

Phil McKinney

Vice President and Chief Technology Officer, Personal Systems Group

General Manager, Gaming Business Unit

Hewlett-Packard Company

Philip McKinney is vice president and chief technology officer for the Personal Systems Group at HP, overseeing long-range technical strategy and research and development. He also is the general manager of the new gaming business unit within the Personal Systems Group, responsible for aligning the unit with the company's research and development organization by providing access to the latest technologies and innovation.

McKinney is recognized, through his numerous worldwide speaking engagements, seminars and workshops, as a leading authority on technology and innovation and its impact on business, industries, economies and society.

Previously, McKinney was vice president and chief technology officer of the Network and Server Provider Business at HP, responsible for the executive CTO relationship, long-range strategy and R&D for HP's largest industry vertical business segment.

Before joining HP, McKinney was senior vice president and founding chief information officer for Teligent, a global provider of fixed-wireless services. At Teligent, he led the strategy development, IT infrastructure build out and ongoing operations, managing a team of more than 1,000 technology professionals.

Prior to joining Teligent, McKinney was the senior executive responsible for the Communication Industry Consulting Practice at Computer Sciences Corp., where he directed consulting engagements worldwide. Earlier in his career at CSC, he oversaw the communication industry managed services division that provided mission-critical system outsourcing for more than 165 network and service providers worldwide.

McKinney currently serves on the board of directors for Signafor, Inc.
