

Paul Perez

Vice President, Storage, Networks and Infrastructure, Industry Standard Servers

Hewlett-Packard Company

Paul Perez leads the Storage, Networks and Infrastructure organization of HP's Industry Standard Servers unit, which combines the server storage and infrastructure function with additional value-add options.

Previously, Perez led the High Performance Systems team in HP's Business Critical Servers unit. Since joining HP in 1984, he has held research and development leadership positions in server development, most recently leading the effort to launch both Windows® and HP-UX HP Integrity Superdome server versions.

Paul holds a bachelor of science and master's degree in electrical engineering from Cornell University.
