

Jennifer Millier

Vice President Mission Critical Business Solutions, Business Critical Systems

Hewlett-Packard Company

Jennifer Millier is vice president of the Mission Critical Business Solutions Group within the Business Critical Systems business unit at HP. As the leader of HP UNIX, Windows, Linux, OpenVMS, Tru64, Alpha and MPE Research and Development organizations, Millier is responsible for the design and delivery of all HP operating environments with robust mission-critical virtualization, in-depth security and mainframe-class availability.

Previously, Millier was the Enterprise Storage and Servers operations manager, where her team was responsible for driving all aspects of the ESS Global Business Unit. As a result of her efforts, the business completed a significant transformation to profitability.

Millier's broad managerial experience includes stints in marketing, research and development, supply chain, and international business development. As a member of HP's PC business unit, she pioneered the company's first worldwide volume direct sales program, building the go-to-market plan. She also managed point of sales systems at major retailers and has extensive experience in all routes to market.

Millier joined HP's California Personal Computer Division in Sunnyvale, Calif., in 1983. She attended San Jose State University and holds a Bachelor of Science, Electrical Engineering degree.
