

Software, Programs and Services for New HP 3PAR Storage Systems Accelerate Return on Storage Investments

Overview

The new [HP P10000 3PAR Storage System](#) comes two models, the V400 and V800 (HP 3PAR V-Class). The HP 3PAR V-Class is a powerful, mission-critical storage system that simultaneously supports unpredictable and multitenant workloads on a single high-performance array. These new solutions are part of HP's Converged Storage portfolio which provides the storage foundation for HP VirtualSystem and HP CloudSystem offerings.

To empower clients to accelerate deployment and optimize the agility, efficiency and performance benefits of the new HP 3PAR Storage Systems, HP is offering the following software, programs and services:

- Guaranteed 50 percent or more capacity savings⁽¹⁾ with the [HP Get Thin Guarantee Program](#),⁽²⁾ which enables clients to reduce storage capacity requirements when they replace legacy equipment with [HP 3PAR Utility Storage](#).
- Integration of the P10000 3PAR with [HP-UX Serviceguard](#) Metrocluster and Continentalclusters to ensure the availability of mission-critical applications after a site disaster. Service guard solutions integrate with 3PAR Remote Copy software for synchronous data replication and reduce downtime with automated application failover.
- [HP Storage Essentials 9.5](#) provides quicker time to value by eliminating the need to deploy agents on every host to manage storage and it integrates with HP software products to deliver data center automation. It provides a dashboard view of storage capacity utilization in physical and virtual environments as well as key performance indicators that enable organizations to identify trends and reclaim unused storage to reduce costs and respond faster to enterprise needs.
- Storage Efficiency Assessment service from [HP Technology Services](#)
