

HP ProCurve ONE Partners

Avaya

“Through our strategic alliance with HP and the ProCurve Open Network Ecosystem, we’ll deliver fully integrated IP networking and unified communications solutions and services with significant benefits for businesses and organizations.”

– Alan Baratz, senior vice president; president, Global Communications Solutions

F5

“F5 is very pleased to be chosen as a strategic launch partner for the ProCurve ONE program and align much more closely with HP. We bring our deep expertise of the enterprise data center and market-leading application delivery networking solutions that give customers the flexibility to deploy solutions that scale and adapt on demand.”

– Dan Matte, senior vice president, Marketing and Business Development

McAfee

“We’re excited about becoming a member of the HP ProCurve ONE alliance program and the opportunity to collaborate with HP ProCurve in building data center solutions that combine McAfee’s industry-leading network security products with HP ProCurve’s new family of data center switching products.”

– Dan Ryan, executive vice president and general manager, Network Security Business Unit

Microsoft Corporation

“HP ProCurve ONE will help customers resolve interoperability concerns by delivering an open standards-based solution that is effective and efficient. The combination of the HP ProCurve ONE initiative and Microsoft Network Access Protection (NAP) will provide customers with enhanced security and policy-based access that helps reduce downtime and boosts return on investment.”

– Tim Sinclair, general manager

Riverbed

"The inclusion of Riverbed WAN optimization in the HP ProCurve Open Network Ecosystem gives customers moving to next-generation data center models a best-of-breed solution that reduces costs and complexity, while improving application performance and employee productivity."

– Eric Wolford, senior vice president, Marketing and Business Development

AirTight Networks

"As wireless becomes a pervasive technology for connecting users to enterprise networks, wireless security has emerged as a critical requirement for IT departments globally. We are pleased to work with an innovator like HP ProCurve in offering AirTight's industry-leading wireless intrusion prevention technology to enterprises worldwide. By creating an open architecture model for its HP ProCurve ONE program, HP ProCurve has demonstrated a commitment to provide its networking customers with complete security and management capabilities from a diverse ecosystem."

– David King, chairman and chief executive officer

Aastra

"Our two companies have a common focus on open standards. HP ProCurve was at the forefront in driving open-standards-based solutions and Aastra is already one of the industry leaders in Europe for enterprise communications. With our combined strengths, we are committed to offer best-in-class solutions that help customers enjoy higher return of investment and an extremely competitive cost of ownership."

– Pierre-Alexandre Fuhrmann, vice president, Global Technology and Development

Ekahau, Inc.

"Knowing where assets are at all times and being able to optimize their use is a prime directive for today's global companies, especially in a down economy. Ekahau can help companies achieve green initiatives by doing more with less."

– Antti Korhonen, president and chief executive officer

VBrick Systems

"The VBrick ViP further enhances VBrick's focus on bringing enterprises together with fast, personalized collaboration on a group, department or worldwide basis. Video streaming over the Internet speeds the distribution of ideas and execution, which are critical in today's business atmosphere."

– Vince Graziani, chief executive officer

.vantronix

"I'm excited about the HP ProCurve ONE alliance. Our Firewall ZL1 product utilizes the benefits of the HP ProCurve ONE platform, which provides customers with the choice of applications and services from leading industry partners."

– Reyk Flöter, chief technology officer and co-founder

InMon Corp.

"InMon is pleased to announce the availability of Traffic Sentinel as an HP ProCurve ONE application. Traffic Sentinel on an HP ProCurve ONE application provides network managers and IT staff with a unique solution. In addition to taking maximum advantage of industry-standard sFlow built into HP ProCurve switches and routers, Traffic Sentinel itself is now fully integrated into the network. This solution gives full visibility into the network traffic across the enterprise and is easy to use, manage and deploy."

– Peter Phaal, president
