

HP Education Services

HP RAIL

Live Training. No Travel.
You'll like it. We guarantee it.

Don't sacrifice your training goals due to travel restrictions. With HP RAIL, you receive live interactive instruction, including hands-on lab work—*virtually*—in real-time over the internet. HP RAIL combines the best of classroom training with the best of online training—without the travel and with reduced 'out-of-office' time. You attend our award winning instructor-led training from wherever you are: home, office, anywhere.

HP Virtual Technologies— innovative tools for collaboration and learning

Over the last decade, HP has pioneered the use of cutting edge technologies to support remote, instructor-led learning environments over the Internet. Harnessing the power and innovation of the HP Virtual Room and Virtual Lab, RAIL recreates the classroom experience online.

HP RAIL features include:

- *Collaboration tools*—such as application sharing, 'breakout rooms', group/private chat, and spontaneous polling—to ensure that students can fully interact with instructors and peers; and,
- *Remote lab equipment* to provide students the same lab experience as if sitting in front of the console.

When it comes to virtual training, you need confidence in the technical capabilities of your provider. With RAIL, HP offers unparalleled commitment, experience and technical resources. Given the ever-changing technical landscape, HP commits significant resources to keep the RAIL technical infrastructure up-to-date with the most current and sophisticated hardware and technologies. Check out the side bar for a glimpse into the technology behind our HP RAIL/Virtual Lab facility located in Andover, Massachusetts.

HP RAIL Facility—At-a-Glance

Our investment in your success

- Accommodates 1200+ concurrent connections
- 3200+ named servers
- 3/4 Perabyte of storage capacity (>750 TB)—and growing
- 33 miles of copper cabling
- 14 miles of fiber optic
- 30,876 fiber connections
- 18,312 managed Ethernet ports
- 56 megabit network connections
- 12,000 sq feet of floor space
- Equipment draws 750 amps @ 440 volts of power
- 340 tons of air conditioning
- Automated shutdown process to reduce energy consumption
- 2 UPS systems to ensure its up and running when you need it!
