

HP Live Photo

Create and share photos that magically come to life!

HP Live Photo is a free, fun and easy mobile app that lets you share glimpses of your life with your friends by creating photos that launch short personal videos. The app uses the magic of Augmented Reality, powered by Aurasma, to make your Live Photos spring to life. Use HP Live Photo to share special moments, create unique invitations and send personalized messages.

Key Features and Benefits:

- Compatible with iPhone® 3GS, 4, 4S, 5, iPod touch® (newest generation), and iPad® 2 or newer on iOS 6.0.
- Compatible with Android version 4.0.3 - 4.2.2 on the following devices: Samsung Galaxy® SII, SIII, S4, Galaxy Nexus and Note II.
- Get creative using our fun, themed templates.
- Your friends just need the image, your Nametag and the app to view!
- Pick videos up to 45 seconds long.
- Delivers the magical experience using Augmented Reality.
- Print on 4 inch x 6 inch and 5 inch x 7 inch photo size paper.
- Prints with Airprint-enabled printers on iOS and HP web-enabled printers via the HP ePrint app on Android.

Make a Live Photo

- Connect to Facebook through the HP Live Photo app (Optional on iOS).
- Choose a video from your Camera Roll.
- Select a still image from your video to be used as your photo.
- Select a creative template; print via AirPrint™ on iOS or via the HP ePrint app to your printer.
- Share it!

View Live Photos

- To identify an HP Live Photo, look for our HP Live Photo icon. 
- Find your friend's Nametag printed on the Live Photo and connect to them in the 'View' tab.
- Hover your phone over the photo while in the app's 'View' tab.
- Watch the photo come to life!

* Compatible with iOS: iPhone®, iPad® 2, and iPod touch® and Android. Periodic software upgrades may be needed - for more information, go to <http://www.hp.com/go/livephoto>. Use of the app requires Internet connection and may require Facebook account/registration. Separately purchased data plans or usage fees may apply. Recipient is required to have the app to view photos. Wireless performance is dependent upon physical environment and distance from access point. Printer must be Airprint-enabled or web-enabled. Android version may require download of the HP ePrint app to print. Print times and connection speeds may vary.

This is not a long-term video and photo storage solution. Please be sure to save images and videos using your own storage solutions. Your Live Photos will be visible for the duration of the program. HP reserves the right to discontinue the program at any time.

App will be available outside the US and Canada in select countries by Oct 1, 2013.
