

MPE/iX Fundamental Operating System (FOS) and HP database right-to-use licenses on the HP e3000 servers allow customers to use that software only on the system for which it was purchased. FOS and HP database software may not be transferred to other servers without prior written approval from Hewlett-Packard. Using MPE/iX¹ on original, upgraded, or modified hardware systems or a platform emulator running on a licensed HP product without the appropriate MPE/iX right-to-use license and/or software license upgrade from HP is prohibited.

1. MPE/iX is only licensed for use on valid HP e3000 hardware configurations or platform emulators running on a licensed HP product.
2. To use MPE/iX on HP e3000 hardware that has been upgraded or modified by any party other than HP authorized personnel, the appropriate MPE/iX license upgrade and authorization must be obtained from HP or HP authorized resellers. This authorization will only be given for systems adhering to an official HP e3000 upgrade path.

¹ "MPE/iX = FOS, IMAGE/SQL, and ALLBASE/SQL software products.
