

HP Indigo Ink Mixing System Software, Version 6.0

Overview

With HP Indigo Ink Mixing System (IMS) Software version 6.0, print service providers (PSPs) can offer digital production with a full range of true, PANTONE®-licensed spot colors. The HP Indigo IMS version 6.0 upgrades the HP IndiChrome off-press ink mixing solution for formulating spot-color inks, giving PSPs and the creative and print-buying community they serve the ability to specify from more than 3,000 PANTONE-named colors from the PANTONE Goe and PANTONE MATCHING SYSTEM® libraries.

HP is one of the first digital press manufacturers to support the PANTONE Goe library and HP Indigo is the only digital electrophotographic press technology that supports both ink mixing and on-press simulation of those colors. The full range of PANTONE-licensed color reproduction methods enables PSPs to match specific customers' needs and pursue greater profit opportunities. HP Indigo customers can choose between printing with true spot-color inks available with the HP Indigo IMS, or with HP Indigo's licensed on-press emulation of PANTONE colors through four-, six- and seven-color process printing.

The more than 3,000 colors available to HP Indigo users with the HP IMS version 6.0 helps PSPs accurately, consistently and affordably reproduce their clients' valuable brand colors. Designers looking to specify many of the new colors available through the expanded PANTONE Goe palette gain the reassurance that they have valid digital production options when they choose to work with HP Indigo customers.

The HP Indigo IMS Software version 6.0 also enables ink-mixing compatibility with the new HP Indigo 7000 Digital Press.

Key features and benefits

- Ability to mix more than 1,000 licensed PANTONE MATCHING SYSTEM spot colors
- Ability to mix more than 2,000 licensed PANTONE Goe spot colors
- Ability to mix licensed PANTONE colors for coated gloss, uncoated and matte media
- Compatible with the new HP Indigo 7000 Digital Press

Pricing and availability

The HP Indigo IMS Software version 6.0 is available now as a free upgrade to existing HP Indigo IMS users worldwide.
