PALO ALTO, Calif., Sept. 10, 2012 — HP today announced [HP ArcSight Enterprise Security Manager](#) (ESM) 6.0c, the most powerful, scalable security monitoring and compliance solution on the market, helping clients identify and remediate cyberthreats faster than ever before.<sup>(1)</sup>

Major IT trends such as cloud computing and mobility have resulted in a loss of control and visibility into network activity, increasing potential security risks. This lack of visibility can impede an organization's ability to protect against cyberthreats, which can lead to the loss of sensitive data, service disruption and damage to an organization's reputation. However, traditional Security Information and Event Management (SIEM) systems lack the ability to identify true security threats among the vast quantity of data generated.

HP ArcSight ESM 6.0c is the first software solution to include the [HP Correlation Optimized Retention and Retrieval Engine](#) (CORR-Engine), which applies sophisticated intelligence to more accurately and quickly identify security threats across the IT infrastructure. This intelligence enables enterprises to filter anomalies, prioritize critical issues and reduce potential damage from cyberattacks.

*"Organizations need powerful data analytics to pinpoint critical threats amongst the massive amounts of security information they are generating," said Michael Callahan, vice president, worldwide product and solution marketing, Enterprise Security Products, HP. "HP ArcSight ESM 6.0c uses advanced algorithms to correlate this data, alerting clients to threats in real time while providing the scalability needed to handle the most demanding levels of network activity."*

With the CORR-Engine, HP ArcSight ESM 6.0c processes up to 500 percent more activity per second compared to previous versions of ESM, providing faster analysis and reduced security monitoring costs. This enables clients to quickly identify and reduce potential security risks while efficiently storing log data, using up to 20 times less storage space.<sup>(2)</sup>

A key component of the [HP Security Intelligence and Risk Management](#) (SIRM) platform, HP ArcSight ESM 6.0c collects and analyzes data across all systems and applications to identify real threats based on behavioral context. It has the unique ability to identify and

understand who is on the network, what data they are seeing, how they are using the data, and the potential threat to the enterprise. Once threats are identified, HP ArcSight ESM 6.0c uses a built-in workflow engine to manage incidents and minimize damage from data breaches and malicious attacks.

### **Pricing and availability**

HP ArcSight ESM 6.0c will be available in October under a new simplified pricing model, which allows clients to select the solution that best fits their needs with the flexibility to expand the deployment to support future growth.

### **About HP**

HP creates new possibilities for technology to have a meaningful impact on people, businesses, governments and society. The world's largest technology company, HP brings together a portfolio that spans printing, personal computing, software, services and IT infrastructure to solve customer problems. More information about HP (NYSE: HPQ) is available at <http://www.hp.com>.

- (1) According to research published by Gartner on May 21, 2012, titled "Critical Capabilities for Security Information and Event Management," HP ArcSight ESM was ranked as the top SIEM product across the vendors evaluated. The Gartner report is based on an earlier version of the product. HP ArcSight ESM 6.0c performed faster than the earlier version of the product in all internal performance benchmarking tests.
- (2) During internal performance testing, ESM on CORR engine could collect and correlate data 500 percent faster than the earlier versions of ESM on Oracle RDBMS using 20 times less storage.

This news advisory contains forward-looking statements that involve risks, uncertainties and assumptions. If such risks or uncertainties materialize or such assumptions prove incorrect, the results of HP and its consolidated subsidiaries could differ materially from those expressed or implied by such forward-looking statements and assumptions. All statements other than statements of historical fact are statements that could be deemed forward-looking statements, including but not limited to statements of the plans, strategies and objectives of management for future operations; any statements concerning expected development, performance, market share or competitive performance relating to products and services; any statements regarding anticipated operational and financial results; any statements of expectation or belief; and any statements of assumptions underlying any of the foregoing. Risks, uncertainties and assumptions include macroeconomic and geopolitical trends and events; the competitive pressures faced by HP's businesses; the development and transition of new products and services (and the enhancement of existing products and services) to meet customer needs and respond to emerging technological trends; the execution and performance of contracts by HP and its customers, suppliers and partners; the protection of HP's intellectual property assets, including intellectual property licensed from third parties; integration and other risks associated with business combination and investment transactions; the hiring and retention of key employees; assumptions related to pension and other post-retirement costs and retirement programs; the execution, timing and results of restructuring plans, including estimates and assumptions related to the cost and the anticipated benefits of implementing those plans; expectations and assumptions relating to the execution and timing of cost reduction programs and restructuring and integration plans; the resolution of pending investigations, claims and disputes; and other risks that are described in HP's Quarterly Report on Form 10-Q for the fiscal quarter ended April 30, 2012 and HP's other filings with the Securities and Exchange Commission, including HP's Annual Report on Form 10-K for the fiscal year ended October 31, 2011. HP assumes no obligation and does not intend to update these forward-looking statements.
