

The successful deployment of VMware technologies in any enterprise relies on trained staff who can plan, configure and manage a virtualized environment. HP offers the complete, official VMware training curriculum to provide the essential skills needed in a virtualized world.

Keep pace with technology

Many customers choose virtualized servers to help them manage complexity, drive efficiency and reduce costs. VMware has developed virtualization software that brings mainframe-class partitioning to industry-standard servers. But most organizations do not come close to using their VMware solution to its fullest potential. Indeed, hardware and software alone is not sufficient to reap all the benefits of server virtualization.

Companies also need the right people with the right skills and expertise to manage the new potential promised by virtualization. They need to make certain their teams maintain high levels of staff motivation and productivity. Education about virtualization with VMware is now just as important as having the appropriate hardware and software.

HP ProLiant is the leading industry-standard platform, with more VMware-certified servers, integrated management capabilities, and expert training. It is a winning combination.

Let HP show you how to make the most of your VMware environment and employ it as a tangible competitive advantage with the help of our extensive VMware training curriculum. VMware training from HP will help you reduce costs, improve resource efficiency, and improve management and provisioning.

Our solution

HP is a global VMware authorized training center (VATC), using VMware-certified instructors and course materials. We deliver training recognized by VMware for their VMware Certified Professional (VCP) program.

- For Administrators: Students will learn how to use VMware ESX Server for consolidating and partitioning servers in high performance environments. Our courses also cover the installation and configuration of ESX server, Virtual Machine creation using the VMware Management Interface and VirtualCenter. Administrators already familiar with the ESX 2.x server environments can take a 'What's new in ESX 3.0' class.
- For Operators: Hands-on training that provides an introduction to VMware virtual infrastructure, along with the practical aspects of the day-to-day operator tasks.

“Hewlett-Packard is one of our largest VMware Authorized Training partners, dedicated to the highest standards of quality training and customer satisfaction. With HP’s authorized VMware training, customers can be confident that they will have the best possible experience allowing them to make the most of their VMware investment.”

—Richard Kerr, Worldwide Partner Manager,
VMware Education Services

- **Technology expertise:** With HP ProLiant servers, HP has the leading industry-standard platform, more VMware certified servers, and integrated management capabilities for a winning combination. VMware training from HP will help you reduce costs, improve resource efficiency, and improve management and provisioning by consolidating multiple logical servers onto more powerful ProLiant servers.
- **Leadership:** HP is the largest official VMware authorized training center (VATC) in the world (based on schedule information publically available on www.vmware.com). With the combination of our global presence, remote training delivery infrastructure and experience in VMware training, you can trust HP to deliver VMware training that will meet your quality expectations and training needs.

Why HP education services for VMware?

- **Flexibility:** Our VMware training is offered via traditional instructor-led courses at one of over 100 training centers worldwide or onsite at your location.
- **Certifications:** HP is a global VMware authorized training partner, with VMware-certified instructors and course materials. We deliver training recognized by VMware for the VMware Certified Professional (VCP) program. Accredited Systems Engineer (ASE) candidates can now use VMware certification (VCP) as an elective towards their ASE certification.
- **Quality:** Our ongoing course and instructor evaluations, and commitment to the highest standards of quality and customer satisfaction, have built HP’s reputation for technology training.

HP Care Pack services for education

For a proven, easy-to-purchase approach to training with HP education services, consider HP Care Pack. There are two types: HP Care Pack Total Education, and technology-specific courses.

HP Care Pack Total Education offers the ultimate in flexibility. It’s a simple, economical way to purchase training. This package provides your company with credits like a bank account, which can be used for any of over 200 different scheduled instructor-led courses offered at HP education centers (including those discussed above), or more than 3,000 online courses via our HP IT Resource Center. Credits can even be used to rent one of our HP Virtual Rooms. If you know that your organization needs technical training, but are not exactly sure who needs what and when, then the flexibility of the HP Care Pack Total Education is an ideal match.
