting up your HP all-in-one for faxing, see Fax setup.
- If you are using a phone splitter, this can cause faxing problems. (A splitter is a two-cord connector that plugs into a telephone wall jack.) Try removing the splitter and connecting the HP all-in-one directly to the telephone wall jack.
- Try connecting a working phone and phone cord to the telephone wall jack that you are using for the HP all-in-one and check for a dial tone. If you do not hear a dial tone, contact your telephone company and have them check the line.
- Try to send or receive a test fax. If you can send or receive a fax successfully, there might not be a problem.

After you resolve any problems found, run the fax test again to make sure it passes and your HP all-in-one is ready for faxing.

The phone cord connected to correct port on fax test failed

Solution    The phone cord is plugged into the wrong port on the back of the HP all-in-one.

1 Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.

   Note If you use the "2-EXT" port to connect to the telephone wall jack, you will not be able to send or receive faxes. The "2-EXT" port should only be used to connect other equipment, such as an answering machine or a telephone.

2 After you have connected the phone cord to the port labeled "1-LINE", run the fax test again to make sure it passes and your HP all-in-one is ready for faxing.

3 Try to send or receive a test fax.

The fax line condition test failed
Solution

- Make sure you connect your HP all-in-one to an analog phone line or you will not be able to send or receive faxes. To check if your phone line is digital, connect a regular analog phone to the line and listen for a dial tone. If you do not hear a normal sounding dial tone, it might be a phone line set up for digital phones. Connect your HP all-in-one to an analog phone line and try sending or receiving a fax.
- Check the connection between the telephone wall jack and the HP all-in-one to make sure the phone cord is secure.
- Make sure you have correctly connected the HP all-in-one to the telephone wall jack. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one. For more information on setting up your HP all-in-one for faxing, see Fax setup.
- Other equipment, which uses the same phone line as the HP all-in-one, might be causing the test to fail. To find out if other equipment is causing a problem, disconnect everything from the phone line, and then run the test again.
  - If the Fax Line Condition Test passes without the other equipment, then one or more pieces of the equipment is causing problems; try adding them back one at a time and rerunning the test each time, until you identify which piece of equipment is causing the problem.
  - If the Fax Line Condition Test fails without the other equipment, connect the HP all-in-one to a working phone line and continue reviewing the troubleshooting information in this section.
- If you are using a phone splitter, this can cause faxing problems. (A splitter is a two-cord connector that plugs into a telephone wall jack.) Try removing the splitter and connecting the HP all-in-one directly to the telephone wall jack.

After you resolve any problems found, run the fax test again to make sure it passes and your HP all-in-one is ready for faxing. If the Fax Line Condition test continues to fail and you experience problems faxing, contact your telephone company and have them check the phone line.

The dial tone detection test failed

Solution

- Other equipment, which uses the same phone line as the HP all-in-one, might be causing the test to fail. To find out if other equipment is causing a problem, disconnect everything from the phone line, and then run the test again. If the Dial Tone Detection Test passes without the other equipment, then one or more pieces of the equipment is causing problems; try adding them back one at a time and rerunning the test each time, until you identify which piece of equipment is causing the problem.
- Try connecting a working phone and phone cord to the telephone wall jack that you are using for the HP all-in-one and check for a dial tone. If you do not hear a dial tone, contact your telephone company and have them check the line.
• Make sure you have correctly connected the HP all-in-one to the telephone wall jack. Using the phone cord supplied in the box with your HP all-in-one, connect one end to your telephone wall jack, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one. For more information on setting up your HP all-in-one for faxing, see Fax setup.

• If you are using a phone splitter, this can cause faxing problems. (A splitter is a two-cord connector that plugs into a telephone wall jack.) Try removing the splitter and connecting the HP all-in-one directly to the telephone wall jack.

• If your telephone system is not using a standard dial tone, such as some PBX systems, this may cause the test to fail. This will not cause a problem sending or receiving faxes. Try sending or receiving a test fax.

• Check to make sure the country/region setting is set appropriately for your country/region. If the country/region setting is not set or is not set correctly, the test may fail and you might have problems sending and receiving faxes. For information on changing the country/region setting, see the Setup Guide that came with your HP all-in-one.

• Make sure you connect your HP all-in-one to an analog phone line or you will not be able to send or receive faxes. To check if your phone line is digital, connect a regular analog phone to the line and listen for a dial tone. If you do not hear a normal sounding dial tone, it might be a phone line set up for digital phones. Connect your HP all-in-one to an analog phone line and try sending or receiving a fax.

After you resolve any problems found, run the fax test again to make sure it passes and your HP all-in-one is ready for faxing. If the Dial Tone Detection test continues to fail, contact your telephone company and have them check the phone line.

---

The HP all-in-one is having problems sending and receiving faxes

Solution

Note This possible solution applies only in the countries/regions that receive a 2-wire phone cord in the box with the HP all-in-one, including: Argentina, Australia, Brazil, Canada, Chile, China, Colombia, Greece, India, Indonesia, Ireland, Japan, Korea, Latin America, Malaysia, Mexico, Philippines, Poland, Portugal, Russia, Saudi Arabia, Singapore, Spain, Taiwan, Thailand, USA, Venezuela, and Vietnam.

• Make sure you used the phone cord supplied in the box with your HP all-in-one to connect to the telephone wall jack. One end of this special 2-wire cord should be connected to the port labeled "1-LINE" on the back of your HP all-in-one and the other end to your telephone wall jack, as shown below.
This special 2-wire cord is different from the more common 4-wire phone cords you might already have in your home or office. Check the end of the cord and compare it to the two types of cords shown below.

If you used the 4-wire phone cord, disconnect it, find the supplied 2-wire cord, and then connect the 2-wire cord to the port labeled "1-LINE" on the back of your HP all-in-one. For more information on connecting this phone cord and setting up your HP all-in-one for faxing, see Fax setup. If the supplied phone cord is not long enough, you can extend it. For information see The phone cord that came with my HP all-in-one is not long enough.

