

HP Scitex Color Workflow Interactive Navigator

Overview

The HP Scitex Color Workflow Interactive Navigator is a comprehensive color management solution that maximizes the output quality of HP Scitex wide- to super-wide format industrial printers, while providing consistent high-quality color reproduction across HP Scitex printers, ink and media types, and environmental conditions. This is a critical advantage for printers producing integrated marketing campaigns.

Designed for ease of use, HP Scitex Color Workflow Interactive Navigator includes tools, information and equipment required to maintain high color quality and predictability without needing outside ICC profiling experts. This also means that the color management workflow can be easily adjusted to accommodate new substrates, seasonal environmental changes and the addition of further HP Scitex printers.

Highlights

The package helps HP Scitex printer users gain a competitive advantage through:

- Significantly improving printed results
- Achieving excellent color matching on multiple media types

It enables customers to increase productivity by:

- Reducing set-up time through the use of simple processing tools
- Reducing calibration time
- Standardizing the overall calibration process
- Offline print proofing

The package improves cost-effectiveness through:

- An efficient calibration process
- Helping to optimize ink consumption
- Allowing users to carry out ICC profiling in-house
- Fully utilizing the production environment

It gives users greater flexibility by facilitating:

- The use of multiple printers for backup and for large-scale or highly varied campaigns
- Convenient, in-house color matching for new media, printers and seasonal or environmental changes.
