Make the most of HP OpenVMS—with training from HP Education Services

Solutions for the adaptive enterprise.

Managing large volumes of information across your enterprise—quickly, reliably, and securely—is a requirement you face every day. In today's ever-changing business climate, your IT infrastructure absolutely must provide more. Business requires that you capitalize on all opportunities, and when change occurs, your IT environment must adapt—dynamically and easily—to enhance your competitive advantage. HP offers you the agility, flexibility, innovation, and performance you need to have peace of mind, knowing that your business and IT are synchronized and that your investment is protected well into the future.

HP OpenVMS is built on HP's vision of an Adaptive Enterprise, where business and IT are synchronized to capitalize on change. But what sets OpenVMS apart as it handles some of the most challenging IT demands of millions of users worldwide—every second of every day, year after year—is its ability to deliver industry-leading security, high performance, solid disaster tolerance, reliability, and scalability, resulting in up to 100% application availability.

Let HP show you how to make the most of this world-class enterprise platform—deriving tangible competitive advantages—with the help of our extensive HP OpenVMS training curriculum. If you are adding staff or capabilities, or simply furthering the development of your existing team, training from HP will help you achieve your business goals more efficiently and cost-effectively.

HP OpenVMS training topics

Whether your business is running on HP Integrity servers or HP AlphaServer systems, and whether your staff is highly experienced or entry level, our courses provide a wide range of competencies and are designed to help you to get more from your systems. Course topics include:

OpenVMS for HP Integrity servers

The availability of OpenVMS on the entire line of HP Integrity servers is an important milestone. Now, HP customers can take advantage of four industry-leading operating systems—OpenVMS, HP-UX 11i, Microsoft® Windows® Server 2003, and Linux®—across our entire high-performance, cost-effective HP Integrity server family.

For those entities migrating to Integrity servers, our update courses for system managers and programmers address the differences and new functionality. Also, courses in our system manager track include OpenVMS version 8.2, which runs on both HP Integrity servers and AlphaServer systems.

Virtualization and system management essentials strengthen your IT environment.

To enable you to keep your IT environment running strong, HP Integrity Essentials provides modular, integrated system management software, including HP Global Workload Manager, HP Systems Insight Manager, and HP OpenView, for resource lifecycle management on your HP Integrity servers.

Certifications	Prerequisites	Recommended courses
Certified System Administrator (CSA) OpenVMS v8 Systems Administration Exam #HP0-081	None	<ul style="list-style-type: none"> • HP OpenVMS Fundamentals (U3716S) • HP OpenVMS System Management I: Essentials for Established Systems (U3724S) • HP OpenVMS System Management II: Installation, Configuration, & Customization (U3725S) • HP OpenVMS System Performance Management (U3727S)
Certified Systems Engineer (CSE) HP OpenVMS v8 Advanced Administration, Performance, and Support Exam #HP0-082 HP OpenVMS v8 Network Administration Exam #HP0-83	Certified System Administrator (CSA)	<ul style="list-style-type: none"> • TCP/IP Services for HP OpenVMS (U3728S) • HP OpenVMS Internals for System Managers (U3729S) • HP OpenVMS System Performance Management (U3727S)

Our System Manager curriculum focuses on those tools that will help you understand and use the specific features of OpenVMS that will assist you on your path to a more dynamic, flexible, and efficient computing environment.

OpenVMS for HP AlphaServer systems

Today's AlphaServer systems running OpenVMS operate at their peak performance and efficiency, and HP will continue to support these solid, dependable systems for years to come. Built for reliability, outstanding price/performance, simplified management, exceptional scalability, flexibility, and high application availability, HP AlphaServer systems offer a sensible and natural evolutionary path to HP Integrity servers.

The System Manager curriculum is mature but has been kept up to date to support OpenVMS as it has evolved over time. When you are ready to make the move to HP Integrity servers, migration training is available in our update courses.

We have something to offer everyone, from the novice to the seasoned professional.

We provide suggested curriculum paths for system administrators, network administrators, and application developers at all levels of expertise. After completing our system administration curriculum, attendees can validate their knowledge and competencies and earn recognition for their OpenVMS expertise by taking our certification exams. By helping your staff continually increase their intellectual capital in this way, you help your IT environment reach its full potential. Additionally, for the highest level, HP offers OpenVMS Advanced Boot Camp training. Check www.hp.com/go/openvms/bootcamp for upcoming events.

We offer flexible purchase options.

