

## HP Web Jetadmin Enterprise Edition

### Overview

For medium- to large-size businesses that require a comprehensive imaging and printing management solution, HP Web Jetadmin Enterprise Edition (EE) delivers a unique enterprise-level solution with customizable modules – available individually or as a suite.

Leveraging the 12-year legacy of HP Web Jetadmin platform, the EE modules continue to raise the industry standard in fleet management by offering additional value add. This includes business intelligence reporting for device management; easy management of more devices for IT operations; application integration for smooth incorporation of HP Web Jetadmin with other applications using OXP-m web services, which empowers customers to effectively and affordably manage enterprise fleets; and advanced non-HP device support.

HP Web Jetadmin EE is compatible with HP software and hardware, HP partner and non-partner solutions, and customer-specific applications, which enhances IT capabilities and user productivity while reducing costs.

### Key features and benefits

- Starting with a comprehensive, enterprise-level solution, users can optimize their package with HP Web Jetadmin EE's customizable modules – available as individuals or as a suite – to meet the various imaging and printing fleet management demands:
  - Leverage the Business Intelligence Module to obtain key device information in multiple formats for easy integration in internal and external reporting systems or for exporting to Microsoft® Excel as a .csv file.
  - Choose the IT Operations Module for easy management of many devices to meet enterprise system requirements, including scalable performance and management of a company's devices for improved IT operations.
  - Easily deploy imaging and printing devices with the Application Integration Module and its powerful fleet management and configuration web services, the HP Open Extensibility Platform, which provides programmatic access to HP's device lists, device status information and fleet notifications through a web-services interface.
  - Manage HP and non-HP enterprise print and multifunction devices on the network with the comprehensive Advanced Non-HP Device Support Module.
- Improved support, maintenance and services provide customers with a complete solution to save time and money when managing the total printing and imaging environment.
- Easy integration with enterprise management packages to manage an entire IT

environment through a single console.

- Support for various Microsoft Windows® versions including Microsoft Windows Client and Server operating systems, Windows Vista® and more.

### **Pricing and availability**

HP Web Jetadmin EE and its modules will be available in May 2009 worldwide. Please contact an HP sales representative for pricing and other information.
