

HP Supply Chain Social and Environmental Responsibility Policy

HP's commitment to Global Citizenship extends to our supply base. We expect HP suppliers to conduct their worldwide operations in a socially and environmentally responsible manner. At HP, we work collaboratively with our suppliers to encourage compliance with the following principles:

- **Legal and Regulatory Compliance:** Suppliers are to ensure their operations and the products and services supplied to HP comply with all national and other applicable laws and regulations.
- **Environmental Performance Improvement:** Suppliers are to understand and reduce the environmental impacts of their operations and of the products and services they provide to HP. This will include programs that promote efficient use of energy and other resources, minimize the use of hazardous materials, promote reuse and recycling, and reduce emissions to air, soil and water.
- **Management Systems:** Suppliers are to maintain effective management systems that integrate environmental, occupational health and safety, human rights and labor policies, and ethics into their business and decision-making processes. This includes establishing appropriate objectives and targets, regularly measuring and assessing performance, and practicing continual improvement.
- **Information Access:** Suppliers are to provide clear, timely, accurate and appropriate reporting to HP upon request

In selecting and retaining qualified suppliers, HP will show preference to suppliers that meet the above requirements, HP's *Electronic Industry Code of Conduct*, and HP's *General Specification for the Environment*.
