

# HP SmartStream Production Analyzer for Scitex

---

Become more efficient through deeper understanding of your production gaps and trends.

---

Achieve full, automated monitoring of your print production and gain a greater understanding of your production gaps and trends.

Acquire deeper insight into your single-unit or multiple-unit environment in order to help decrease waste, improve margins, increase workforce efficiency, reduce printer and personnel downtime, and to obtain a better sense of your costs<sup>1)</sup>. Gain real-time and historical visibility into your printer activities to determine if you use your presses to their fullest potential. Generate greater production efficiencies and cost-effectiveness.

---

<sup>1)</sup> This is an SaaS application and requires a purchased license. It does not require installation on site. HP Print Care is a prerequisite to using the HP SmartStream Production Analyzer.

## Automate helpful data analysis

Automate helpful data analysis and acquire a set of real-time and historical production information. You can eliminate the less-reliable method of manual pen-and-paper tracking and documenting of your production records.

- Choose how to view and analyze your data from a broad range of filters and graphical analysis charts that are easy to arrange, view, and compare.

## Understand your current and historical production gaps and trends

Acquire, analyze, and compare current and historical reports on presses, operators, and shifts automatically to gain a comprehensive understanding of your operations. Use the knowledge gained from parsing comprehensive data to improve your production efficiencies and increase your competitive advantage.

- Identify your operation's strengths and weaknesses, enabling better decisions on time-sensitive jobs.
- Identify performance degradation promptly and respond accordingly to get presses back on track.
- Help decrease waste and improve margins, increase workforce efficiency, and reduce downtime.
- Accumulate and analyze production data, and compare it with HP industry benchmarks to enable better production planning.

---

### Available on the following presses and printers<sup>1)</sup>:

---

HP Scitex Tj8600/Tj8550/Tj8350 Industrial Presses

---

HP Scitex FB7600/FB7500<sup>2)</sup> Industrial Presses

---

HP Scitex XP2300/XP5300/XP5500/XP2500 Industrial Printers

---

<sup>1)</sup> HP Print Care is a prerequisite to using the HP SmartStream Production Analyzer.

<sup>2)</sup> Requires installation of the HP Scitex FB7500 Industrial Press Upgrade Kit

## Monitor your production floor from a dashboard in real time

Achieve remote, real-time visibility into the activities of the presses on your production floor with a Web-based dashboard view. See what each machine is doing, who is operating it, how it is being utilized, and whether it is meeting targets and goals.

- View activity and utilization rates on the production floor as your presses are running, even when you're out of the office.

## Seize the power of the cloud

Gain your insights on your production operations anytime, virtually anywhere. No installation is required with this Web-based tool, which is easy to use and compatible with smartphones and tablets<sup>1)</sup>. Monitor events and statuses from virtually anywhere and with various mobile devices. Set up and receive reports by email or SMS from multiple production sites.
