

HP Web Jetadmin 10.0

Overview

HP Web Jetadmin 10.0 is a printing and imaging fleet management software tool for remotely installing, configuring and managing a wide variety of HP and non-HP network peripherals. Now in its 10th year, HP Web Jetadmin 10.0 boasts new features – such as enhanced security, a more intuitive user interface, additional customizable reporting capabilities, links to HP Instant Support and new supplies management capabilities for multiple devices – to help medium to large-size organizations improve performance and decrease IT time spent managing the printing and imaging environment.

Key features and benefits

- Behaves more like a Windows® application than ever with new right-click functionality and drag-and-drop capability to enable easier navigation, organization and use. Find support topics faster with new searchable help capabilities⁽¹⁾
- New interface provides assistance with common tasks with step-by-step instructions as well as details on status, configuration, alerts, groups, reports, printing supplies, firmware and troubleshooting on a single screen
- Reports and customizable templates provide better insight into print environments and help control costs. Tracking and reporting capabilities provide supply forecasting and reordering information, as well as information about which devices are used most heavily
- More convenient supplies management through the ability to create groups, organize views by urgency or part number and set levels of alerts to be notified about supplies that are low or have been replenished
- Enhanced security capabilities, IPSec and consolidated security settings, help protect data by creating a more secure print environment
- HP Color Access Control enables device access configuration, the ability to edit color access lists for multiple devices and the ability to report by user who is printing in color
- Remote printer management tool enables accessibility anywhere on the network via web browser through Smart Client Technology
- Active Directory Services allow user to easily control and manage a printer fleet with auto grouping of devices, drag-and-drop capability, single sign-on and a new task-based interface
- Easy integration with enterprise management packages to manage an entire IT environment through a single console
- Support for Windows Vista™ and other Vista-certified devices