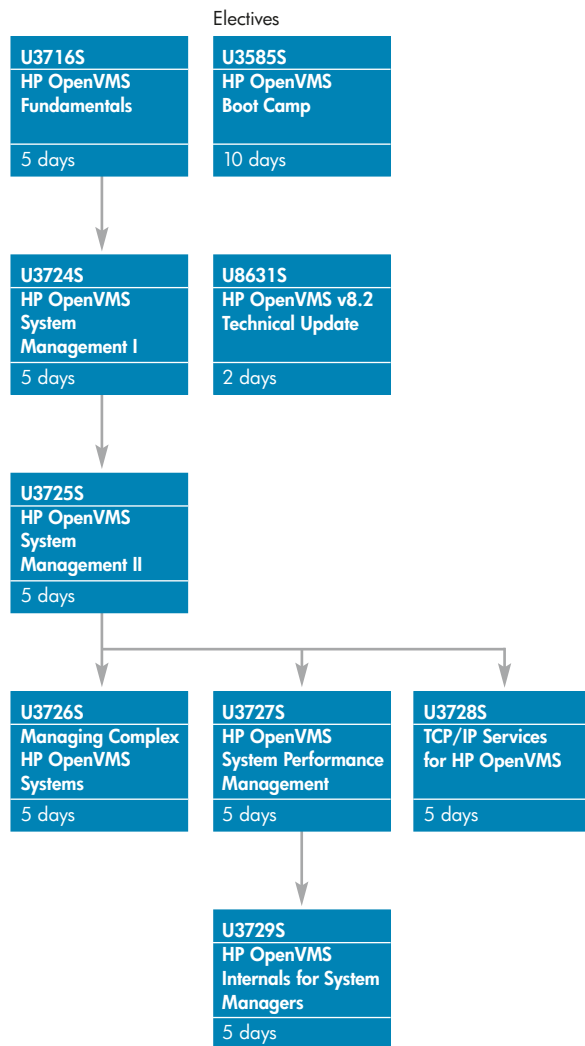

HP offers several options to help you manage your training budget. Select from job-focused courses that can be ordered individually to meet specific training needs; or, to get the best value and most flexibility, purchase an HP Care Pack.

HP Care Pack Total Education offers the ultimate flexibility to meet your education needs. A simple, economical way to purchase training, this package provides credits like a bank account that can be used for any of more than 650 different instructor-led courses offered at HP education centers, or more than 3,000 online courses offered through the HP IT Resource Center.

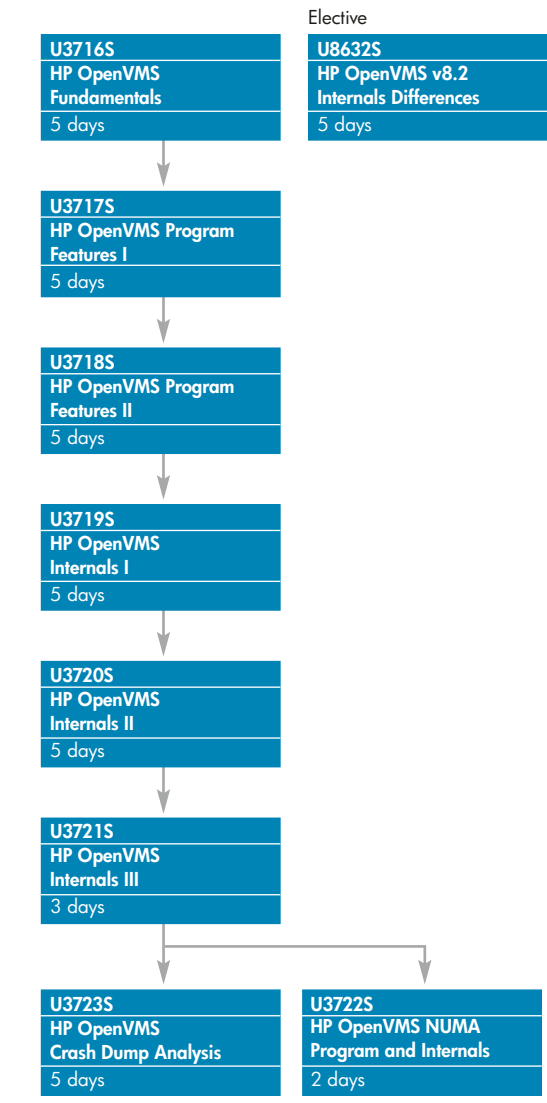

HP Certified Professional program

HP offers HP OpenVMS System Administrator certification, designed to make sure IT professionals demonstrate understanding of installation, configuration, and administration skills. At the advanced HP OpenVMS Systems Engineer level, participants demonstrate understanding of management integration, performance tuning, and troubleshooting support of enterprise-class configurations. To help prepare for certification, IT professionals can take the HP OpenVMS boot camp (U3585S) or follow the courses recommended in the table below. For full details on HP OpenVMS certifications, go to www.hp.com/certification.

Why HP Education Services?

HP offers an industry-leading IT training portfolio with flexible scheduling, over 650 different instructor-led courses, and more than 3,000 online courses, so you choose the desired level of detail, timelines, and local languages. Our blended approach to learning through a combination of classroom and online courses provides the maximum effectiveness and flexibility. HP's education services can be tailored to help meet your training requirements. We can bring in an HP OpenVMS expert to help you to determine exactly what you need—either on your premises or at one of our dedicated training centers. These resources place HP in the ideal position to provide HP OpenVMS training to thousands of employees all over the world.

Whether you need a half-day refresher course or a 10-day intensive technical course, HP Education Services—with more than 200,000 people trained every year—has the breadth, depth, and flexibility to make sure you get the right HP OpenVMS training solution for your business.

Consider these key reasons to choose HP Education Services for your OpenVMS training needs.

It costs less than informal training.

Using your own OpenVMS expert or experts to train less-knowledgeable IT staff may seem “free” at first glance, but in reality you’re tying up the time (and salaries) of two valuable team members (one teaching and one learning) for the entire duration of the training process. With HP Education Services, only the people in need of training are involved, leaving the “teaching” staff members free to focus on their higher-level duties.

Nobody knows HP OpenVMS better than HP.

We developed OpenVMS, we designed its functionality, and we control its evolution. Because of that, we are immersed in the latest OpenVMS innovations every day. With 30 years of experience in OpenVMS education and the most experienced HP OpenVMS instructors in the world, we’re able to perform OpenVMS training faster, more thoroughly, and more comprehensively than anyone else.

We offer a variety of training methods to fit your needs.

At HP we understand that each company and each individual will bring different time constraints, budget parameters, and learning preferences to the table. That’s why we offer flexible learning options, in a wide variety of languages. We have 80 training centers worldwide as well as e-learning on the award-winning IT Resource Center, a “learning community” with extensive on-demand resources that can be accessed 24x7 wherever there is an Internet connection. If none of those options fits your needs, HP can also create customized learning solutions that address the challenges specific to your IT environment and your industry.
