

Fact sheet

HP ColorSphere Toner Offers More Colors, Higher Gloss Levels and Enables Faster Printing

Overview

HP's ColorSphere toner, designed exclusively for HP Color LaserJet printers, enables customers to bring brilliant ideas to life quickly and consistently through stunning, high quality prints. Representing 20 years of innovation, HP Color LaserJet print cartridges offer higher gloss, a wider range of colors, more consistent color and higher resolution than ever before. The result is better quality prints with brilliant color and photo quality for compelling, high-impact communications. This advanced toner technology also enables customers to print significantly faster without sacrificing quality.

Key Features and Benefits:

- Improved to deliver a wider range of color vs. previous generations
- HP Color LaserJet print cartridges have enhanced melting and fusing features—enabling optimum toner release and better flow onto the page for more consistent color and higher resolution and a 40 percent increase in gloss levels⁽¹⁾
- Toner offers enhanced charge capabilities and faster melting, resulting in prints ready for immediate handling and use
- Toner particles are scientifically developed to be uniformly rounder and smoother to improve toner flow, resulting in precise toner placement and higher resolution
- HP ColorSphere toner and HP Color Laser glossy papers are designed to provide optimal results when used together, providing exceptional results that make documents shine
- Formulated and tested to work with a broad range of specific paper types to deliver stunning prints for every application
- Patented additives specifically designed to maintain charge control for reliable performance across different environmental conditions
- Scientifically developed under rigorous testing conditions using detailed analysis and precision instruments to ensure reliable, high-quality color that shines
- Incorporates HP Smart Printing Technology – As the system triggers adjustments to the electrophotographic voltages inside the print cartridge, a precise mix of patented additives -- fine-tuned for quality results under diverse environmental conditions -- ensures consistency. HP supplies and the printer work together to ensure the quality of each print, saving time and providing real value.

The name ColorSphere describes the nearly perfect spheres that comprise HP's

toner particles, and the empowering color image quality that these particles provide.

Technical Specifications

- **Compatibility:** HP CLJ 1600, 2600, 2605, 3000, 3600, 3800, 4700, 4730mfp

Pricing and Availability

HP Color LaserJet print cartridges with HP ColorSphere toner are currently available for purchase in the United States, Europe, and Asia Pacific. Estimated prices vary per HP Color LaserJet printer.

###

⁽¹⁾ HP ColorSphere toner achieves up to 40 percent higher gloss using high-gloss mode on HP Color Laser Photo & Imaging Paper, glossy with HP's award-winning HP Color LaserJet 4650 Printer (Best Network Color Laser of 2004, *PC Magazine*, 12/04). Percentage improvements based on internal testing using Industry Standard 75 degree Gloss Meter.