- Try connecting a working phone and phone cord to the telephone wall jack that you are using for the HP all-in-one and check for a dial tone. If you do not hear a dial tone, contact your telephone company and have them check the line.
- Other equipment, which uses the same phone line as the HP all-in-one, might be in use. For example, you cannot use your HP all-in-one for faxing if an extension phone is off hook, or if you are using your PC modem to send an e-mail or access the Internet.
- The phone line connection might be noisy. Phone lines with poor sound quality (noise) can cause faxing problems. Check the sound quality of the phone line by plugging a phone into the telephone wall jack and listening for static or other noise. If you hear noise, turn Error Correction Mode (ECM) off and try faxing again. For information, see Use error correction mode. If the problem persists, contact your telephone company.
- If you are using a digital subscriber line (DSL) service, make sure that you have a DSL filter connected or you will not be able to fax successfully. The DSL filter removes the digital signal and allows your HP all-in-one to
communicate properly with the phone line. Obtain a DSL filter from your DSL provider. If you already have a DSL filter, make sure it is connected correctly. For information, see Case B: Set up your HP all-in-one with DSL.

- Make sure your HP all-in-one is not connected to a telephone wall jack that is set up for digital phones. To check if your phone line is digital, connect a regular analog phone to the line and listen for a dial tone. If you do not hear a normal sounding dial tone, it might be a phone line set up for digital phones.

- If you are using either a private branch exchange (PBX) or an integrated services digital network (ISDN) converter/terminal adapter, make sure the HP all-in-one is connected to the port that is designated for fax and phone use. Also, make sure that the terminal adapter is set to the correct switch type for your country/region, if possible. Note that some ISDN systems allow you to configure the ports for specific phone equipment. For example, you might have assigned one port for telephone and Group 3 fax and another port for multiple purposes. If you continue to have problems when connected to the fax/phone port, try using the port designated for multiple purposes; it might be labeled “multi-combi” or something similar. For information on setting up your HP all-in-one with a PBX phone system or ISDN line, see Fax setup.

- If your HP all-in-one shares the same phone line with a DSL service, the DSL modem might not be properly grounded. If the DSL modem is not properly grounded, it can create noise on the phone line. Phone lines with poor sound quality (noise) can cause faxing problems. You can check the sound quality of the phone line by plugging a phone into the telephone wall jack and listening for static or other noise. If you hear noise, turn off your DSL modem and completely remove power for at least 15 minutes. Turn the DSL modem back on and listen to the dial tone again.

  Note You might notice static on the phone line again in the future. If your HP all-in-one stops sending and receiving faxes, repeat this process.

  If the phone line is still noisy or for more information on turning your DSL modem off, contact your DSL provider for support. You can also contact your telephone company.

- If you are using a phone splitter, this can cause faxing problems. (A splitter is a two-cord connector that plugs into a telephone wall jack.) Try removing the splitter and connecting the HP all-in-one directly to the telephone wall jack.

The HP all-in-one is having problems sending a manual fax

Solution

- Make sure the telephone you use to initiate the fax call is connected directly to the HP all-in-one. To send a fax manually, the telephone must be connected directly to the port labeled "2-EXT" on the HP all-in-one, as shown below. For information on sending faxes manually, see Send a fax manually from a phone.
1 Telephone wall jack
2 Phone cord supplied in the box with your HP all-in-one
3 Telephone

- If you are sending a fax manually from your phone that is connected directly to the HP all-in-one, you must use the keypad on the telephone to send the fax. You cannot use the keypad on the control panel of the HP all-in-one.

The HP all-in-one cannot receive faxes, but can send faxes

Solution
- If you are not using a distinctive ring service, check to make sure that the Answer Ring Pattern feature on your HP all-in-one is set to All Rings. For information, see Change the answer ring pattern (distinctive ringing).
- If Auto Answer is set to Off, you will need to manually receive faxes; otherwise, your HP all-in-one will not receive the fax. For information on receiving faxes manually, see Receive a fax manually.
- If you have a voice mail service at the same phone number you use for fax calls, you must receive faxes manually, not automatically. This means that you must be available to respond in person to incoming fax calls. For information on setting up your HP all-in-one when you have a voice mail service, see Fax setup. For information on receiving faxes manually, see Receive a fax manually.
- If you have a PC modem on the same phone line with your HP all-in-one, check to make sure that the PC modem software is not set to receive faxes automatically. Modems with the auto fax receive feature turned on will receive all incoming faxes, which prevents the HP all-in-one from receiving fax calls.
If you have an answering machine on the same phone line with your HP all-in-one, you might have one of the following problems:

- Your answering machine might not be set up properly with your HP all-in-one.
- Your outgoing message might be too long or too loud to allow the HP all-in-one to detect fax tones, and the calling fax machine might disconnect.
- Your answering machine might hang up too quickly after the outgoing message plays if it does not detect someone trying to record a message, as when a fax is calling. This prevents the HP all-in-one from detecting the fax tones. This problem is most common with digital answering machines.

The following actions might help solve these problems:

- When you have an answering machine on the same phone line you use for fax calls, try connecting the answering machine directly to the HP all-in-one as described in Fax setup.
- Make sure your HP all-in-one is set to receive faxes automatically. For information on setting up your HP all-in-one to receive faxes automatically, see Set up the HP all-in-one to receive faxes.
- Make sure the Rings to Answer setting is correct. Set your answering machine to answer in 4 rings and your HP all-in-one to answer in the maximum number of rings supported by your device. (The maximum number of rings varies by country/region.) In this setup, the answering machine will answer the call and the HP all-in-one will monitor the line. If the HP all-in-one detects fax tones, the HP all-in-one will receive the fax. If the call is a voice call, the answering machine will record the incoming message. For information on setting the number of rings to answer, see Set the number of rings before answering.
- Disconnect the answering machine and then try receiving a fax. If you can receive a fax without the answering machine, the answering machine might be causing the problem.
- Reconnect the answering machine and rerecord your outgoing message. Make sure the message is as short as possible (no more than 10 seconds long), and that you speak softly and slowly when recording it. At the end of your outgoing message, record an additional 4 - 5 seconds of silence with no background noise. Try to receive a fax again.

Note Some digital answering machines might not retain the recorded silence at the end of your outgoing message. Play back your outgoing message to check.

If your HP all-in-one shares the same phone line with other types of phone equipment, such as an answering machine, a PC modem, or multi-port switch box, the fax signal level might be reduced. This can cause problems during fax reception.

