

HP SmartFriend for Digital Photography

Overview

HP SmartFriend for Digital Photography gives consumers with technology questions a place to turn and get the most out of their digital photography experience. Customers buy 45 or 75-minute service plans to get many of their digital photography "how to" questions answered on topics such as cropping photos or changing printer settings to enhance photos.

With HP SmartFriend, agents make virtual house calls by connecting to a customer's PC over the Internet and provide one-on-one advice and assistance on a variety of digital photography questions while customers watch on their computer screens.

HP SmartFriend for Digital Photography home-technology technicians can answer "how to" questions on PCs, cameras, photo printers, and digital photography software for both PCs and Macs.
