

Executive Biography

Robert Taylor

Vice President, Outsourcing Solutions, Enterprise Services
Hewlett-Packard Company

Robert Taylor is vice president of Outsourcing Solutions for HP Enterprise Services. In this role, he is responsible for managing infrastructure foundation outsourcing, including data center facilities and networks as well as the portfolio strategy, value-chain effectiveness, service capability and solution development for data center, network and workplace offerings.

Most recently, Taylor was vice president of Data Center Services for HP Enterprise Services. HP Data Center Services creates, designs and deploys data center services offerings that deliver superior value for clients. Taylor drove best-in-class data center models and developed the next generation of standardized low-cost, high-value offerings.

Prior to this role, Taylor was the U.S. midwest region leader responsible for the delivery of Infrastructure and Business Process Services for Electronic Data Systems (EDS).

Taylor is a veteran in service delivery management. Prior to assuming responsibility for the midwest region, he was the client delivery executive on several large accounts. His responsibilities included the delivery of midrange, desktop, help desk, network, application development and other services to clients.

Before his career with EDS, Taylor implemented a data analysis application as part of General Motors' Cooperative Education Program. Taylor also has developed industry expertise in both the financial services and manufacturing industries through his varied work experiences.

Taylor has a bachelor's degree in computer science from the University of Missouri.