To find out if other equipment is causing a problem, disconnect everything except the HP all-in-one from the phone line, and then try to receive a fax. If you can receive faxes successfully without the other equipment, one or more pieces of the other equipment is causing problems; try adding them back one
at a time and receiving a fax each time, until you identify which equipment is causing the problem.

- If you have a special ring pattern for your fax phone number (using a distinctive ring service through your telephone company), make sure that the Answer Ring Pattern feature on your HP all-in-one is set to match. For example, if the telephone company has assigned your fax number a double ring pattern, make sure Double Rings is selected as the Answer Ring Pattern setting. For information on changing this setting, see Change the answer ring pattern (distinctive ringing).

**Note** The HP all-in-one cannot recognize some ring patterns, such as those with alternating short and long ringing patterns. If you are having problems with a ring pattern of this type, ask your telephone company to assign a non-alternating ring pattern.

---

**Fax tones are recorded on my answering machine**

**Solution**

- When you have an answering machine on the same phone line you use for fax calls, try connecting the answering machine directly to the HP all-in-one as described in Fax setup. If you do not connect the answering machine as recommended, fax tones might be recorded on your answering machine.

- Make sure your HP all-in-one is set to receive faxes automatically. If your HP all-in-one is set up to receive faxes manually, the HP all-in-one will not answer incoming calls. You must be available to respond in person to incoming fax calls, or the HP all-in-one will not receive the fax and your answering machine will record the fax tones. For information on setting up your HP all-in-one to receive faxes automatically, see Set up the HP all-in-one to receive faxes.

- Make sure the Rings to Answer setting is correct. The number of rings to answer for the HP all-in-one should be greater than the number of rings to answer for the answering machine. If the answering machine and the HP all-in-one are set to the same number of rings to answer, both devices will answer the call, and fax tones will be recorded on the answering machine. Set your answering machine to answer in 4 rings and your HP all-in-one to answer in the maximum number of rings supported by your device. (The maximum number of rings varies by country/region.) In this setup, the answering machine will answer the call and the HP all-in-one will monitor the line. If the HP all-in-one detects fax tones, the HP all-in-one will receive the fax. If the call is a voice call, the answering machine will record the incoming message. For information on setting the number of rings to answer, see Set the number of rings before answering.

---

**I hear static on my phone line since connecting the HP all-in-one**
Solution

Note This possible solution applies only in the countries/regions that receive a 2-wire phone cord in the box with the HP all-in-one, including: Argentina, Australia, Brazil, Canada, Chile, China, Colombia, Greece, India, Indonesia, Ireland, Japan, Korea, Latin America, Malaysia, Mexico, Philippines, Poland, Portugal, Russia, Saudi Arabia, Singapore, Spain, Taiwan, Thailand, USA, Venezuela, and Vietnam.

- If you did not connect the 2-wire cord (supplied in the box with your HP all-in-one) to the port labeled "1-LINE" on the back of your HP all-in-one to your telephone wall jack, you might hear static on your phone line and you probably will not be able to fax successfully. This special 2-wire cord is different from the more common 4-wire phone cords you might already have in your home or office.
- If you are using a phone splitter, this can cause static on the phone line. (A splitter is a two-cord connector that plugs into a telephone wall jack.) Try removing the splitter and connecting the HP all-in-one directly to the telephone wall jack.
- If you are not using a proper grounded power outlet for your HP all-in-one, you might hear static on your phone line. Try connecting to another power outlet.

The phone cord that came with my HP all-in-one is not long enough

Solution If the phone cord that came with your HP all-in-one is not long enough, you can use a coupler to extend the length. You can purchase a coupler at an electronics store that carries phone accessories. You will also need another phone cord, which can be a standard 4-wire phone cord that you might already have in your home or office.

Tip If your HP all-in-one came with a 2-wire phone cord adaptor, you can use it with a 4-wire phone cord to extend the length. For information on using the 2-wire phone cord adaptor, see the documentation that came with it.

To extend your phone cord

1 Using the phone cord supplied in the box with your HP all-in-one, connect one end to the coupler, then connect the other end to the port labeled "1-LINE" on the back of your HP all-in-one.
2 Connect another phone cord to the open port on the coupler and to the telephone wall jack, as shown below.
I am having problems faxing over the Internet

Solution
Check the following:

- The FoIP service might not work properly when the HP all-in-one is sending and receiving faxes at high speed (33600bps). If you experience problems sending and receiving faxes, use a slower fax speed. You can do this by changing the Fax Speed setting from High (the default) to Medium. For information on changing this setting, see Set the fax speed.
- You can only send and receive faxes by connecting a phone cord to the port labeled "1-LINE" on the HP all-in-one and not from the Ethernet port. This means that your connection to the Internet must be done either through a converter box (which supplies regular analog phone jacks for fax connections) or your telephone company.
- You should also check with your telephone company to make sure their Internet phone service supports faxing. If they do not support faxing, you will not be able to send and receive faxes through the Internet.

Operational troubleshooting
This section contains information on: paper, print cartridge, and fax troubleshooting. The troubleshooting section in the HP Image Zone Help contains more complete troubleshooting tips for some of the most common issues associated with your HP all-in-one.

To access the troubleshooting information from a Windows computer, go to the HP Director, click Help, and then choose Troubleshooting and Support. Troubleshooting is also available through the Help button that appears on some error messages.

To access troubleshooting information from Macintosh OS X v10.1.5 and later, click the HP Image Zone icon in the Dock, select Help from the menu bar, choose...
HP Image Zone Help from the Help menu, and then choose 6200 series Troubleshooting in the Help Viewer.

If you have Internet access, you can get help from the HP website at www.hp.com/support. The website also provides answers to frequently asked questions.

Paper troubleshooting

To help avoid paper jams, only use paper types that are recommended for your HP all-in-one. For a list of recommended papers, see the onscreen HP Image Zone Help, or go to www.hp.com/support.

Do not load curled or wrinkled paper, or paper with bent or torn edges, into the input tray. For more information, see Avoid paper jams.

If paper does become jammed in your device, follow these instructions to clear the paper jam.

Paper has jammed the HP all-in-one

Solution

1. Press in the tab on the left side of the rear clean-out door to release the door. Remove the door by pulling it away from the HP all-in-one.

Caution Trying to clear a paper jam from the front of the HP all-in-one can damage the print mechanism. Always access and clear paper jams through the rear clean-out door.

