

HP Access Control Printing Solutions

Overview

Increase security and manage printing fleets with HP Access Control Printing Solutions, which are designed to help mitigate security and compliance risks. These solutions help control and protect access to imaging and printing devices and documents and also facilitate tracking and monitoring of the usage of documents.

HP Access Control Secure Printing Solution

The HP Access Control Secure Printing Solution delivers authentication, authorization and auditing: authentication requires users to validate their identity prior to accessing the device functionality; authorization determines the functions the user can do; and auditing tracks what the user did when scanning, faxing, copying and printing.

This offering includes a breadth of authentication options ranging from windows log-in to card-based capabilities. These features help prevent fraudulent use, protect data privacy, increase convenience printing and enhance fleet management.

HP Access Control Secure Pull Printing Solution

The HP Access Control Secure Pull Printing Solution helps mitigate security and compliance risks and reduces paper waste by enabling users to retrieve their output when and where they want it within prescribed networks.

Greater security and compliance is achieved by allowing print jobs to be encrypted and stored until the authorized user is ready to retrieve them using:

- Smart or Proximity Badges
- PIN Authentication numbers
- Windows log-in credentials

HP Access Control Job Accounting Solution

The HP Access Control Job Accounting Solution provides the ability to track detailed print, scan, copy and email usage information by device, user, department or cost center. This solution effectively accounts for print jobs and aids in forecasting, internal billing and cost recovery so businesses can run more profitably.

Pricing and availability

Please contact an HP sales representative for pricing and service information. The English version is expected to be available for purchase worldwide on May 30 and an expanded set of languages is planned to be available by Aug. 30.
