

HP Universal Print Driver 5.0

Overview

The award-winning HP Universal Print Driver (UPD) continues to evolve: new HP EasyColor advanced technology improves print performance and print quality. HP UPD is the core driver technology for HP LaserJets and Edgeline. Both a basic driver and a complete driver management solution, organizations can deploy it in a variety of models based on specific requirements.

HP UPD helps organizations using HP LaserJet printers and Edgeline to simplify the print architecture. A single, feature-rich driver replaces many individual drivers, making it easy to connect to printing devices without downloading separate, product-specific drivers. Because HP UPD communicates directly with a device, it provides a unique, but familiar, user experience – customized to reflect the attributes of each printer.

Key features and benefits

- HP EasyColor optimizes color printing and improves print performance for image intensive documents, such as Microsoft® PowerPoint documents
- HP EasyColor defaults are set to simplify the customer experience and automatically select optimal color treatment
- HP EasyColor can decide preferred rendering based on document content, identifying photos from non-photos
- Duplex shortcut option and color management policies can be implemented to decrease paper and ink/toner usage
- Provides new functionality for customization of shortcuts to enable corporate standards and initiatives
- Now available for use with non-HP devices
- Localized for 35 languages
- Improved configuration capabilities with Microsoft Active Directory and Citrix

Availability

HP Universal Print Driver 5.0 is expected to be available in drivers after June 2009 or as a no charge download from www.hp.com/go/UPD.