2. Gently pull the paper out of the rollers.

Warning If the paper tears when you are removing it from the rollers, check the rollers and wheels for torn pieces of paper that might be remaining inside the device. If you do not remove all the pieces of paper from the HP all-in-one, more paper jams are likely to occur.

3. Replace the rear clean-out door. Gently push the door forward until it snaps into place.

4. Press OK to continue the current job.

Paper has jammed the automatic document feeder
Solution
1 Lift the cover of the automatic document feeder.

2 Gently pull the paper out of the rollers.

**Warning** If the paper tears when you are removing it from the rollers, check the rollers and wheels for torn pieces of paper that might be remaining inside the automatic document feeder. If you do not remove all the pieces of paper from the HP all-in-one, more paper jams are likely to occur.

3 Close the cover of the automatic document feeder.

---

**The automatic document feeder picks up too many pages or none at all**

**Cause** You need to clean the separator pad or rollers inside the automatic document feeder. Pencil lead, wax, or ink can build up on the rollers and separator pad after extensive use, or if you copy handwritten originals or originals that are heavy with ink.

- If the automatic document feeder does not pick up any pages at all, the rollers inside the automatic document feeder need to be cleaned.
- If the automatic document feeder picks up multiple pages instead of single sheets, the separator pad inside the automatic document feeder needs to be cleaned.

**Solution** Load one or two sheets of unused plain white full-size paper into the document feeder tray, and then press **Start Copy Black** to pull the pages through the automatic document feeder. The plain paper releases and absorbs residue from the rollers and separator pad.

If the problem persists, or the automatic document feeder does not pick up the plain paper, you can clean the rollers and separator pad manually.

**To clean the rollers or separator pad**
1 Lift the cover of the automatic document feeder.

The rollers and separator pad are identified in the following illustration.
2 Lightly dampen a clean lint-free cloth with distilled water, then squeeze any excess liquid from the cloth.
3 Use the damp cloth to wipe any residue off the rollers or separator pad.
4 If the residue does not come off using distilled water, try using isopropyl (rubbing) alcohol.
5 Close the cover of the automatic document feeder.

Print cartridge troubleshooting
If you are experiencing problems with printing, you might have a problem with one of the print cartridges.
1 Remove the print cartridges and check that the protective tape has been completely removed.
2 Reinsert the print cartridges and verify that they are fully inserted and locked in place.
3 If the problem persists, print a self-test report to determine if there is a problem with the print cartridges. This report provides useful information about your print cartridges, including status information.
4 If the self-test report shows a problem, clean the print cartridges.
5 If the problem persists, clean the copper-colored contacts of the print cartridges.
6 If you are still experiencing problems with printing, determine which print cartridge is experiencing the problem and replace it.

For more information on these topics, see Maintain your HP all-in-one.

HP Image Zone troubleshooting
If your HP all-in-one has been connected to a computer with a USB cable and you now want to connect it to a network using an HP JetDirect, you will only be able to print or scan (using Webscan) from your computer(s). If you try to use the HP Image Zone software, you will find that the scan picture, scan documents, send a fax, and make copies features display error messages indicating that the HP all-in-one is disconnected.

I get an error message when I select Scan Picture
Solution If you try to use the HP Image Zone software, you will find that the scan picture feature displays an error message indicating that the HP all-in-one is disconnected.

➔ Close out of the error message and use Webscan to perform a scan.
For more information on Webscan, see Use Webscan.

---

I get an error message when I select Scan Document or Scan to OCR

Solution If you try to use the HP Image Zone software, you will find that the scan document feature displays an error message indicating that the HP all-in-one is disconnected.

➔ Close out of the error message and use Webscan to perform a scan.
For more information on Webscan, see Use Webscan.

---

I get an error message when I select Make Copies

Solution If you try to use the HP Image Zone software, you will find that the make copies feature displays an error message indicating that the HP all-in-one is disconnected.

➔ Close out of the error message and use the control panel of your HP all-in-one to make a copy.
For more information on making a copy from the control panel, see Use the copy features.

---

I get an error message when I select Send a Fax

Solution If you try to use the HP Image Zone software, you will find that the send a fax feature displays an error message indicating that the HP all-in-one is disconnected.

➔ Close out of the error message and use the control panel of your HP all-in-one to send a fax.
For more information on sending a fax from the control panel, see Use the fax features.

---

Device update

Several options are provided to update your HP all-in-one. Each involves downloading a file to your computer to start the Device Update Wizard. For example:

- Based on advice from HP customer support you might access the HP support website to retrieve an upgrade for your device.
- A dialog might appear on your HP all-in-one control panel display to direct you to update your device.

Note If you are a Windows user, you can set the Software Update utility (part of the HP Image Zone software installed on your computer) to automatically search the HP support website for device updates at predetermined intervals. For more information on the Software Update utility, see the onscreen HP Image Zone Help.
Device update (Windows)

Use one of the following to retrieve an update for your device:

- Use your Web browser to download an update for your HP all-in-one from www.hp.com/support. The file will be a self-extracting executable with the extension .exe. When you double-click the .exe file, the **Device Update Wizard** opens on your computer.
- Use the **Software Update** utility to automatically search the HP support website for device updates at predetermined intervals.

**Note** After the **Software Update** utility is installed on your computer, it searches for device updates. If you do not have the latest version of the **Software Update** utility at the time of install, a dialog appears on your computer prompting you to upgrade. Accept the upgrade.

**To use device update**

1. Do one of the following:
   - Double-click the update .exe file you downloaded from www.hp.com/support.
   - When prompted, accept the device update found by the **Software Update** utility.

   The **Device Update Wizard** opens on your computer.

2. At the **Welcome** screen, click **Next**.

3. Select your HP all-in-one from the list, and then click **Next**.

4. Make sure your computer and device meet the requirements listed.

5. If you meet the requirements, click **Update**.

   The **Updating Device** screen appears. A light then begins to flash on the control panel of your HP all-in-one.

6. Do not disconnect, shut down, or otherwise disturb your device while the update is occurring.

   **Note** If you disrupt the update, or an error message indicates the update failed, call HP support for assistance.

After your HP all-in-one shuts down and restarts, an update complete screen appears on your computer.

Your device is updated. It is now safe to use your HP all-in-one.

