HP Printer Control Mobile App

Overview

HP Printer Control allows users to access and control their HP printer from anywhere, through a robust and simple mobile experience. HP Printer Control makes printer management easier and more convenient for those who are on the move or not always situated next to their printer.

A printer can become a two-way communications device with digital scan services – including scan to Facebook, scan to Google Docs and scan to email. Printer management features include automatic printer discovery and setup, printer status notification, remote ink/toner status and troubleshooting cartridge identification. Users can print from virtually anywhere to HP ePrint enabled printers.[1]

Key features and benefits

— Print, copy and scan interactively from a mobile device.

— Easily scan documents to Facebook, Google Docs and email directly from a mobile device.

— Use a mobile device as a scanner.

— Printer management features allow for automatic printer discovery and setup, printer status notification, remote ink/toner status, troubleshooting cartridge identification and more.

— Print photos, PDFs and Microsoft® Office documents from anywhere to HP ePrint-enabled printers. [1]

Availability

— Available for Apple iPhone, iPad and iPod touch running iOS version 4.2 and later.

— Supported on most ePrint-enabled Photosmart, Officejet and LaserJet

printers 2011 and later.

(1) Requires an internet connection to the printer. Feature works with any connected Internet- and email-capable device. Print times may vary. Some HP LaserJets may require a firmware upgrade. A list of supported documents, and image types is available at www.hp.com/go/eprintcenter. And for additional solutions see www.hp.com/go/mobile-printing-solutions.
