

June Manley

Director, Information Optimization
Enterprise Marketing
Hewlett-Packard Company

June Manley is worldwide director of Information Optimization within Enterprise Marketing at HP. HP Information Optimization solutions help organizations harness the power of 100 percent of their information to drive better enterprise decisions from insight, intuition and ideas. Manley drives the positioning and strategy for Information Optimization across HP.

Manley brings a wealth of experience and a proven track record in product marketing, including campaign go-to-market strategy, sales, business development and strategic alliances. With a history spanning HP, CommVault, NetApp, ZANTAZ, Fujitsu and Quantum, Manley has unique experience spanning hardware, software and services from a variety of go-to-market perspectives.

At NetApp, she led the marketing and business development teams that launched the Nearline ATA storage and D2D backup markets. Subsequently, she advanced ZANTAZ's off-site archival offering. Most recently, she drove CommVault's Simpana software platform product launches, highlighted by the largest campaign in company history.

Manley holds a BA degree in business administration and management from St. Jude's Business College in India.