Device update (Macintosh)

The device update installer provides a means to apply updates to your HP all-in-one as follows:

1. Use your Web browser to download an update for your HP all-in-one from www.hp.com/support.

2. Double-click the downloaded file.

   The installer opens on your computer.

3. Follow the onscreen prompts to install the update to your HP all-in-one.

4. Restart the HP all-in-one to complete the process.
Get HP support

Hewlett-Packard provides Internet and phone support for your HP all-in-one. This chapter provides information on how to get support from the Internet, contact HP customer support, access your serial number and service ID, call in North America during warranty, call HP Japan customer support, call HP Korea customer support, call elsewhere in the world, call Australia post-warranty, and prepare your HP all-in-one for shipment.

If you are unable to find the answer you need in the printed or onscreen documentation supplied with your product, you can contact one of the HP support services listed in the following pages. Some support services are available only in the U.S. and Canada, while others are available in many countries/regions worldwide. If a support service number is not listed for your country/region, contact your nearest authorized HP dealer for help.

Get support and other information from the Internet

If you have Internet access, you can get help from the following HP website:
www.hp.com/support
This website offers technical support, drivers, supplies, and ordering information.

HP customer support

Software programs from other companies might be included with your HP all-in-one. If you experience problems with any of those programs, you will receive the best technical assistance by calling the experts at that company.

If you need to contact HP Customer Support, do the following before you call.

1. Make sure that:
   a. Your HP all-in-one is plugged in and turned on.
   b. The specified print cartridges are installed correctly.
   c. The recommended paper is properly loaded in the input tray.

2. Reset your HP all-in-one:
   a. Turn off the HP all-in-one by pressing the On button.
   b. Unplug the power cord from the back of the HP all-in-one.
   c. Plug the power cord back into the HP all-in-one.
   d. Turn on the HP all-in-one by pressing the On button.

3. For more information, go to www.hp.com/support.
   This website offers technical support, drivers, supplies, and ordering information.

4. If you are still experiencing problems and need to speak with an HP Customer Support Representative, do the following:
   a. Have the specific name of your HP all-in-one, as it appears on the control panel, available.
   b. Print a self-test report. For information on printing a self-test report, see Print a self-test report.
   c. Make a color copy to have available as a sample printout.
   d. Be prepared to describe your problem in detail.
   e. Have your serial number and service ID ready. For information on how to access your serial number and service ID, see Access your serial number and service ID.

5. Call HP Customer Support. Be near your HP all-in-one when you call.

Access your serial number and service ID

You can access important information by using the Information Menu of your HP all-in-one.
Note: If your HP all-in-one is not turning on, you can view the serial number by looking at the sticker on the rear side. The serial number is the 10-character code in the upper left corner of the sticker.

To access your serial number and service ID
1. Press and hold OK. While holding OK, press 4. This displays the Information Menu.
2. Press ▶ until Model Number appears and then press OK. This displays the service ID. Write down the complete service ID.
3. Press Cancel, and then press ▶ until Serial Number appears.
4. Press OK. This displays the serial number. Write down the complete serial number.
5. Press Cancel to exit the Information Menu.

Call in North America during warranty
Call 1-800-474-6836 (1-800-HP invent). US phone support is available in both English and Spanish languages 24 hours a day, 7 days a week (days and hours of support may change without notice). This service is free during the warranty period. A fee may apply outside the warranty period.

Call elsewhere in the world
The numbers listed below are current as of the publication date of this guide. For a list of current international HP Support Service numbers, go to www.hp.com/support and choose your own country/region or language.
You can call the HP support center in the following countries/regions. If your country/region is not listed, contact your local dealer or nearest HP Sales and Support Office to find out how to obtain services.
Support service is free during the warranty period; however, your standard long-distance phone charges will apply. In some cases, a flat fee per single incident will also apply.
For phone support in Europe, please check for the details and conditions of phone support in your country/region by going to www.hp.com/support.
Alternatively, you can ask your dealer or call HP at the phone number provided in this guide.
As part of our constant efforts to improve our phone support service, we advise you to check our website on a regular basis for new information regarding service features and delivery.

Prepare your HP all-in-one for shipment

If after contacting HP Customer Support or returning to the point of purchase, you are requested to send your HP all-in-one in for service, remove the print cartridges and pack the HP all-in-one in the original packing materials to avoid further damage. You can remove print cartridges from your HP all-in-one whether it is turning on or not. Retain the power cord and control panel overlay in case the HP all-in-one needs to be replaced.

Note: This information does not apply to customers in Japan. For information on service options in Japan, see HP Quick Exchange Service (Japan).

1. Turn on the HP all-in-one. If your HP all-in-one will not turn on, skip this step and go to step 2.
2. Open the print-carriage access door.
3. Wait until the print carriage is idle and silent, and then remove the print cartridges from their slots. For information on removing the print cartridges, see Replace the print cartridges.

Note: If your HP all-in-one does not turn on, you can unplug the power cord and then manually slide the print carriage to the far right to remove the print cartridges. When finished, manually move the print carriage to the home position (on the left side).

4. Place the print cartridges in print cartridge protectors or an airtight plastic container so they will not dry out, and put them aside. Do not send them with the HP all-in-one unless the HP customer support call agent instructs you to.
5. Close the print-carriage access door and wait a few minutes for the print carriage to move back to its home position (on the left side).
Note  Make sure the scanner has returned to its parked position before turning off the HP all-in-one.

6  Press the On button to turn off the HP all-in-one.
7  Unplug the power cord, and then disconnect it from the HP all-in-one. Do not return the power cord with the HP all-in-one.

⚠️ Warning  The replacement HP all-in-one will not be shipped with a power cord. Store the power cord in a safe place until the replacement HP all-in-one arrives.

8  Remove the control panel overlay as follows:
   a  Place your hands on each side of the control panel overlay.
   b  Use your thumbs to pry the control panel overlay off.

9  Retain the control panel overlay. Do not return the control panel overlay with the HP all-in-one.

⚠️ Warning  The replacement HP all-in-one might not come with a control panel overlay. Store your control panel overlay in a safe place, and when the replacement HP all-in-one arrives, reattach your control panel overlay. You must attach your control panel overlay to use the control panel functions on the replacement HP all-in-one.

