

HP StorageWorks All-in-One SB600c Storage Blade

The HP StorageWorks All-in-One SB600c Storage Blade, the newest member of HP's easy-to-use family of All-in-One Storage Systems (AiOs) for midsize businesses, allows rapidly growing businesses to quickly add capacity or migrate to new technology faster and more simply than ever before.

Similar to other members of the [AiO family](#), the SB600c combines network-attached storage (NAS), storage area network (SAN) and data protection functions under a single management umbrella to enable small IT staffs without specialized storage expertise to quickly respond to changing business conditions.

The AiO systems are specifically designed for easy storage management in Microsoft® environments through point-and-click tools for use with Microsoft Exchange and SQL Server. In fewer than 10 clicks, customers can launch shared storage for an Exchange mailstore.

Built using an HP storage blade and c-Class server that runs the AiO software, the SB600c installs directly into any HP BladeSystem c-Class enclosure. This accelerates the deployment of the business application and yields lower power and cooling costs compared to traditional external storage.

The SB600c improves storage utilization by reducing duplicate files within shared volumes and speeds up end-user search with full-text indexing of documents. Customers can store, share, manage and protect rapidly growing pools of application and file data. In addition, the SB600c offers a mechanism to create snapshots of data stores – making it ideal for data protection. Data can easily be backed up, restored and even replicated to another system for enhanced disaster recovery, thereby mitigating business risk.

The HP StorageWorks All-in-One SB600c Storage Blade is available now at a U.S. list price \$9,968. ⁽¹⁾

⁽¹⁾ Estimated U.S. price. Actual price may vary.
