

Fact sheet

HP Web Jetadmin 8.0

Overview

HP Web Jetadmin 8.0 peripheral management software is a simple tool for remotely installing, configuring and managing a wide variety of HP and non-HP network peripherals using only a standard web browser. HP Web Jetadmin 8.0 can help enterprises as well as medium to large organizations decrease IT time spent managing their printing and imaging environment with new features such as links to HP Instant Support and assisted supplies ordering.

HP Web Jetadmin 8.0 also includes enhanced security, tools to help control access to color printing, enhanced reporting capabilities that provide print job tracking by user and by application, and the ability to view status, page counts, and supplies levels on select direct PC connected printers. These new enhancements provide tangible time-saving benefits to administrators and IT professionals.

Key Features

- Proactive remote printer management accessible anywhere users can use a standard browser on the web
- Predictive supplies reporting that provides a pre-populated list of supplies needed and the ability to route that information to your preferred vendor
- Proactive email notification of potential printing problems
- Multi-vendor print management, with improved support for standard printer MIB devices
- Fleet deployment and management capabilities
- The ability to create custom asset and utilization reports
- Data storage in one central database
- Plug-ins for enhanced functionality including:
 - PC Printer Discovery Plug-in 2.0
 - HP Driver Preconfiguration Plug-in
 - Report Generations Plug-in 3.0
 - Device Storage Manager Plug-in
