

Fact Sheet

HP Flow CM Professional

HP Flow CM Professional is a cloud-based document management solution that gives growing organizations a complete set of proven tools for document capture, storage, search, retrieval, sharing and more, so businesses can manage information more efficiently.

With HP Flow CM Professional, businesses can:

- Streamline workflows and make collaboration more convenient and productive with sharing and notification tools.
- Gain greater access to documents when they are needed by storing them in the cloud.
- Safeguard sensitive business information with a provider that businesses can trust.

With HP Flow CM Professional, growing organizations will be able to:

- Leverage the cloud to centralize both paper and digital content, improving collaboration by sharing information and publishing documents with employees, customers, vendors and other partners.
- Rely on the same security that supports leading banks, legal firms and stock exchanges – including enterprise-level encryption, authentication and security management – allowing them to confidently send, store and retrieve valuable information and meet certain regulatory requirements.
- Enhance employee productivity by providing access to files and documents while at home, in the office or on the go via a web browser or by using the solution's mobile device app.
- Access content from a convenient online destination featuring a user-friendly interface and powerful search features, all from desktops, laptops, mobile devices or HP LaserJet flow multifunction printer (MFP) control panels.
- Get first-rate cloud storage and the scalability without costly commitments, allowing them to manage their content without needing to purchase additional software, hardware or IT infrastructure.
- Share files and folders across devices using the HP Flow Sync tool, which is integrated with HP Flow CM Professional to share new or updated content almost immediately.
- HP Flow CM Professional supports a multitude of multi-vendor MFPs and scanners, but provides a better together solution with HP LaserJet Flow MFPs which can be configured to fully integrate with HP Flow CM Professional. Businesses can access the solution from the front panel of the HP LaserJet Flow MFP with the touch of a button.

Using the Scan to HP Flow CM Professional button, SMBs can capture single or multiple documents even easier and faster.

Pricing and availability

HP Flow CM Professional will be available in a limited capacity in November, with general availability in January. Pricing information is available from your local representatives.
