

Larry L. Acklin

Product Marketing Manager, Applications Services
HP Enterprise Services
Hewlett-Packard Company

Larry Acklin is a member of the Product Marketing organization at HP, where he is responsible for the Application Modernization Services offering for HP Enterprise Services globally.

Acklin continually drives innovation for HP's clients by helping them drive business growth and innovation through their IT and applications environments. Acklin has provided consulting on a broad range of IT management, business process, applications development and applications management for clients spanning industries and geographies.

Acklin specializes in creating new offerings and organizations around emerging technologies, including object-oriented development, web development, systems integration, mobile applications, enterprise architecture and transformational consulting.

Prior to his work on new offerings and organizations, Acklin programmed enterprise systems, including mission-critical custom applications for some of HP's major clients. Acklin got his start in building embedded systems for automobiles before becoming an application architect.

Acklin has been a technical leader, offering leader, marketing leader and mentor at HP. He received an HP Most Valuable Performer award in 2012.

Acklin has more than 26 years of experience in the application business covering every aspect from consulting, management, development and leadership. He earned his degree in electrical engineering, specializing in computer software.