Note  See the Setup Guide that came with your HP all-in-one for instructions on how to attach your control panel overlay. The replacement HP all-in-one might come with instructions for setting up your device.

10  If available, pack the HP all-in-one for shipment by using the original packing materials or the packaging materials that came with your exchange device.
If you do not have the original packaging materials, please use other adequate packaging materials. Shipping damage caused by improper packaging and/or improper transportation is not covered under the warranty.

11 Place the return shipping label on the outside of the box.

12 Include the following items in the box:
   - A complete description of symptoms for service personnel (samples of print quality problems are helpful).
   - A copy of the sales slip or other proof of purchase to establish the warranty coverage period.
   - Your name, address, and a phone number where you can be reached during the day.
17 Warranty information

Your HP all-in-one comes with a limited warranty that is described in this section. Information about how to obtain warranty service and how you can upgrade your standard factory warranty is also provided.

This chapter provides information on duration of your HP all-in-one limited warranty, warranty service, warranty upgrades, returning you HP all-in-one for service, and contains the Hewlett-Packard limited global warranty statement.

Duration of limited warranty

Duration of Limited Warranty (hardware and labor): 1 Year
Duration of Limited Warranty (CD media): 90 Days
Duration of Limited Warranty (print cartridges): Until the HP ink is depleted or the "end of warranty" date printed on the cartridge has been reached, whichever occurs first. This warranty does not cover HP ink products that have been refilled, remanufactured, refurbished, misused, or tampered with.

Warranty service

To obtain HP repair service, you must first contact an HP service office or an HP Customer Support Center for basic troubleshooting. See HP customer support for steps to take before calling Customer Support.

If your HP all-in-one needs a minor part replacement that you can replace, HP might prepay shipping charges, duty and taxes; provide telephone assistance for replacing the part; and pay shipping charges, duty, and taxes for any part that HP asks you to return. Otherwise, the HP Customer Support Center will direct you to an authorized service provider who is certified by HP to service the product.

Note This information does not apply to customers in Japan. For information on service options in Japan, see HP Quick Exchange Service (Japan).

Warranty upgrades

Depending on your country/region, HP might offer a warranty upgrade option that extends or enhances your standard product warranty. Available options might include priority phone support, return service, or next business day exchange. Typically, service coverage begins on product purchase date and must be purchased within a limited time of product purchase.

For more information:
- In the U.S., dial 1-866-234-1377 to speak to an HP advisor.
- Outside the U.S., please call your local HP Customer Support office. See Call elsewhere in the world for a list of international Customer Support numbers.
- Go to www.hp.com/support.
  If prompted, choose your country/region, and then find warranty information.

Returning your HP all-in-one for service

Before returning your HP all-in-one for service, you must call HP Customer Support. See HP customer support for steps to take before calling Customer Support.

Note This information does not apply to customers in Japan. For information on service options in Japan, see HP Quick Exchange Service (Japan).
Hewlett-Packard limited global warranty statement

The following information specifies the HP limited global warranty.

**Extent of limited warranty**

Hewlett-Packard ("HP") warrants to the end-user customer ("Customer") that each HP Officejet 6200 series all-in-one product ("Product"), including related software, accessories, media, and supplies, shall be free from defects in material and workmanship for the duration, which begins on the date of purchase by the Customer.

For each hardware Product, the duration of HP's limited warranty is one year for parts and one year for labor. For all other Products, the duration of HP's limited warranty for both parts and labor is ninety days.

For each software Product, HP's limited warranty applies only to a failure to execute programming instructions. HP does not warrant that the operation of any Product shall be uninterrupted or error free.

HP's limited warranty covers only those defects which arise as a result of normal use of a Product, and does not cover any other problems, including those which arise as a result of (a) improper maintenance or modification, (b) software, accessories, media, or supplies not provided or supported by HP, or (c) operation outside the Product's specifications.

For any hardware Product, the use of a non-HP ink cartridge or a refilled ink cartridge does not affect either the warranty to the Customer or any HP support contract with the Customer. However, if Product failure or damage is attributable to the use of a non-HP or refilled ink cartridge, HP shall charge its standard labor and materials charges to service the Product for the failure or damage.

If HP receives, during the applicable warranty period, notice of a defect in any Product, HP shall either repair or replace the defective Product, at HP's option. Where labor charges are not covered by HP’s limited warranty, repairs shall be at HP's standard charges for labor.

If HP is unable to repair or replace, as applicable, a defective Product which is covered by HP's warranty, HP shall, within a reasonable time after being notified of the defect, refund the purchase price for the Product.

HP shall have no obligation to repair, replace, or refund until the Customer returns the defective Product to HP.

Any replacement product may be either new or like-new, provided that it has functionality at least equal to that of the Product being replaced.

HP products, including each Product, may contain remanufactured parts, components, or materials equivalent to new in performance.

HP's limited warranty for each Product is valid in any country/region or locality where the covered HP product is distributed by HP. Contracts for additional warranty service, such as on-site service, are available from any authorized HP service facility in countries/regions where the product is distributed by HP or by an authorized representative.

**Limitations of warranty**

TO THE EXTENT ALLOWED BY LOCAL LAW, NEITHER HP NOR ITS THIRD PARTY SUPPLIERS MAKE ANY OTHER WARRANTY OR CONDITION OF ANY KIND, WHETHER EXPRESS OR IMPLIED, WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE.

**Limitations of liability**

To the extent allowed by local law, the remedies provided in this Limited Warranty Statement are the Customer's sole and exclusive remedies.

TO THE EXTENT ALLOWED BY LOCAL LAW, EXCEPT FOR THE OBLIGATIONS SPECIFICALLY SET FORTH IN THIS LIMITED WARRANTY STATEMENT, IN NO EVENT SHALL HP OR ITS THIRD PARTY SUPPLIERS BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER BASED ON
CONTRACT, TORT, OR ANY OTHER LEGAL THEORY AND WHETHER ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Local law
This Limited Warranty Statement gives the Customer specific legal rights. The Customer may also have other rights which vary from state to state in the United States, from province to province in Canada, and from country/region to country/region elsewhere in the world.
To the extent this Limited Warranty Statement is inconsistent with local law, this Statement shall be deemed modified to be consistent with such local law. Under such local law, certain disclaimers and limitations of this Statement may not apply to the Customer. For example, some states in the United States, as well as some governments outside the United States (including provinces in Canada), may:
Preclude the disclaimers and limitations in this Statement from limiting the statutory rights of a consumer (for example, the United Kingdom);
Otherwise restrict the ability of a manufacturer to enforce such disclaimers or limitations; or
Grant the Customer additional warranty rights, specify the duration of implied warranties which the manufacturer cannot disclaim, or not allow limitations on the duration of implied warranties.
FOR CONSUMER TRANSACTIONS IN AUSTRALIA AND NEW ZEALAND, THE TERMS IN THIS LIMITED WARRANTY STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT, OR MODIFY, AND ARE IN ADDITION TO, THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THE COVERED HP PRODUCTS TO SUCH CUSTOMERS.

