

HP's Compliance with REACH

REACH ("Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)") is a new European Union (EU) chemicals regulation that entered into force on 1 June 2007, with phased deadlines to 2018.

HP supports the overall REACH objective of improving the protection of human health and the environment. HP's long standing policy is to provide products and services that are safe to use and have a low environmental impact throughout their lifecycle. HP will meet all applicable REACH requirements and is committed to providing our customers with information about the chemicals in our products as needed to comply with REACH. HP is working with industry and government to achieve a workable system that fulfills the goals of REACH and with our suppliers to ensure that HP products comply with REACH.

HP and its suppliers have taken the necessary action to meet the requirements of REACH to ensure that HP Products can continue to be supplied in the EU. This includes, where required by REACH, pre-registration of substances. We will continue to comply with the requirements of REACH including completing all necessary Registration of substances.
