

## HP Project and Portfolio Management Center

Deliver consistent business outcomes

HP Project and Portfolio Management Center software, is a comprehensive project and portfolio management offering that gives you the information you need to make better business decisions, helps you lower the total cost of running your business, and reduces risk.

### Can you meet your management challenges?

Today's IT organizations struggle with gaining better visibility into what is going on, putting better controls in place, prioritizing investments, and implementing consistent quality practices—without breaking the budget or further burdening the staff.

Given these daily challenges, it is difficult for IT executives to see which operational and strategic activities they should be working on. This has to be evaluated against how much is left in their budget, resource capacity levels, and alignment with business needs.

### HP Project and Portfolio Management Center

HP Project and Portfolio Management Center software helps you overcome these challenges. It provides your IT executives with visibility into strategic and operational activities under evaluation or underway at any given moment. What is provided is the ability to step back to see which ones are truly aligned with business objectives.

HP Project and Portfolio Management Center:

- Enables agility into your organization to respond quickly to fast-changing business conditions and the ever-changing priorities of your customers, employees and partners.
- Delivers integrated, top-down PPM that can help you define and enforce “control points” throughout the process.
- Offers top-down planning capabilities that are supported with bottom-up detailed project plans

### HP Project and Portfolio Management Center components

**HP Portfolio Management** software enables you to govern your portfolio of IT projects, applications and opportunities in real time with effective collaborative processes. It gives you the information and process to make effective portfolio decisions—from proposal initiation, justification and review to project initiation, execution, deployment, and benefits realization. And with the optional Portfolio Optimization feature, HP Portfolio Management automatically determines the best mix of proposed projects, projects, and assets based on user-defined criteria.

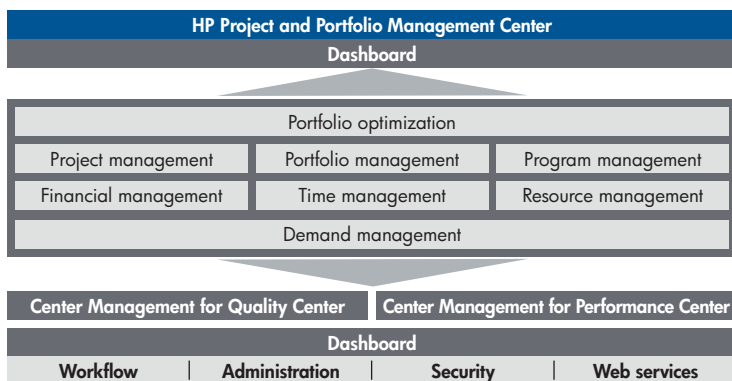

**HP Program Management** software enables you to collaboratively manage your programs from concept to completion. It automates processes for managing scope, risk, quality, issues, and schedules. With HP Program Management, you no longer need multiple point tools and paper manuals to manage program initiation, approval, scope changes, risk, issue resolution, resources or status.

**HP Project Management** software helps you meet the challenges of managing projects in large, geographically dispersed enterprise environments. It integrates project management and process controls to reduce the number of project/schedule overruns, thereby reducing project risks and costs.

**HP Financial Management** software provides real-time visibility into all financial attributes related to programs, projects and overall IT demand—without costly integrations to multiple data sources. For global organizations, multi-currency is supported within the application. HP Financial Management supports comprehensive earned value analysis and SOP 98-1 capitalization.

**HP Resource Management** software provides comprehensive resource analysis, which includes both strategic and operational activities at any stage in the work lifecycle. This holistic approach enables a complete understanding of where resources are currently

HP integrated approach to project and portfolio management

committed and allocated. In turn, your managers can quickly respond to changes with a clear understanding of the effects on resource capacity and work prioritization.

**HP Time Management** software helps you focus on value-added activities by streamlining time collection and improving accuracy across the wide range of work performed by IT. This provides the capabilities your IT organization needs to overcome the challenges of time collection and to focus on improving productivity and execution.

**HP Demand Management** software captures all requests on IT so you will know what the organization is asking for and have the information to focus your valuable IT resources on top business priorities. Stakeholders have a comprehensive picture of past, present and future demand so requests can be prioritized, assigned, viewed, and "sliced-and-diced" across multiple dimensions to identify trends.

**HP Project and Portfolio Management** Dashboard provides role-based, exception-oriented visibility into IT trends, status and deliverables to help you make and execute real-time decisions. It supports information sharing with other applications or corporate portals through enterprise industry standards JSR 168 and WSRP.

**HP Center Management** for Quality Center software helps customers manage HP Quality Center software as a shared Center of Excellence (CoE). The solution provides "out-of-the-box" quality management best practices for project and resource management, pre-packaged content and workflows to automate key

processes for quality management, and management of HP Quality Center administrative tasks.

**HP Center Management** for Performance Center helps customers manage HP Performance software as a shared/hybrid Center of Excellence (CoE). The solution provides "out-of-the-box" application performance management best practices for project, resource, time management, pre-packaged content, and workflows to improve quality by applying a consistent load testing process and drive productivity by providing one interface between the business and CoE.

**HP Project and Portfolio Management** Foundation is our unique platform that runs the application. It includes our advanced workflow engine and configuration capabilities. Additionally, Project and Portfolio Management Foundation provides enterprise-class data security features.

## Why HP?

HP is uniquely positioned to deliver your project and portfolio management solutions. We offer:

**Visibility into all demand**—HP Project and Portfolio Management Center provides real-time visibility into strategic and operational activities, including in-flight projects, proposals under review, and all non-project work. You can optimize your IT portfolio by rapidly identifying the projects that can deliver the highest ROI and assigning the right resources to support those projects.

**Lifecycle approach**—HP Project and Portfolio Management Center delivers a single platform for end-to-end lifecycle management of proposals, projects, and applications. This provides IT with a consistent framework for evaluating, managing, executing, and retiring projects, as well as a way to leverage best practices from active or retired projects.

**Rapid value**—HP helps you achieve a rapid return on your HP Project and Portfolio Management Center investment through packaged solution offerings delivered on-site or through a software as a service (SaaS) deployment. Both approaches offer a service delivery model that can help you identify the better starting point to achieve a rapid successful adoption that delivers measurable results.
