

Russ Daniels

Vice President and Chief Technology Officer, Software

Hewlett-Packard Company

Russ Daniels is vice president and chief technology officer for HP's Software business, where he sets and coordinates the technology strategy across HP's software portfolio of solutions for the Adaptive Enterprise – HP's vision of an organization in which business and IT are synchronized to capitalize on change.

Previously, he was general manager of HP's application development organization and research and development manager of the software and systems development lab.

Daniels has more than 25 years of industry experience specializing in Java, object-oriented programming, XML, enterprise management, and software development processes. Prior to joining HP, he spent 15 years at Apple Computer where he held a variety of developer-related positions and managed a website design and hosting business.

He holds a bachelor's degree in general studies, with concentration on small business management and computer science, from Ohio University.
