

Reference Sheet

HP Compaq nc6140 Notebook PC

Reference quotes:

"We have been very impressed with the HP Compaq nc6140 notebook PC so far. The embedded EV-DO functionality will provide users with true mobility by giving them access to wide-area wireless broadband in more locations. We also like the overall design of the laptop and the extra two USB ports are a welcome addition, especially placed on either side of the laptop. Once the HP Compaq nc6140 notebook PC becomes available, QUALCOMM employees will have the opportunity to use this laptop to stay mobile and productive in their work."

- Norm Fjeldheim, senior vice president and CIO, QUALCOMM

"We had some of our attorneys test the new HP Compaq 6140 notebook PC while traveling, and they were always able to get and maintain a good connection. Currently we work from a pool of cards that are checked out as needed for wireless cellular access. Having the cards built in is a very big advantage that will eliminate that whole card deployment process. HP is thinking right on the edge of technology with this new notebook and features complemented by Verizon Wireless."

- Brian Clayton, manager, Information Systems Group, Sebaly Shillito + Dyer

"The HP Compaq 6140 notebook PC is a great fit for traveling executives who always want to be connected. The minute you step off a plane, it starts syncing email. That provides great efficiencies for people on the go. Built-in wireless allows you to work without worrying about dial up, and the Verizon Wireless coverage is great whether it's in the airport, a taxi or hotel. We've been working with external cards, but it's so common to realize that card is back at home. With the new HP Compaq 6140 notebook, it's worry free, and busy execs have everything they need right with them."

- Charlie Orndorff, VP Infrastructure Services, Crossmark
