

Fact Sheet

HP ePrint Enterprise 2.2

HP ePrint Enterprise⁽¹⁾ 2.2 expands capabilities with several enhancements, including mobile printing integration with mobile device management security solutions. Good Technology, an HP partner with more than 3,800 customers globally, provides secure integration for mobile devices in the workplace by separating enterprise data from an employee's personal information.

The HP ePrint Enterprise for Good iOS app gives mobile users the ability to print from Good applications while allowing enterprise IT administrators the flexibility of security policies for a variety of mobile configurations. By integrating with Good Technology's mobile email and collaboration suite, Good for Enterprise, HP ePrint Enterprise allows mobile users to be more productive with access to print from secure workplace services like corporate email and other apps.

Updates include:

- Mobile printing from within Good for Enterprise is enabled with the HP ePrint Enterprise server and iOS smartphone and tablet app to allow employees at companies using Good Dynamics to print from corporate email and the Good suite of secured mobile apps.⁽²⁾
- Users connect to the HP ePrint Enterprise server by simply opening the HP ePrint Enterprise for Good iOS app; there is no need to connect over VPN, which speeds mobile workflows while remaining secure.
- Printed mobile data is encrypted end to end—on the device and in transit—with digital content never leaving the corporate firewall. Real-time policy control over corporate applications and data access is available to IT administrators with the integration with Good Dynamics, including the ability to remotely revoke or wipe data without disrupting the iOS device or personal data.
- HP ePrint Enterprise 2.2 helps IT administrators simplify the deployment and maintenance of ePrint Enterprise—for example, performing tasks like adding users or provisioning guests—by leveraging existing profiles of users or groups already defined on the given LDAP directory service model.
- HP makes it easy for customers to print from a wide variety of mobile devices to a wide variety of printers, both while at work and on the go with a global network of 30,000 HP Public Print Locations like FedEx Office, The UPS Stores and Hilton Hotels.

Availability

HP ePrint Enterprise 2.2 is currently available in English. The HP ePrint Enterprise for Good iOS app will be available in late summer 2013 in the following languages: English, French, German, Italian, Spanish, Brazilian Portuguese, Japanese, Korean and Chinese (Traditional and Simplified).

- (1) HP ePrint Enterprise requires HP ePrint Enterprise server software. App-based option requires Internet- and email-capable BlackBerry smartphone OS 4.5 or newer; iPhone® 3G or newer, iPad® and iPod Touch® (2nd gen) devices running iOS 4.2 or later; or Android® devices running version 2.1, 2.2, 2.3, with separately purchased wireless Internet service and the HP ePrint service app. Email-based option requires any email-capable device and authorized email address. Solution works with PCL5/6, PCL3, and PCL3GUI printers (HP and non-HP).
- (2) Requires license of Good for Enterprise and Good Dynamics
