

HP Simplifies Network Connectivity and Communication

Introduces “Just Right IT” portfolio for SMBs

Overview

Small and midsize businesses (SMBs) require solutions that simplify their network infrastructures while providing the management, security and support necessary to protect and grow their businesses.

Included in the HP “Just Right IT” portfolio are the new [HP V-M200 802.11n Wi-Fi Access Point](#) for mobile networking and the [HP VCX9.5 IP Communications systems](#) with the [HP 350x Series IP Phones](#).

Mobile networking made simpler and faster at a lower cost of ownership

The HP V-M200 802.11n Wi-Fi Access Point enhances mobile networks for SMBs by providing a simpler and faster network to access business-critical applications. The V-M200 enables clients to:

- Improve performance options by concurrently operating two different wireless frequency ranges, combined with a high signaling rate that allows up to 64 mobile users simultaneous access to interactive or bandwidth-demanding applications.
- Easily deploy and access the wireless network through an intuitive web user interface with support for centralized user authentication.
- Reduce total cost of ownership with an [HP Lifetime Warranty](#), which helps protect investments and keep networks up and running.
- Ensure protection of important data with [Wi-Fi certified 802.11n compatibility](#), providing the highest levels of encryption available today.

Converging a network infrastructure with IP telephony solutions

Separate voice and data networks are difficult to manage and operate, requiring staff with specialized skills. Supported by the new generation of VCX IP Communications systems, the HP 350x Series IP Phones simplify both deployment and management, while lowering costs of IP telephony through a single network infrastructure. The new solution offers leading telephony features including wideband audio support for high sound quality and available backlit and full color

displays.

The HP 350x Series IP Phones unify communications and:

- Simplify VoIP deployment through an open network and switch design compatible with any HP or third-party server platform.
- Increase productivity by providing centralized administration and secure remote access to an intuitive web management interface that simplifies deployment and maintenance of VoIP technology.
- Enhance collaboration and communication between users with high-definition video-conferencing, file transfer, instant messaging and Microsoft® Outlook integration.
- Deliver high reliability to maintain IP telephony communication in branch offices with redundancy to a central server across the WAN and failover support.
- Simplify cabling with Power over Ethernet (PoE) and power save modes that reduce energy consumption by up to 50 percent relative to peak usage.

Pricing and availability

The new HP V-M200 802.11n Wi-Fi access point for mobile networking is shipping worldwide. Pricing starts at \$219, based on configuration.⁽¹⁾

The HP 350x Series IP Phones for unified communications is available in the United States, Canada, Latin America and Asia Pacific and Japan regions. Pricing starts at \$119, based on configuration.⁽¹⁾
