

ULTIMATE THIN COMPUTING SIMPLICITY AND VALUE

HP t5325 Essential Series Thin Client

The low cost,
high value
access
appliance

The HP t5325 Essential Series Thin Client is the ultimate in HP thin computing simplicity and value — the most affordable, power-efficient HP thin client delivering reliable business-class client virtualization with a breakthrough configuration experience and simple plug-n-play deployment.

New value equation

The HP t5325 can maximize IT budgets with reduced IT management and power costs. Featuring ICA and RDP connectivity with basic multimedia & USB redirection, IceWeasel, Java and PDF support, the t5325 delivers a business-class desktop experience. Combined with various kiosk style user experience options, the t5325 can be purposed as an optimized client virtualization appliance.

Designed for energy efficiency, the small, quiet HP t5325 maximizes space, including flexible VESA mount options.

Setup in seconds

The ThinPro Easy Config setup wizard takes the guesswork out of thin client setup by streamlining configuration and management applications into a short series of easy-to-follow and complete screens that help administrators quickly choose the

right configurations for their environment.

Administration is simplified further with the HP ThinPro single console interface providing dashboard visibility to all administrative touch points.

Click and deploy Simplicity

HP ThinState allows administrators to capture a configuration profile or complete image from any t5325 and save it to a USB key or central repository for image deployment or restoration.

Save time with the HP ezUpdate utility which automatically deploys new connections, properties, additions and image updates to thousands of like desktops, while HP Device Manager provides single console visibility and management for all HP thin clients.

Let the t5325 help you quickly setup and deploy a powerful computing experience at an affordable price.