Limited warranty information for EU countries/regions
Listed below are the names and addresses of the HP entities which grant HP’s Limited Warranty (manufacturer’s warranty) in EU countries/regions.
You may also have statutory legal rights against the seller on the basis of the purchase agreement in addition to the manufacturer’s warranty, which are not restricted by this manufacturer’s warranty.

1 Maximum capacity.
2 Output tray capacity is affected by the type of paper and the amount of ink you are using. HP recommends emptying the output tray frequently.

Note The document feeder tray holds 20 sheets of Letter, Legal, and A4 sized paper (16 to 24 lb. paper).

¹ Maximum at 400% scaling.

**Fax specifications**
- Walk-up black and white and color fax capability
- Up to 60 speed dials (varies by model)
- Up to 60-page memory (varies by model, based on ITU-T Test Image #1 at standard resolution). More complicated pages or higher resolution will take longer and use more memory.
- Manual multiple-page fax
- Automatic busy redial up to five times (varies by model)
- Automatic no-answer redial one time (varies by model)
- Confirmation and activity reports
- CCITT/ITU Group 3 fax with Error Correction Mode
- 33.6 Kbps transmission
- 3 seconds per page speed at 33.6 Kbps (based on ITU-T Test Image #1 at standard resolution). More complicated pages or higher resolution take longer and use more memory
- Ring detect with automatic fax/answering machine switching

Scan specifications
- Image editor included
- Integrated OCR software automatically converts scanned text to editable text
- Scan speeds vary according to the complexity of the document
- Twain-compliant interface
- Resolution: 1200 by 2400 ppi optical, up to 19,200 dpi enhanced
- Color: 16-bit per RGB color, 48-bit total
- Maximum scan size from glass: 216 by 297 mm (8.5 by 11.7 inches)

Physical specifications
- Height: 23.4 cm (9.1 inches)
- Width: 45 cm (17.6 inches)
- Depth: 38.4 cm (15 inches)
- Weight: 6.8 kg (15 pounds)

Power specifications
- Power consumption: 80 W maximum
- Input voltage: AC 100 to 240 V ~ 1 A 50–60 Hz, grounded
- Output voltage: DC 32Vdc=1100 mA, 16V dc=1600 mA

Environmental specifications
- Recommended operating temperature range: 15° to 32°C (59° to 90°F)
- Allowable operating temperature range: -15° to 35°C (5° to 104°F)
- Humidity: 15% to 85% RH non-condensing
- Non-operating (Storage) temperature range: −4° to 60°C (−40° to 140°F)
- In the presence of high electromagnetic fields it is possible the output from the HP all-in-one may be slightly distorted
- HP recommends using a USB cable less than or equal to 3 m (10 feet) in length to minimize injected noise due to potential high electromagnetic fields

Additional specifications
Memory: 32 MB or 64 MB DRAM depending on model
If you have Internet access, you can get acoustic information from the HP website. Go to www.hp.com/support.

Environmental product stewardship program
This section provides information on protecting the environment; ozone production; energy consumption; paper use; plastics; material safety data sheets; and recycling programs. This section contains information about environmental standards.

Protecting the environment
Hewlett-Packard is committed to providing quality products in an environmentally sound manner. This product has been designed with several attributes to minimize impacts on our environment. For more information, visit HP's Commitment to the Environment website at: www.hp.com/hpinfo/globalcitizenship/environment/index.html
Ozone production
This product generates no appreciable ozone gas (O3).

Energy consumption
Energy usage drops significantly while in ENERGY STAR® mode, which saves natural resources, and saves money without affecting the high performance of this product. This product qualifies for ENERGY STAR, which is a voluntary program established to encourage the development of energy-efficient office products.

ENERGY STAR is a U.S. registered service mark of the U.S. EPA. As an ENERGY STAR partner, HP has determined that this product meets ENERGY STAR guidelines for energy efficiency.
For more information on ENERGY STAR guidelines, go to the following website:
www.energystar.gov

Paper use
This product is suited for the use of recycled paper according to DIN 19309.

Plastics
Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of the product’s life.

Material safety data sheets
Material safety data sheets (MSDS) can be obtained from the HP website at:
www.hp.com/go/msds
Customers without Internet access should contact their local HP Customer Care Center.

Recycling program
HP offers an increasing number of product return and recycling programs in many countries, as well as partnering with some of the largest electronic recycling centers throughout the world. HP also conserves resources by refurbishing and reselling some of its most popular products.
This HP product contains the following materials that may require special handling at end-of-life:
● Mercury in the fluorescent lamp in the scanner (< 2 mg)
● Lead in the solder

HP inkjet supplies recycling program
HP is committed to protecting the environment. The HP Inkjet Supplies Recycling Program is available in many countries/regions, and lets you recycle used print cartridges free of charge. For more information, go to the following website:
www.hp.com/hpinfo/globalcitizenship/environment/recycle/inkjet.html

Regulatory notices
The HP all-in-one meets product requirements from regulatory agencies in your country/region. This section contains regulatory topics that do not pertain to wireless functions.
Regulatory model identification number

For regulatory identification purposes, your product is assigned a Regulatory Model Number. The Regulatory Model Number for your product is SDGOB-0402. This regulatory number should not be confused with the marketing name (HP Officejet 6200 series all-in-one) or product number (Q5800A).

Notice to users of the U.S. telephone network: FCC requirements

This equipment complies with FCC rules, Part 68. On this equipment is a label that contains, among other information, the FCC Registration Number and Ringer Equivalent Number (REN) for this equipment. If requested, provide this information to your telephone company.

