

Executive Biography

Ted Ross

Director, Security Research, Enterprise Security Products
Hewlett-Packard Company

Ted Ross is director of Security Research within the Enterprise Security Products organization at HP. In this role, he is responsible for the Field Intelligence team—a team of senior security researchers and analysts.

Ross is an industry veteran with 24 years in the network and security industries. Prior to his current role at HP, he led the Office of Advanced Technology and led the global TippingPoint System Engineer team, where he helped grow the company from the ground up prior to its acquisition by 3Com and later HP.

Prior to TippingPoint, he worked as a strategic engineer for Extreme Networks with a focus on service provider technologies. Before Extreme Networks, Ross was a strategy architect for Wal-Mart and director of network engineering for West Corp. Ross started his career in the U.S. Air Force.
