

Sharon Jones

Vice President, LaserJet Connectivity, Imaging and Printing Group

Hewlett-Packard Company

Sharon Jones is the vice president of the LaserJet Connectivity Organization within the Imaging and Printing Group (IPG) at HP. Her organization is responsible for delivering connectivity standards, technologies, products, and solutions that seamlessly integrate LaserJets and other IPG devices into customers' environments, from small businesses to global enterprises. Her team's goal is to make it simpler, easier and cheaper to use HP imaging and printing devices.

Jones' organization's products include: the industry leading JetDirect network connectivity products; the industry leading Web Jetadmin software for managing fleets of devices across medium to enterprise businesses; the recently introduced Easy Printer Care software that enables device maintainers in small businesses to monitor their devices and easily reorder supplies; reliable, easy to use print drivers for IPG's devices including the recently released innovative Universal Print Drivers for Windows® that virtually eliminate the hassle and complexity of managing print drivers; and the HP Output Server software that brings reliable, secure document delivery to enterprise applications.

Jones has a long and successful career with HP holding numerous engineering and management positions in the successful Imaging and Printing business. She has a bachelor's degree in electrical engineering from Washington State University as well as executive education at the University of Michigan through HP's Accelerated Development Program.