An FCC compliant telephone cord and modular plug is provided with this equipment. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack which is Part 68 compliant. This equipment connects to the telephone network through the following standard network interface jack: USOC RJ-11C.

The REN is useful to determine the quantity of devices you may connect to your telephone line and still have all of those devices ring when your number is called. Too many devices on one line may result in failure to ring in response to an incoming call. In most, but not all, areas the sum of the RENs of all devices should not exceed five (5). To be certain of the number of devices you may connect to your line, as determined by the REN, you should call your local telephone company to determine the maximum REN for your calling area.

If this equipment causes harm to the telephone network, your telephone company may discontinue your service temporarily. If possible, they will notify you in advance. If advance notice is not practical, you will be notified as soon as possible. You will also be advised of your right to file a complaint with the FCC. Your telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the proper operation of your equipment. If they do, you will be given advance notice so you will have the opportunity to maintain uninterrupted service.

If you experience trouble with this equipment, please contact the manufacturer, or look elsewhere in this manual, for warranty or repair information. Your telephone company may ask you to disconnect this equipment from the network until the problem has been corrected or until you are sure that the equipment is not malfunctioning.

This equipment may not be used on coin service provided by the telephone company. Connection to party lines is subject to state tariffs. Contact your state public utility commission, public service commission, or corporation commission for more information.

This equipment includes automatic dialing capability. When programming and/or making test calls to emergency numbers:

- Remain on the line and explain to the dispatcher the reason for the call.
- Perform such activities in the off-peak hours, such as early morning or late evening.

Note The FCC hearing aid compatibility rules for telephones are not applicable to this equipment.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of transmission, the date and time it is sent and an identification of the business, other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.) In order to program this information into your fax machine, you should complete the steps described in the software.

FCC statement

The United States Federal Communications Commission (in 47 CFR 15.105) has specified that the following notice be brought to the attention of users of this product.
Declaration of Conformity: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Class B limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

For more information, contact the Product Regulations Manager, Hewlett-Packard Company, San Diego, (858) 655-4100.

The user may find the following booklet prepared by the Federal Communications Commission helpful: How to Identify and Resolve Radio-TV Interference Problems. This booklet is available from the U.S. Government Printing Office, Washington DC, 20402. Stock No. 004-000-00345-4.

Caution Pursuant to Part 15.21 of the FCC Rules, any changes or modifications to this equipment not expressly approved by the Hewlett-Packard Company may cause harmful interference and void the FCC authorization to operate this equipment.

Exposure to radio frequency radiation

Caution The radiated output power of this device is far below the FCC radio frequency exposure limits. Nevertheless, the device shall be used in such a manner that the potential for human contact during normal operation is minimized. This product and any attached external antenna, if supported, shall be placed in such a manner to minimize the potential for human contact during normal operation. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20 cm (8 inches) during normal operation.

Note à l’attention des utilisateurs du réseau téléphonique Canadien/notice to users of the Canadian telephone network

Cet appareil est conforme aux spécifications techniques des équipements terminaux d’Industrie Canada. Le numéro d’enregistrement atteste de la conformité de l’appareil. L’abréviation IC qui précède le numéro d’enregistrement indique que l’enregistrement a été effectué dans le cadre d’une Déclaration de conformité stipulant que les spécifications techniques d’Industrie Canada ont été respectées. Néanmoins, cette abréviation ne signifie en aucun cas que l’appareil a été validé par Industrie Canada.

Pour leur propre sécurité, les utilisateurs doivent s’assurer que les prises électriques reliées à la terre de la source d’alimentation, des lignes téléphoniques et du circuit métallique d’alimentation en eau sont, le cas échéant, branchées les unes aux autres. Cette précaution est particulièrement importante dans les zones rurales.

Le numéro REN (Ringer Equivalence Number) attribué à chaque appareil terminal fournit une indication sur le nombre maximal de terminaux qui peuvent être connectés à une interface téléphonique. La terminaison d’une interface peut se composer de n’importe quelle combinaison d’appareils, à condition que le total des numéros REN ne dépasse pas 5.

Basé sur les résultats de tests FCC Partie 68, le numéro REN de ce produit est 0.2B.

This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation IC before the
registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas.

Note  The Ringer Equivalence Number (REN) assigned to each terminal device provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed 5.

The REN for this product is 0.2B, based on FCC Part 68 test results.

Notice to users in the European Economic Area

Declaration of conformity

This section contains the HP Officejet 6200 series all-in-one Declaration of conformity, and information about it for the European Economic Area.

Declaration of conformity (European Economic Area)

The Declaration of Conformity in this document complies with ISO/IEC Guide 22 and EN 45014. It identifies the product, manufacturer’s name and address, and applicable specifications recognized in the European community.
DECLARATION OF CONFORMITY

according to ISO/IEC Guide 22 and EN 45014

Manufacturer's Name: Hewlett-Packard Company

Manufacturer's Address: 16399 West Bernardo Drive
San Diego CA 92127, USA

declares, that the product

Regulatory Model Number: SDGOB-0402
Product Name: OfficeJet 6200 Series (Q5800A, Q5802A, Q5810A)
Model Number(s): OJ 6210 (Q5801A/B), OJ 6213 (Q5808C), OJ 6210x (Q5802A), OJ 6210v (Q5803A), OJ 6200 (Q5804A/B), OJ 6203 (Q5807A), OJ 6205 (Q5805A), OJ 6215 (Q5806B), OJ 6210 (Q5801A/C), OJ 6200 (Q5804A), OJ 6208 (Q5809D)

Power Adapter(s) HP part#: 0950-4491 (international)

conforms to the following Product Specifications:

Safety: IEC 60950-1: 2001
EN 60950-1: 2002
UL 60950-1: 2003
CAN/CSA-22.2 No. 60950-1-03

IEC 61000-3-2: 2000 / EN 61000-3-2: 2000
CNS13438:1998, VCCI-2
FCC Part 15-Class B/ICES-003, Issue 2
GB9254: 1998

Supplementary Information:
The product herewith complies with the requirements of the Low Voltage Directive 73/23/EC, the EMC Directive 89/336/EC and with the R&TTE Directive 1999/5/EC (Annex II) and carries the CE-marking accordingly. The product was tested in a typical configuration.
