HP Page Plan

Overview

HP offers HP Page Plan for customers who are looking to gain greater control of their imaging and printing environments but are not yet ready for a full-scale managed print services engagement. HP Page Plan is designed for enterprise departments looking to better manage their environments by taking advantage of HP's new plug-and-play solutions, including HP Access Secure Pull Printing with PIN Authentication and HP Access Control Job Accounting. These pre-bundled solutions are self-managed in the environment by the customer.

HP Page Plan combines the plug-and-play solutions with a wide range of hardware, genuine HP supplies and expert technical support into a single print services contract.

HP makes it easier for enterprises to engage

With this offering, enterprise businesses can make transactional purchases under a scalable, flexible plan that helps reduce printing costs, improve office productivity and reduce page and supplies usage. Companies interested in optimizing their imaging and printing environments of one to 100 devices can engage in a simplified and straightforward one- to five-year contract with page usage billing.

Enterprises interested in a managed print services offering can begin to experience an optimized imaging and printing environment with HP Page Plan. After the customer sees the results of Page Plan, HP invites them to experience the change and costs savings associated with an HP Managed Print Services engagement.

Improve security and document workflow with HP

HP will provide Page Plan customers with easy-to-install solutions to improve security measures associated with their networked devices and to help streamline document workflow in a smaller setting. With the HP Access Secure Pull Printing with PIN Authentication, employees can validate their identities and authorize users prior to their accessing devices. The offering includes functionality designed to prevent fraudulent use, protect data privacy, increase convenience printing and enhance fleet management.

With HP Access Control Job Accounting, enterprises can develop detailed reports by tracking accurate print, scan, copy and email usage information by device, user, department or cost center. This solution effectively accounts for print jobs and aids in forecasting, internal billing and cost recovery so businesses can run more profitably.

Maximize the utilization of existing investments as well as future devices

HP Page Plan customers have the option of selecting from a number of HP's reliable single and multifunction printers to support all work environments, from small teams to large departments.
