

## Fact Sheet

# HP Flow CM Professional

---

HP Flow CM Professional<sup>(1)</sup> is a cloud-based document management solution that can save small to mid-sized businesses time and money by helping them securely integrate their digital and paper workflows, smartly search for documents and access content virtually anytime, anywhere.

Office processes are streamlined with HP Flow CM Professional, which allows companies to easily capture, store, manage and organize their documents in the cloud. Customers can capture files using practically any scanning device, smartphone or multifunction printer, including all touchscreen-enabled HP LaserJet Pro and HP Officejet Pro devices. And, content can be securely accessed from PCs, laptops and iOS, Android and Windows®-based<sup>(2)</sup> smartphones and tablets.

With HP Flow CM Professional, growing organizations are able to:

- Use the cloud to centralize both paper and digital content, improving collaboration by sharing information and publishing documents with employees, customers, vendors and other partners.
- Rely on the same security that supports leading banks, legal firms, and stock exchanges—including encryption at rest, authentication and security management—allowing organizations to confidently send, store and retrieve valuable information. Encryption at rest helps ensure that sensitive business content remains safeguarded and encrypted when access controls such as user names and passwords fail.
- Get first-rate cloud storage and scalability without costly commitments, allowing organizations to manage their content without any additional software, hardware or IT infrastructure.
- Access content from a convenient online destination featuring a user-friendly interface and powerful search capabilities, from desktops, laptops, mobile devices, or select HP LaserJet Enterprise, HP LaserJet Pro and HP Officejet Pro devices.
- Enhance employee productivity by providing access to files and documents while at home, in the office or on the go via a web browser or by using the solution's mobile device app or mobile browser.
- Share files and folders across devices using the HP Flow Sync tool, which is integrated with HP Flow CM Professional to share new or updated content almost immediately.
