

HP Delivers Compact, Lightweight Battery Chargers for Select Mobile Printers

Quickly, conveniently charge batteries while on the go for ultimate portability

SAN FRANCISCO, Calif., May 9, 2006 – Today at *Connected: The HP Mobility Summit*, HP introduced the HP Battery Charger and the HP Battery and Charger Kit for the HP Deskjet 450 and Deskjet 460 Mobile Printers. Portable and lightweight, the new accessories allow mobile professionals to conveniently charge batteries while on the go for increased productivity.

Compact, lightweight design

Both the HP Battery Charger¹ and the HP Battery and Charger Kit include a charger and A/C adaptor with power cord. The Charger Kit adds an HP lithium-ion battery. Weighing only about three ounces², the battery charger folds up into a compact design that easily fits into a bag or purse. Combined, the charger, battery, A/C adaptor and power cord weigh a little more than a pound – about 21 ounces.³

Efficient and convenient

With the new accessories, users of HP Deskjet 450 and Deskjet 460 Mobile Printers can quickly charge batteries away from their printers in about two hours⁴, so that they have fully charged back-up batteries ready to replace low-power or dead batteries. HP's long-lasting lithium-ion battery stores enough power to print up to 450 pages per charge.⁵

Pricing and availability

The estimated U.S. street price for the HP Battery Charger is \$79⁶ and is \$139⁶ for the HP Battery and Charger Kit. Both accessories are expected to be available for purchase in May 2006. The HP Battery Charger will be sold in North America. The HP Battery and Charger Kit will be sold in North America and Europe.

###

¹ Battery not included, sold separately.

² Weight of the battery charger, without A/C adaptor, power cord and battery, is approximately 3.04 ounces.

³ Weight of the HP Battery and Charger Kit, with charger, A/C adaptor, standard Euro/U.S. power cord, and battery, is approximately 1.286 pounds. Weight of the Kit with a UK power cord (instead of a Euro/U.S. power cord) is approximately 1.402 pounds.

⁴ Charging time may vary based on the type of battery, the level of discharge, and other factors

⁵ Battery's printing capacity varies by printer.
