

## HP SmartStream Production Analyzer

---

### Overview

HP SmartStream Production Analyzer is an advanced management information tool for multipress and/or multiplant operations. It monitors, benchmarks and reports key metrics, providing customers with a deeper understanding of their HP Indigo print operations so they can improve efficiency.

Designed for customers that use more than one HP Indigo press, HP SmartStream Production Analyzer helps larger, multisite production operations determine when and why specific plants, shifts, presses or operators are not achieving maximum productivity.

### Features and benefits

- Real-time print production monitoring
  - Immediate identification and quick response to production events
- Historical reports of production characteristics (e.g., production performance, up time, printing errors, etc.)
  - Better production planning based on historical inconsistencies and unexpected production behaviors from previous work
- Comparison of production characteristics against HP Indigo industry benchmarks and customer targets
  - Allows customers to recognize productivity gaps
- Ability to monitor and compare production of multiple sites
- Easy-to-use, web-based user interface
- Flexible reports (activity and comparison of data by press, press type, shift, operator, plant, etc.)

### The HP SmartStream portfolio

HP SmartStream Production Analyzer is part of the HP SmartStream portfolio of digital workflow components that help customers efficiently meet a broad range of market segments and application needs. The HP SmartStream portfolio provides comprehensive workflow management from job creation to fulfillment. Customers that combine HP SmartStream and partner components receive greater flexibility, with specific solutions to address key market segments that are customizable and
