

HP Indigo Print Care version 1.5

Overview

HP Indigo customers can now gain remarkable uptime with HP Indigo Print Care. Using advanced diagnostics and troubleshooting tools, status summaries, and new remote communication tools, HP Indigo Print Care enables exceptional press uptime and high productivity.

HP Indigo Print Care alerts users to press events, taking them to guided troubleshooting with automated diagnostics and providing links to testing and calibration routines. Print Quality Assist tools give customers a step-by-step visual wizard to address print quality issues.

HP Indigo Print Care also has a desktop sharing tool that enables the HP service center to gain direct access to the print device's onboard computer for real-time support. A web camera provided with HP Indigo Print Care allows the customer to share video and still images with HP remote service engineers, who can then provide precise, real-time guidance. Proactive diagnostic tools automatically identify common problems and alert customers, sometimes even before the problems manifest themselves.

Features and Benefits

- Improved productivity
- Maximum uptime
- Press troubleshooting assist: Self-guided troubleshooting instructions for quickly solving press issues using automated diagnostics
- Print Quality Assist: Print quality symptom-oriented troubleshooting tool
- Press @ Glance: Press event history displayed in easy-to-read graphical views
- Knowledge Base: Documentation and best practices database
- Automatic Tests: Automatic electronic and software tests at board and component levels
- Element Tests: New, streamlined diagnosis of elements for advanced users
- Binary Inking Device (BID) Validation: New, easy diagnosis of suspected BID issues before replacing BID unit
- Call Me @ HP: Online call initiation with automatic forwarding of related press
