

## HP Web Jetadmin 8.1

### Overview

HP Web Jetadmin 8.1 peripheral management software is a simple tool for remotely installing, configuring and managing a wide variety of HP network peripherals using only a standard web browser. HP Web Jetadmin 8.1 can help enterprises as well as medium to large organizations decrease IT time spent managing their printing and imaging environment with new features such as links to HP Instant Support and assisted supplies ordering.

HP Web Jetadmin 8.1 also includes enhanced security, tools to help control access to color printing, enhanced reporting capabilities that provide print job tracking by user and by application. These new enhancements provide tangible time-saving benefits to administrators, facility managers, and IT professionals.

### Key Features and Benefits

- HP Web Jetadmin Report Generation Plug-in 3.1 provides more reports than ever to help manage and control costs in the printing and imaging environment; new reports include inventory reports, a printed pages (one and two-sided) by user information report and a supplies use/misuse report;
- Improved color access control enables device access configuration, the ability to edit color access lists for multiple devices and the ability to report by user who is printing in color;
- Enhanced supplies management through improved toner-level alert and threshold levels and a consolidated supplies reordering report that contains a customizable URL to link into existing procurement systems;
- Enhanced security solutions include SNMPv3 device support, automated, unattended secure operations; new authentication, authorization management and policy administration for MFPs, as well as a new plug-in for MegaTrack in Printer Agent (MIPA) and MIPA PIN by Capella which provides security and job tracking solutions that are fully integrated with HP Web Jetadmin;
- Easy integration with enterprise management packages through the new SNMP trap generator plug-in as well as the ability to subscribe to new printer error code alerts and additional printer error details that can assist in quick issue resolution;
- Remote printer management tool that is accessible anywhere by using a standard web browser;
- Plug-ins for enhanced functionality including PC Printer Discovery Plug-in, HP Driver

Preconfiguration Plug-in, Report Generation Plug-in 3.1, SNMP Trap Generator Plug-in, MIPA and MIPA Pin Plug-in by Capella, Authentication Manager Plug-in.
