PREVENT PAPER STOCK THEFT
PROTECT AGAINST DOCUMENT FRAUD

HP and TROY Security Printing Solutions

Most businesses locate their workgroup printer in an open office environment, creating a security risk to high-value paper stock. Organizations that fail to confront and minimize the risk of counterfeiting and theft often find out how painful the losses can be to the bottom line.

What if you could...

Replace your noisy, single-process dedicated dot matrix printers with compatible, high-quality HP LaserJet printers and...

Prevent the theft of costly security forms and check paper stock?

Print checks, prescriptions, transcripts and other high-value documents securely on pre-printed media whenever you need them, at locations of your choice?

Deploy a solution that meets government, regulatory and internal compliance mandates for fraud prevention, privacy and auditing—yet addresses your organization's unique budget and operational requirements?

Integrate security capabilities into your current systems and workflows quickly and easily?

HP and TROY solutions at a glance

Security Printing Solutions from HP and TROY deliver the ultimate level of security for localized, distributed and production workgroup applications. Using an HP and TROY Security Printer or MFP with secure locking trays, you can capture the full value of secure, distributed, on-demand printing of high-value documents, while lowering costs and maintaining tighter security and control.

Government organizations, educational institutions, healthcare and other enterprise organizations throughout the world face the ongoing challenge of theft of high-valued pre-printed documents right from the printer. State and local government entities, along with healthcare organizations, are concerned about providing chain of custody for pre-printed vital

statistics forms and pre-printed prescriptions. For many customers, these high-value pre-printed forms sit in printer paper trays unattended, unprotected and are susceptible to theft.

Education institutions provide printers in public spaces across their environment, and protecting plain printer paper from unauthorized "borrowing" has become a significant cost-control challenge.

Security Printing Solutions from HP and TROY help provide security needed to guard against media theft and help control costs.

Design features

- Embedded paper tray locks ensure controlled, authorized access to valuable paper stock.
- Rugged paper tray shielding prevents paper removal from the back of your printer.

1. Embedded key lock secures paper tray.

2. Preventing media theft from the back of the printer.

3. Secure shielding prevents media theft from the top of paper tray.

HP three-part approach

HP works with you to assess, deploy, and manage an imaging and printing environment tailored to meet your business needs, while reducing costs, conserving resources, and simplifying document-intensive processes with our three-part approach:

Optimize infrastructure

HP can help you achieve a balance between your total cost of printing and your needs for user convenience and productivity.

Manage environment

Working together, HP can help you maintain your optimized infrastructure while improving business efficiency and tightening security.

Improve workflow

By streamlining your document-intensive processes, HP can help you deliver a more efficient environment for capturing, managing, and sharing information.
