

HP Services Unified Communications Solutions

Halifax International Airport Authority

"Halifax International Airport Authority depends on a stable and secure infrastructure in order to service airlines from across the globe. Our unified communications solution brought to us by HP and Cisco resulted in a seamless migration to an advanced network that integrates voice, video, data and wireless communications into a single airport-wide communications system, and enables us to manage risks and achieve better ROI. And now we are known in the industry for our quality service."

Michael J. Healy, P. Eng.

Vice President Infrastructure & Technology

HUBER+SUHNER

"We rely on our global IT infrastructure to support our centrally managed business processes, such as innovation, generating orders and order fulfilment. The Unified Communications solutions from Cisco and HP, being deployed across three continents, will help us to further streamline operations and improve our ability to adapt quickly to changing business needs. The strategic alliance, the global presence, the technological leadership and the compelling offering were the decisive factors to team up with Cisco and HP."

Daniel Woesch

Head of Global Information Systems

Lion Nathan

"HP provided the expertise in the Microsoft and Cisco platforms to seamlessly integrate the Cisco and Microsoft platforms together and provide a truly unified-communications experience."

Darryl Warren

Chief Information Officer

Parts for Trucks

"We went with Cisco because the solution was the best fit for us and met our requirements. What HP brought to the process was its expertise as a systems integrator and solutions provider. HP helped us to identify our requirements and worked with Cisco to get the pilot hardware in place – then they put the system through its paces. We wanted to move forward, and we did. We made the right choice."

Darryl Batchilder

IT Manager

St. Olavs Hospital Development Project

"We're investing in Information and Communications Technology (ICT) to be a leading university hospital with a focus on the patient. The digital communication system can be described as shared IP for everything - Television, Radio, Music, Telephony, Data and Images...everything is IP based."

Tore Indrerak

ICT Manager

The Weather Channel

"HP completed our Exchange Server migration in approximately four months, converting mailboxes and data from Lotus Notes to Exchange quickly and smoothly, while addressing our bigger issues with collaboration and expanded messaging capabilities. As we expand our unified communications solution, we will continue to explore opportunities to increase operational efficiencies and realize substantial cost savings using HP Network Services."

Brian Shield

Executive Vice President and CIO
